CONFIRMATIONS

Executive nominations confirmed by the Senate October 27, 1981:

DEPARTMENT OF AGRICULTURE

Everett George Rank, Jr., of California, to be a Member of the Board of Directors of the Commodity Credit Corporation.

COMMODITY FUTURES TRADING COMMISSION

Susan Meredith Phillips, of Iowa, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1985.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSION OF REMARKS

HOW FAST WILL GAS PRICES RISE UNDER DECONTROL?

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. DANNEMEYER. Mr. Speaker, the decontrol of natural gas prices through the repeal or reform of the Natural Gas Policy Act of 1978 (NGPA) continues to be the most important energy issue facing the 97th Congress. It is, in fact, extremely regrettable that progress to date has been marginal either in Congress or within the policy circles of the administration. Natural gas decontrol will bring order to domestic markets through increased incentives for production and conservation.

According to Prof. Glenn Loury of the University of Michigan, decontrol would back out an eventual 2.83 million barrels of imported oil per day, reduce the price of a barrel of crude oil by $10 below what it would otherwise be absent natural gas decontrol, and produce an eventual increase in supply of 5.89 trillion cubic feet (TCF), which would amount to a 25 percent increase over current levels.

One of the key questions that has been raised about decontrol is the extent to which it would increase wellhead prices for natural gas and, in turn, to what extent these price increases at the wellhead would affect consumer gas bills. There is no doubt that natural gas prices would increase. However, the magnitude of the price increase remains a subject of considerable disagreement. The most outspoken opponents of decontrol have ventured forward with the prediction that prices would double in a very short period of time. Such claims cannot be taken lightly.

In its issue of August 8, 1981, the National Journal carried an excellent article in its policy forum section by Paul A. London, a Washington-based economist who is working for the decontrol of natural gas on behalf of oil marketers in the Northeast region of the country. Mr. London examines in considerable detail how the major actors in the natural gas marketplace are actually likely to behave in a deregulated environment. He sets out the market forces that will keep price increases below those projected by many decontrol opponents. He concludes that:

The conservation and production impacts of gas price increases resulting from gas price decontrol will create a price bargaining climate which has been ignored by many studies of this issue. Price increases will take place, but rising prices for natural gas are likely to have the same impact on gas markets that higher oil prices have had on oil markets. Higher prices will engender conservation, which will force distributors to drive hard bargains with producers.

And:

Although gas prices will certainly rise with decontrol and even under present law, there is good reason to believe that they will rise fairly gradually, and in a way which will encourage reduced oil imports and a measured acceleration of conservation and alternative energy investments.

Mr. Speaker, Mr. London's article brings home once more the need for immediate, total decontrol of natural gas prices as provided for by my bill, H.R. 2019, the Natural Gas Decontrol Act of 1981. I insert the full text of the article at this point in the RECORD:

HOW FAST WILL GAS PRICES RISE UNDER DECONTROL?

(By Paul A. London)

Most studies of the impact of natural gas price decontrol assume that the price of gas will rise to an oil equivalent within the first year. Several assume this equivalent price to be that of high sulfur residual oil. Others use very high projections of future oil prices and assume gas will "fly up" to these levels with decontrol. A few mention a lower gas price linked to coal in industrial markets. In a competitive energy market with interfuel competition, natural gas, which is now often 50 per cent less expensive than oil, in the long run will rise to a price closely related to that of other fuels. But the assumption that this substantial price rise will occur immediately after decontrol and cause severe adjustment problems, is questionable and unrealistic.

In part, the assumption that gas prices will rise immediately to an oil equivalent after decontrol is simply blind opposition to decontrol Energy Action, which claims to represent consumers, for example, assumes gas at the wellhead will rise to the price of oil at the burner tip, ignoring transportation costs. This allows Energy Action to add about $2 per thousand cubic feet (mcf) to the costs of decontrol, which no doubt serves its purposes. Similarly, the American Gas Association (AGA), a group composed principally of gas distribution and pipeline companies, bases its assumptions of a fly-up in gas prices on the existence of some gas contracts calling for heating oil (#2 oil) equivalence and/or Most-Favored Nation (MFN) treatment (a price equivalent to the highest price in the gas field) after deregulation. AGA is legitimately worried about the contract problem and, perhaps to increase pressure for a solution, chooses in its analysis to ignore the likelihood that deregulation would encourage and possibly require renegotiation of such contracts. AGA also fails to point out that many old gas contracts at 40 cents per mcf would be a strong "bargaining chip" in the hands of pipelines and distributors to encourage renegotiation of high-priced contracts after decontrol.

In another politically self-serving judgment, Energy Action assumes a jump in price from $1.80 mcf to $7.00 per mcf with decontrol, but no increased conservation as the price rises. Energy Action may believe that the use of higher prices to induce conservation is wrong in principle, but it should not ignore that this approach works. Finally, there is no recognition by opponents of decontrol like Energy Action and AGA that what is working now in the market for oil will work for gas too, and probably better because there is no organization like OPEC to put a floor under gas prices when consumer resistance starts to make them erode.

Another reason for the oversimplified assumption that gas prices will immediately jump to the level of oil is the inability of existing energy models to factor in all the bargaining variables. They can not easily capture the intricate bargaining relationships in energy markets, which have come into play with oil recently, and which will also come into play for gas once it is deregulated. These modeling problems, however, should not cause us to overlook the change in bargaining positions which will occur with decontrol, and its impact on prices. There is a good chance that price increases after full decontrol will be significantly slower than most people now assume. Market forces will ensure that even immediate decontrol will lead only to a gradual increase in gas prices over several years until a stable oil-gas-coal-alternatives price relationship is achieved. This prediction of a slow trajectory of gas price increases in based on a realistic view of the bargaining capacities of various actors once decontrol takes place.

WHO ARE THE ACTORS?

Prices after decontrol will be set by the interaction of a number of actors faced by supply and demand constraints. The price of gas will not simply be dictated by the price of oil. Bargaining will take place. Gas prices will rise but the actors in a price bargaining situation will play much different cards than are being played now. Various starting positions for the bargaining are clear.

Gas producers will seek to move prices up as high as possible and to produce as much as possible.

Various classes of present gas consumers, residential, commercial, industrial, and utility, will react to higher gas prices by conserving and making alternative investments. These same classes of oil consumers will have to decide whether to buy gas or stay with oil.

Various gas distributors and pipelines will be willing to pay different prices for gas supplies depending on the demands of their customers, their load mix, their competitiveness with other fuels, and their customers' ability to conserve in the face of higher prices, transportation costs, etc.

Public utility regulatory bodies will try to protect consumers by reviewing contracts to purchase gas.

Sellers of alternative fuels will have to adjust their prices to keep market shares and to compete with decontrolled gas.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

HOW WILL THE ACTORS BEHAVE WHEN GAS IS DECONTROLLED?

Producer Behavior: First, it is safe to assume that in a decontrolled market gas producers (freed of existing contract and regulatory restraints) will try to get the highest possible prices. The question is whether they can get oil equivalent prices immediately from pipelines, distribution companies, and ultimately from consumers. Second, we can safely assume that producers will increase production—by how much we do not know—to take advantage of decontrol. Under the Natural Gas Policy Act (NGPA) signed by President Carter in 1978, a real price increase of 12 percent to consumers and 24 percent to producers has led to a 3.1 percent increase in production.

Consumer Behavior: Another safe assumption is that any increase in natural gas prices will lead to increased conservation of gas by current users. An AGA study, which opposes deregulation, shows that based on experience since 1973 a 20 percent increase in natural gas prices to residential users could be expected to reduce residential usage by 6 percent on the average. If natural gas were to rise to the distillate heating oil price, which would mean a 100 percent increase for residential gas users, conservation levels, according to AGA, could easily be 30 percent. AGA thinks that conservation by industrial and commercial users will be less than the drop in usage by residential users, but it will still be substantial. Using AGA's own estimates, the decline in use by existing nonresidential customers in two years would reach 10 percent if gas prices approach those for oil. (This conservation level seems very low given the experience with oil price increases.) Total conservation by all gas customers, residential, commercial, utility, and industrial, in only two years (based on 1973-79 experience) would approach 2 TCF a year (equivalent to 1 million barrels of oil per day), doubling to 4 TCF in another few years. Moreover, AGA estimates on-shore gas supplies could increase by .3 to .7 TCF/year. With no significant price advantage over oil, however, where do customers for this gas come from?

This leads to the key issue. What would distribution companies agree to pay for decontrolled gas knowing from past experience that large price increases would lead to substantial conservation? AGA assumes distribution companies are powerless to bargain, a fairly good assumption if controls continue. With controls there always have been additional residential customers waiting to buy gas and distributors always have been willing to pay producers almost any price because they average in high prices with still-controlled gas. This explains the astronomic prices being paid for small amounts of decontrolled gas under present law. No real bargaining is taking place under current conditions. But if distributors have to charge consumers a delivered price near the price of oil after decontrol, few residential users will be tempted to convert to gas and consumption per existing gas household will drop rapidly. Distributors selling gas at the oil price to residential customers, therefore, will at best hold on to existing residential customers (but with lower volumes of sales) and compete with oil, electricity, and alternatives for new customers. Under these conditions, after decontrol, distributors will have to bargain as they have not done in years to remain competitive.

WHAT ABOUT INDUSTRIAL AND OTHER NONRESIDENTIAL CUSTOMERS?

Current industrial use of oil is about 8.1 quads/year or 4 million barrels a day. About half of this is for heat and half for raw material. This is enough potential demand for gas to absorb increased supplies from any source. But why are these oil users not using gas now when it is cheap and available? What new incentive will they have to switch to gas after decontrol when its price is expected to rise?

Clearly, conservation presents a bargaining opportunity to distributors. If distributors agree meekly with producers to pay prices equal to those for oil, more conservation gas will quickly be available for new users but there will be less price incentive to convert to gas. If gas rises to the oil price, consumers will not shift to gas. Therefore, distributors will have powerful arguments to persuade producers to keep price increases slow enough to encourage continued market expansion.

After all, why should a residential oil customer invest $600 to $2,000 in a gas system if he saves little or no money on gas over oil? Why should an industrial boiler fuel customer shift from oil to gas if there is no financial advantage in doing so? Will a utility want to use gas in 1990 if it is likely to cost much more than coal or some other alternative? Producers will have to yield to these realities so that distributors can sell gas to industrial users with the assurance that current priority and use restrictions will be a thing of the past, and that prices will be competitive. If the price "fly-up" is immediate distributors will not be able to develop the additional markets needed for conservation gas and increased production.

CAN PRODUCERS SHUT-IN GAS?

The theory advanced by AGA in its opposition to decontrol, is that producers faced with conservation due to higher gas prices will shut-in gas and produce less, and that distributors simply will pay the asking price of the producers. This is contrary to basic economic theory. It assumes that producers who were willing to sell gas for an average of $1.61 per mcf at the wellhead in December 1980, will shut-in deregulated gas at a higher price rather than accept something less than the price of oil from distributors for several years. This would be a possibility if producers and royalty owners could decide as a body to prorate production among themselves, each shutting in 20 per cent for example, to prevent conservation from forcing prices down. But even OPEC is unable to make such a cartel arrangement work when supply is adequate. It will never work in the U.S. market where no company produced more than 6.4 per cent of all gas in 1980, and where U.S. oil and gas companies clearly will prefer to sell U.S. gas which they own rather than imported oil, which they do not own. Moreover, U.S. law forbids collusion to prorate production in any case.

WILL NOT DISTRIBUTORS BE STUCK WITH UNMARKETABLE GAS?

AGA argues that with immediate decontrol pipelines and distributors will be forced to pay producers the oil price because of provisions in existing contracts, and then be stuck with gas they can not sell. This assumes that provisions in existing contracts will force higher prices even if the gas cannot be marketed. This flies in the face of economic logic even if the pricing and the take or pay provisions of existing contracts are not altered, as they should be, directly or indirectly by deregulation. Consumer resistance and conservation will force distributors and pipelines to make offers to producers which will allow the marketers to sell the gas, and producers will have to accept these offers. This means a natural gas price above the current price but not a price so high as to create an unmanageable conservation bulge of unmarketable gas.

WHAT ABOUT DIFFERENCES AMONG DISTRIBUTORS?

Decontrol will give some distributors and pipelines advantages they do not now have under controls. For example, a distribution company close to gas fields will be able to offer producers a higher price for gas (and still make it attractive for customers to shift from oil) than a company far from any gas fields. However, demand for gas near the fields is not limitless. Distributors near the fields certainly will not be able to bid away all the gas from distant customers, and they will face the same problem of what to do with conservation gas as prices rise. Moreover, any replacement of oil, coal or other fuels by gas near the gas fields will push down these prices, both in the U.S. and overseas, as oil and other marketers fight to keep their customers. This dampening impact on oil and alternative fuel prices is an important and overlooked advantage of gas decontrol.

THE ROLE OF PUBLIC UTILITY REGULATORY BODIES

Conservation and production increases engendered by higher gas prices will place a limit on how high gas prices will go after deregulation. Local public utility commissions (PUCs) can be expected to reinforce market forces in preventing gas prices from moving up precipitously. It is hard to believe, for example, the PUCs will allow local utilities to pay prices for gas supplies which would lead to unnecessarily high prices for local customers. PUCs will surely ask distribution companies about the impact of higher prices paid to producers on consumption and therefore on fixed pipeline charges. They will understand that if the local distribution company pays too much for gas it will find its system underutilized, and this will have the effect of raising costs to customers who remain on the system. PUCs acting to protect consumers, therefore, will discourage inept bargaining by distribution companies. If distribution companies and pipelines do not recognize that they can and should drive hard bargains in their dealings with producers, an unlikely blindspot, regulatory authorities will.

SELLERS OF ALTERNATIVE FUELS

There is recognition in some studies of decontrol that in some markets, particularly the utility market, gas may have to complete in price, not with oil, but with lower cost coal. It should be noted that in a deregulated market gas also will have to compete in price with conservation investments, insulation, hot water heat pumps, district heating and cogeneration, coal-mixes, wood pellets and biomass, solid waste, and perhaps other fuel alternatives. One Department of Energy study, for example, estimates that 300 cogenerating district heating plants using waste heat could back out up to 4 million barrels of imported oil a day, and create thousands of U.S. jobs. In many areas these projects now are unable to compete with a low priced gas alternative. Decontrol will put the shoe on the other foot. It will be gas which risks pricing itself out of some markets, before it can find new replacement markets.

The conservation and production impacts of gas price increases resulting from gas price decontrol will create a price bargaining climate which has been ignored by many of the studies of this issue. Price increases will take place, but rising prices for natural gas are likely to have the same impact on gas markets that higher oil prices have had on oil markets. Higher prices will engender conservation, which will force distributors to drive hard price bargains with producers.

Studies which ignore this likely scenario simply overlook market reaction to price increases. When they ignore conservation impacts they fly in the face of recent experience. If they assume that conservation gas will be marketed to current oil users even at a high price, they must suggest a reason for these current oil users to switch to gas and concede that oil imports will drop drastically when switching occurs. If they assume that gas production will drop because demand for gas will fall at higher prices, they are assuming that higher prices will lead to falling gas production, another hard case to make.

Although gas prices will certainly rise with decontrol and even under present law, there is good reason to believe that they will rise fairly gradually, and in a way which will encourage reduced oil imports and a measured acceleration of conservation and alternative energy investments.●

ENERGY AND THE WORLD BANK

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. BEDELL. Mr. Speaker, last week DICK OTTINGER and I cochaired a joint hearing on the U.S. posture toward helping developing nations meet their energy needs. Included among others on the witness list were Elliott Abrams, the Assistant Secretary of State for International Organizations, and Robert S. McNamara, the former president of the World Bank.

The Reagan administration stands alone in the world in its opposition to establishing an energy affiliate at the World Bank to make loans to developing nations that need financial help in solving their energy problems. One of the explanations offered by our Government is that we are opposing the creation of any new international structures. The State Department witnesses also cited the possible cost to the U.S. Treasury as a reason for resisting the proposal.

Fortunately, Mr. McNamara was present to set the record straight. He stated that creation of the energy affiliate at the World Bank would not involve creation of any new organization or bureaucracy, and probably would not necessitate the hiring of any additional personnel. The affiliate, he explained, would merely be a paper creation.

He stated further that the proposed energy affiliate need not neccessarily require any additional U.S. contribution to the World Bank. In fact, he noted that the World Bank actually is generating a positive cash flow on its loan portfolio.

In response to one of my questions, Mr. Abrams answered that the Reagan administration would oppose the energy affiliate even if its creation does not require a new bureaucracy and does not require any additional U.S. funding of the World Bank. This came as quite a revelation to those of us who have been following the debate.

Mr. Speaker, there is much that I can say about the error of this policy. The point that I wish to make today, though, is that the administration is misleading the American people by not truthfully debating the merits of the energy affiliate proposal.

The administration has been telling the public that it opposes this idea because, they say, it would create a new international bureaucracy and would cost us money. Yet in last week's hearing it became clear that these points may not be true and that they are not the real basis for our position anyway.

It is bad enough that this administration has chosen to pursue a solitary course in world affairs that is so clearly contrary to our national interests. But to attempt to deceive the American public as to the facts of the matter just compounds the error.●

COMMEMORATION OF CZECHOSLOVAK INDEPENDENCE DAY

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. NELLIGAN. Mr. Speaker, today marks the 63d anniversary of the founding of the Czechoslovak Republic on October 28, 1918. Under the leadership of Dr. Thomas Masaryk, the National Council of Czechoslovakia was recognized by France, Britain, and the United States as the legitimate representative of the new nation during the summer of 1918. Austria, which had dominated Czechoslovakia, collapsed on the night of October 27, 1918, and independence was declared by the National Council on October 28.

The Czechoslovak Declaration of Independence, which established the First Republic, was signed by Thomas Masaryk, who was the first President of the Republic, in Independence Hall in Philadelphia. The Constitution of the First Republic is also very close in structure to our own Constitution. The people's profound determination for independence and freedom was finally realized after two centuries of struggle and three centuries under Austrian domination.

But the hard-won freedom was short lived as the Nazis and then the Communists forcefully occupied Czechoslovakia. Today, Czechoslovakia is still under the repressive control of Soviet and Warsaw Pact forces. In spite of this, the people's spirit for self-determination and the refusal to surrender their freedom has not died.

I join with Americans of Czech and Slovak descent in the 11th District of Pennsylvania, which I am privileged to represent, in honoring and supporting the undying spirit and determination of those in Czechoslovakia to become a free and independent country.●

REMEMBERING OUR COLLEAGUE EARLE CABELL—FORMER CONGRESSMAN FROM THE FIFTH CONGRESSIONAL DISTRICT, DALLAS, TEX.

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. PICKLE. Mr. Speaker, the late Earle Cabell was a wise and good friend to many of us in the Congress. October 27, 1906, was his birth date and I would like to share with you a tribute given to him by A. C. Greene on Dallas television channel 13 at the time of his death in 1975. This editorial was originally brought to our attention by another great friend of ours, the late Tiger Teague.

In Tiger's introduction to the editorial he noted that Earle's coming to Congress restored dignity and respect to the Fifth District congressional seat he served. Tiger also noted that Dearie, his charming and devoted wife, was a great asset and assistant in his efforts to represent his district. Earle and Dearie made many friends in Washington and came to mean much personally to many of us.

Dearie is still active in her church and in Dallas civic and public affairs, as all of us would expect her to be. Though this tribute is for Earle, the two of them went through public life hand in hand and Dearie shared as a partner in all of his accomplishments.

EDITORIAL BY A. C. GREENE, CHANNEL 13 NEWSROOM, SEPTEMBER 24, 1975

Earle Cabell was Dallas to the core: but Dallas never understood him, even when pulling the lever on his behalf. He was a loner who did things because he felt like it, not to get votes—but he had something no Dallas politician today has enough of: charisma and conviction. If Cabell had started his political career a few years earlier and had been a younger man, he might be seriously mentioned for national nomination because he could have been of that level.

Earle Cabell may be the last Dallas politician who got into politics from family obligation. he took it as his burden. His grandfather, a Confederate general called Ol Tige Cabell, had become mayor of the frontier city almost before he got his bags unpacked when he moved here in the 70s. Earles

father Ben served eight years as county sheriff, then in 1900 became the first Dallas mayor to face such modern municipal problems as paving streets, laying sidewalks, getting a safe water supply, and franchising the transit system, and gas and electrical service.

But once into politics, Earle Cabell saw things the others failed to grasp. Beaten by Uncle Bob Thornton the first time he ran for mayor in 1959, Cabell made a surprisingly strong race against this legendary name from financial history. And Cabell discerned changes which were not, at that time, exactly blowing in the wind. He sensed popular dissatisfaction with the ruling establishment, and he became convinced the racial barriers would fall—and fall quickly.

Too old to march with them as a political career—or too old, perhaps, to create the inner zeal his perceptions called for—he nonetheless presided over the first steps Dallas took toward integration in the schools and among businesses—and named the first Negro George Allen—to a city commission since Reconstruction. Cabell even risked his political reputation by pushing hard, and unsuccessfully, for public housing at a time when federal money in Dallas, for anything but business subsidies, had a taint to it worse than adultery.

Earle Cabell wasn't particularly enlightened in philosophy: and he was far from being liberal the way his delightful wife Dearie was. But he was fair—not just cautiously in public—and he was brave in a social way. And in Dallas, that's the bravest kind of brave there is: to be something your friends and social peers tell you you mustn't be. Earle Cabell was a member of the Citizens Council—which he approved of—but he challenged its iron control of the city—which he didn't approve of. He was a businessman from a very conservative industry—dairying—but he refused to run on a business is best platform. Some of his peers—and friends—never forgave him for this disloyalty, and he bore to his death the hurt from their response.

He was, perhaps, a politician before his time—or a politician who arrived at success too late to take hold of what success seemed willing to grant him. It is ironic that he took on the two strongest conservative symbols in local politics—Thornton and Congressman Bruce Alger whom he annihilated—yet never gained the advantage this opposition should have given him: opponents continued to call him part of the oligarchy, while others refused to acknowledge he was different from Alger. But he was, and those who knew him and worked with him recognized that with a few years and a few circumstances, Earle Cabell almost certainly would have been the first 21st century politician of Texas.

Once in Congress, Cabell seemed to find political life disappointing. Washington came too late. His dreams and restless plans—two things that characterized Earle Cabell the businessman—had been carried beyond his reach by time—if not the times. Time, and the ancient lesson our bodies eventually teach all of us: the end is nearing. Rest in peace.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday October 27, 1981

● Mr. CORCORAN. Mr. Speaker, due to previous commitments in my district last Thursday, I was not able to be present and voting on several amendments and final passage of the farm bill. Had I been present, I would have voted in the following way on various issues of the day:

On the motion that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of H.R. 3603, the farm bill, "yea."

On an amendment offered by Mr. WALKER which sought to partially restore the purchase requirement to the food stamp program, "aye," (paired for).

On an amendment, as amended by a substitute—which I would have voted for and was paired for—that excludes meat from importation that has been produced using chemicals or drugs banned in the production of domestic meat, and places imported meat under the same inspection criteria as domestic meat, "aye," (paired for).

On an amendment offered by Mr. COLEMAN which sought to limit authorities in the bill to a 2-year period, rather than 4 years, "aye," (paired for).

On passage of S. 884, a similar Senate-passed bill, after it was amended to contain the language of the House bill as passed, "no," (paired against).●

REVISING SOCIAL SECURITY

HON. CLEVE BENEDICT

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. BENEDICT. Mr. Speaker, social security stirs more emotion, more conflicting opinion, and more controversy than perhaps any other issue of our day. Congress seems to be fearful of the political consequences of revising the system. The people meanwhile are genuinely concerned and confused. That is why I put together a questionnaire for my most recent newsletter asking the opinions of the Second District residents of West Virginia. I am pleased to report that over 1,200 individuals from the district have taken the time to give me their ideas and remedies for keeping the vital social security system solvent, and I would like to share some of the results with my colleagues.

As I reviewed the responses, two prevailing messages came through loud and clear. The first is that the people feel that a strong social security system must be maintained in order to protect the 36 million Americans who presently receive social security, some as their sole source of income. The respondents are very cautious of any changes affecting those presently receiving benefits or who might be receiving benefits in the near future. For instance, in a question asking whether the retirement age should be raised from 65 to 68, 75 percent of the respondents registered their opposition to the proposal, 21 percent were for it and 4 percent were undecided.

The second point brought out by those who responded is that the system must be preserved for future generations of Americans. However, to insure this will occur, a clear majority said that social security must once again become strictly a "retirement program", the original intent of President Franklin D. Roosevelt when he started the Federal Government's first safety net program. A resounding 79 percent of the respondents agreed with the statement that nonretirement programs added to the social security system over the years should be taken out of social security and placed into other categories, 14 percent disagreed, 7 percent were undecided. This is not to suggest that the respondents wanted to eliminate nonretirement programs like supplementary security income (SSI) or the disability income program, but only that these programs should be transferred to another part of the Federal system.

Another question, which called for greater accountability in the system by tightening the standards of eligibility for disability benefits, had almost equally strong support, with 77 percent replying they favor tighter standards, 19 percent against, and 4 percent undecided. Clearly, respondents are demanding a strong and effective social security program—one that is fiscally accountable and at the same time serves the needs of the recipients.

In addition, respondents clearly indicated that they wanted to remove the limit on outside earnings while collecting social security and were also for including Federal employees to pay into the Nation's largest safety net program, and exemption that is extremely unfair to the non-Federal worker who must support those who do not contribute to the program. By the way, I recently cosponsored H.R. 3657 which would require Members of Congress to pay into the social security system.

While a great deal of discussion and deliberation remains on this most important subject, one thing is certain: The Congress and the American people have to look at new and innovative ways to begin to deal with this problem and have the guts to implement creative and alternative systems

to save social security. At the same time, we must insure that those who have paid social security taxes and now rely upon those earned benefits for their very survival as well as those now working, will continue to have a solvent retirement fund for their future security. I would like to thank all those people who helped me by answering this questionnaire. Their input has proved invaluable to me as I deliberate with my fellow colleagues the future of the social security system.●

ROBERT V. DENNEY FEDERAL BUILDING AND COURTHOUSE

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. HOWARD. Mr. Speaker, today I am introducing a bill on behalf of the leadership of the House Committee on Public Works and Transportation and members of the 90th Club to name a Federal building in Lincoln, Nebr., after Robert V. Denney.

As you know, Mr. Speaker, Congressman Denney was first elected to the 90th Congress to represent Nebraska's First Congressional District. He was reelected in 1968 and was reelected in a primary to serve a third term. At that point, the President appointed him to the Federal bench, where he continued to serve until the time of his death this past June.

Those of us on the Public Works Committee that were privileged to have him with us on the committee came to know and respect him. He was a tireless worker who did his homework. We likewise know of his efforts to insure that the Lincoln Federal Building and Courthouse in Lincoln, Nebr., became a reality. It was truly fitting that in the latter days of his career in public service, he was able to preside as a Federal judge in the building he worked so hard to have constructed. I can think of no better tribute to a fine American who served his country in all three branches of the Federal Government—executive, as an FBI agent; legislative, as a Representative; and judicial, as a judge—than to name this building the "Robert V. Denney Federal Building and Courthouse."●

FULL SPEED AHEAD WITH THE TAX RATE CUT

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. GINGRICH. Mr. Speaker, there is talk on Capitol Hill and in the news media of rescinding or delaying President Reagan's tax rate cut for working Americans. It would be wrong, economically and politically, for the GOP to return to its orthodox ways. Surely we have learned by now that we cannot balance the budget by allowing taxes on already overtaxed working Americans to rise.

A constituent of mine, Frank Gregorsky of Douglasville, Ga., has written an article that reviews the political history of U.S. economics since Dwight Eisenhower. Regarding the notion that Congress should delay or rescind the tax rate cut, Gregorsky points out that:

If we junk the tax cuts and go back to chasing the will-of-the-wisp of a balanced budget attained by a never-ending increase in per capita tax burdens, we will have a sharp recession—which will push us even further from a balanced budget.

I commend this article to my colleagues and hope they will support the President on this issue.

The article follows:

REPUBLICAN ECONOMICS TIMES TWO

(By Frank Gregorsky)

The big story, according to the objectively biased Dan Rather, is that Reaganomics won't work. But the real story is that neo-Keynesian economics is bereft of followers.

NeoKeynesianism was born when sixties liberals took the worthwhile theories of John Maynard Keynes and turned them into a prescription for endless government growth. The height of this approach was during the administration of Richard Nixon. It was then that the neoKeynesians ruled the national Democratic Party, while the old ideas of Keynes—conservative Keynesianism—took up residence in the Republican Party.

Nixon as President deliberately ran budget deficits to hype the economy, even as he trimmed spending here and there. Shortly after the 1970 elections, in which a rising unemployment rate hurt Republican candidates, he announced, "I am a Keynesian." Nixon's opponents, basically the Democrats in Congress, went him one better, supporting all spending increases except those for the military and ignoring any concern about deficits.

The Republican establishment followed Keynes, after denouncing the English economist for decades, while the Democratic opposition sought to change Keynes into a hybrid of Karl Marx and Santa Claus. As these two spectacles competed for attention, followers of classical, or conservative, economics got no coverage. The national press usually portrayed the Nixon stance as the "conservative position." In relation to what the press thought of as centrist, it was. In relation to the traditional stance of the GOP, it wasn't.

Now, ten years later, the only people who will admit to being Keynesians of any type are in the American labor movement, which has as much influence in setting national priorities as New Deal historians have in designing our fiscal policy. Everyone is raving mad about budget deficits these days—quite a change when you consider how in 1971 the problems with deficits were laughed off even by a "conservative" Republican President. Now we have a genuine conservative in the White House, Ronald Reagan, and everyone—even liberals—are on his back about budget deficits.

It's a strange world. I would argue that the press is so used to covering liberals and Democrats, who ran this country for fifty years, that they've accidentally made liberals seem the real opposition to Reagan. In fact the liberals have enough residual authority to man the cannons, but they're filling them with non-liberal cannonballs. Having lost most of their credibility, the liberals and the Democrats have hitched themselves to Wall Street's wagon, and their general notoriety obscures the fact that they're not in the driver's seat.

The two competing views of the way the American economy works are not liberals v. Reagan. Instead the contest is between "supply-side economics" and traditional Republican economics. The former, as designed by the Reaganites, says: a balanced budget is a goal but not the highest one. Its attainment is merely the reflection of policies that promote sound money, economic growth, and rising employment. Aim for these policies via money supply restraint, spending and red tape cuts and the reduction of high marginal income tax rates, and the balanced budget will follow.

Traditional Republican economics says: Big budget deficits are only defensible in a time of severe economic contraction. Otherwise the key goal is the elimination of red ink. Tax cuts are justified as an emergency response to recession, but otherwise they heat up the economy and cut revenues needed to balance the government's books. The way to eliminate deficits is through spending cuts and tax increases. In this view of things a balanced budget prevents inflation and reassures the financial community, and both are more important than any philosophical commitment to low tax rates and full employment.

If we have to tie all these approaches to recent political figures, George McGovern represented the implied neoKeynesian belief that deficits didn't matter and government could never get too big; Richard Nixon embodied the idea that deficits were okay as long as they were less than those sought by the opposition; Ronald Reagan favors the supply-side approach of reducing both inflation and unemployment and simultaneously slowing money supply growth and reducing the government share of both the national income and total spending. As for traditional Republicanism, its presidential defenders were Dwight Eisenhower and Gerald Ford: both appeared to welcome recession as the only alternative to inflation, and both rejected broad-based tax reduction as being destructive of economic stability and balanced budgets.

In 1981, American liberals have adopted that old-line Republicanism, and it's not a pretty sight. Great progressives like Morris Udall join with conservative Wall Streeters in calling for a scrapping of the third year of the Reagan tax cuts. The Members of the Black Caucus become allies of people like Henry Kaufman and Felix Rohatyn. Got to get more dough into government coffers, says this team. In late July, House liberals argued for an alternative federal budget that would've been balanced this year—by a huge series of tax increases (bracket-creep, Social Security, windfall profits, and abolition of "loopholes") and only token spending cuts. Without exception, these liberals quoted Wall Street financiers as the source of their wisdom.

Can you believe it? Liberals who spent 50 years damning balanced budgets and the financial community now cling to both to avoid political eclipse. There's noting wrong

with that; it reminds us once more how much the world's second oldest profession has in common with the oldest. But don't get confused when asked to take a stand. In this race, the liberals have no legs. They're using the crutches of Wall Street. If you're like most observers of this economic tug-of-war, you'll choose either old-line Republicanism or the newer strand of supply-side Republicanism. When doing this, pinch yourself as you realize that the Republican coalition now includes every reasonable point of view on economics, as the Democrats scramble for a table in the rightward-most corner of the GOP tent.

The supply-siders have won the policy war, even though the traditionalist outlook is made highly visible by skeptical money men looking for a reason to disbelieve, congressional Democrats looking for a life preserver, and Dan Rather & Co. looking for an opposition to Reagan. No matter. Old-line Republicanism was given a fair shake under Eisenhower and Ford. It was better than what it replaced, because it moderated inflation and slowed the trend toward bigger government. But it failed to forestall recession. Because Ike and Jerry failed to make rise the tide that would lift all boats, they were ultimately replaced by a revived Democratic opposition that promised us the moon—only to bring meteorites crashing onto our fiscal landscape.

President Reagan, more than do some of his nervous allies, knows better than to let Wall Street and the Black Caucus make him the eighties equivalent of Herbert Hoover. If we junk the tax cuts and go back to chasing the will-of-the-wisp of a balanced budget attained by a never-ending increase in per capita tax burdens, we will have a sharp recession—which will push us even further from a balanced budget. At that point, both the broad public support and the philosophical substance needed for a successful Republican revival will evaporate. This can't be allowed to happen.●

REMEMBERING CATHERINE

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MORRISON. Mr. Speaker, for the record, I would like to indicate that a most distinguished former Member of the Congress is retiring after nearly 30 years of public service. Catherine May Bedell is remembered and respected by her colleagues and contemporaries. Her multitude of talents are exceeded only by her warmth as a person, and it is a special honor to have my life touch hers in both our home State of Washington and the Nation's Capital.

On this occasion of her retirement from the International Trade Commission, Catherine's son, James C. May, vice president of Public Affairs for the Grocery Manufacturers of America, penned the following tribute to his mother. It describes the service, the sacrifice, the love that is Catherine May Bedell so effectively that I ask that these words become a part of the CONGRESSIONAL RECORD for all to share.

REMEMBERING CATHERINE

Come the end of October, The Honorable Catherine May Bedell will end nearly thirty years of public service and retire from Washington, D.C. to Palm Desert, California. Her many friends and colleagues have, during this past month, honored her with kind words, memorials and tributes to her years of exemplary service. Every one of these fine testimonials will serve as a warm remembrance of her years in Washington, and each will give all who have had the privilege to know her yet another reason to be so very proud of the record their friend has established.

Each of us who know Catherine remember her for different reasons. Some were Congressional colleagues, others remember her as the first woman chairman of The International Trade Commission. Many remember her as a source of sound advice on often difficult decisions. For members of the Republican Women's Federal Forum, the National Federation of Republican Women and Executive Women in Government she was a leader, advisor and staunch supporter of women's rights. She has always been a respected voice for agriculture and as a Member of Congress built a still enviable record of support for the interests of the district she represented. Can any of us cite any current members who dictate the exact reasons why they voted as they did on every vote they cast? She did. So, while her many friends and constituents remember her for many different reasons, all remember her as a very special woman.

Yet none of her friends and associates can remember her as I do. A son will always have very special memories. A young boy, sleeping on a couch in the cloakroom at midnight, waiting for final adjournment and wondering whether it will come before Christmas. The late night calls from irate constituents who seem not to remember that there is a three hour time difference between Washington, D.C. and Yakima, Washington. A young man trying to act mature as he escorts his mother to a dinner or reception. The adjustment of moving from a small rural town in the West to an environment that included an occasional visit to the White House, of all things. The late nights my mother had to spend in session or the time away from home giving speeches or campaigning for reelection.

In later years the memories were of a different type. The pride I felt for a mother who was so obviously respected. The hurt and disappointment at her defeat for reelection. Imagine my surprise when as a young Marine lieutenant in Viet Nam my unit received a visit from a group of visiting dignitaries that included my mother! And my anger that they would allow her into an unsafe area.

Most of all, I remember Catherine as a loving, caring, compassionate mother and most of all friend. I remember a strong willed woman, with a heart as big as the Country she served. A woman who, no matter what the pressures of work, always had time for her family, always found time to listen to your troubles, always gave sound advice, and forever met the toughest of times with a warm and ready smile.

Finally, I will remember Catherine for the lessons she has taught me about living and working in Washington, D.C. Be straightforward, be honest, and never break your word for it is your reputation. Have the courage of your convictions, and never lose your ability to laugh.

Although these are ideals which may seem old-fashioned in our modern world, they are the foundation for the success of a most remarkable woman whose lessons I will always remember and of whom I will forever remain proud.●

CONGRESS MUST TAKE IMMEDIATE ACTION TO HALT THE GROWTH OF TERRORISM

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ASHBROOK. Mr. Speaker, this morning, I would like to call to the attention of my colleagues an excellent article by columnist M. Stanton Evans which appears in the October 31 edition of the national conservative weekly Human Events. Mr. Evans' article is particularly enlightening in the wake of last week's horrible event in New York which resulted in the murders of two police officers and a Brinks guard, allegedly by members of the terrorist Weather Underground.

Most Americans looked on in horror and disbelief when it became painfully apparent that the United States is not immune from terrorist acts of violence and lawlessness. I would hope that the events in New York and subsequent published reports about the continuing existence of terrorist groups in the United States would serve as compelling evidence to some of the doubting Thomases in Congress. There is a serious problem, and it is not going to go away simply because we pretend it is not there.

For years, our liberal friends have told us that we have no internal security problems in the United States and that those who see a need to police domestic radical organizations are only interested in witch hunts and in threatening the civil liberties of well-meaning dissidents whose only crime is being antiestablishment. I am afraid that it is a little bit more serious than that.

Mr. Evans correctly points out that intelligence files have been destroyed, the FBI has been handcuffed, congressional internal security committees have been abolished, the CIA has been crippled, and foreign intelligence gathering within the borders of the United States has been increased dramatically.

Mr. Speaker, it is clearly time that we in the Congress wake up to the grim reality we most certainly face. I would commend Mr. Evans' column to my colleagues.

WHY DO TALES OF TERRORISM GO UNHEEDED?

(By M. Stanton Evans)

Among its other unhappy consequences, the murder of Anwar Sadat reminds us that political terrorism is a grim reality of the age.

In the past year, President Reagan and the Pope have also been the targets of (for-

tunately unsuccessful) assassination attempts. Political bombings, kidnappings and other terrorist acts have become commonplace. The American hostages in Iran—and 600 other acts of violence against U.S. personnel abroad—are other vivid reminders of the problem.

Under the circumstances, one might suppose that U.S. authorities have taken steps to shore up our defenses against potential violence. The facts of the case, somewhat incredibly, are otherwise. Precisely as acts of terror and subversion have escalated, we have destroyed our defenses against them. As matters currently stand, we have little protection against political terrorists or would-be assassins.

Items:

In recent years, police intelligence files on potentially violent or subversive groups and individuals in major American cities have been locked up or destroyed, on the grounds that keeping such intelligence data, prior to the actual commission of a crime, is a violation of basic freedoms.

Simultaneously, the FBI has been subjected to restrictive guidelines which prevent it from planting agents in the ranks of potentially violent groups, or even keeping files of newspaper clippings concerning them, until a crime has been committed or is in the process of being committed.

As a result of these two policies, the flow of data to the Secret Service has been severely curtailed. The head of that agency has testified that the vast reduction in available information has severely affected its ability to protect the President. In a colloquy with Sen. Orrin Hatch (R.-Utah), Secret Service chief Stuart Knight explained the gravity of the situation:

"Hatch: Are there some cities in the United States that you might just recommend to the President that he not visit because of the inadequacy of available intelligence about violence-prone organizations?

"Knight: That is a possibility, Mr. Chairman.

"Hatch: Have you ever recommended that the President of the United States not visit certain cities?

"Knight: Yes, we have, but I prefer not to name the cities. I do not think that would be appropriate."

So topsy-turvy have the rules on internal security become that two FBI officials were convicted for authorizing surreptitious entry against relatives and friends of the bomb-happy (and Cuban-connected) Weather Underground. (Last week in New York a fugitive from this group, Kathy Boudin, was arrested after an armed robbery and bloody shoot-out with the police; subsequently, police discovered what they called a Weather Underground "bomb factory" across the river in New Jersey.) President Reagan pardoned the two officials earlier this year.

In an even less believable development, the head of the Civil Service Commission under Jimmy Carter testified that his agency considered it a violation of constitutional rights even to ask a prospective federal employee if he were a Communist. The colloquy between Sen. Strom Thurmond and this official, Alan Campbell, is instructive:

"Thurmond: Is it accurate that the Civil Service Commission some time ago, ruled that applicants for federal employment could not be asked whether they are or have been members of the Communist party or other organizations that are committed to the violent overthrow of the U.S. government. . . . ?

"Campbell: "Yes, it is true that we were advised by counsel that in relationship to the Privacy Act such questions were inappropriate."

While all this was going, liberals in Congress succeeded, by parliamentary sleight-of-hand, in abolishing both the House and Senate internal security committees, which kept tabs on such matters for the Congress. (A version of the Senate committee was reinstated this year.)

In the mid-70s, liberals in the Senate succeeded in eviscerating the CIA, while renegade agent Philip Agee and his collaborators made it their business to expose CIA operatives around the world and thereby disrupt its program.

While these efforts to cripple our internal security and intelligence services have gone forward, Soviet and Cuban intelligence services have stepped up the pace of their activities on American soil—aided by the great increase in the number of Communist U.N., diplomatic, "cultural exchange," and other personnel flooding into the country under the banner of detente.

There has been copious documentation concerning the efforts of the KGB and other Communist-bloc agents to wiretap our citizens, bribe members of our military, and otherwise siphon vital information from the United States. Add that problem to the chronic threat of terrorism and the recent siege of assassination attempts, and it should be apparent that the internal security danger is a real one.

It is long past time that we started rebuilding our defenses on this front—not to impinge on civil liberties, but to protect them. There is nothing libertarian in giving unchecked license to those who would inflict violence on others, or subvert our nation to a hostile foreign power.●

LIFT FEDERAL PAY CEILING

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. WOLF. Mr. Speaker, I would like to call to the attention of my colleagues an editorial which appeared in the September 14-15, 1981 edition of the Deseret News in Salt Lake City, Utah, titled, "Lift Federal Pay Ceiling." I ask that it be inserted at this point in the RECORD for the benefit and enlightenment of all who are concerned about the quality of management in our Government.

[From the Deseret News, Sept. 14-15, 1981]

LIFT FEDERAL PAY CEILING

This page has been vigorous in the past in protesting excessive pay raises for government officials. Now we must be just as vigorous in protesting a freeze on the $50,112-a-year salaries paid to top-level government executives.

That figure may seem high to many American workers who earn far less. But with inflation, it's becoming less and less competitive with salaries paid to comparable managers in private industry. The result is to drain competent people away from government service.

Then there's the morale problem. More and more subordinates of federal managers are catching up with their bosses in the pay scale. Most government workers soon will receive another increase of 4.8 percent.

What qualified executive would go to work for a private company or corporation if there was no prospect of a future pay raise, even to cover the higher cost of living? Or if subordinates to whom they give orders were receiving the same salary?

If Americans refuse to pay government executives a competitive salary, they're bound to pay in other ways: In incompetent public servants, in low morale, in bad judgment. We shouldn't make that mistake.●

OLDER AMERICANS: WATCHING AND WONDERING

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. DWYER. Mr. Speaker, I would like to share with my colleagues a recent letter I received from one of my constituents, a resident of Piscataway, N.J., who is vehemently opposed to the Reagan administration's proposals to cut social security. Her views, many of which mirror my own, offer a cogent description of the apprehension, resentment, and frustrations held by many of our older and working Americans as they view the turn of events in this administration.

DEAR CONGRESSMAN DWYER: I cannot believe that the President of the United States and his favorite economic adviser Stockman will prey upon the lives of the elderly and the deserved citizens of this great nation. I myself will be 60 years old shortly and have been working hard all my life; multiply me by the tens of thousands of Americans who have worked and are still working for our America and have paid our hard-earned money into what we all felt was a non-bankrupt, non-touch system, namely, the Social Security. This is not a give-away. We worked for it. If our Government has allowed it to be mismanaged, why should we suffer for it? Why don't we look at Europe? The elderly can retire at the age of 55 and their funds are intact, albeit, other factions of their government fail, they made sure to protect these funds, enabling them to retire in dignity such as all of us deserve.

I am sick at the fact that this President is cutting away at the poor. Why not touch the fat rich in Washington? You very well know of whom I speak: the true bureaucracy, not the poor people. Has he or any member of our esteemed government family ever gone shopping with wives and watch the elderly or the oppressed shop? Let me quote from our Public Employees Paper of this September.

A few days ago a newspaper took a look at President Reagan's Washington and reported that "signs of the new luxury are everywhere," noting expensive jewelry, $10,000 dresses, manicurists from Los Angeles and other signs of baronial diversion. The story told of the endless round of lavish entertainments such as "a lawn party for 300 at the $765,000 home of Raymond Donovan, Secretary of Labor."

Charles Z. Wick, a millionaire member of the President's inner circle, said he thought that economically pinched Americans enjoy viewing this parading of wealth much as

Americans who suffered in the Depression enjoyed watching Hollywood stars in the movies. "People selling apples * * * loved those glamour pictures showing people driving beautiful cars and women in beautiful gowns, showing that people were living the glamourous good life," Wick said.

As another member of the inner-circle, put it, "This is a fun administration."

Fun for whom? The wealthy, the untouchables, not the sick, the endless jobless people, the elderly, the migrant workers, the kids who go to bed hungry at night, and let me tell you there are plenty of them. Have they, the "fun" people, ever seen migrant workers' working conditions, the distressed lands of our country, the hovels some live in? Knowing all this, can we people sit by and tell this administration: go ahead fellows, take away our Social Security, our rights, the money we paid in, and go ahead and attack the elderly.

Mrs. Reagan is so concerned whether her $1,000 place settings (China) will be ready in time for her Christmas festivities. Imagine people donating for this kind of stuff, they say at a cost of approximately $209,000, when we have people in this country who don't even get enough food to put on a paper plate. Something is very wrong here. Remember, tell the people in Washington that the true Americans, and I am one of them, never begged for charity. My parents never took a dole during the Depression. We were proud people and I come from proud decent stock, but I'll be darned, I don't want this Administration to get on our backs and tell us now what you worked for we can and will take away.

Remember too, that I am speaking not for myself alone, but for my 91-year-old mother, the little old lady across the street crippled with arthritis, the little old man hobbling on a cane to pick up his meager groceries, praying to God along the way that they won't mug him. This is what the plight of the elderly is like today, and tell Stockman who said, and I quote, "the rich don't need food stamps or welfare." It is like the time when Marie Antoinette was told that the people were starving and had no bread, and she said let them eat cake. This character is one that I would love to meet eyeball to eyeball. I'd love to give him a tour of the America he has never seen or does not want to know about. How can he feel for the poor of this country and the oppressed? His stomach is always and I am sure always has been full. This person has never had to stretch his money and make ends meet; his philosophy and credo speak for itself.

Well this is my message to you: tell the people in Washington that this is a new generation of Americans. We know how to read, write and know our rights, and we want them to be executed by the people we put into power. Remember that the great majority helped make this country great, not the few millionaires who became so on the backs and the sweat of the little man.

Respectfully yours,

MRS. ANGELA DICORRADO.●

FAREWELL TO A FAITHFUL FRIEND AND EMPLOYEE

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. WON PAT. Mr. Speaker, whenever our Maker calls a spouse, a dear friend, or a relative from the ranks of the living it is a grievous occasion which can only be rationalized as an act of God. But when death calls a friend who is also an employee, it is difficult and painful to accept his passing in the prime of life as anything but a tragic loss. Greg Sablan, my lifelong friend, supporter, and for the four terms in which I have served as the Delegate from Guam, my trusted, dedicated district office staff assistant, was that kind of friend and employee. His call came suddenly and without warning at age 55.

As a youth of 20, he was a member of the Guam Combat Patrol, a civilian unit which aided the U.S. Marines in flushing out enemy stragglers from remote areas of our island. He had, with his family, endured 2½ years of hardship and deprivation under enemy occupation.

He served in various civilian and U.S. Navy jobs, mostly related to hospital work, until 1952, when he went to work for the Navy's Public Works Center. This was when Guam received its Organic Act from the U.S. Congress and set out to run its own affairs. In 1969, Mr. Sablan joined the local government's department of land management. In 1975, my second term in the Congress, he joined my district office staff.

On my visits home, he has been my constant companion, working with me from early morning until late at night. He has always been extremely patriotic and proud of his country's flag. He would mount a small American flag on my car whenever we were driving about the island. Of course, children would take the flag whenever the car was left unattended. But Greg was happy to replace it. It was his small but sincere way of expressing his pride in Americanism.

To his mother, Maria Sablan, his devoted wife, the former Francesca Quitugua, his sons, Lawrence and Anthony, and his 12 brothers and sisters, most of them residing in California and in the Washington, D.C., area, I extend my deepest sympathy.

On October 31, they will lay Greg Sablan to rest and I am sure there will always be a little American flag beside his grave. I will return to the House a little sadder, but sincere in my final tribute—"Greg Sablan's devotion to his country, to my office, and to the people of Guam will live on in the memory of those who knew and loved him."●

DOWN'S SYNDROME

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. SOLARZ. Mr. Speaker, I would like to take a moment to bring to the attention of my colleagues a life-threatening disease that, surprisingly enough, to date has not seen a major nationwide effort to investigate its prevention or cure. Formerly called mongolism, Down's syndrome is at present an incurable genetic disease characterized by mental retardation and a variety of physical handicaps and even poses severe life-threatening complications. Given the severity of Down's syndrome, it amazes me that so little is being done on the Federal level to prevent its occurrence or to develop effective biomedical treatments for the 250,000 Down's syndrome patients in the United States.

Recently, I introduced legislation, H.R. 4657, to create a national commission on Down's syndrome, that would begin to unravel the mysteries of this condition. My legislation would set up a national commission directed toward expanding and coordinating research, treatment, and remediation efforts on this genetic disease. The commission would be charged with advancing educational activities and training opportunities for professionals interested in exploring Down's syndrome, coordinating research, and disseminating information on this condition. Through its coordination efforts, publications, and hearings, the commission would work to improve the quality of life for individuals with Down's syndrome and their families. Most importantly, it would increase public awareness of Down's syndrome, and determine what more needs to be done.

While 12 of my colleagues have joined me in cosponsoring this important effort, some Members are concerned about the possible cost of such a Commission. In these days of budget austerity, let me assure you that this Commission is a modest one, modeled on the efforts of other commissions that past Congresses have wisely created to improve public health and well-being. According to my research, a budget of $2 million would enable the Commission to fully carryout its investigative, educational, and coordinating role. Furthermore, my legislation, if enacted, requires that all expenditures for staff and support services come directly from the Commission's appropriation instead of depending on other agency funds. In this way, the cost of this Commission is highly controllable and would, in fact, be substantially less than that of

other commissions funded through agency discretionary budgets.

While some might object to spending $2 million, let me say that an adult with Down's Syndrome, who needs to be institutionalized, costs society an estimated $30,000 per year. If this Commission would lead to only 70 out of more than 250,000 individuals with Down's Syndrome not having to spend 1 year in an institution, the Commission would have paid for itself. In addition, the lives of thousands of American families would be improved, if we come to understand more clearly what this disease is, and how to help those so afflicted to lead the fullest lives possible.

Mr. Speaker, present Federal efforts to find the causes and proper treatment models for Down's Syndrome have been piecemeal and fragmented. Responsibilities have been divided among a number of different agencies. The proposed Commission would, during its 15-month life, develop recommendations for a more cohesive package of programs and would provide an impetus for the coordination of both research and service. It would catalog research and treatment advances and develop a plan for more efficient use of Federal, State, and local resources in the future, that could save millions of dollars and enhance the lives of those afflicted with this condition.

Considering the fact that there are 600 persons with Down's syndrome in each of our congressional districts, I sincerely hope that other Members will join me in supporting this important and timely effort to launch a National Commission to investigate Down's syndrome, and to increase our understanding of this, the most prevalent form of organically based mental retardation.●

SISTERS OF MERCY CELEBRATING 150TH ANNIVERSARY

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. NELLIGAN. Mr. Speaker, throughout this year the Sisters of Mercy, the largest community of Roman Catholic Sisters in the United States, will be celebrating their 150th anniversary.

The order was founded 150 years ago in Dublin by Catherine McAuley, and their apostolate includes education, hospitals, and a variety of social programs.

To the Sisters of Mercy throughout the world, and particularly at College Misericordia and across the 11th Congressional District of Pennsylvania, I offer my congratulations for their past achievements and wish them continued success in their many humanitarian efforts.

I also owe a personal debt of gratitude to the Sisters of Mercy because they educated me in my elementary years.●

PROJECT TRUTH: USIA'S NEW PROGRAM, PART II

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MICHEL. Mr. Speaker, I have previously inserted into the RECORD part I of a new publication of the U.S. Information Agency (formerly USICA) entitled "Soviet Propaganda Alert." This publication, part of a new program, "Project Truth", begun by USIA at the direction of President Reagan, seeks to reveal Soviet disinformation efforts and to spread the truth about U.S. policy and objectives.

As I have said, this publication serves an excellent purpose since it makes us aware of Soviet propaganda devices. But I would also like to see USIA begin a similar publication which tells us in capsule form what the agency is doing to combat these Soviet themes.

At this point I wish to insert in the RECORD "Current Soviet External Propaganda Themes", "Global Themes: Military-Strategic" which is the first section of part II of the first issue of "Soviet Propaganda Alert" (October 15, 1981).

II. CURRENT SOVIET EXTERNAL PROPAGANDA THEMES

This list of current propaganda themes and variations is not exhaustive. Soviet propagandists adjust quickly to changing situations, developing variations on general and constant themes in the Soviet repertoire to suit the needs of the moment. Thus, a general theme (e.g.: "The U.S. is a threat to peace") can be refined to apply to an unlimited range of geographic and situational requirements.

The themes are organized according to their geographic concerns—global, regional, or country-specific—and within these categories according to whether they involve military-strategic matters or seek to contrast the Soviet Union with the United States.

A. GLOBAL THEMES: MILITARY-STRATEGIC

The aggressiveness of the U.S. as contrasted with the peace-loving nature of the USSR is one of the dominant themes of Soviet propaganda. It encompasses many sub-themes, some of which are discussed below.

According to Soviet propaganda, the U.S. is escalating the arms race, provoking conflict, and trying to counter every aspect of Soviet influence in the world in its efforts to regain the military-strategic superiority it once possessed. Aggressive behavior by the U.S. stems largely from its inability and/or unwillingness to adjust to the new "correlation of forces" in the world (the decline of the Western capitalism and the rise of socialism). U.S. frustration at no longer being "number one" is expressed in violence, directed primarily at its chief rival, the Soviet Union.

The USSR, on the other hand, has always been and continues to be dedicated to the struggle for peace. Its military might is intended only to defend itself and other peoples who want and deserve help in defending themselves. In recent months, the so-called Brezhnev "peace offensive" has been cited repeatedly as testimony to the peace-loving nature of Soviet policy.

While Soviet propaganda always presents U.S. military-strategic aggressiveness as a real and dangerous threat, it also indicates that U.S. actions will ultimately prove futile. For as Marxism-Leninism teaches, the capitalist/imperialist world is doomed, despite its desperate efforts to survive, and socialism—with the USSR its leading representative—is the future. Nonetheless, the forces of socialism cannot wait passively for the collapse of the capitalist world; they must actively counter its "last gasps" of harmful activity.

Subthemes

1. The U.S. seeks military superiority over the Soviet Union. The U.S. has lost the military preeminence in the world it enjoyed after World War II when only it possessed nuclear weapons. The U.S. wishes to regain its former position in order to blackmail the Soviet Union and its allies, to force its will upon other countries, and to resist forces of change and progress, especially in the Third World.

2. The U.S. is not seriously interested in arms control negotiations. The U.S. strives to create an international atmosphere which is counterproductive to arms talks, it has failed to respond to any of the sincere Soviet initiatives in the sphere of arms control, and it has blocked ongoing efforts such as the MBFR talks. Although the American failure to ratify SALT II is no longer a major emphasis, it is still regularly referred to in the context of more general criticisms of U.S. arms control behavior.

3. The U.S. is introducing sinister new weapons such as the neutron weapon, the Pershing II, the MX, chemical and biological weapons. In its drive to regain superiority, the U.S. is developing and deploying new weapons systems which endanger the alleged parity that Soviet propagandists maintain now exists between the two countries. The U.S. is willing to use any weapon, including chemical and biological devices which most other countries have outlawed. The U.S. is also developing the space shuttle mainly for military use and is working on killer satellites, particle-beam weapons, and laser applications.

4. The U.S. is forcing its allies to accept its weapons and to increase their own arms expenditures. The U.S. blackmails its allies into accepting the placement of weapons (e.g. Pershing II's). It allies resist because they recognize that the U.S. is trying to export a future war, that is, to ensure that it is not fought on U.S. soil. There is a growing split between the U.S. and its allies.

5. The U.S. seeks to forge an anti-Soviet alliance with such countries as China, Japan, Pakistan, and Turkey. The U.S. wants bases for its troops or the right to stockpile military supplies on the soil of other countries. The U.S. uses economic aid, military assistance, weapons sales, or simple blackmail to gain concessions.

6. The U.S. engages in psychological warfare against the Soviet Union. It spreads untruths about the USSR through its propa-

ganda activities—especially radio: VOA, RFE, and RL—and foments anti-Soviet hysteria and war mentality. These activities are in violation of basic international agreements such as CSCE.

7. The U.S. wages economic warfare against the USSR. The U.S. is trying to provoke a costly new round of the arms race that will strain, exhaust and ultimately destroy the Soviet economy. It also uses economic weapons such as the grain embargo to force the Soviet Union to accede to its will. Soviet propagandists always strongly emphasize that the Soviet economy will never be ruined by a forced arms race. Although the Soviet leadership would much prefer to use Soviet resources for improving the people's living conditions, the USSR is certainly capable of keeping pace with U.S. military strength and is determined to do this, even if sacrifices are necessary in other sectors of the economy.

8. The U.S. grossly interferes in the internal affairs of other countries. The U.S. seeks to manipulate the domestic political process of other countries, including its allies. It attempts to guarantee that these countries' domestic and foreign policies will be subordinate or at least complementary to its own. The U.S. is willing to use all methods to this end, including propaganda, blackmail, bribery, and assassination. In the case of countries that seek to free themselves of U.S. or colonial domination, the U.S. assists repressive regimes in putting these movements down or sponsors counterrevolutionary activities which will restore the status quo.

9. The U.S. faces vast resistance to its aggressive plans. The world public opposes the aggressive plans of the U.S. and its allies. Large-scale resistance is seen in almost all countries. Pacifism and neutralism are growing, especially in those countries most threatened by U.S. plans. Even within the U.S., there is a major split between the Government and the people over defense policy.

10. The U.S. and allies are responsible for international terrorism. The U.S., Israel and some of the NATO allies are behind terrorist activity in the world. There is a tradition of terrorism associated with right-wing extremists in the West and the U.S. is a violent, unstable society which spawns terrorist activity.

11. The CIA is behind much of the unrest in the world. In its efforts to carry out its policies, the U.S. resorts to all available means. Along with military, economic, and psychological weapons, the U.S. employs the CIA to subvert other countries and to bring their policies in line with its own. It attempts to control other governments through its agents or to destabilize those countries it cannot control. The CIA has unlimited funds and will employ any means to achieve its ends.

12. The Soviet Union seeks only peace and detente. Soviet policy is peace-loving and defense. The USSR has often sought to reach agreement with the U.S. and its allies to reduce tensions, disarm, and engage in peaceful economic and social intercourse. The Soviet Union respects the independence and sovereignty of other countries and does not interfere in their internal affairs. The world public recognizes and appreciates this policy, and regards the Soviet Union as the greatest force for peace on the planet.

13. The Soviet Union arms only to defend itself and its allies. The USSR is forced to respond to U.S. and Western threats by building its own forces. These forces are purely defensive, but can be used to defend the gains of socialism and national liberation movements such as in Afghanistan.

14. The U.S. cannot succeed in gaining military superiority. The Soviet people are willing to make whatever sacrifices are necessary to provide adequate defenses. In spite of the U.S.'s superior resources, it will never be allowed to regain military superiority.●

NEW MEDICARE NUMBERS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. PICKLE. Mr. Speaker, recent stories which have appeared in the press are discomforting even to those of us who have steadily urged decisive action to handle the problems facing social security. Based on actual expenditures under the medicare program for fiscal year 1981, the actuaries report that under the Senate-passed social security bill, the medicare fund will be reduced from a 7-percent reserve to a 4-percent reserve in 1984, and to a negative reserve in 1985.

More importantly, this small and normally insignificant 3 percent change in the medicare cost figures pulls the overall combined social security reserve levels below that necessary to pay benefits 2 years earlier than before even under intermediate or rosie projections. There is no longer any question of whether we can make it through the decade with interfund borrowing or some other patchwork procedure. We cannot.

Mr. Speaker, we are playing with fire here and we are all going to be burned. The decisions will only get more difficult because adequate lead time is all important in social security changes of any stripe. We all are hesitant to tackle this issue in the current climate. But we cannot escape it—and it is looking more and more like we cannot escape it before 1983.

I call once again on the leadership of this Congress to allow us to go forward now to try to address the problems we face in social security.●

THE REAGAN ADMINISTRATION'S ASSESSMENT OF THE MULTILATERAL DEVELOPMENT BANKS

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. PATTERSON. Mr. Speaker, the Reagan administration recently completed a major study reassessing the purposes and effectiveness of continued U.S. participation in the World Bank and the other multilateral development banks. As we all know, the new administration entered into that assessment with a healthy dose of skepticism about the MDB program. Therefore, I think it is particularly significant that the administration has presented Congress with a study which underscores the important role these international agencies play in our country's foreign policy and our foreign economic policy. The study identifies a number of areas where the multilateral agencies need to improve their operations and strengthen their programs. On the whole, though, it shows the multilateral banks are well run and effective institutions and the United States needs to keep its influential voice in their operations.

In the coming weeks, I think many of us in Congress are going to have to take a careful look at the administration's assessment. I think it is right in saying the multilateral banks should put stronger conditions on countries' access to their aid. I also think it is correct in saying the level of U.S. contributions for the MDB program should not increase any more, in real terms, in the coming years. Everybody is not going to agree, though, with all its conclusions or all its recommendations. Some will want more emphasis on this or less emphasis on that. But I think there is the basis in its findings and conclusions for a broad new bipartisan consensus supporting continued U.S. participation in the multilateral agencies.

I would like to put in the CONGRESSIONAL RECORD, at this point, an article by my friend TOM EVANS of Delaware, as it appeared in last Thursday's Philadelphia Enquirer. As my colleague points out, President Reagan's trip to the North-South summit meeting in Cancun, Mexico, emphasizes—as nothing else could—the value of these multilateral agencies to the United States. With all this talk about "Global Negotiations" and a "New International Economic Order," it is gratifying to realize there are institutions like the mulitlateral banks where the United States and the other developed countries still have a majority voice in the decision process. Perhaps now, more than ever, we need to take a hardnosed look at maintaining our role in these international organizations in order to have the right kind of forum for these coming discussions.

A MESSAGE FOR CANCUN

One of the central themes of the Cancun Conference will be United States' participation in the multilateral development banks—the World Bank and the three regional development banks.

Traditionally our foreign aid programs have been based largely on achieving humanitarian goals. Today, there are many pragmatic reasons to continue these programs. All of them stem from our interdependence with the Third World. The United States is critically dependent on developing countries for a whole range of strategic raw materials that are vital to our economy.

As the Department of Treasury recently reaffirmed, the World Bank and the region-

al development banks are the most effective form of development assistance yet designed. With some fine tuning to reflect more closely United States policy preferences, the Reagan administration could and should give the multilateral development banks the full weight of its support.

We simply cannot neglect the Third World if we are to serve our own interests. The explosive population growth in developing countries means that the world population will increase by two billion before the end of the century. Without cooperative attempts to greatly expand food production, widespread starvation will result in many parts of the world. This specter is something from which no developed country can insulate itself.

That these multilateral development institutions are the most effective vehicle for promoting economic development should now be quite clear. While this administration began its term with a healthy degree of skepticism regarding these institutions, a recent Department of Treasury draft report demonstrates once again that the multilateral development banks serve the interests of both North and South.

One of the conclusions in the Treasury Department's assessment deserves particular emphasis. The World Bank and the regional development banks are an extremely cost-effective means of supporting development, when compared to bilateral foreign assistance.

President Reagan gave the World Bank and its sister institutions a rhetorical pat on the back at last month's World Bank-IMF meeting, but it was clear from his statement that the central thrust of this administration's strategy for development is reliance on the private sector.

I agree with President Reagan on the importance of private sector development and on the need for free and open markets. But, practically speaking, that will not occur in most Third World countries without public sector involvement.

The missing ingredients is the existence of a sound economic and physical infrastructure. Without water and sewers, a country like Haiti cannot hope to develop a tourist industry. Without a functioning railway from Port Sudan to Khartoum, the Sudan cannot effectively develop its vast agricultural potential.

The private sector has traditionally left the construction of roads, dams, sewers, port facilities and the like to the public sector. Similarly, investments in human capital such as disease eradication, vocational education and training have typically been accomplished at least in partnership with the public sector.

Government participation in these efforts in the Third World is even more critical. In most poverty stricken Third World countries there is little hope of either private capital formation or government revenues sufficient to permit the developing country to finance its own infrastructure development.

As the Treasury report concludes, the multilateral development banks are ideally designed to finance and oversee the construction of those infrastructure-type projects which provide the foundation on which developing countries can build.

The President has reminded developing countries that the United States developed from a barren frontier to the world's foremost economic power with only the occasional infusion of foreign capital. While true, it must be remembered that there are many differences between the world of today and that faced by the emerging United States.

We were blessed by a favorable combination of bountiful resources, cheap energy, a hospitable climate, virtually unlimited markets and two wide oceans to afford us decades of safety from foreign influences. No developing country today faces such happy circumstances.

Even if conditions were perfect for economic growth in developing countries, we could not afford to wait for long-term, incremental development to catch hold in the Third World the way it did in the United States. Pressures from growing populations, social unrest, rising expectations and increasing economic deprivation have combined to give developing countries and their beleagured leaders little time to find solutions.

The United States created considerable anxiety at the recent World Bank-IMF meeting when the administration unveiled its tougher stand on multilateral lending. Whether intended or not, the message received by most foreign delegates was that America was beginning its withdrawal from the same institutions created decades ago at American insistence.

The message we should be sending is that we understand the value of the World Bank and the regional development banks to the countries of both the South and the North.

In today's political atmosphere, there is less support for this type of assistance than at any time since World War II. And yet, there have been few times in our history when it has been more important. President Reagan has a marvelous opportunity for leadership on this issue. We should all hope he takes that opportunity.●

TITLE XVI OF SOCIAL SECURITY ACT

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ASPIN. Mr. Speaker, I am introducing legislation to amend title XVI of the Social Security Act.

The bill is meant to cure a discrepancy between the appeal process under title XVI, supplemental security income, and title II, old age, survivors, and disability insurance.

Under the current law, no provision is made for the award of attorney fees in supplemental security (SSI) appeals. The payment of fees is left as a matter between attorney and client. Consequently, attorneys are reluctant to take SSI disability appeals, robbing many potential claimants of the chance to get benefits due them.

This bill, therefore, is to change those provisions of title XVI to allow the award of attorney fees on the same basis as under title II.

The only argument I can find against this change is that SSI is meant for the poor who really need the back benefits they would win in court. This argument is specious. First, by discouraging attorneys from taking cases, we are preventing many people from having their day in court and getting any back benefits. Second, there is an implicit suggestion that it is all right for SSI recipients to run away from their debts to their attorneys. As a corollary, there is an implicit threat that attorneys for successful claimants who do not pay their fees will tie the SSI recipients up in court with even greater eventual cost to the SSI recipient.

The law already provides protection for SSI claimants against unscrupulous attorneys. As in the case of social security recipients, the judge in the case must review and approve attorney's fees. The only change my bill provides is that the judge may direct that the attorney be paid directly from the award of back benefits, as is now the case with social security awards.●

THE PROMOTION OF OUTDOOR ETHICS

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. SAWYER. Mr. Speaker, the 20th century has seen in this country the birth of the movement to conserve first America's, and now the world's environment: The land, the water, the air, and, thus, all life on the planet. This movement seeks the wise and careful use of all our natural resources, and it is interesting to note that the genesis of the idea came from the concern of hunters and fishermen, especially in the 1920's to preserve and protect fish and game populations for future generations.

The twenties saw groups of sportsmen band together to begin, among other efforts, the promotion of ethical behavior and conservation of the outdoors. These ethics included, of course, payment of license fees, limiting the kill of fish and game, and observing season dates and land and water use restrictions.

The protection of our natural resources by hunters and fishermen went far beyond merely trying to conserve fish and game animals for self-serving purposes. Sportsmen long ago established a tradition that conservation also meant planting trees, cleaning up litter, courtesy to fellow outdoorsmen, promoting recreational safety on land and water, halting pollution, and frequently giving up personal time and money to work in the wilderness and the cities and in the legislatures and the courts to protect our environmental heritage. Simply put, hunters and fishermen began the idea that ethics and sportsmanship means disturbing the environment as little as possible and conserving natural resources as much as possible.

I would like to point out that, according to the 1980 Statistical Abstract of the United States, last year 32.6 million people went hunting, 51.8 million went camping, 91 million fished, and 103.3 million people enjoyed one or more forms of recreational boating. This represents an incredible increase in the use of our natural resources, surely one which the sportsmen of the early part of the century would never have anticipated. The question inevitably arises, are outdoor ethics, and thus the environment, in jeopardy from the influx of millions of eager, new recreationists each year?

Since our resources are so finite, the concern is a very real one, but I am pleased to report that good sportsmanship and ethical outdoor behavior are currently undergoing a popular rebirth. The environmental movement of the sixties and early seventies lead not only to a greater use of America's outdoor wealth, but also to a greater understanding of and concern for how fragile the environment is. The environmental movement made everyone aware that we are individually responsible for the proper use of our woods, waters, and wildlife.

In 1980, a dozen or so conservation organizations experimented by holding the first national conference on outdoor ethics. I would like to share some excerpts from a speech by my friend, Jack Lorenz, the executive director of the Izaak Walton League of America. Jack made this speech on the results of the conference last June 15, in Louisville, Ky., before the Outdoor Writers Association of America:

Last year, the Izaak Walton League cosponsored the first National Conference on Outdoor Ethics. We were joined by the International Association of Fish and Wildlife Agencies and the J. N. "Ding" Darling Foundation. Dan Saults represented OWAA [Izaak Walton], played a strong role in the Conference and reported on it in Outdoors Unlimited. Ducks Unlimited, the NRA [National Rifle Association], Trout Unlimited, the Boy Scouts, the National Wildlife Federation, 4-H, the National Shooting Sports Foundation and many federal and state agencies were in attendance.

We spent three days talking about outdoor behavior, identifying problems and opportunities and suggesting guidelines and solutions. Only now can we fully appreciate what that meeting meant. Since the National Conference we have seen increasing interest at the State level with similar events in Iowa, South Carolina, Wisconsin, Minnesota, Virginia and other States. Sportsmen conservationists are talking to each other about how they themselves act and how they can set a good example for others. That's exciting news.

The [Outdoor Writers Association of America] League is serving as a National Clearinghouse and Information Center on Outdoor Ethics. Interest is growing so rapidly that we will have to add additional staff to meet the demands. That will take money, so we are actively looking for sponsorship of the program that will include a second conference next year to fully analyze the products of the 1980 meeting. The North American Association of Hunter Safety Coordinators has expressed an interest in tying the Second Conference in with theirs. Hunter responsibility was a major topic at the North American Association's 1981 meeting in Denver. Red Hasay of Edmonton, Alberta, the current President of the North American, took part in the 1980 National Ethics Conference.

The Army Engineers took part in the Ethics Conference and as a result, the Corps is producing a new film on User Conflicts on Corps Reservoirs. It should be ready for release in November or December of this year.

And States like Missouri and Pennsylvania with their S.P.O.R.T. programs, Virginia and North Carolina with Operation RESPECT, New Mexico, Colorado and other Western States with Operation Game Thief. Those are but a few.

The International Association meeting here in Louisville last September urged all member agencies to enhance their on-going ethics programs or start them up. Fish and Wildlife agency regional meetings have moved Outdoor Ethics higher up on their agendas.

Ducks Unlimited's International Waterfowl Symposium covered hunter ethics. Chester McConnell of the Wildlife Management Institute is doing some terrific things on sportsman behavior. Outdoor Ethics is on a roll.

I would like to talk about hunting for a minute. At every ethics conference I have attended, hunting ethics receives the most discussion time. That's no surprise to anyone here. Many sportsmen feel hunting may be in for its most difficult period over the next two decades. Their reasons are:

The urbanization of America;

The increasingly smaller percentage of hunters in the total U.S. population;

The growing political sophistication and funding of the anti-hunting, animal rights and anti-gun movements;

The continuing loss of habitat;

The increasing use of high-tech gadgets in the field;

Deteriorating hunter-landowner relations;

The illegal actions of far too many hunters;

Opposition and ridicule by the media and popular public figures;

Erosion of State management authority;

Abuse of subsistence hunting rights;

Lack of funding for State agencies; and

A largely ineffective game law judicial enforcement process and primarily a poor job of public relations and education.

I believe that these conditions are backing hunters into an increasingly narrow corner—a corner from which we may not extract ourselves without a revival of the spirit of sportsmanship shown in the 1920's.

In recent years there have been hundreds of research papers presented on the hunter, hunting, and the public's view of hunters and hunting. An analysis of those papers tells me that the conditions I just mentioned are indeed having a marked effect on public attitudes.

When boiled down the surveys reveal that:

The majority of the public obtains its knowledge of animals from watching television;

The younger generation is increasingly more preservation-minded and some students believe that life for a wild animal involves no struggle for survival;

Student objections to hunting also included hunting as sport, overkill, cruelty and unfair chase;

A high percentage of non-hunters grew up in cities and far more people with anti-hunting views reside in urban rather than rural areas;

Many people feel hunters require little skill or knowledge to get a hunting license;

Most hunters are poor joiners of sports and conservation groups, and

Of the negative views, more were directed at the hunter rather than hunting.

Landowners say property damage and a lack of courtesy, rather than safety, are the main problems with hunting today. All in all, the surveys and papers studied show that public descriptive opinions of hunters have tended to be negative since the 1960's.

There are also some good signs from the researchers and some very positive programs under way to improve hunter behavior, the quality of hunting and public education.

The researchers' findings show that specific, well-targeted education programs can change attitudes in favor of consumptive use.

Studies of hunter attitudes show such things as:

Urban hunters express the greatest concern with unethical hunting practices;

Many hunters express a willingness to report violations;

Many hunters are willing to curtail their activity and increase their own costs to benefit the resources and improve the quality of their experience.

Studies of the non-hunting public show that:

While most are not active supporters of hunting, they are also not anti-hunting and most agree that hunting should continue as a management tool;

Wildlife is better off with animal population controls;

Illegal killing should draw stiffer fines.

There is a great deal of new activity promoting hunter ethics. Possibly no organization has or is doing more to improve hunter behavior and change public attitudes than is the National Shooting Sports Foundation. The work of the Foundation is a model for all of us interested in preserving quality hunting.

After more than five years of studying the subject of sportsman behavior I have become convinced that improving the *image* of the hunter, angler, canoeist or other recreationist depends first on improving the behavior of the individual. To do that we must try and recapture the evangelistic spirit of men like Zane Grey and Hammond Brown. We must realize that the political and legal institutions of this country are demonstrably inadequate to regulate behavior in the field; that will continue to depend, as it always has, on what behavior we expect of ourselves.

I come reluctantly, but inevitably to the conclusion that the day has passed when ethics could be treated as a merely personal matter, an unwritten contract between a man and his conscience, and not the proper business of anyone else. The time has come when the contract must be enlarged and renewed, when we must assume our share of responsibility for the code of our hunting and fishing group and the ethical behavior of our friends and readers, when we must admit that whenever we remain silent about slob behavior in others we become slobs ourselves.

Writing or talking about ethics is not sexy. It is tougher than the story about a new hot spot for bass or a secret for taking big mulies. But we can fine tune those arti-

cles to put added emphasis on the ethics of the chase. We can search out more stories about the personal satisfaction a sportsman gets out of helping a farmer or planting for wildlife, or teaching kids how to fish.

Most of all we can catch a little of that old time spirit and pass it on to our readers.

We can't leave outdoor ethics and the future of outdoor recreation up to the State, the Fish and Game Commission, the wardens or the law. Sportsmanship can't be legislated, but it can be marketed. One on one, writer to writer, hunter to hunter, angler to angler, outdoor ethics is an exciting product. As Ham Brown said, all it needs is personal example and the example of publicity.

It is our challenge, our responsibility and our opportunity to write and talk about outdoor America in a way that makes every camper, every canoeist, every fisherman, every hunter and every birdwatcher leave the forest and stream with as much self-respect as when he went in.

Thank you for asking me to be with you today.

The subject of outdoor ethics is an important one: It affects millions of people and involves billions of dollars annually. The movement to promote ethics is being felt in every congressional district. Individuals, families, private clubs and groups, public agencies, even concerned businesses are joining the efforts to sponsor greater public awareness of the fundamental issue of using all our natural resources wisely and fairly. I urge all my colleagues to actively support the promotion of outdoor ethics at home and in Congress. If my colleagues are interested in more information on the subject and how we as legislators can help, they should contact Jack Lorenz at 1800 N. Kent Street, Arlington, Va. 22209.●

THE APPALLING USE OF PLASTIC BULLETS IN NORTHERN IRELAND

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. OTTINGER. Mr. Speaker, as a member of the Ad Hoc Congressional Committee for Irish Affairs, I rise to call to the attention of my colleagues testimony from a recent hearing held by this committee on the use of plastic bullets by British soldiers and the Royal Ulster Constabulary (RUC) in Northern Ireland. Testifying at this important hearing were two officials from Nassau County, N.Y.: District Attorney Denis Dillon, and Town Councilman Peter King. Both were members of a five-member international panel sent to Northern Ireland by the International Association for Legal Justice to investigate the matter of plastic bullets. Their testimony both saddened and appalled me.

A new chapter of horror is now being added to the tragic story of Northern Ireland. This is the increased use of plastic bullets by the British Army and the RUC. These bullets are allegedly used only as a last resort. Yet in this past year, dozens of people have been severely injured and seven people have died, including five children under the age of 15, from the use of these bullets. These lethal weapons are simply not being used as a last resort—they are being used as a matter of course.

The international panel upon which D. A. Dillon and Councilman King served noted:

> There appears to have been * * * widespread indiscriminate shooting by plastic bullets of people not involved in riots, which, in view of the total lack of official response to complaints, we can only assume to be placidly tolerated by the authorities.

I urge my colleagues in Congress to join me in refusing to let this appalling barbarity be placidly tolerated by British officials. We in Congress should strongly protest the immoral atrocities which have become a tragic part of daily living for the northern Irish.●

FEDERAL RESERVE BOARD CONTROVERSY CONTINUES

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. IRELAND. Mr. Speaker, the activities of the Federal Reserve Board as they relate to our problems with inflation and high interest rates have caused some degree of controversy recently.

I feel that the debate, often heated, would benefit from some of the thoughts recently expressed by a pair of editorials in the Florida Times-Union, the first on October 7, the latest on October 14.

The central wisdom expressed in these editorials is a point I have been trying to make for some time: The problems we are now addressing did not appear overnight, and they cannot be cured overnight.

Consequently, it is both logic and political courage to stick to our guns, and not tinker with policies designed to work for a long-range, genuine solution to inflation and high interest rates, until we have given those policies a fair chance to work.

Most particularly, the editorials point out why the independence of the Fed must be preserved, if we are to have institutions capable of withstanding the pressures of the moment for the advantages of the future.

With that, Mr. Speaker, I am pleased to present for the RECORD the recent editorials of the Florida Times-Union:

[By the Florida Times-Union, October 7, 1981]

DO NOT CHANGE FED POLICY AS IT STARTS TO GET RESULTS

Last year it was foot-long two-by-fours and this year it is keys, mailed in a flood to Federal Reserve Board Chairman Paul Volcker.

The key campaign now beginning ("keys to the house you can't afford to buy, the car you can't purchase") is part of a nationwide lobbying effort by three trade associations (home builders, realtors and automobile dealers) totaling nearly 850,000 members.

But don't expect the keys to work—any more than the two-by-fours did. Paul Volcker has the courage of his convictions' he can because, basically, his convictions are correct.

In the past, every time tight credit really started hurting, the Fed would relent and loosen the controls. As a result, at just about the time the tight money policy was starting to work, it was abandoned. And the nation was soon right back in the economic mess it was trying to escape.

This time, unlike the past, the Fed is holding firm to its guidelines.

Importantly, it has now held to them long enough that its policy is beginning to show results; therefore, there can now be some liberalization while—and this is the vital consideration—still holding to the goal.

Already the prime rate has dropped three times in just over a month, to 19 percent, and the consensus is that further declines (note the plural—the trend seems clear) will come in future months.

It seems, in short, that at long last the Fed is doing the job of taking the slack out of the nation's money supply, which should have been done years ago.

Certainly it has been a painful process. Any economy as sick as ours is bound to hurt in the process of getting well again. And the pain brings cries of anguish, such as the avalanche of two-by-fours or keys—or proposals for reform.

One proposal currently offered (there have been others in the past) by Sen. Paula Hawkins would politicize the Fed.

The freshman Florida Senator has proposed a reorganization of the Fed that would remove its independence, make it little more than a political pawn.

She would (among other things):

Allow the President to, at his pleasure, "hire and fire" the chairman and vice chairman, thus assuring leadership of his own men when he takes office.

Reduce the terms of board members from 14 to five years. This way a President, by his second term, would have a board comprised fully of his own appointees.

Give Congress the right to approve or reject all expenditures by the Fed.

Obviously, this would daubly hobble the Fed. With a President packing its membership and Congress controlling its purse strings, the board would have no independence.

Another Floridian—Fed Vice Chairman Fred Schultz of Jacksonville—puts the proposal in its place by labelling it "a serious mistake * * * the last thing we want to do."

He is right.

When the present Federal Reserve System was created in 1913, it was deliberately designed to counterbalance any profligate tendencies that might be exhibited by Congresses or administrations.

The system has worked, although by no means perfectly. In fact it has not worked

as well as it could have for the very reason that, in the past, it has tended to yield, more than was necessary, to political pressures.

It has done its best under strong leadership. Arthur Burns was a strong chairman, as is Volcker, who is holding the present board to a course that—given time—can work.

It will be far from painless and many more Americans will be up in arms against its policies before it's over. But its approach is the only sound option, the only one which can lead to future economic stability.

[By the Florida Times-Union, Oct. 14, 1981]

ECONOMIC QUICK-FIX EXISTS ONLY IN WISHFUL THINKING

Jacksonville's Fred Schultz occupies a position with as good a view of the nation's overall economic situation as any other in the nation.

He is not only one of seven members of the Board of Governors of the Federal Reserve System, but also its vice chairman. This is both a policy-making and an administrative post.

Schultz says the Federal Reserve is determined to "hang tough" with its tight reins on the money supply, despite strong pressures to ease up.

There had been suggestions before Monday, when Schultz talked to editors of the Florida Times Union and the Jacksonville Journal, from Treasury Secretary Donald Regan that a little less restraint from "The Fed" would be in order. Whether that represents a signal from the administration of President Ronald Reagan is a matter in dispute.

However, there is no equivocation possible about United Auto Workers' president Douglas Fraser's call to make the system's chairmanship an elective post.

Fed Chairman Paul Volcker is regarded as the chief architect of the present tight-money policy. It is strong medicine for a sick economy and one only a politically independent body like the Federal Reserve could prescribe and see to fruition.

There is a move in the U.S. Senate, with Sen. Paula Hawkins, R-Fla., as one of the sponsors, to make the Fed responsive to political pressure.

It is tunnel vision of the narrowest variety, one that would make impossible long-term restoration of the economy to health. Any short-term gains that proponents of loosening the money supply expect to get from politicizing the Fed would be, in fact, illusory.

And the timing is atrocious. It comes after most of the pain of the tight-money policy has been borne and after the policy has begun to show desirable effects.

Just yesterday one of the nation's largest banks dropped its prime interest rate to 18 percent. That isn't any bargain from a historical perspective, but it is the lowest since April and the trend for a month has been downward.

The rate of inflation also has slowed significantly.

Schultz points out, however, that the most important single effect of the policy is the headway it is making against the inflationary psychology, the widely perceived notion that has prevailed since the summer of 1979 that the government was not going to get inflation under control.

Yet high inflation, Schultz feels, is a real threat to stable government and democracy itself. Getting it under control is a matter of survival.

There are now promising signs that the policy is beginning to work. Coupled with a few elements of sheer luck, Schultz believes that to be the case.

The luck includes record corn and wheat crops and a bumper soybean crop. One economic sign that the inflationary psychology is softening is a lessening of wage expectations as the nation heads into a bargaining year for crucial industries.

The effects of high interest on some industries—especially housing and automobile manufacturing—have been severe. These industries and those who work in them have a correspondingly large stake in measures that will bring the interest rate down to the level where people can again afford to buy.

Unfortunately, as Schultz points out, there is no "quick fix." It took a while to get into this mess and it will take a while, and some economic discomfort in the process, to get out of it.●

AN AMERICAN DISEASE

HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. BOLLING. Mr. Speaker, the article which follows, "An American Disease" by Meg Greenfield which appeared in the Newsweek of November 2, 1981, goes to the heart of the problem of the flawed American foreign policy which has failed in so many ways in so many places during the past 15 years. I believe that to a significant degree our future depends on the American people and their leaders recognizing the truth contained in this short statement:

AN AMERICAN DISEASE

(By Meg Greenfield)

This country has developed a ritual for failing in our confrontations with Third World turmoil, and it has been a great success: it worked so well in Iran and Indochina that we seem determined to try it out in Central America and the Caribbean. True, there are some regional variations, but the basic formula remains the same. It involves, first, a couple of competing analyses of the turmoil that are at odds over what the cause of the trouble is, but as one in their unrealistic, oversimplified approach. Then it involves, invariably, a fight to the death to defend each analysis—never mind what happens to the region in turmoil—so that eventually the policy choices people are arguing about have practically nothing to do with the problem they are confronting.

In Central America now, as in Indochina and Iran in an earlier day, the political conflict is viewed by many in the American Government as almost solely the malevolent work of a Soviet-connected conspiracy. This view has an unfortunate impact on the conduct of American policy beyond the obvious one of directing our energies at a single aspect of the trouble and our support to characters whose anti-communism may be their only redeeming feature.

It also, and this is the fatal part so far as making useful decisions is concerned, automatically activates a political response that denies all. By "all" I mean all possibility that anything more sinister than a largely justified, democratically inclined local protest movement is at work. This school insists on seeing everyone from the Sandinistas in Nicaragua to the mullahs and Mujahedin of Iran to the Khmer Rouge and Viet Cong of another day as your basic Eleanor Roosevelt in national dress, nice but exasperated liberals driven to do, perhaps, some desperate and violent things, but wouldn't you be, too?

Choices: There you have the enduring outlines of the sterile American policy debate. What makes it so attractive, one must assume, to the people who work either side is that it doesn't generally require making any especially difficult—I mean really difficult—choices. We should support and arm the government in its struggle with the forces of international communism, it will be said. Or, we should get out and stay out and let nature take its course, let the forces of reform, which we should actually be supporting, at least prevail and stop thinking there are Russians and Cubans everywhere.

Recognizing a variation on this argument in our current political controversy over Administration policy toward El Salvador in particular and Central America and the Caribbean in general, you have to ask yourself whether, after all that tendentious talk about "lessons," the right or the left learned anything at all from our recent misadventures. Our Indochinese and Iranian allies were armed to the teeth by us. Surely, even allowing for eventual American second thoughts and doubts about supporting them forever, it should be apparent that there was a domestic political dimension to their troubles that American policy couldn't deal with. How anyone could fail to believe this also to be the case with the government of El Salvador now or the government of Nicaragua under the fallen Somozas I will never know.

Still, the wishful thinking and fantasies of the military-minded, anti-communist right strike me as being probably less harmful to the possibility of doing things well in these turbulent places than do the comparable fantasies of the romantic, reform-minded left. That may be merely because I keep expecting more insight and discrimination from this quarter—and God knows the crashed assumptions of the past ten years should have produced more of both.

Surely if postwar Indochina and post-Pahlavi Iran tell us anything, it is that the so-called popular alternatives to our less attractive friends among governments of the right are not necessarily any improvement. From which it should be possible to conclude that in countries all over the world where we believe we have an interest or a claim we are obliged to pursue there may be no attractive or even minimally acceptable political ally. Maybe that means we still have overwhelming national reason to support an unnacceptable ally. Maybe it means we walk away from it. Maybe it means we make some other more complicated or partial choice. All I'm saying is that we rarely even reach these hardest of questions, because there is so compelling a force in our political chemistry at home to keep us from acknowledging that the choices are as bad or imperfect as they are.

Evidence: With due respect to the French, for example, and in praise of that particular aspect of their policies most of us like least, they do not seem to have any trouble whatever in seeing the world around them in the harshest, most realistic light and in acting in what they take to be their own interest in the most unsentimental (to be dainty about

it) way. But in this country we insist on interpreting evidence that contradicts our assumptions about "our" side in a conflict abroad as only further evidence of the rightness of those assumptions. Thus, the collapse of a beloved ally's armed forces and the defeat of his military struggle to save a doomed political base will be viewed by the friends of right-wing governments in this country as proof we didn't send them enough F-16s after all. The collapse will be seen as the indirect handiwork of those who were questioning and impeding the arms flow.

And what will happen then? When the peerless general, prince or civilian strongman gets chased out of his palace, or maybe strung up in it, and the forces of "light" take over and turn out to be vicious, repressive butchers themselves, what is to be said by their erstwhile champions? Not that they turned out to be a rotten lot, but rather that our earlier support of their oppressors made them that way.

We are not there yet in Central America. We are still at the point where one side is saying that the rightist soldiers need more support, and the other is saying that those Cuban-shipped, Russian-made arms don't exist. Even at today's accelerated rates of disaster, that gives us some time before the former are asking who "lost" Central America and the latter are loftily replying that it is arrogant for us to have thought it was ours to "lose."

How nice it would be if we could break the pattern before that happens this time.●

THE 75TH ANNIVERSARY OF THE CHICAGO SOUTHTOWN ECONOMIST NEWSPAPERS

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. FARY. Mr. Speaker, I want to take this opportunity to bring to the attention of my colleagues in the House of Representatives the 75th anniversary of the Chicago Southtown Economist Newspapers. This tabloid has been serving the important Southwest Side of Chicago and the southwest suburbs with more than 252,000 households and a population in excess of 1 million.

Founded as the Englewood Economist in the Englewood area of Chicago in 1906, the Economist Publications have grown in scope and circulation over the years, to a total of more than 175,000. The Economist, in addition to printing its own papers, also prints numerous other publications, including the national edition of the New York Times, which is transmitted from New York to the Economist plant by satellite.

Publisher Bruce Sagan and his staff have emphasized the community social, political and economic aspects of their area, providing a strong voice on behalf of worthwhile projects and programs. At the same time they have provided their leaders with Chicago and area news gathered by a group of skilled reporters and full national news from the wires of the United Press International and from other services.

Mr. Speaker, I must admit that some of the Southtown Economist columns have generated heated discussions in my own quarters. However, the paper has never lost sight of its primary goal: To provide accurate and unbiased news of interest to its readers.

It is fitting that the Economist Newspapers have received a great number of awards and citations for community service, news coverage and photography over the years.●

263D SQUADRON OF NORTH CAROLINA NAMED MOST OUTSTANDING

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. HEFNER. Mr. Speaker, the 263d Combat Communications Squadron of the North Carolina Air National Guard at Badin, N.C., has been named the most outstanding communications-electronics unit in the United States. The Badin unit ranked first among the 278 units in the national competition which was held recently in Biloxi, Miss.

I would like to bring this outstanding achievement to the attention of my colleagues in the House of Representatives. The following article was printed in the October 16, 1981, edition of the Stanly News and Press:

263RD AGAIN BEST ANG UNIT IN U.S.

The 263rd Combat Communications Squadron, North Carolina Air National Guard, at Badin, has proven it was no accident they won the Air National Guard Communications-Electronics trophy in 1979.

Once again, the local Air Guard has been named the outstanding Communications-Electronics Unit in the nation for 1981.

This award does not come easy as there are 278 ANG Units in the competition.

The criteria established for the outstanding Communications Unit includes the training accomplishments of each person in the unit, annual average attendance at training assemblies, and the 15-day Air Force exercise each year. The reenlistment rate and unit strength play an important role. The 263rd maintains over 100 percent strength continuously.

The Air Force Communications Command inspected the unit in February and rated it excellent, stating that unit personnel exceeded Air Force standards, reflecting outstanding knowledge in unit readiness and mission capability. Numerous laudatory remarks were included in the Inspector General's summary. Contributing factors to the award was that the unit maintained an extremely high reliability rate throughout exercises in Turkey, Germany, and on the east coast of North Carolina. No major problems were encountered in any of these joint military exercises. Communication systems under their control were over 99 percent reliable.

The unit maintains the highest possible combat communications readiness rating.

In a recent exercise, the ground power production personnel and equipment maintained 100 percent reliability to five locations in addition to two other collocated Air Force and Marine Units.

One officer observing the record of the 263rd stated: "You cannot overlook its safety record of personnel. In the past 15 months, the unit has moved personnel and equipment over 30,000 air miles and logged over 18,000 road miles without incident or accident. Receiving the award and honor of being the outstanding Air National Guard Communications-Electronics Unit two out of three years is unprecedented. A unit cannot win the award back-to-back; otherwise, the 263rd might have made it three out of three."

The presentation was made October 6, during the National Guard Association of the United States Annual General Conference at Biloxi, Mississippi. Lieutenant Colonel Frederick R. Keith, Jr., commander of the 263rd Communications Squadron, received the award from Major General John Conaway, director of the Air National Guard. Colonel Keith expressed pride for the accolades received by the unit from all four services.

He said the esprit de corps and superior performance by all personnel are justly recognized by the squadron's receipt of the outstanding Communications-Electronics trophy.●

DON KENDALL OF THE U.S CHAMBER URGES TAX CUT SPEEDUP

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. KEMP. Mr. Speaker, Donald Kendall, the distinguished chairman of the U.S. Chamber of Commerce is urging that, rather than delaying or reducing the Reagan cut in tax rates, it should be accelerated. In a statement on Wednesday, Kendall observed that this would be more prudent in terms of the budget, because a developing recession would widen the deficit far more than a cut in tax rates. This is because the Government loses revenue and sees its entitlement spending automatically rise whenever unemployment increases.

I commend Mr. Kendall's advice to my colleagues as they deliberate on Federal economic policy and express my support for his sound advice.

The article follows:

CHAMBER CHAIRMAN CALLS FOR CONSIDERATION OF A SPEEDUP IN TAX CUTS

WASHINGTON, Oct. 21.—"Congress should consider speeding up the tax cut, not delaying it," Donald Kendall, chairman of the U.S. Chamber of Commerce commented today, saying:

"The third quarter decline in real GNP marks two consecutive quarters of negative economic growth, adding further confirmation that the economy is confronted with the threat of a recession. With business activity declining, the recent proposals to delay the tax cut are misguided and wholly inappropriate. Increasing taxes to balance

the budget in a recession hasn't worked in the past and won't work now.

"Had Congress enacted the original Reagan program, which proposed a 10 percent income tax rate cut in July 1981 it is unlikely that we would be in the present situation. Congress should now be seriously considering alternatives such as moving the full 10 percent tax cut to January 1, 1982, or spreading out the 1982 tax cut by giving 5 percent in January and 5 percent in July.

"By moving the full 10 percent cut to January 1, 1982, the government would lose $17 billion in revenue before counting the feedback from a healthier economy. Spreading out the 1982 reduction would cut this loss in half. In contrast, the Congressional Budget Office has estimated that each one percent increase in the unemployment rate will add $27 billion to the deficit. Thus, with either change in the tax cut, the effect on the deficit could be smaller than that of a serious recession. Better still, the economy would be growing and workers would be spared the pain of unemployment.

"As a result of the earlier compromise, 1981 will be a year of rising tax burdens for the average American worker. The 1.25 percent cut for all of 1981 is too small to offset the bracket creep experienced by many. An individual with a taxable income of $20,000 in 1980 will have to earn $22,000 this year just to keep pace with inflation. However, even with the October cut, the income gain will leave this individual facing a marginal tax rate of 27.65 percent compared to 24 percent last year. What's worse, this same individual also experienced an 8.5 percent social security tax increase last January. So much for excessive tax cutting.

"With this as background, it is clear that any delay or reduction in the 10 percent cut scheduled for July 1982 will simply contribute to a further increase in the personal income tax burden and make economic recovery that much more difficult to achieve.

"In fact, such an effort is counterproductive," Kendall added. "It will worsen the recession and create more unemployment. This will reduce tax revenues and raise federal outlays as incomes decline and the need for social welfare spending increases.

"Our economic research indicates that since 1950, this country has experienced six recessions. In four of them, the government countered with a tax cut either during the recession or immediately following. In these four cases, the ensuing expansion lasted for an average of sixty months. In the two where no tax cut actions were taken, the subsequent period of expansion averaged only sixteen months. As this experience amply demonstrates, the time for cutting taxes is now."●

EARLY WARNING

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ASPIN. Mr. Speaker, today, at the request of the Budget Committee, I am inserting this week's early warning package into the CONGRESSIONAL RECORD. This week the House of Representatives is not scheduled to consider any new spending bills. However, the early warning package does include brief summaries of the authorization—nonspending—bills that are scheduled. These materials factually compare the total amount of spending authorized by these bills with the assumptions for such spending that resulted from congressional approval of the first budget resolution for fiscal year 1982 and the amounts actually in appropriation bills, where appropriate. The committee intends to insert into the CONGRESSIONAL RECORD these staff analyses, and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. We hope to provide these early warnings to interested Members each week. I believe that it is essential for the House to have information that compares such bills to the budget resolution—achievement of the resolution spending targets is not likely to occur unless the Members are clearly aware of the budget impact of their votes.

SUMMARY OF AUTHORIZATIONS

H.R. 4734—ITALIAN AMERICAN WAR VETERANS

This is a bill to recognize the organization known as the Italian American War Veterans of the United States. The legislation states the organization's purpose, membership criteria, restrictions, responsibilities and provides tax exempt status to the corporation. There is no cost associated with this bill.

H.R. 4755—FORMER MEMBERS OF CONGRESS

This bill recognizes the organization known as "Former Members of Congress." The organization is incorporated as a tax exempt organization under the Nonprofit Corporation Act of the District of Columbia. It is estimated that no significant cost to the Government will result from enactment of this bill.

H.R. 4766—U.S. SUBMARINE VETERANS OF WORLD WAR II

This is a bill to recognize the organization known as the United States Submarine Veterans of World War II. The legislation states the organization's purpose, membership criteria, restrictions, responsibilities and provides tax exempt status to the corporation. There is no cost associated with the bill.

H.R. 4769—AMERICAN COUNCIL OF LEARNED SOCIETIES

This bill would grant a Federal charter to the American Council of Learned Societies, an organization which was established in 1919 and is a federation of 43 professional and honorary associations with an aggregate membership of 250,000 scholars. While the legislation would grant the Society a Federal charter, the Society would be prohibited from claiming congressional approval or Federal Government authority for any of its activities. The Congressional Budget Office has found that there would not be any significant cost to the Government as a result of the enactment of this legislation.

H.R. 3963—DRUG DEPENDENT FEDERAL OFFENDERS

This bill amends the Contract Services for Drug Dependent Federal Offenders Act of 1978. It would extend the period for which funds are authorized through 1985. Since funds are already authorized for fiscal year 1982, this bill would have no budgetary impact in fiscal year 1982.

H.R. 4503—FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1981

This bill authorizes the appropriation of $2.4 billion for the Environmental Protection Agency's municipal wastewater treatment construction grants program for fiscal year 1982. The bill also contains numerous changes in the financing and use of funds for the grants program. The CBO estimate of outlays resulting from fully funding this bill are $20 million in fiscal year 1982, $300 million in fiscal year 1983, $660 million in fiscal year 1984, $620 million in fiscal year 1985 and $400 million in fiscal year 1986.

H.R. 4603—TO PROVIDE FLEXIBILITY FOR FEDERAL FINANCIAL SUPERVISORY AGENCIES

This bill is designed to improve the flexibility of the Federal Deposit Insurance Corporation (FDIC), the Federal Savings and Loan Insurance Corporations (FSLIC), and other financial regulatory agencies to deal with federally insured financial institutions experiencing problems. The main changes would be to allow the insurance agencies to arrange mergers of problem institutions across State lines or mergers between institutions insured separately by the FDIC and FSLIC. The bill creates no direct spending; but if it should be successful in enhancing the flexibility of and consequently reducing the net costs of the Federal financial supervisory agencies, it could reduce net outlays of these agencies.

H.R. 2330—NUCLEAR REGULATORY COMMISSION (NRC) AUTHORIZATION

This is the bill that authorizes programs run by the Nuclear Regulatory Commission. The text of H.R. 4255 will be introduced as a substitute to H.R. 2330 for floor consideration. H.R. 4255 includes compromises between the House Interior and Energy and Commerce Committees which share jurisdiction over the NRC. The authorization level totals are within those sought by the administration for NRC appropriations.

H.R. 4437—ENERGY CONSERVATION DAYLIGHT SAVING ACT

The bill amends the Uniform Time Act so that daylight savings time is observed for 8 months instead of 6 months—from the first Sunday in March to the last Sunday in October. The Federal Communications would be authorized to adjust its hours for broadcasting stations. The Congressional Budget Office has estimated the cost of rulemaking and processing of requests for exemptions to be $70,000. However, this cost would be completely offset by decreasing utility costs to the Government.

H.R. 4814—STATE DEPARTMENT AUTHORIZATIONS

The House Foreign Affairs Committee is seeking a rule which will allow House consideration of S. 1193, the Senate-passed State Department Authorization Act for fiscal year 1982. (The House bill, H.R. 3518, was defeated on September 17, primarily on the basis that it was in excess of the President's request and the budget resolution in fiscal year 1983.)

The rule would provide that S. 1193 could be considered in the House and an amendment by the House Foreign Affairs Committee would be in order. The Committee amendment would be H.R. 4814, which would authorize foreign aid spending levels at the levels requested by the President as of September 28. These levels would, of course, be below the level assumed in the First Budget Resolution or set in the Omnibus Reconciliation Act of 1981.

According to the staff of the House Foreign Affairs Committee, there is substantial bipartisan support in the Committee and in the House for the procedure which the Committee plans to follow.

H.R. 3275—CIVIL RIGHTS COMMISSION

This bill amends the Civil Rights Act of 1957 to authorize appropriations for the Civil Rights Commission. For fiscal year 1982, $14 million would be authorized with outlays (including those previously obligated) estimated at $14 million. The authorization is $2 million above the President's request and the level assumed in the First Budget Resolution. The House-passed Commerce-State-Justice appropriation bill includes $12,318,000 for the Commission.●

INTEREST RATE POLICIES

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. HUBBARD. Mr. Speaker, I continue to receive hundreds of letters from auto dealers, realtors, homebuilders, businessmen, farmers, and many others who, like millions of people across the Nation, are being hurt by the current high interest rates. Mr. David Freeman, a constituent of mine in Paducah, Ky., has sent me a copy of a letter that he wrote to Federal Reserve Board Chairman Paul Volcker asking Mr. Volcker for the reasons behind the Federal Reserve's high interest rate policies. I feel Mr. Freeman's letter is one which should be shared with my colleagues and I wish to do so at this time. His letter follows:

DEAR MR. VOLCKER: Mr. Volcker, could you please answer some questions concerning your reasoning behind your high interest rate policies?

Mr. Volcker, are you not aware that you are destroying the free enterprise system of our great country? Many small businessmen are losing their businesses every day. Recently, I have had three once successful business people contact me to sell their businesses. Today's high rates have left them with enough money to pay their interest but not themselves. They have less money financed now than when you put your powerful grip on our economy almost two years ago. How do you expect these and the majority of the American people to survive?

How can people save money when many are taking money from their depleted savings accounts to live? The only people saving money are those who are fortunate enough to have these high yielding certificates of deposit. The small business people, homebuyers, farmers, car dealers, and the many others are forced to pay these high rates to the wealthy. Why?

Mr. Volcker, I am sure you are correct about a huge government deficit causing a strain on our money supply. However, will this deficit not continue to grow because there will be no tax dollars from these average American people who are not making any money? Most of these average paying a large portion of our tax dollars because they are not in the position of the wealthy who have numerous tax deductions and escape without paying any taxes. This is only common sense that our deficit will be larger and our government will also have to borrow these funds that in a normal economy would be coming in.

Mr. Volcker, I realize that you are strongly convinced that your ideals will control inflation. Why haven't they in two years? How long have you been in office? Do you plan to remain? Am I not correct, in saying that you were appointed? Perhaps, you should be reminded of this. You were not elected to control our country as you are doing.

What does a government deficit have to do with inflation? When government borrows, do they have to pay these high rates? Do these high rates cause our deficit to be more when the government has to borrow to pay these high rates? Why can't you see that these policies themselves are inflationary? Perhaps, more inflationary than any other single item pertaining to our economy.

Mr. Volcker, perhaps you should re-evaluate your policies. I am afraid that if you don't our economy will collapse. Where will your pay check come from then? At present you do not have to worry because it is there every Friday. Do you deserve it or shouldn't you suffer from your policies along with the rest of us?●

AID TO EDUCATION

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MOFFETT. Mr. Speaker, I would like to bring the following statement in support of Federal aid to education to your attention. Mr. Stephen Joel Trachtenberg, president of the University of Hartford in Connecticut, made this welcoming address to students coming to the campus for the beginning of the 1981 academic year. Mr. Trachtenberg has made a number of observations that merit the close consideration of my colleagues on both sides of the aisle. I hope that you find the following remarks as insightful as I did.

CUT IN FEDERAL AID TO EDUCATION IS SHORTSIGHTED

(By Stephen J. Trachtenberg)

As you begin your journey, I would like to give you three pieces of advice:

1. As Samuel Johnson pointed out, nothing will ever be attempted if all possible objections have to be overcome.

2. In the words of Winston Churchill, sometimes it isn't enough to do our best; sometimes we have to do what is required.

3. As my mother is fond of telling me, all things being equal, all things are never equal.

The most efficient energy resource in an advanced industralized economy is the midnight oil. Properly used, it fuels people to whom we look for skills, imagination, ideas, insights, and productivity.

Our government tells us that defense is a national priority; and yet in what appears to be a contradiction, it reduces its fiscal commitment to education. If this country is to remain strong, its people must be educated. If it is not to be a second-rate power, education and scientific affairs must not be neglected. We cannot forget or ignore the lessons learned from Sputnik in 1957, the year the University of Hartford was chartered.

NEGLECTING EDUCATION COSTLY

Obviously, inflation must be controlled. Clearly, there is a need to stretch national dollars and to invest them prudently; but neglect of education, particularly at the elementary and secondary levels, results in the ignorance of our people and that in turn leads to inevitable expenditures for welfare and prison systems and reformatories.

We are regularly told that we live in the richest country in the world, and I'm tempted to believe it if for no other reason than the way we treat our pets. We spend about $5.4 billion a year to acquire them and care for them and bury them.

I've seen reports that a person who buys a $200 poodle or a parakeet is likely to spend up to $4,000 before it's all over.

It's expensive to put food in the bowl, food that might well go to people, and a collar around the neck and shots and coats and sweaters and dresses and sterling silver cuddle bones and gold glitter nail polish and pedigree papers and summer camp.

REVIEW PRIORITIES

I don't mean my remarks to be seen as an attack on pets. I'm not saying that the country is going to the dogs. What I'm calling for is an explanation of priorities.

I can't help but wonder how this land has $2 billion to spend on horse-care products and not enough to resolve the embarrassingly low verbal and numerical literacy rate which we see around us.

Only a few years ago, the Department of Education reported that one of every five Americans was functionally illiterate. The crisis of accomplishment in our classrooms is widely acknowledged. In the past few years, national commission after national commission has reported the problems of America's primary and secondary schools.

There may be disagreement concerning the causes and solutions to our problems. But to all who believe that education is crucial to the survival and future of American democracy, it's clear that the signal is S.O.S.

Standardized tests and college board scores show the decline in students' ability to read, to write, and to figure. Employers echo those conclusions and voice dismay.

People of America believe that the high schools have been so downgraded that the term "high school graduate" now means as much as "sound as a dollar."

DEFICIENCY IN READING

A recent study of 23,000 recruits at the San Diego Naval Base showed that 37 percent of them could not read at the 10th grade level.

A friend of mine who works at the Walter Reed Army Hospital tells me that the signs posted around the facility had to be rewritten to a third grade level because too many of the personnel found the old signs difficult to understand. Weapons manuals and other literature for military personnel are being similarly rewritten.

These problems are yours. The future that is pregnant within them is your future. The 21st century will require this country to have a population able to do sophisticated work calling for more mind than muscle. The expanding role of technology in every suspect of our society is creating a race not to be won by the swift but by the keen and the adaptable.

Cutting federal aid to education while increasing the Pentagon budget is shortsighted, for it inhibits the research and development on which future innovations are based. Without an educated population, America will not be able to defend itself.

I hope that we can persuade you to devote yourselves to the learning that is so important to our country. I would urge that you conceive of that liberally. The next generation of Americans will need to be trained, but will also need to have judgment and historical perspective and a capacity for reason.●

ROTARY CLUB HONORS BRIG. GEN. JOHN A. SHAUD

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Ms. OAKAR. Mr. Speaker, periodically the Rotary Club of Cleveland, Ohio, the second oldest of 19,000 Rotary Clubs in the world, takes time to honor one of the outstanding Clevelanders who have made a substantial impact on the world. Among those previously honored were John Heisman, whom we hear about every year when the Heisman Trophy is awarded, Ransom Olds, the father of the Oldsmobile, Dr. Donald Henderson, who did so much to rid the world of smallpox, and others.

This Thursday, October 29, 1981, the Cleveland Rotary Club will be honoring Brig. Gen. John A. Shaud who was born and raised in Cleveland, graduating from Cleveland Heights High School in 1951. General Shaud then attended the U.S. Military Academy at West Point. He went on for even higher education, eventually getting a Ph. D. from Ohio State University. He has also pursued his studies in military science, graduating from the National War College in Washington, D.C.

As a soldier, General Shaud has had a distinguished career serving his country. He has assumed staff and command positions in various locations in the United States, including Wright-Patterson Air Force Base in his native Ohio. Overseas, General Shaud served in Thailand and Vietnam.

It might seem to some that General Shaud has spent as much time in the air as he has on the ground. After receiving his commission at the U.S. Military Academy, he entered pilot training and in 1957 became a rated pilot. Since then, General Shaud has had more than 4,000 flying hours, which include 110 combat missions. In the course of his flying career, he has won numerous decorations and awards, including the Legion of Merit with one oak leaf cluster, the Distinguished Flying Cross, Meritorous Service Medal with one oak leaf cluster, the Air Force Medal with six oak leaf clusters, and the Air Force Commendation Medal with one oak leaf cluster.

In September 1980, he was promoted to brigadier general. At present, General Shaud is commander of the 57th Air Division, Strategic Air Command, Minot Air Force Base in North Dakota.

I want to join the Cleveland Rotary Club in honoring this outstanding American who has chosen a career in service to his country and in so doing brings honor to his hometown of Cleveland, Ohio.

BIOGRAPHY OF BRIG. GEN. JOHN A. SHAUD

Brigadier General John A. Shaud is commander of the 57th Air Division, Strategic Air Command, Minot Air Force Base, N.D. This command includes "Strategic Projection Force" responsibility.

General Shaud was born Dec. 15, 1933 in Cleveland where he graduated from Cleveland Heights High School in 1951. He attended Lafayette College, Easton, Pa., until 1952 and then entered the U.S. Military Academy, West Point, N.Y. He graduated in 1956 with a bachelor of science degree; earned a master of science degree from the George Washington University, Washington, D.C., in 1967; and received a doctorate of philosophy in management science from Ohio State University in 1971. General Shaud completed Air Command and Staff College at Maxwell Air Force Base, Ala., in 1967 and graduated from the National War College at Fort Lesley J. McNair, Washington, D.C., in 1974.

After being commissioned at the U.S. Military Academy, General Shaud entered pilot training and become a rated pilot in August 1957.

His first operational assignment was to Davis-Monthan Air Force Base, Ariz., in 1958 as a B-47 pilot in the 358th Bombardment Squadron. He transferred to Wright-Patterson Air Force Base, Ohio, in 1964 where he served as a B-52 aircraft commander with the 17th Bombardment Wing.

General Shaud's next assignment was to Air Command and Staff College. Following his graduation he attended RF-4C combat crew training school at Shaw Air Force Base, S.C.

He served on the 388th Tactical Fighter Wing operations staff at Korat Royal Thai Air Force Base, Thailand, from January to May 1968. He then served as an RF-4C flight commander with the 12th Tactical Reconnaissance Squadron, Tan Son Nhut Air Base, Republic of Vietnam, until January 1969.

General Shaud was a student liaison officer for the Air Force Institute of Technology at Ohio State University until 1971 and was a faculty member of the Air Command and Staff College from 1971 until 1973. He graduated from the National War College in June 1974 and was assigned to Kincheloe Air Force Base, Mich., as deputy commander for operations, 449th Bombardment Wing. In March 1975 General Shaud became vice commander of the wing.

In January 1976 he was assigned to the Office of the Deputy Chief of Staff, Plans and Operations, Headquarters U.S. Air Force, Washington, D.C., where he served as chief, Strategic Division, until June 1976. He then became deputy chief, Readiness Initiatives Group, and remained in that position until he was appointed assistant deputy director for readiness development in November 1976. In June 1978 General Shaud took command of the 92nd Bombardment Wing (Heavy) at Fairchild Air Force Base, Wash., and became commander of the 47th Air Division there in June 1980. He assumed his present command in August 1980.

A command pilot with more than 4,000 flying hours, General Shaud has flown 110 combat missions. His military decorations and awards include the Legion of Merit with one oak leaf cluster, Distinguished Flying Cross, Meritorious Service Medal with one oak leaf cluster, Air Medal with six oak leaf clusters and Air Force Commendation Medal with one oak leaf cluster.

He was promoted to brigadier general Sept. 8, 1980, with date of rank Aug. 13, 1980.

General Shaud is married to the former Janelle M. Ohlenbusch of Lubbock, Texas. They have three children: Patricia, James and Katherine.

PROCLAMATION

Whereas the Rotary Club of Cleveland (the second oldest of 19,000 Rotary Clubs in the world) does, from time to time, honor native sons of the Cleveland area, who have gone forth to achieve national distinction, and

Whereas previously Cleveland Rotary has honored John Heisman, after whom the famous Heisman Football Trophy is named; Ransom Olds who is father of the Oldsmobile and father of the American Motor Car Industry; Dr. Donald Henderson who "rid the world of smallpox"; Frank Taplin, now president of The Metropolitan Opera; and George Crile III, producer of "CBS Reports", and

Whereas at its civic luncheon on Thursday, Oct. 29, 1981, Rotary will have as is honoree and speaker, such a distinguished Greater Cleveland son—Brig. General John A. Shaud, and

Whereas John Shaud was born in Cleveland, grew up in Cleveland Heights, attended its schools and graduated from Cleveland Heights High School, and

Whereas he is a graduate of the U.S. Military Academy, at West Point and of the National War College, and has graduate degrees from George Washington University and Ohio State University, and

Whereas he is a command pilot who flew 110 combat missions, and is the recipient of many military decorations and awards, and

Whereas in the Air Force, he has held many important assignments in the United States, Thailand and Vietnam, and became Brigadier General in 1980, and

Whereas for some time, he has been Commander of the 57th Air Division, Strategic Air Command, which command includes "Strategic Projection Force" responsibility, and

Whereas just this October, he was assigned to new responsibilities at the Pentagon in Washington, as Deputy Director of Plans for the Air Force: Now therefore * * *●

EDITORIALS BY BILL PAYNE

HON. RAY KOGOVSEK

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. KOGOVSEK. Mr. Speaker, I would like to submit these editorials

for the RECORD. They were written by a fellow Coloradan who is dedicated to the principles and objectives of the American labor movement; Mr. Bill Payne.

ANNUAL LUDLOW MEMORIAL LOVESONG SUNG WITH A BEAUTIFUL GREEK ACCENT!

(By Bill Payne)

Sunday morning was overcast, as John Mrozek and I made the annual 'love drive' to Ludlow. Heavy, dark clouds rolled up against the foothills blocking the peaks from view, and half-way to Colorado Springs the rains raced along with the car and the wipers seemed to sadly sing, "Ludlow, Ludlow."

As we sped Southward, the lighter skies in the East promised clear weather for the Memorial Services. At the site, the podium quickly filled with United Mine Workers officials and special guests. In charge, were newly elected District 15 president Bob Moore and Secretary-Treasurer Joe "Pepsi" Garcia who handled the program with much skill and great love.

Special guest was International President Sam Church whose long trip from Washington headquarters, was proof of his love and respect for the occasion and the Western membership. Other speakers in turn, including Zelda Bransted, told of the event and its impact on the people of Colorado. Congressman Ray Kogovsek of the Third District was most effective in reaching the hearts and minds of the people gathered at the site. This dedicated public official who is of the people, by the people, and FOR the people left no doubt of his love for labor and working people!

Despite the honor of both Sam and Ray, real 'grabber' was 92-year-old survivor Gus Papadakis, whose heavy Greek accent added spice to his remembrances of the event and his fallen comrades, as his words by-passed the ears and went straight to the heart! Tall, erect and with a simple dignity which shone through like the marble statues which dominate the memorial site, Gus with his quiet devotion was in himself, a living memorial!

And so it was over for another year. The good brothers, sisters and friends whose hearts and hands had been clasped together and united by a common love sought home as darkening skies promised rain. And somewhere in the distance, a lone meadowlark seemed to call, "Thank you for remembering . . . and see you next year, Gus."

HIGH COURT RULES PATENT OK ON OILSPILL EATERS AND OTHER BEASTIES!

(By Bill Payne)

Did you happen to read in the papers this week where the U.S. Supreme Court ruled where a genetic scientist can patent his test-tube creation! Seems as if the High Court by a 5-4 vote, ruled that test-tube life may be included in the federal law allowing patents to someone who "invents or discovers any new or useful process, machine, manufacture or composition of matter."

Whole concept is enough to boggle the mind! It ain't enough that we now have the oil conglomerates, the Tri-Lateral Commission and the federal bureaucrats regulating our lives to the point where we are becoming numbers on a giant super-computer—now, they are going after the very life process itself!

It all began with a General Electric employee Ananda Chakrabarty developed a bacterium believed to eat crude oil spills more quickly and efficiently than natural bacteria.

Great idea, but what happens when all the oil spills over the world have been eaten, what happens next? Does the globeeater go off and die? We'll bet it quickly develops a taste for more exotic dishes including perhaps humans in addition to other flora and fauna.

Just suppose it develops a taste for hamburgers and raids every McDonalds where it eats up not only the hamburgers but the customers as well. Or perhaps, McDonalds buy some and injects it into the hamburgers—and the burgers eat you!

How about if the oil companies buy a good supply of the little beasties and then keep them on hand for customers who are late paying their gasoline bills. Can't you just see it now—the oil company computers put you on the corporate 'hit list' and then one dark night, they slip up to where your car is parked either at the curb or in your garage, and they stick some of the little buggers into your exhaust pipe . . . before you can say Exxon, Continental Oil Company, or those grand folks at Phillips Petroleum Corporation the little munchies have completely devoured your crankcase . . . right up to and including . . . your dipstick!

THE 67TH OBSERVANCE AT LUDLOW SITE . . . BEACON TO FREE LABOR—FOREVER!

(By Bill Payne)

The Annual Memorial Service at Ludlow is always one of my most loving events each year, as we pay tribute to the memory of those brave souls who by their actions gave backbone to the union movement in Colorado.

This year's 67th observance will be at 2 p.m. this Sunday (June 14) at the memorial site. Each year I manage to return from the service renewed, refreshed and rededicated to the task of helping to build a bigger and better labor movement in the state. To see old friends and perhaps even make a couple of new ones. Anyhow, this old editor gets a lot of love.

Over the years, we've discovered the Mine Workers are a strange and beautiful breed of unionists. On television this week, the network was interviewing some Mine Workers in Pennsylvania after they had agreed on a new contract but as of the moment their mine construction workers had not. When asked that if in the event the construction people put up a picket—would they cross it now that they had their contract. To a man, they answered NO—and in one or two cases the answer was, "Hell no! we don't cross picketlines."

And it seems to me that is what this whole union movement is all about. Union members do not cross picketlines. We are supposed to be brothers and the time has come for all of us to act like brothers. Unfortunately, in the various 'rooms' in the U.S. House of Labor, we have a few meatheads, ego-heads and just plain blockheads who use the labor movement to push their own particular 'star' and to hell with everyone else. Luckily, there aren't too many and the damage they do, is in the end, to themselves! They only muck things up for the real builders of brotherhood.

We hope that you and your family can join us this year at the memorial site . . . as you honor them, you likewise bring honor to yourself. May the lesson of Ludlow be always remembered. For as times change, our enemies do not. There will be other Ludlows in the future—may we be worthy of the test. And may the fires lighted here on this spot in the past . . . burn brightly like a beacon in our minds and hearts . . . now, and in the future.

THE ANNUAL LOVE VISIT TO LUDLOW BEACON TO LABOR NOW AND FUTURE . . .

(By Bill Payne)

Sunday morning dawned clean and crystal-clear, as 93-year young Gus Papadakis, AFL-CIO Field Representative Steve Bieringer and I made the annual love visit to the memorial site at Ludlow.

We had come to be a small part of the annual remembrance of those who had paid the ultimate price in the battle for union freedom. That it is better to die with honor, than live on bended knee. A goodly crowd of several hundred were there to pay their respects.

At the beginning of the ceremony, United Mine Workers District 15 president Bob Moore was presented new American flags for the memorial site by Victor Ringo and Phil Manisacco of Elks Lodge #181 in nearby Trinidad, Colorado. Bob introduced the visitors and speakers—as usual, he did his dedicated best. UMW District 15 Secretary-Treasurer Jose 'Pepsi' Garcia's message was well prepared and really 'hit the spot.'

Colorado AFL-CIO president Norm Pledger reminded the crowd of the terrible price the miners had paid for union freedom and hoped that Colorado labor leaders now and in the future, would be worthy of the legacy. This aging editor simply gave his annual message of love and respect for those living and dead who had been equal to the test. He said the yearly visit renews, refreshes and helps him rededicate himself for the battles ahead. And finally, he warned that in America's search for energy both in fossil and synthetic fuels, that future Ludlows were possible and hoped that Colorado labor would be equal to the task!

And then it was done . . . The quiet crowd returned home. The long fingers of the afternoon sun softly brushed the stone faces of the granite monument who seemed to say, "Thank you for coming, we shall never die as long as you who love us, keep the flames of Ludlow burning in your minds and hearts."

And a passing freight seemed to whistle . . . We shall!●

TOBACCO TRIUMPHS

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. SHAMANSKY. Mr. Speaker, last week the House defeated my amendment to eliminate the tobacco allotment and price support system. This action by the House has generated a considerable amount of comment in the media. I would like to recommend to my colleagues the following two articles, one from the Washington Post and one an Anthony Lewis piece from the New York Times.

[From the Washington Post, Oct. 22, 1981]

TOBACCO TRIUMPHS

One by one, over the last few weeks, the House has taken on the once sacrosanct farm support programs—peanut allotments,

sugar "loans," dairy price supports—and voted for needed reforms. But yesterday when it came to tobacco, smoke got in its eyes. Following the Senate's lead, it voted to keep the tobacco price and production control system intact.

It's easy to create confusion about tobacco subsidies. Unlike other government-subsidized crops, tobacco hasn't cost the taxpayer very much—probably less than $1 billion over its history, and most of that was for interest subsidies that have been terminated. This is because rigid production controls have kept farmers from producing costly surpluses for government stockpiles.

Production is limited, however, through a ridiculously feudal system of allotments that conferred on owners of tobacco-producing land in the 1930s the exclusive right to grow flue-cured tobacco, the tobacco most used in cigarettes. These allotments can be inherited, bought or, as is now the predominant case, leased for a substantial fee to the farmers who actually grow the tobacco. The system has worked to the extent that large stockpiles have been avoided, but the cost of leasing growing privileges adds almost $300 million annually to tobacco prices—while unfairly enriching a bunch of absentee landlords.

In recent years, moreover, surplus stocks have been growing despite production controls, as foreign imports of cheaper tobacco grades have undercut government-supported tobacco price levels. The tobacco lobby's response to this has been to call for more government market interference in the form of higher tariffs.

The tobacco issue is further clouded by the fact that any move toward a freer market is likely to reduce tobacco prices and increase supply—and thus, presumably, encourage more smoking. This has enabled the tobacco lobby to turn the health issue to its own advantage in arguing for the retention of price and production controls. Congressmen were thus offered a convenient justification for perpetuating a government-created monopoly for tobacco while voting earlier to end a similar allotment system for peanuts.

The clear-eyed reader will note, however, that there are other and better ways to control tobacco production than through an anachronistic and inequitable allotment system. Nor should the claims of a few thousand farmers who might be adversely affected by a freer market be given any greater weight than, for example, those of the hundreds of thousands of auto, steel and government workers whose jobs have been lost through economic change. If tobacco stockpiles keep growing and pressure for higher tariffs continues, the tobacco support system may find itself again under attack. By that time, perhaps, the smoke will have cleared.

[From the New York Times, Oct. 22, 1981]

MERCHANTS OF DEATH

ABROAD AT HOME

(By Anthony Lewis)

BOSTON, October 21.—Few of us who are middle-aged or older have missed the grim experience of cancer striking a friend or relation. My sense, based on what has happened around me, is that incidence of the disease is sharply increasing. I find that others have the same feeling.

That impression is not, in fact, generally supported by medical statistics. The death rates for most forms of cancer in this country have remained remarkably steady over many years. For breast cancer, for example, the death rate was 25.2 per 100,000 population in 1930, 27 in 1978. But in one area there has been an overwhelming, an epidemic increase in deaths. That is lung cancer. This year an estimated 122,000 Americans will die of lung cancer. And the death rate has gone up by more than 12 times in the last 50 years: from 3.6 persons per 100,000 in 1930 to 44.8 in 1978.

The reason for that extraordinary rise in deaths from lung cancer is not in any scientific doubt. The reason is smoking. And we all know it: all except the corrupt and the willfully ignorant.

Against that gruesome factual background, the House of Representatives voted yesterday to continue Federal price supports for tobacco. The 231 members in the majority voted to subsidize a commodity that will bring thousands of Americans inexorably to a painful and utterly unnecessary death.

The tobacco industry and its apologists—growers, manufacturers, advertising agencies, pseudo-scientific institutes and regional politicians—have two ways of dealing with the morbid reality of their product. First they throw dust in the public eye, claiming that facts are just "theories." Second, they say that anyone who wants to do something about smoking is an "authoritarian" stomping on "individual freedom of choice."

As far as I am concerned, smokers should remain free to go on killing themselves. The United States has made enough of a social and legal mess in the field of drugs without trying to outlaw a substance that addicts millions more.

Many smokers want to quit: many more than succeed in doing so. The problem is precisely that they are addicted. If the society can do little about them, it can do a great deal to discourage additions to the addict rolls. There again, the facts are known. The smoking habit takes hold when people are young. Some 54 million Americans smoke. And 75 percent were hooked before they reached the age of 21.

A society that allows children to be enticed into smoking is engaging in a form of suicide. A 16-year-old boy who smokes two packs of cigarettes a day has a life expectancy of 62 years. If he did not smoke, he could expect to live to 71.

And children are being lured into the habit by advertising and social pressure: girls especially, for some reason. The percentage of girls between 12 and 14 years old who say they are regular smokers increased from 0.6 percent in 1968 to 4.3 percent in 1979.

How many of the 122,000 Americans who will die of lung cancer this year might have lived if they had not smoked? Of course there can be no absolute answer. But an article this year in the Journal of the National Cancer Institute, by Richard Doll and Richard Peto, looked at the figures for 1978 and estimated the effects of smoking from known data. The results of their analysis were shocking.

In 1978, 71,000 men died of lung cancer. If they had not smoked, the authors said, only 6,439 would have died. The same year 24,080 women died of lung cancer; if they had not smoked, the figure would have been 5,454.

The terrible statistics of death by smoking were not at the forefront of the tobacco price support debate in the House. Craven political calculations were what mattered.

Democrats from the Southern tobacco states pleaded with their Northern colleagues to vote for the program. Otherwise, they said, they would be decimated when Senator Jesse Helms, the North Carolina Republican, used the tobacco issue against them. And enough Northern Democrats yielded to the plaint to make the difference.

What the episode shows is that tobacco has hooked political systems as well as individuals. Jesse Helms is widely regarded by his colleagues of both parties as one of the meanest characters in Congress; members do not want to do him favors. But tobacco has them in his grip. Too many interests in the South depend on it.

Nor is the phenomenon limited to the United States. Third-world countries are growing and smoking more tobacco—and their governments are increasingly dependent on it for revenue. Brazil's Secretary of Federal Revenue warned tobacco companies this year that they had better sell more aggressively or he would increase taxes on them.

The tobacco price support program does not itself encourage smoking. Its direct effect is to enrich the handful of U.S. landowners who have acreage allotments. But the moral effect is clear. The United States Government lends its support to the production of a known poison. Those 231 Representatives voted for death.●

CONFUSION AT THE WHITE HOUSE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. FORD of Michigan. Mr. Speaker, today's Wall Street Journal has, as its lead story on page 1, an analysis of the great confusion over the adminstration's budget programs recently enacted by Congress. The confusion in the White House can only add to the chaoes felt in the business and financial communities at this time.

The article follows:

[From the Wall Street Journal, Oct. 28, 1981]

CLOUDIER OUTLOOK: REAGANITES ARE AT ODDS OVER HOW FAR TO TRIM 1982 ECONOMIC FORECAST

(By Kenneth H. Bacon)

WASHINGTON.—President Reagan's economic strategists, an uneasy coalition of tax-cutters, tight-money advocates and budget-balancers, are beginning to realize that their approaches can't all succeed at once.

Early this year, they unified behind a forecast of rapid economic growth, declining inflation and a balanced budget by 1984 despite a large increase in defense spending. Most private economists contended that the forecast was fraught with internal contradictions. But the administration stood by its projection and managed to win large tax cuts as well as spending reductions.

Now the administration facing a recession brought on by persistently high interest rates, is preparing to retreat from its bright forecast. The big question is how far to back off. Initial efforts to agree on the fundamental elements of a new forecast for 1982 are being complicated by bitter infighting among supporters of rival strategies—offi-

cials in the White House, the Treasury and the Office of Management and Budget.

OPPOSING SIDES

"The tension is between those who want to recognize realistic deficits and those who support a crazy forecast" that shows rapid economic growth in the face of the Federal Reserve Board's restrictive monetary policy, a member of the President's Council of Economic Advisers says. He believes a realistic forecast would point to "huge deficits" over the next few years and would dash hopes of balancing the budget by 1984, one of President Reagan's fondest goals.

Faced with that danger, the White House and Republicans in Congress are already backtracking from their early economic strategy. Senate Majority Leader Howard Baker says they are nearing agreement on budget cuts and tax increases designed to reduce federal deficits by $115 billion during the next three years. Doubts about recent economic-growth forecasts are beginning to sink in.

The administration's current estimate of a $43.1 billion budget deficit for the fiscal year that started Oct. 1, rests on an assumption now appearing shaky—that the "real" gross national product, adjusted for inflation, will rise a robust 5.2 percent between the fourth quarter of this calendar year and the final quarter of 1982. New, preliminary estimates by administration economists project more-modest growth, in the range of 2.9 percent to about 4 percent. Even these reduced figures are optimistic in comparison to the Federal Reserve Board's internal estimates that its tight monetary policies will hold GNP growth to 1.4 percent adjusted for inflation, during the same 12 months.

"The budget impact of a lower forecast could be very sharp," a White House official notes. Each percentage-point lag in the GNP widens the deficit by about $8 billion as tax receipts fall and the cost of unemployment benefits rises.

CONFLICT IN FORECASTS

One recent forecast generated by the administration's computers shows low growth and inflation and a 1982 deficit of about $80 billion. Other estimates, based on different economic assumptions, show deficits much closer to the $43.1 billion currently projected.

The lower the growth forecast, the higher the projected deficit and the greater the chance that President Reagan will further have to postpone or modify his conflicting goals: tax cuts, a balanced budget within three years, higher defense spending and support of a tight monetary policy to cool inflation. Thus, some officials see the fight over the 1982 growth forecast as a proxy for future struggles over the administration's economic priorities.

"There's a big fight between the monetarists and the supply-siders," a presidential economic adviser says. Fought primarily by deputies to White House Economic adviser Murray Weidenbaum, Treasury Secretary Donald Regan and Budget Director David Stockman, the battle focuses on the realism of the White House economic forecast and the probable size of the budget deficit.

The monetarists stress the importance of slow, steady growth in the nation's money supply to curb inflation. This group—Treasury Under Secretary Beryl Sprinkel, Chief Budget Office economist Lawrence Kudlow and Jerry Jordan of the Council of Economic Advisers—believes the Fed's tight monetary policy leaves little room for real economic growth until inflation slows further. They forecast slower growth and larger deficits than the administration has projected.

SUPPLY-SIDE VIEW

The supply-siders, led by Treasury Secretary Regan, Under Secretary Norman Ture and Assistant Secretary Paul Craig Roberts, still think the tax cuts will produce rapid growth and high enough tax receipts to hold down the deficit.

"The administration's program, which everyone says is a supply-side program, is a compromise between three schools," Mr. Roberts says. Besides the monetarists and the supply-siders, he is referring to the traditional Republican budget-balancers, who emphasize the need to reduce the size of government and eliminate the deficit. Budget Director Stockman forcefully represents this view.

The supply-siders charge that talk of large deficits threatens to undermine the stimulative impact of the tax cuts. Gloomy deficit projections create nervousness in the financial markets and keep interest rates high, they complain. The monetarists and the budget-balancers, in efforts to build pressure for more cuts, "are trying to push through a forecast that shows a 1982 recession with massive deficits," one supply-sider complains. "I think OMB is going to destroy the President and destroy his program."

The supply-siders fear that a low-growth, low-inflation forecast would increase pressure in Congress and the White House to delay or modify scheduled tax cuts in order to help balance the budget. They charge that the monetarists and the budget-balancers place too much emphasis on anti-inflation policies that, over the short term at least, choke off economic growth.

The monetarists worry that impatience for faster growth will force the administration to demand an easier, more expansive monetary policy from the Fed. Their fears were fueled by Secretary Regan's recent call for slightly faster money growth.

The budget-balancers complain that the supply-siders overlook the importance of a decisive reduction in the deficit as a way to reduce federal borrowing, a step that should boost financial-market confidence in the Reagan program and lead to lower interest rates.

Some monetarists and budget-balancers believe the administration damaged its credibility and aggravated nervousness in the financial markets early this year when it issued an economic forecast that was too optimistic for many private forecasters to accept. They are campaigning to prevent the administration from making the same mistake again.

"A growth estimate that's too high will stir suspicion and derision in the financial markets," one member of the Council of Economic Advisers says. "We don't want to defend something that isn't really defensible," another White House economist says.

A GAP IS A GAP

One participant in the forecast fight is more blunt. "There is a large budget gap, and no amount of phony economic numbers is going to obscure that," he says, warning that the financial markets won't buy a new government forecast that is out of line with the consensus of private forecasts.

At this stage, certainly, many people outside government remain skeptical of the assumptions the administration has made.

"Right or wrong, the financial markets are unconvinced that the administration's bold and unorthodox plan of monetary restraint and fiscal stimulus can produce the happy combination of less inflation and strong economic growth," says Norman Robertson, senior vice president of the Mellon National Bank in Pittsburgh. "And should real growth be lower than the administration has projected, the markets are fearful that the budget will remain in substantial deficit, with ominous implications for future inflation as well as the volume of Treasury financing."

So far, inflation has slackened somewhat, but at the same time real economic growth has slowed or stopped. The supply-siders contend growth has lagged because the first phase of the personal tax-rate cuts was watered down and delayed. The 10 percent rate cut initially proposed to take effect last July 1 became a 5 percent cut effective Oct. 1.

AN UNSATISFYING COMPROMISE?

Now the supply-siders and the other groups competing for influence may all be facing a disappointment. One member of the Council of Economic Advisers predicts that the new economic forecast will represent a compromise satisfying no one. The growth estimate will be lower than the supply-siders think possible but higher than the monetarists consider realistic. Such an estimate might well produce a higher deficit figure than the budget-balancers want. "There's going to be blood on the floor," one official predicts.

Expecting that both growth and inflation in 1982 may be lower than has been projected, Mr. Jordan sees the administration facing four difficult options: Live with deeper deficits, cut spending further, propose revenue-raising measures such as higher excise taxes, or press the Federal Reserve for monetary stimulus to fuel growth. These hard choices would once more pit the supply-siders, monetarists and budget-balancers against each other. Ultimately, President Reagan would have to referee their disputes and decide what new steps to take.●

HELP THY NEIGHBOR HELP HIMSELF

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. HANSEN of Idaho. Mr. Speaker, the greatest problem with welfarism is the addiction and destruction of self-esteem which ruins rather than uplifts and eventually smothers the productive capacity of both the recipient and the system supporting him.

Give a man a fish and he will eat for a day, but teach him to fish and he can eat as long as he lives. This is the spirit of Ronald Reagan's traditional America, the America any thinking person stands for and cherishes. And this spirit lives in the hearts of millions and in the works of some of our fine institutions. Nowhere is it better exemplified than in the help-thy-neighbor-help-himself welfare program of the Church of Jesus Christ of Latter-day Saints—the Mormons.

Following is an Associated Press article from the October 26, 1981 Idaho State Journal telling this remarkable story.

MORMON WELFARE SERVICES REFLECT REAGAN PHILOSOPHY

SALT LAKE CITY.—In 1936, one of the gloomiest of the Depression years in Utah, the Church of Jesus Christ of Latter-day Saints established a welfare services plan for its faithful members.

It was not to be confused with New Deal social welfare introduced by President Roosevelt, which in large part was considered an unrighteous dole and an anathema by the church hierarchy.

Rather, the plan was rooted in a help-thy-neighbor-help-himself philosophy which President Reagan has embraced to cushion the impact of budget cuts.

"You think back to those traumatic days," Reagan said in a recent interview with The Associated Press, "and say, 'what if every organized religion in America had said they were going to do this'?"

The ability of the nation's churches to mount such programs and the extent to which they would be effective is debatable. But church-generated statistics at the worldwide headquarters of the church in Salt Lake City support Mr. Reagan's thesis in microcosm.

Tens of thousands of Mormons yearly are spared the so-called indignity of public assistance through the kindness of their brethern.

The church prefers to think of its welfare services not as a program, but as "the gospel in action, the crowning principle of a Christian life," according to church literature.

In the spirit of volunteerism, which is one of President Reagan's bywords, all able Mormons are expected to abstain from two meals each month and contribute the equivalent cost, or a more generous offering, to the church. This provides a fund for distribution of cash or commodities to needy church members, proferred not as a gift, but for temporary assistance.

Where possible, recipients can work for what they receive, either performing tasks around their chapel or at church-owned farms, canneries, storehouses or in any other of the welfare service systems 1,000 projects worldwide.

President Reagan has said clergymen from other churches are intrigued by the Mormons' project. And he says they think a "help thy neighbor policy" could replace government programs.

While on the campaign trail and since his election, Reagan has often accented the hope that Americans would move to solve common problems and lessen the role of government. He has found, possibly through the Mormon members of his administration, whose work ethic he admires, what he considers a fine example born in Depression-mired Utah 45 years ago.

There were 760,690 Mormons in 1935, and at the October general conference in Salt Lake City that year, church president Heber J. Grant said the purpose of the new program was "to set up, insofar as possible, a system under which the curse of idleness would be done away with, the evils of dole abolished, and independence, industry, thrift and self-respect be once more established among our people. The aim of the church is to help people help themselves. Work is to be reenthroned as the ruling principle of the lives of our church membership."

Today there are nearly 5 million Mormons worldwide, and in 1980, 160,600 of them were assisted with cash or commodities; most were thus kept off of government assistance programs, a church spokesman said.

Also during the year, 51,600 church members were assisted by LDS Social Services, a professional arm of licensed service professionals who arrange for adoptions, foster care and perform other functions; 26,400 were found jobs; 527,900 man-days of labor were donated welfare services by members, and 35.4 million pounds of commodities were distributed to needy faithful.

"There are several reasons for not going to the government," said Glenn L. Pace, the managing director of welfare services. "The primary reason is that we are trying to develp the man, and there are certain principles that need to be followed in order for this individual to come out of the hopefully temporary problem he is in. These principles are not administered by the government programs."

"The whole purpose of the system is not to take care of someone in poverty, as it is to help him get on his feet."

In each Mormon congregation, the lay bishop administers the welfare system, deciding who needs help and how much, when assistance should cease and related questions.

The bishop dispenses requisition orders to recipients, redeemable at church storehouses that resemble retail markets, except they have no cash registers.

Worldwide the church operates canneries and farms, providing vegetables, fruit, peanut butter, gelatin, soap, detergent, pasta, milk, cheese, meat and more.●

PENN STATE CONTINUING EDUCATION PROGRAM STUDIES SECURITY ISSUES IN WASHINGTON, D.C.

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, on Friday, October 23, I was pleased to meet with participants of a continuing educational Penn State program entitled "International Security Decisions—An Inside Look." This very fine group, ranging in age from high school students to retirees, met with officials from both the Pentagon and State Department, in addition to visiting our Capitol.

While participating in a discussion of security issues, questions ranged from reinstatement of the draft to justification of defense spending. I found this meeting to be an interesting learning experience, for it is important that both young and old come together in such an exchange of ideas. I was very impressed by the group's interest and awareness regarding current crises facing our Nation—their efforts are to be commended.

Accompanying instructors Dr. Don Goldstein and Don Gogniat were the following students: Brother William Feally, Jim Kenyon, Frank Veltri, Louis Obradovich, Jane Ashoff, Dan Evans, Janet Kuras, Lucia Caldwell, Dorothy Burr, Jane Moore, Stanley Joseph, Mark Tisdale, Jim Glaser, John Bocello, Greg Conway, Veronica Ashoff, Kathryn Evans, Ellen Kuras, Marie Russ, Mary Chastaine, and Dolly Elyes.●

EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. GOODLING. Mr. Speaker, as one who has spent most of my life in public education—as a teacher, principal, superintendent, and school board member—I want to commend my colleague, JOHN ASHBROOK, for his outstanding leadership in putting together and getting enacted the Education Consolidation and Improvement Act of 1981 (ECIA). I hope that school people all across America come to appreciate fully what this means for our schools.

By the time the administration education block grant proposals had been forwarded to the Congress, JOHN ASHBROOK had been working for 1 year on the legislation which became ECIA. His proposal differed substantially from the administration proposal, principally because it had been put together carefully after thorough consultation with school administrators from around the country. It represented a complete rewriting of the Elementary and Secondary Education Act of 1965, but one which kept title I assistance for the education of disadvantaged children essentially intact—removing only those provisions which caused an enormous amount of paperwork and administrative difficulty. When the time came to include such a proposal in the Budget Reconciliation Act this summer, the Ashbrook bill was the only alternative to the much less attractive administration package.

I am proud to have cosponsored the Ashbrook bill and to have assisted in the final redrafting of key provisions. A measure of how good a job it was is that Senator STAFFORD, who is chairman of the Subcommittee on Education in the other body, offered a very slightly modified version of the bill which won Senate committee approval with only a single dissenting vote.

As the ranking Republican member of the Subcommittee on Elementary, Secondary, and Vocational Education, I particularly appreciate the strong leadership, interest and support we have had from JOHN ASHBROOK in his role as ranking minority member of the full Committee on Education and Labor. I am pleased that Education Times recently took note of that lead-

ership and also provided an explanation of ECIA. For the information of all Members, I am placing the full text of that article in the RECORD, as follows:

THE AUTHOR OF BLOCK GRANT LEGISLATION TALKS ABOUT THE NEW EDUCATION LAW

(By JOHN ASHBROOK)

The following are comments by Rep. John Ashbrook, R-Ohio, during House debate on legislation to cut federal spending in fiscal years 1982, 1983 and 1984.

Ashbrook, the senior ranking Republican member of the House Education and Labor Committee, is the author of the "Education Consolidation and Improvement Act" passed by Congress as part of the budget bill, which revises ESEA Title I and consolidates some 30 federal categorical education programs into a single grant to the states.

The "Education Consolidation and Improvement Act" . . . represents a genuine victory for the views of President Reagan and of the vast majority of American educators.

Those views are that federal aid for elementary and secondary schools should continue at a significant level but should be so structured that education decisions are made at the state and local level, close to the people, and that school officials set their own priorities for funding programs within a wide range of choices, and do so with a minimum of paperwork and interference.

We have accomplished that, and the final product emerging from the elementary and secondary education mini-conference was, in my judgement, superior to either the House or Senate versions of the bill standing alone.

We left the huge Title I program for disadvantaged children intact as to the formula and method of distributing funds and the purpose for which those funds would be used. We left it without a specified dollar amount authorization, as under existing law, but in a separate section provided for funding of $3.48 billion, for each of the fiscal years 1982, 1983 and 1984, which is an increase of $380 million over the 1981 level.

But we stripped out of Title I those detailed requirements and instructions on how to conduct programs which caused most of a staggering five million hours of paperwork each year just to administer the program at state and local levels.

We consolidated about 30 smaller programs into a single block grant funded at $589.4 million for each of the fiscal years 1982, 1983 and 1984. At least 93 percent of this goes to the states on a school-age population basis, with up to 1 percent for the outlying territories and up to 6 percent retained by the secretary as a discretionary fund (much of which we earmarked for the most worthwhile national programs).

Of the grants going to the states (which includes the 50 states, Puerto Rico, and the District of Columbia), at least 80 percent must be distributed to local school districts, primarily on a school enrollment basis, but weighted for extra cost factors such as concentrations of poverty.

This means that, for the first time, every state and school district will have its own pot of federal funds with which to plan its own programs designed to meet its own needs. And neither the state nor federal government can tell a local school district how to spend its federal funds, so long as it complies with the stated requirements of the law.

One of those requirements, which does not much vary from existing law for the individual programs we have consolidated, is that nonpublic schoolchildren and teachers are to participate equitably in the benefits of the programs, with an equitable share of the funds designated for that participation.

This bill is fair.

And it is only fair that when we use all the taxpayers' money to improve the education of children, and count all the children to determine the distribution of funds, we insure that all children will participate equitably in those benefits without regard to whether they attend public or private schools.

That has been our national policy since the National Defense Education Act of 1958, and this new act continues that in a way guaranteed to be effective.

This act—and I confess to taking enormous pride in being the author of the versions adopted by both the House and Senate—restores the balance of education power to the state and local agencies in dramatic ways. Let me cite a few examples.

First, the [U.S.] Secretary's authority to issue regulations is strictly limited to (1) those necessary to carry out duties specifically assigned to him, (2) those necessary for proper fiscal audit, and (3) those necessary to insure compliance with specific requirements of the act (which are kept to a minimum).

The bill states: "In all matters relating to the details of planning, developing, implementing, and evaluating programs and projects by state and local educational agencies the Secretary shall not issue regulations, but may consult with appropriate state, local and private educational agencies and, upon request, provide technical assistance, information, and suggested guidelines designed to promote the development and implementation of effective instructional programs and to otherwise assist in carrying out the purposes of this (act)."

I'll bet most school people never thought they would live long enough to see that kind of language in a federal law.

Second, there is a provision stating outright that the regulations which are issued shall not have the standing of a federal statute. This brings to a screeching halt the practice of executive branch bureaucrats making law through regulation, at least under this act. I think there will be wide support for this among educators.

Third, when the Secretary moves to withhold funds from a state for an alleged infraction of the statute, the legal scales will not longer be heavily weighted in his favor.

As things now stand, the courts must sustain the Secretary's findings if based upon "substantial evidence." In law, that really means that the great weight of evidence can be against the Secretary's position and he still wins.

This act creates a presumption that state and local educational agencies have complied with the law, and the presumption can only be overcome, if the position of the Secretary is "supported by the weight of evidence," which at law means a preponderance of evidence.

Moreover, the Secretary can no longer withhold funds and negotiate from that position of strength, because the law provides for the filing of an action against the withholding which automatically suspends the Secretary's action pending final determination of the matter in the courts. Again, a dramatic shift in the balance of power, and one long overdue.

There are a number of other less dramatic but important provisions for restoring authority to where it belongs.

The necessary protections against supplanting local and state school funds with federal dollars, and similar provisions, are retained but rewritten in such a way as to conform to actual school practices and not to require expensive procedures to avoid federal audit exceptions over trivialities.

Finally, the act in very specific terms nails down "complete discretion, subject only to the provision of this (act)" for local educational agencies in determining how to use funds under the consolidated programs.

The act asserts this as a guarantee of local control, close to local voters and the parents of schoolchildren, even against efforts by the state to interfere in the use of federal funds allocated under this program.

Of course, necessary authority is preserved for the state to insure that the specific requirements of the act are met, and for the Secretary to enforce compliance with those requirements. Essential accountability is preserved, but not at the expense of state and local responsibility and not through constant federal bureaucratic intervention.

The working philosophy of the new act is that educators and school officials are a lot more accountable than federal bureaucrats, I expect to see this philosophy extended to federal programs, even beyond education, which are not covered under this act.

In my 20 years as a member of this body, I have seen a steady movement of power, authority and responsibility to the federal government.

One of the most disturbing trends has been the shift away from broadbased grants to narrow categorical programs. With this shift have come innumerable unnecessary requirements that complicate the job of efficient administration by the states.

I am pleased that in my 21st year here we are at last reversing that trend and shifting power back to the states.●

HONORING ITALIAN AMERICAN WAR VETERANS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MARKEY. Mr. Speaker, yesterday I was pleased to join my colleagues in the House in honoring a great and patriotic organization—the Italian American War Veterans of the United States, Inc. In 1982, the ITAM will celebrate its 50th year of incorporation as a veterans' organization. I am certain my colleagues are well aware of the worthwhile work of America's veteran groups, whose members are dedicated to serving the needs of our former fighting men and women, and their families. ITAM has played an even more important role over the past 49 years; promoting goodwill and friendship between our Nation and the people of Italy.

Today, ITAM's 8,000 members, in communities throughout the United States, continue this organization's work as a patriotic, research, educational, and civic veteran's organization. Much of this success can be attributed to the fact that ITAM draws

its strength from two of the proudest and most important groups of Americans—our veterans and our Italian American citizens.

I am pleased to have this opportunity to praise ITAM and its members for the half-century of service to our veterans and their families. I call upon my fellow members to continue to support the spirit of H.R. 4734, a bill which this House passed yesterday, which recognizes ITAM as a nonprofit organization and grants Federal status to the Italian American War Veterans of the United States, Inc. Considering ITAM's record of exemplary service and achievement, I feel this bill was indeed worthy of the support which it received.●

HENRY HAZLITT ON REAGANOMICS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. McDONALD. Mr. Speaker, now that the White House is occupied by President Ronald Reagan, the hope of the Nation has surged with great expectation. I for one welcomed this change for the better. But there is a long distance to go to return this Nation to fiscal solvency.

I think, rightfully so, I have informed my constituents that the programs of the President are a step in the right direction. I have also warned against euphoria, keeping in mind, that the present budget of some $700 billion, was not a reduction in the budget, but merely, a reduction in the growth of the budget.

Those of us who are committed to returning America to greatness, should pay heed to an article I recently came across in the October 1981 issue of Gold Newsletter. The author is Henry Hazlitt, one of, if not America's greatest, living economists. He needs no introduction, but for the benefit of my colleagues, there is a brief background in the accompanying article. So, for all to read and pay heed, here is Henry Hazlitt and his article, "The Outlook for Inflation, the Dollar, and Gold":

THE OUTLOOK FOR INFLATION, THE DOLLAR, AND GOLD

(By Henry Hazlitt)

I shall not attempt to make any short run forecast for the dollar, gold, or inflation. This is solely a long run forecast. In that long run inflation will continue, and it will accelerate. Gold will go higher in terms of paper dollars. The purchasing power of dollars will continue to decline.

It does not require any great astuteness or detailed knowledge to make such a forecast. We need merely ask what policies we ought to be following to halt the inflation, and then compare them with the policies we actually have been following.

First, we ought to stop expanding the money supply (preferably altogether, or at least by any more than 2 or 3 percent a year).

Now let us look at the record for just the last seven years. By December of 1974 the money stock, as measured by M1-B (the particular aggregate of currency, deposits, etc. most often used for such comparisons), had increased 4.3 percent over the total of the year before. To December 1975 the money stock had increased 4.8 percent over the year before. To December 1976 the annual increase was 6.5 percent; to December 1977, 8.1 percent; to December 1978, 8.2 percent; to December 1979, 7.3 percent; to December 1980, 6.5 percent. In sum, in the last seven years, monetary inflation was continued every year without exception. Altogether, from December 1974 to September of this year, the money stock, measured by M1-B, had increased from $275.7 billion to $432.9 billion or 57 percent.

It has not done this, as we have seen, at any even annual rate, and certainly not at any even quarterly or monthly one. The rate, in fact, has often been permitted to swing widely. In the single week ended April 8, for example, the money stock increased $5.2 billion; in the week ended June 3, it decreased by $2.9 billion. The basic M1-B measure of money declined at an annual rate of 8.2 percent in one month, after it had grown at an annual rate of 6.8 percent over the preceding statistical quarter.

Given an irredeemable paper currency, the height of prices tends to vary more or less directly with the quantity of that currency and credit in circulation. The weekly fluctuations and irregular forward spurts in the money supply, therefore, must mean that those in charge of determining what that supply shall be (namely, the Federal Reserve Board) either are powerless to control the supply, or do not know, or are indifferent to what the supply is, or just do not want to slow down the growth.

Let us see exactly what the effect of this increasing money supply has been on increasing inflation. This means looking at the official index of consumer prices. In 1972 these increased 3.4 percent; in 1973, 8.8 percent; in 1974, 12.2 percent; in 1975, 7.0 percent; in 1976, 4.8 percent; in 1977, 6.8 percent; in 1978, 9.0 percent; in 1979, 13.3 percent; in 1980, 12.4 percent.

Not much reassurance there. Not only annual rises without exception, but an accelerating trend in the last four years.

The cumulative figures are completely disheartening—an increase of more than 85 percent in the full eight years. And if we go back 14 years, to 1967, the cumulative price increase has been 166.8 percent.

This result is not solely the fault of the policies of the Federal Reserve System. If successive Congresses and Presidents make excessive annual expenditures, and do not have the courage to impose enough tax revenues to pay for them, then an excessive temptation is put on the Federal Reserve to monetize the deficit by buying government bonds in the open market and paying for them with newly created Federal Reserve Notes or deposits.

If the Fed does not do this, the government must pay for its deficit expenditures by selling bonds to the public. This soaks up private savings, leaving much less available for investment in new housing or other new business ventures. It also raises interest rates, so discouraging home or commercial building construction and new business ventures by those who would otherwise be borrowers.

If the monetary authorities do not wish to get the blame for this discouragement to private business, they have an alternative: they can buy and monetize more government bonds. In other words, they can inflate.

So successive Congresses and Presidents must share the blame for inflation by their fiscal policies, even though these policies are not a direct cause of inflation.

If once more we consult the past record, we can see how Congresses and Presidents have not only been preparing the ground, but have been making inflation inevitable and serious for many years. For a full explanatory record we need to go back fifty years. We had our first budget deficit since 1920 in the fiscal year 1931. In the 51 years including 1931 and since, we have had surpluses in only six, and deficits in the other 45. There has been no surplus in 13 years. The gross national debt of the United States at the end of fiscal year 1930 was $16 billion. That debt stands today in the neighborhood of a trillion dollars—more than a 60-fold increase.

If there had been no real concern among our Congressmen and Federal office holders during this period, would these chronic deficits have been allowed to continue? The deficit for the fiscal year 1980 was $59.6 billion—more than twice the size of the deficit of $27.7 billion for 1979. The official estimate for the 1981 fiscal year is total expenditures of $661.5 bilion, (compared with $579.6 in 1980) and a deficit of $58.1 billion. And for 1982, Congressional conferees have agreed on another huge deficit. (Estimates range from $60 billion to $80 billion.)

And so, in brief, no matter where we look—at the growth of the money supply, at concern over consumer prices, at Congressional spending and taxing policies, at past or prospective Federal Reserve actions, we find those in charge of policy have not only been doing little to restrain inflation, but taking the actions most likely to increase it.

Is this the result of sheer ignorance? Is it the result of deliberate malice? We can at least dismiss the latter explanation. These pro-inflationary policies are still being followed, it seems to me, because many of those we are holding responsible for controlling our economic policies are sincerely worried about our unemployment.

This has undoubtedly been high by historic standards. Since the beginning of this year it has stood at 7.3 percent or more, higher than any rate since 1976. And for the further comparison, in the twenty-year period beginning with 1950, the rate of unemployment averaged 4.8 percent.

In a situation like this, Congressmen fear to reduce the rate of Federal spending, or the rate of credit creation, and hence the rate of inflation, and eager to do everything they can to bring down the rate of interest. They are tempted, in short to continue Keynesian policies to "increase purchasing power."

But sound economists—"Austrian" and "supply-side" economists—look at the problem from another perspective. Both theory and experience lead them to conclude that whenever there is abnormal unemployment, at least some wage-rates must be too high. They may have just recently been made too high, or they may have become too high because of special conditions. This is the situation today.

We may look first at the minimum-wage law, because this cause is the most direct. When this was first enacted in 1937 (the Labor Standards Act), the minimum wage

was fixed at only 25 cents an hour. This was raised in 1939, 1945, 1950, 1956, 1961, 1963, 1967, 1968, and so on. It stands today, since January 1, at $3.35 an hour.

It may be thought that these successive raises were ordered merely to keep minimum wage-rates abreast of the inflation, but they have been pushed up faster than the market rate of wages. That the minimum-wage law creates a large part of today's unemployment cannot be doubted. This was most clearly shown by the increasing gap between the rate of unemployment of black and white teen-agers. In 1952, the unemployment rate among white and black teen-agers was the same—9 percent. But year by year, as the minimum wage was jacked higher and higher, a disparity grew and increased. In 1968, the unemployment rate among white teen-agers was 11.6 percent, but among non-white teen-agers it has soared to 26.6 percent.

These particular statistics are apparently no longer kept. But today, when the unemployment rate of the whole working population is 7 percent, that of 16-19 year olds is 18.1 percent; and while unemployment among whites is 6.2 percent, among blacks it is 13.6 percent. A great part of this chronic gap has developed since the minimum-wage law was enacted.

Perhaps even more influential in causing the present high level of wage-rates in many lines have been three or four outstanding labor laws passed mainly in the depression and New Deal periods nearly fifty years ago. Though the general public has forgotten their influence if not their very existence, these laws are still on the books, not only unrepealed but, except for one of them, unamended.

One of these is the Davis-Bacon Act, passed in 1931. Its professed purpose, in that depression period, was to keep building wages from being pushed down excessively. It provided that Federal construction work should pay whatever wage-rates already "prevailed" in the district in which the work was done. The result of this law has simply been to impose union-dictated wage-rates nationally. The Heritage Foundation has estimated that its effect today is to cost U.S. taxpayers three-quarters of a billion dollars a year in wasteful construction costs, to restrict minority entry into the construction crafts, and to hurt part of the poor and elderly by driving up the cost of federally assisted housing.

The Norris-La Guardia Act was passed in 1932. In effect it freed union violence and intimidation from restraint by federal injunction. In addition, a Supreme Court decision in 1941 had the effect of virtually freeing unions from liability to criminal prosecution and suits for damages under the Sherman Act. The law remains a continuing encouragement to vandalism and violence.

The Wagner Labor Relations Act was passed in 1935, and though a few of its worst features were later mitigated by the Taft-Hartley Act of 1947, the amended law still makes it compulsory to "bargain collectively" over any union demand, however extravagant it may be. In effect the employer must usually make concessions, to prove that he has bargained "in good faith."

These laws, individually and in combination, force up the level of wage rates. Wage rates above what a free market will support must bring about unemployment. An outstanding example today is the American automobile industry, in which wage-rates have been nearly 50 percent greater than the Japanese scale, and, including fringe benefits, some 60 percent higher than the average hourly American scale in other manufacturing industries. Little wonder that the American automobile has not competed better.

I apologize for this long parade of facts, which may have seemed tedious to some readers, but when we bring them all together we realize how formidable the obstacles have been, and will continue to be, to any serious effort to halt the inflation.

The Federal Reserve Board acts as if it does not even know how to restrain the growth of the money supply. Nobody—not the Fed, not the overwhelming majority of bankers—i.e., of lenders—and certainly not the overwhelming majority of businessmen—i.e., of borrowers—professes to want high interest rates. The recent rate of around 20 percent are almost universally deplored. (They are certainly high by historic standards; but when the lender considers the real purchasing power likely to be returned to him compared with the purchasing power that he parts with when he makes the loan, these rates seem at least in part a not unreasonable compensation for the lender's risk.)

The continued expansion of the money supply even with these high rates means that on net balance the rates have not in fact been high enough to discourage lending. Some monetary doctors ask for a rigid ceiling on the money supply; but no one wants to be the marginal lender or borrower cut off from his intended activity by such a ceiling. And no one in authority seriously asks for such a ceiling.

What seems to have been happening is heavy deficit. If nothing is done to offset it this deficit tends to be monetized as it is produced. But the Fed is trying to offset the deficit by keeping money rates high. The result of this is to raise the cost and restrict the volume of private credit. This hurts business, new ventures, and employment. But meanwhile the deficit keeps increasing the money supply. So the congressional deficit, combined with the Fed's stiff money rates, gives the economy the worst of both worlds.

So the volume of credit continues to grow, the total money supply continues to grow, consumer prices continue to rise. The budget continues to be in deficit because Congressmen fear that cutting off this or that subsidy would hurt some constituents. But there is no reduction of Federal expenditures that wouldn't hurt or disappoint somebody, somewhere. The budget can be balanced only when there is political courage. Meanwhile, our currency expansion is always about to be stopped, the budget deficit is always about to be terminated . . . but continued for just a little while longer.

The irony of inflation seems to be this: When it is running at a comparatively moderate rate, say 10 percent a year, as in the United States, the inflation hardly seems to warrant making the sacrifices or taking the risky measures necessary to halt it; but when, as in Israel, it reaches rates like 133 percent a year, any attempt to halt it seems either hopeless or too disruptive to be considered.

At the moment, in our own country, some signs seem to point to a slow-down in inflation, like the moderate consumer price rises of the last few months. But part of this slowdown has been due to transient changes in the supply-and-demand relations affecting individual commodities, such as fuel oil and gasoline. Over the long run the growth of the money stock will resume its role as the dominant influence on the average level of prices.

It remains to be pointed out that even if the rate of increase in the money supply does not begin to accelerate, the inflationary rise in prices will. As people begin to expect this continued increase in the money supply, they will reduce their valuation of the monetry unit much faster than the money supply is increased. This helps to explain the almost invariable acceleration of inflation in its late stages.

Investors in gold do not need to be reminded that in an inflation its price does not necessarily vary in proportion with the average price of other commodities. On January 21, 1980, when the consumer price index stood at 233.2, gold sold for $850 an ounce. On September 21, 1981, with consumer prices above 274.4 gold was selling at $463 an ounce. As with any other commodity, the price of gold moves with the ever changing supply and demand for that particular commodity. Nevertheless, the price of gold must in the long run be dominantly affected by the outlook for inflation. An increasing inflation will in time be once more reflected in an increasing price of gold.

In sum, during an inflation like the one we are suffering today, every investor or speculator would be well advised to keep his eye mainly on the long run trend. If he does this he must conclude that, whatever happens in the next few months, in the long run, inflation in the United States will continue and will accelerate, and the tendency of gold prices will once more be upward.

Note.—Henry Hazlitt is a financial journalist and economist. For 12 years, from 1934 to 1946, he wrote most of the economic editorials of the New York Times; or 20 years, from 1946 to 1966, he wrote the signed weekly column, "Business Tides," for Newsweek. He is the author of 17 books, including "Economics in One Lesson" (1946) and "The Inflation Crisis and How To Resolve It" (1978). "Economics in One Lesson" has been translated into eight languages and has sold nearly a million copies in all editions.●

MR. AND MRS. JOHN ALLAN CECIL'S 60TH WEDDING ANNIVERSARY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. DYSON. Mr. Speaker, on this important date, I would like to congratulate Mr. and Mrs. John Allan Cecil on the occasion of their 60th wedding anniversary. I hope you will join me in wishing them many more years of happiness.

I would like to bring this very important wedding anniversary to the attention of the House, and to extend to these very dear people in my district sincere congratulations on their 60th wedding anniversary.●

CHINESE ILLUSIONS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. FIELDS. Mr. Speaker, the Republic of China on Taiwan recently celebrated in behalf of all the world's Chinese people the 70th anniversary of the founding of the Chinese Republic.

At the same time, the Communists in control of the mainland issued another in a series of spurious invitations for reconciliation talks. The sole purpose of these periodic overtures is to gain propaganda value. No one would be more shocked than the Communists themselves should the Taiwanese ever accept. Peking knows in advance that the Taiwanese will reject their offerings, and also that the likes of the New York Times will pick up their cue to paint Taiwan as recalcitrant and an obstacle to world peace.

Mr. Speaker, I am inserting into the RECORD an editorial from the Wall Street Journal which gives only a few of the reasons why Taiwan properly rejects this periodic nonsense from the mainland. An even more important reason for rejection is that the Republic of China is not about to give up its claim as the legitimate government of the Chinese people. To recognize Peking as its central government would be tantamount to suicide. Then, any armed action by Peking to settle differences would evoke screams from the New York Times that the United States should not meddle in the internal affairs of China by aiding Taiwan.

Mr. Speaker, the editorial follows:

[From the Wall Street Journal, Oct. 15, 1981]

CHINESE ILLUSIONS

The other day the Communist government at Peking published yet another invitation designed to lure the Nationalists on Taiwan into rejoining the mainland. This caused a bit of excitement because the Communists went so far as to offer formally that Taiwan could retain some political autonomy, its own "socioeconomic system" and even its own army, while its leaders could "participate in running" the national government. Taiwan, however, promptly rejected the offer, much to the consternation of one-China optimists who saw it as a generous gesture. The New York Times, for example, held that by failing to discuss the proposal Taipei "forfeits the propaganda struggle."

This would be a small price, if true, considering what Taiwan stands to lose by taking the Peking offer seriously. What you had in China's offer wasn't any waking up to reality of the sort that occurred, say, when Anwar El-Sadat of Egypt finally agreed to talk with the Israelis, who had three times defeated his country at war. What we've just heard from Peking is more analogous to an offer by a large corporation in the midst of bankruptcy proceedings to acquire its most successful competitor and set it up as some kind of subsidiary.

It's an offer, in short, that doesn't make sense. Consider, for example, that Taiwan's per capita income stands, at nearly $3,000 a year, among the highest in the developing world, while China's, at below $300 a year, ranks among the lowest. The gap between the rich and the poor is narrower in capitalistic Taiwan than in supposedly egalitarian and Communist China. And the two-way external trade carried on by Taiwan's 17 million people rivals that of the mainland, with its population of nearly a billion. China, in short, doesn't have the sort of economy into which Taiwan wants to be absorbed.

This is particularly true when no one, inside or outside of China, seems to be taking seriously Taiwan's own statement on the subject. It argues that the only way to bring about reunification is for the mainland to "abandon the Communist system." This would be, after all, the first prescript of any Taiwanese official asked to give advice on economic development policy. And development policy surely must be a key area in which the mainland's rulers want Taiwan's leaders to "participate in running" the nation.

Now it is of course true that Deng Xiaoping and his allies have sharply modified Mao's communism, introducing certain capitalist elements, such as joint ventures with foreign firms. But when they began making their overtures to Taiwan, K.T. Li, for many years Taipei's finance minister and an architect of its "economic miracle," pointed out the fundamental contradiction that faces not only Peking but any Communist regime as it contemplates economic reform. "If it adopts the pragmatic measures that proved so successful in Taiwan," he argued, "they will lead to the emergence of certain capitalistic elements that will erode the communist ideology and eventually destabilize the existing political system."

If you don't believe Mr. Li, take a trip today to Poland and see what he's talking about. The Chinese Communists have come a long way since the death of Mao and it's comforting to know they're tilting in our direction rather than toward the Soviets. But they haven't yet shown signs that they really understand the economic problem they face. And until they do Taiwan deserves nothing but support in its refusal to get sucked into their schemes.●

CAMBRIDGE CITY COUNCIL DEPLORES WATT'S POLICIES

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. O'NEILL. Mr. Speaker, 6 months ago a nationwide petition drive was launched by the Sierra Club and Friends of the Earth calling for the dismissal of Secretary of Interior James Watt and a rejection of legislation emobdying his policies.

More than 1 million signatures have been collected so far and on October 19, I received these petitions on behalf of the House.

Secretary Watt and his defenders charge that his critics are a tiny group of radical environmentalists. The truth is that his policies and pronouncements have offended and outraged an overwhelming majority of the American people—people from every State in the Union, from every profession, from every political persuasion—Americans who are raising their voices in an evergrowing protest against the callous and calculated assaults by this administration on our national parks, our wilderness areas, our historical preservation programs—indeed, on our national heritage.

Last week, the City Council of Cambridge, Mass., added its voice to the protest by adopting a resolution expressing grave concern and dissatisfaction with Secretary Watt's performance. I am pleased to insert the resolution in the RECORD and commend it to my colleagues:

CITY OF CAMBRIDGE

Whereas since his appointment this year, Secretary of the Interior James Watt has acted in a manner which is inconsistent with our nation's goals of environmental preservation; and

Whereas Secretary Watt has expressed his support for the exploratory drilling off George's Bank and similar drilling in other environmentally sensitive areas of the nation and has declared that he intends to open over eighty percent of the continental shelf to exploratory off-shore drilling; and

Whereas Secretary Watt has publicly gone on record in opposition to the continued expansion of our National Parks System and applauded the Reagan Administration decision to gut the Land and Water Conservation Fund which is largely used to purchase new lands for preservation and enjoyment as local parks, and has further all but eliminated the Council on Environmental Quality; and

Whereas in this area of rapidly diminishing open space and funding for local conservation efforts, the position of Secretary of the Interior is a crucial one and must be filled by someone who demonstrates a true concern for our nation's natural resources; now therefore be it

Resolved, That this City Council go on record as expressing its strong disapproval of Secretary Watt's environmental record to date; and be it further

Resolved, That copies of this resolution be sent to the President and to the members of the Massachusetts Delegation to the Congress of the United States advising them of the position of this City Council.●

JACK KEMP: "TAKING PRIDE IN BUFFALO'S ECOLOGY AND ENVIRONMENT"

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. KEMP. Mr. Speaker, no collection of western New York people better epitomizes the spirit of Buffalo than the skilled and highly motivated employees and corporate leaders of Ecology and Environment, Inc., the environmental consulting firm headquartered in my congressional district.

In a single decade, under the leadership of Ecology and Environment

president, Gerhard J. Neumaier, this enterprise has grown from the vision and commitment of him and his three cofounders to a globally involved, private sector, problem-solving corporation of more than 500 employees, with the integrated skills of 75 scientific disciplines.

Throughout our Nation and abroad, Ecology and Environment is applying its unique expertise to help energy and chemical clients avoid environmental production and design mistakes which are costly in terms of corporate and political liabilities. Ecology and Environment is playing a critical role in helping to provide adequate supplies of energy and products which assure the growth of jobs and a better quality of life, not only for Americans but for other friendly governments and emerging societies.

Most important, past and ongoing activities of Ecology and Environment dramatically testify to the wisdom and cost effectiveness of applying private enterprise ingenuity to the objective balancing of our industrial, ecological, social, and political concerns.

Mr. Speaker, the story of Ecology and Environment and its contributions is told in a story written by Lou Rotterman, formerly my executive assistant, in the October 18, Sunday edition of the Buffalo News.

Respectfully, I share his article with my colleagues:

THE GOOD-GUY SUCCESS OF ECOLOGY AND ENVIRONMENT—FROM HEADQUARTERS IN CHEEKTOWAGA, A BOOMING HOMEGROWN COMPANY CLEANS UP WORLDWIDE

(By Lou Rotterman)

They've got customers in Asia, Africa, Europe, and all over the Americas. Their advice is sought and valued in the power centers of Washington, in boardrooms of international conglomerates, in distant capitals and in opulent palaces of Arab princes. They've had a hand in projects totaling $150 billion. Their profits have fueled a phenomenal growth from a nucleus of four men in 1970 to a 500-employee corporation today.

All this, and they get to be the good guys, too.

In fact, the people who make up Ecology and Environment Inc., which runs its empire from headquarters hidden away on Sugg Road in Cheektowaga, may be the ultimate kind of 20th-century good guys. What they're selling is the scientific expertise that can keep the environment clean—and not by stopping development, but by planning it carefully from the beginning and by moving rationally to correct old problems.

Ecology and Environment specializes in figuring out what effects proposed new projects will have on the environment. Its studies are interdisciplinary; that means they look at a new proposal from many angles, so that they can help the company's clients anticipate effects the projects might have in many areas. The specialists at Ecology and Environment are from fields as diverse as wildlife and range management; sanitary, chemical and nuclear engineering; and social sciences and archaeology.

Locally, the company has worked on such varied projects as a garbage study in Cheektowaga, an assessment of the impact of the Niagara River ice boom on local weather, and an analysis of converting the old downtown post office into an Erie Community College campus.

Nationally, it has helped planners with the Alaska pipeline project, synthetic fuels plant studies in the West, and hazardous waste cleanup from Arkansas to New Jersey.

Internationally, it is involved in an air- and water-quality control program in a fast-growing Saudi Arabian industrial area and in other such projects in many other nations.

"Our job is to provide expertise to private enterprise and governments to avoid design and production mistakes and to remedy mistakes when they occur," says Gerhard Neumaier, the company's hard-driving, 44-year-old president. "Mistakes cost corporations and taxpayers unbelievable sums of money. They can, and they do, cause problems that result in sickness and death and incalculable damage to our living planet."

If you are an Ecology and Environment visitor, you are probably coming from the Greater Buffalo International Airport on Genesee Street, because you probably are from out of town. You swing your car left on Sugg Road, follow it a few hundred yards and spot a modest sign, displaying the company name, on the driver's side.

You wheel hard left again down the narrow road, flanked by millet, sorghum, other high grasses and young trees, clumped together according to species. Camouflaged in foliage, its body motionless, a snowy owl may be turning its head slowly, observing your approach to the rambling one- and two-story buildings.

In comparison to the neatly mowed lawns of nearby industrial facilities, the surroundings of this complex are uncommon. They are deliberately designed to provide forage for birds and other wildlife.

Inside, the human inhabitants and their activities are unique. This is a think tank, affecting the quality of life in the near future and the next millenium. The focus here is the problem of protecting the environment and all living things while at the same time producing energy, jobs, food and other products people want to have.

Cupping his hands behind his head as he swings in a chair behind his sprawling, paper-covered desk, the energetic Neumaier exudes a mixture of enthusiasm, concern and confidence when he declares: "The world is at grips with ecological issues that have staggering implications upon the quality of human existence. What we do or fail to do will determine the future of global economies, political infrastructures and our lives within the next twenty years or less.

"Elected governments can fall to communist or right-wing dictatorships if present leaders fail to avoid ecological disaster."

Neumaier is one of the four men who founded Ecology and Environment in 1970. All the founders worked for Cornell Aeronautical Laboratories, and they realized there was a vast potential for providing multi-disciplinary scientific consulting services on complex ecological problems. Besides Neumaier, the founders were Frank Silvestro, Gerald Strobel and Ron Frank, who remain as corporate principals and directors. Their venture proved to be a good bet.

Ecology and Environment does not design or construct equipment or facilities. It does provide wide-ranging scientific expertise to consulting engineers, architects and others engaged in energy, chemical and petrochemical industries and a wide variety of enterprises that have impact on the environment. Many of its employees are "in the field"—working on construction sites and cleanup projects all over the world.

"Our firm's combined sales for consultive services—to both private-sector and governmental clients—now range at $25 annually," Ron Frank says. To serve both private and public-sector clients, the corporation maintains offices, personnel and fixed and mobile equipment in each of the ten U.S. regions of the Environmental Protection Agency, a major government client.

Ecology and Environment also provides services to the U.S. Interior, Agriculture, Commerce, Transportation and Defense departments, the Fish and Wildlife Service and a host of other federal, state and local governmental entities.

On the 22nd floor of a towering office building in Rosslyn, Virginia, across the Potomac River from downtown Washington, is an Ecology and Environment suite of offices from which all U.S. hazardous waste investigations are directed by Roger Gray, corporate national project manager, and his staff. Other offices bustle with activity in a supporting corporate facility in nearby Arlington. The corporation also maintains executives and staffs at offices in Boston, New York, Philadelphia, Cincinnati, Chicago, Kansas City, Dallas, Omaha, Denver, Billings, San Francisco, and Seattle. In Chicago alone, there are 56 scientists and other experts. Other Ecology and Environment personnel operate from offices in Jeddah, Saudi Arabia; Mexico City; Caracas, Venezuela; Santa Cruz, Bolivia; Abu Dhabi in the United Arab Emirates; Kuwait; Panama; and Natal, Brazil. And activities are conducted from Paris, Tokyo and Indonesia.

One illustration of official Washington's confidence in the corporation was Ecology and Environment's contract from EPA to study and recommend remedial action to solve a widely publicized toxic waste disaster in Southwest Missouri. In headlines, on national television and in the lexicon of voluminous Ecology and Environment reports, the crisis was described as "Denny Farm Site 1" after the last name of a farm owner in the Ozark Mountains.

The environmental emergency became known in 1979 when an anonymous informant reported to EPA that 55-gallon drums of toxic waste had been dumped on the 160-acre farm, seven miles south of the small community of Verona. There, a defunct chemical company had manufactured hexachlorophene, a germicidal soap ingredient.

From the Cheektowaga headquarters and the national project office in Rosslyn, fourteen corporate specialists, many with doctorates, were assembled from Ecology and Environment offices around the country. When they converged on the dump site, they brought analytical skills in chemistry; aquatic biology; botany; geology; environmental, civil, chemical and professional engineering; public health and safety; transportation; cost estimation; and earthwork evaluation. The investigative team determined that 150 drums had been dumped from the back of a truck in a shallow, barely covered trench on a ridge atop the White River drainage basin. In close proximity were a springfed pond, two creeks and a pasture. The containers had been left as they fell, without any attempt to segregate drums of varying toxic substances. Under heavy rainfall, the drums had corroded, causing them to leak and allowing highly poisonous substances to intermingle.

When analyzed, the wastes read like a litany of known environmental nightmares: TCDD, a highly lethal compound known best as a component of Agent Orange, the defoliant used by the U.S. Army in Vietnam; TCP; chlorinated benzene; formaldehyde; and more than a dozen other harmful and deadly substances.

After the investigation—which involved scientists working at Ground Zero in protective garb resembling the attire of astronauts—and after thousands of hours of analysis and study, Ecology and Environment recommended excavation and storage of the toxic substances in a safe and temporary structure on the site. The estimated cost: $2,486,000. A final decision is pending.

Most large chemical, energy and petrochemical producers, Neumaier believes, "are striving to be good environmental citizens."

Yet, he says, the problem of "moonlight" dumping by unscrupulous truck and vessel operators is still a major environmental concern.

To date, Ecology and Environment has worked on 3,000 dump-site problems. Additionally, its field teams and "technical assistance teams"—under contract to EPA—respond to about 2,000 emergencies a year, including rail, ship and train accidents and the scenes of hurricanes and floods which require the handling and safe disposal of hazardous cargoes.

When an ocean barge ran aground in the San Francisco Bay Area, Ecology and Environment faced the task of analyzing and safely removing cylinders of deadly chlorine gas from the vessel. Had one or more of the cylinders ruptured, some Bay residents could have been exposed to the poison gas, the same type used in World War I. The least risky solution was removal of the cargo by what Neumaier concedes was "a ticklish helicopter operation." Another time, when a "midnight dumper" injected toxic wastes into a well, under the guise of pumping gasoline on a filling station property, a corporation team had the task of preventing the poisonous substances from seeping into the Susquehanna River, a main water supply for downstream urban areas.

Ecology and Environment's contract with Saudi Arabia's Royal Commission of Ministers, calling for a comprehensive environmental assessment plan for the Yanbu port complex, is among the corporation's most challenging current efforts. Before workers from 45 nations began construction, the site was a sandy stopping-off place for camel drivers. Within twenty years, it is expected to become a modern city of 150,000.

The complex will include a 450,000-ton petrochemical plant and three refineries, fed by a 750-mile pipeline crossing the Arabian Desert from the Persian Gulf, and a gigantic shipping terminal. From the latter, the Saudis will be able to ship 1.85 million barrels of oil a day to the West. And the complex is being built directly across the Red Sea from Ras Banas, the Egyptian military base eyed by the Pentagon as a staging base for its Persian Gulf rapid deployment force.

"It's obvious why we must make sure people can breathe, super tankers can safely navigate and the sea's marine environment is protected," Neumaier says.

Another ongoing contract involves a highly publicized investigation of toxic substances infiltrating the groundwater and sewer systems in Woburn, Massachusetts, northwest of Boston.

A few of the corporation's past projects include environmental monitoring during construction of the 800-mile Trans-Alaska Pipeline from the Arctic's Prudhoe Bay south to the Port of Valdez, environmental assessment of the proposed Northern Border Pipeline from Montana to Iowa, studies for the safe transportation of liquefied natural gas in Delaware Bay and on the St. Lawrence River, a study to increase fish vegetation in the Sea of Japan and archaeological surveys in Boston and Puerto Rico.

The people of Ecology and Environment are clearly champions of the environment. So are their analyses objective?

"To meet environmental mandates promulgated by laws and regulations or for the practical necessity to protect life forms, we must be objective to be credible or we wouldn't stay in business," Neumaier replies.

"I hope I don't sound self-serving," he says, "when I say we experience great pride and satisfaction because we believe what we do benefits this and future generations. Happily, we make money in a satisfying and challenging business."

Neumaier's personal lifestyle and the methods by which he operates his corporation reflect his concern for environmental protection.

Neither plastic cups nor non-returnable soft drink containers are allowed in his offices or home. Nor are aerosol products. Any product with the potential for contaminating the food chain, air or other life-supporting necessity is barred.

He abhors waste of any resource. Some years ago, he began the practice of giving employees financial incentives to participate in motor pools, and he shares rides to and from work with coworkers.

Just as natural surroundings are the rule at his Cheektowaga headquarters, a wildlife environment is maintained on his 24-acre homestead in East Aurora.

He's unbending in the strict application of health and safety rules for his employees. For the protection of Ecology and Environment employees, subcontractors' workers and others, the company helped to pioneer the use of a wide variety of protective garb, breathing apparatus and sensing and monitoring equipment for both on-site and laboratory investigations and analyses of dangerous or potentially dangerous substances.

Neumaier predicts his 500-employee work force will continue to expand, attracting even more talent from Western New York.

"All our corporate executives, including myself, travel extensively in this country and abroad," he explains. "But it's always great to get back to Buffalo.

"We're proud to be a part of this community and we intend to stay," he emphasizes.●

HOUSE RESOLUTION TO DESIGNATE MAY 4, 1982, AS "INTERNATIONAL FRANCHISE DAY"

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. SCHEUER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

Whereas the franchise method of marketing has proven eminently successful in the aiding of small business men and women, the stimulating of economies, and the betterment of consumers the world over through quality product and service distribution; and

Whereas franchising today accounts for nearly one-third of all U.S. retail sales, spans more than forty industries, and directly employs some 4.6 million people; and

Whereas franchised businesses currently enjoy a success rate better than 95 percent; and

Whereas our nation's women and minorities are especially aided in starting their own businesses through the training and management programs inherent in business format franchising; and

Whereas franchising represents one of our nation's finest institutions, born and nourished in American free enterprise and thriving through its call to serve customers equitably; and

Whereas franchising has enabled hundreds of thousands of Americans to fulfill their dreams of owning their own businesses and will continue to provide economic opportunity to people of all classes and backgrounds; and

Whereas franchising permits the new and small businessman to compete on the same level as the large chains which are increasingly dominating our economic landscape; and

Whereas franchises have led the battle for uniform disclosure laws to assure that prospective franchise buyers are fully aware of their rights and obligations before investing in a franchise; and

Whereas franchising continues to expand internationally, effectively serving ever greater numbers of people the world over: Now, therefore, be it

Resolved by the House of Representatives of the United States of America in Congress assembled, That the President is requested to issue a proclamation designating May 4, 1982 as "International Franchise Day", and calling upon the people of the United States and those who have been served by franchising throughout the free world to celebrate such day with appropriate ceremonies and activities.●

THE PERSIAN GULF: ARE WE COMMITTED? AT WHAT COST?

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. REUSS. Mr. Speaker, I insert in the RECORD my introductory remarks from a document entitled "The Persian Gulf: Are We Committed? At What Cost?" prepared for the use of the Joint Economic Committee. The document contains questions which I posed to the administration, and the responses, concerning the commitments to the Persian Gulf that have been made by Presidents Carter and Reagan:

If the Reagan Administration has a plan for the Persian Gulf, that plan is not yet fully formulated; nor has it been presented in detail to the Congress. But this much is clear: the Administration has decided that the United States must develop the military capability to repel a full-scale Soviet invasion of the Persian Gulf oil fields, without significant assistance either from our allies or from the states in the Gulf region itself.

This is a capability which we do not now have, and which vastly exceeds the existing or projected strength of the Rapid Deployment Force.

The Reagan Administration's plan for Persian Gulf security raises important questions of constitutional authority, of foreign policy, of military policy, of economic policy and of energy policy, none of which has been adequately discussed. Because of the implications for our economic policy, the Joint Economic Committee, assisted by the Congressional Research Service, last summer initiated an exchange with the Departments of State and Defense which had the objective of obtaining a clear statement of the Administration's Persian Gulf security policy and its ramifications as the Administration sees them. The full exchange, together with commentaries prepared by the CRS on both our questions and the Administration's responses, is published here.

This is an important and disturbing document.

It suggests that the Administration is prepared to undertake "commitments" to the military security of the Persian Gulf states for which it has not requested or received Congressional approval, contrary to constitutional procedure and long-established practice.

It suggests that the Administration has defined the principal threat to the Persian Gulf in a way that differs substantially from the preceptions of our European allies, and that therefore we cannot expect full support from them in any actions we may take.

It suggests that the Administration is preparing to develop a military capability of unprecedented dimension and reach, in a part of the world whose proximity to the Soviet Union and harsh physical conditions should suggest caution to the military planner. With any level of expenditure, it is doubtful we can achieve the capability which the Administration needs.

It suggests that the Administration is planning to request from Congress in future years billions of dollars in additional military spending—dollars which have apparently not yet made an appearance in the Administration's long-term budget projections.

And it suggests that alternative approaches to the problem of energy security have not been sufficiently considered.

The question of U.S. military commitments in the Persian Gulf region is a matter which should arouse bi-partisan citizen and Congressional concern. In its answer to question Four, the Administration asserts three cases of alleged U.S. commitment to the security of Middle Eastern nations, none of which have ever been submitted to the Congress in the form of a proposed treaty obligation.

In the case of Israel, a longstanding and valued friend, no treaty for mutual security assistance has ever been requested by either side, although few would question that our friendship is and remains a constant in our national foreign policy.

In the case of Saudi Arabia, the Administration cites Presidential statements, going back to Franklin D. Roosevelt, as sufficient to establish a national military commitment to Saudi security, and backs this assertion with the statement that the Administration's—unilateral and as yet unapproved—decision to sell AWACS to the Saudis in some way underlines this alleged commitment.

In the case of Pakistan, we have a mutual security agreement which provides only that we will consult in the event of Communist aggression against Pakistan and that we will then follow appropriate Constitutional procedures. The Administration goes far beyond the terms of this agreement, to assert that "proposed security sales assistance" to Pakistan constitutes an example of "commitment" to Pakistani military security.

In these responses, the Administration has spelled out a dangerous strategic doctrine, which may return to haunt us in the months and years to come. It has asserted, in effect, a right to commit U.S. prestige, power and military might to the defense of remote areas of the world, without the advice, much less the consent, of the Congress. In so doing, it departs from a long tradition of U.S. diplomatic and constitutional history, which says that the United States is committed only when and where the Congress of the United States stipulates. In the post-World War II period alone, U.S. Presidents have repeatedly sought and received Congressional approval for such military commitments: to NATO, to the members of the SEATO, CENTO and ANZUS pacts, and even though under a cloud of doubtful information, to South Vietnam under the Tonkin Gulf Resolution in 1964. Where, except for Vietnam, U.S. policy has erred, it has often been when American Presidents have sought to create commitments without the full process of Congressional debate and approval. President Carter made just such a mistake in announcing the "Carter Doctrine" of U.S. military commitment to Persian Gulf security, without seeking a resolution of congressional approval. The Reagan Administration is now repeating and magnifying that mistake.

The Administration has defined the threat which we must be prepared to meet in the Persian Gulf as that of a direct overland attack by the armed might of the Soviet Union. While this is clearly the most dramatic potential threat, it is far from the most likely. Morover, it is extremely doubtful that measures which the Administration proposes to take in response to that threat have much bearing on other, more probable and potentially equally dangerous threats to the security of oil supplies. Surely we should have learned from our bitter experiences in Iran and Vietnam that U.S. military power, whether in the form of assistance to an indigenous government or the direct presence of U.S. military force, is not necessarily able to repel a sufficiently popular and fanatical indigenous revolutionary movement. And surely the current Iraq-Iran war should teach us that threats to the flow of oil which are likely to arise around the head of the Gulf include situations in which our military might is unavailing.

Even if the threat of an overland Soviet invasion were as probable as it is dramatic, it is not clear that there is any way, short of nuclear weapons, that the United States can project enough force into the region to provide an effective defense. The Soviet Union borders the region; our supplies must travel 7,000 miles by air and 12,000 miles by ship. Prodigious quantities of material would have to be prepositioned in the area, each of them vulnerable to pre-emptive attack. If the Straits of Hormuz were closed after the start of a Russian-American battle at the head of the Gulf, our forces could be stranded and trapped. Are we building an out-sized Naval Maginot Line?

There are many, many military uncertainties which must make even the non-expert in military planning doubt that a careful evaluation of what is militarily realistic has been done. Certainly no sign of such an evaluation appears in the following pages.

To refrain from the ironclad military commitment in the Persian Gulf toward which we are lurching does not mean that we invite a Soviet takeover. It merely means that we see merit in keeping the Soviets guessing.

As to cost, the Administration states that estimates will be presented for the 1983 budget year, with "full justification and testimony" for that year and for the FY 1983-1987 program period. Those who believed that the Reagan Administration had already proposed a dramatic build-up in our military forces may have a surprise coming. How many billions more will be required in the Persian Gulf? What will be the effect on the deficit, on interest rates, on inflation and on our civilian standard of living of these unquantified commitments?

Finally, the Administration offers no evidence of having integrated its foreign military "commitments" in the Persian Gulf with domestic and international energy policy. Specifically, the Department of Energy has increased by 30 percent those programs which will do the least to reduce oil imports, and cut by 75 percent those programs which do the most to reduce oil imports. On the international side, as the CRS commentary points out, such measures as special arrangements to guarantee our allies access to our coal, to promote third world oil and gas production through the World Bank, and to foster development of energy production and conservation technology have been neglected in the Administration's response. Much more can be done in these areas to reduce the reliance of the West on Persian Gulf oil, and so make that region a less vulnerable target for hostile intervention directed against the West.●

TIME TO PHASE OUT COMMERCE IN HIGHLY ENRICHED URANIUM

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MARKEY. Mr. Speaker, tomorrow I will be offering an amendment to H.R. 4255, the Nuclear Regulatory Commission authorization bill, which will begin a U.S. phaseout of the export of highly enriched uranium. I urge your support of this critical action. The time has come to firmly express our commitment to halting the spread of nuclear weapons.

We must recognize the dangers of highly enriched uranium commerce and reduce the circulation of this material in the world.

Uranium enriched to greater than 90 percent U^{235} is a favored substance for the design and manufacture of atomic bombs. Only 10 kilograms of this material could be used as the fissionable material for a nuclear weapon.

The only barrier for making a fission chain reaction bomb is the lack of an adequate supply of fissionable material; the design of the bomb is relatively

easy. We must not ease the accessibility to this deadly substance.

No nuclear electric powerplants will be affected by this amendment. All can operate on low enriched uranium.

No nuclear research reactors will be shut down. The amendment includes an escape clause whereby reactors which could not convert from using highly enriched to low enriched uranium would still be able to receive highly enriched uranium until such time as they could convert.

The future shift from highly enriched to low enriched uranium will not cause any technological deficiency in reactors. Any normal tasks of power or research reactors could be completed with low enriched uranium.

Export licenses for highly enriched uranium shipments from the United States are pending for a number of nations. This amendment would demand an intensive study of these licenses and a future cutoff of highly enriched uranium to all nations.

The amendment is consistent with broad proliferation principles expressed by the President on July 16, and also consistent with a Senate resolution of July 17, passed 88 to 0, which called for elimination of highly enriched uranium in research reactors.

This amendment is supported by a coalition of groups, including the Union of Concerned Scientists, the Natural Resources Defense Council, Critical Mass Energy Project, Council for a Livable World, Friends of the Earth, the Center for Development Policy, and Americans for Democratic Action. The amendment also has been cosponsored by 30 of your colleagues: PETER RODINO, BOB EDGAR, ANTHONY BEILENSON, JULIAN DIXON, DON EDWARDS, ROBERT KASTENMEIER, BARBARA MIKULSKI, PARREN MITCHELL, JAMES OBERSTAR, BERKLEY BEDELL, TED WEISS, FRED RICHMOND, DALE KILDEE, PAT WILLIAMS, BARNEY FRANK, CLARENCE LONG, LEON PANETTA, LES AUCOIN, HENRY GONZALEZ, RONALD DELLUMS, SAM GEJDENSON, WALTER FAUNTROY, JOHN CONYERS, WILLIAM LEHMAN, THOMAS FOGLIETTA, MICHAEL BARNES, GEORGE MILLER, THOMAS DOWNEY, WILLIAM GRAY III, CHARLES SCHUMER, and JOSEPH SMITH.

Your support of this amendment is vital to insure passage of this sensible measure which will lend substance to the rhetoric of nuclear nonproliferation.

In addition, I wish to submit the following two statements from public interest groups for inclusion in the RECORD:

CRITICAL MASS ENERGY PROJECT,
Washington, D.C., October 27, 1981.

DEAR REPRESENTATIVE: On Wednesday, October 28, the Nuclear Regulatory Commission authorization bill will come before the House. The Critical Mass Energy Project urges you to support Representative Edward Markey's amendment to H.R. 4255 which prohibits the granting of export licenses for highly enriched uranium.

The dangers posed by the proliferation of nuclear materials becomes more apparent each year. The international spread of weapons-grade nuclear material increases the likelihood of nuclear terrorism and atomic war. Currently around 125 research reactors world-wide are using highly enriched uranium fuel suitable for weapons production. Among the countries importing this fuel are the potential weapons states of Pakistan and South Africa. Highly enriched uranium can be used for nuclear explosives while the less enriched is more difficult to convert. This amendment would prohibit the export of uranium enriched to a level greater than 20 percent U-235.

The highly enriched uranium that would be excluded from export under this amendment is not needed for commercial and normal research reactors, where fuel enriched less than 20 percent is suitable. The amendment would not prevent U.S. fuel exports, but would make them less vulnerable to conversion to nuclear weapons.

We hope that you will vote in favor of this important amendment.

Sincerely,

ANNA GYORGY,
Director.

AMERICANS FOR DEMOCRATIC ACTION,
Washington, D.C., October 22, 1981.

DEAR REPRESENTATIVE: ADA strongly urges you to support Representative Markey's amendment to HR 4255, the Nuclear Regulatory Commission authorization bill for fiscal year 1982 and 1983, which prohibits the granting of export licenses for highly enriched uranium (HEU). The amendment will help control commerce in this dangerous, weapons-useable material.

There are over 300 research reactors throughout the world; of these around 125 use HEU fuel suitable for weapons production. Many of these reactors are situated in potential nuclear weapons states including Pakistan, South Africa, Thailand, Columbia, and Germany. Depending on the purity of the U-235 isotope used and the physical characteristics of the weapon's components, a nuclear bomb can be made from 10 to 20 kilograms of HEU. It is the material favored for the design and manufacture of simple, reliable atomic weapons.

This amendment will not cause the shutting down of any reactor for lack of fuel. Nuclear electric power plants use uranium enriched to less than 20 percent which is not affected by the amendment. In addition, the amendment allows HEU to be continued to be exported to those countries which possess research reactors that the NRC determines cannot feasibly be converted to use low enriched uranium.

Nuclear proliferation represents a dangerous and growing threat. Representative Markey's amendment is strong, effective legislation that helps to minimize this threat and does not interfere with any country's nuclear program.

Sincerely,

LEON SHULL,
National Director.●

ROBERT H. GOLDSBOROUGH ON SOLIDARITY—BUDGET CUTS—BLACK CONSERVATISM

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. McDONALD. Mr. Speaker, there has been much concern of late concerning budget cuts and the effect it will have on the poor. We had the spectacle of Solidarity Day here in Washington, implying an alliance with Solidarity of Poland to throw off the yolk of communism. At the same time we heard voices alleging representation of the black people of America that a cut in Government spending would be a bad omen for those black people.

Yet in a very brief column by Robert H. Goldsborough in his Washington Dateline, we have an expose of the true nature and cost of Solidarity Day. As well he examines the philosophy of economist Dr. Thomas Sowell, a black cum laude graduate of Harvard University, whose position is that the removal of government from our lives, will in fact, benefit the black people of America.

I know that my colleagues as well as other Americans will be very much interested in some of the abuses of the CETA program that Mr. Goldsborough exposes and concludes his column with. I commend this brief column that covers much ground by Mr. Goldsborough and hope that he will continue such exposures for all to read. His column follows:

[From the Washington Dateline]

BUDGET CUTS AND THE BARE NECESSITIES

(By Robert H. Goldsborough)

Ronald Reagan, is he Saint or Sinner? If you believe the Solidarity crowd that demonstrated in D.C. on September 19, the President is a number one devil * * * enemy of the poor * * * of the unions * * * of the aged * * * of the blacks * * * of just about everybody in America, with the exception, of course, of big business.

Benjamin Hooks, executive director of the National Association for the Advancement of Colored People, told the partisan crowd, "We will not sit by, while our bare necessities of life are taken from the needy and given to the greedy."

Hooks also charged that the policy of the present administration is a "ticking time bomb" and warned of a "clear and present danger" of upheaval in American Society if social needs are not met.

Some of the demonstrators spent up to a thousand dollars to come to D.C. to sell the media on their rhetoric. If you settle on an average crowd estimate of 200,000 (TV said 300,000; the Washington Post said 250,000; the Baltimore Sun said 200,000; and one crowd control policeman told me 150,000) and use travel agent cost estimates of $200 average per person for food, lodging and travel, you have a conservative estimate of $40 million dollars spent by the "needy" demonstrators. That figure does not include

the cost of extra D.C. police, cleanup crews or what the unions spent to rent the subway for the day. That $40 million would provide a lot of "bare necessities". . . at least food for two million needy persons for a week. Obviously the demonstrators were not all that concerned about helping the truly needy.

Contrary to Hook's claims that the needy will suffer because of program cuts, the noted economist Dr. Thomas Sowell asserts that studies show that many government programs actually work to the detriment of blacks. On a Meet the Press interview, the day after the demonstration, Sowell said that his research indicates that blacks would fare better without government programs and without a minimum wage law which, in the opinion of Dr. Sowell, is one of the main causes of unemployment among teenage blacks.

Sowell is no white conservative; he is a black cum laude graduate of Harvard with a PhD from the University of Chicago. He charged that black leaders of high-visibility black organizations such as the NAACP and the Urban League benefit financially from federal government spending and hence their views are purely subjective.

Let's examine Hooks' assertion that Reagan's budget-cuts will hurt the needy and take away bare necessities. One of the most highly touted federal programs to help the needy and chronically unemployed was the CETA program (Comprehensive Employment and Training Act). It was designed to train the unskilled so they could obtain jobs. CETA programs have cost the taxpayer (the "greedy" according to Benjamin Hooks' dictionary) $50 billion since 1973.

James Bovard, in an Inquiry magazine article listed some examples of "bare necessities" that your tax dollars have purchased.

CETA gave $41,000 to a feminist collective to perform in the nude (women only) the "Leaping Lesbian Follies";

CETA spent $30,000 to build an artificial rock for rock climbers to practice on;

CETA doled out $384,000 for a county cat, dog and horse survey;

In Arizona, CETA paid county employees to attend dance classes;

In Atlanta, a Communist activist was paid $500 a month to, according to his testimony, "organize for demonstrations and confrontation";

In Los Angeles, CETA gave Gay Community Services $640,000 to provide "education about gay life styles and gay people's problems";

In Baltimore, the city council passed a new dog license law and then hired a score of CETA workers to hunt down violators;

In Miami, the director of a CETA youth program had to resign after officials found $200 million worth of cocaine in his garage;

In 1979, in 15 cities, 64 CETA operations were tagged with indictments for embezzlement, false statements, misuse of funds, kickbacks, theft and bribery;

CETA gave $261,933 to a Washington, D.C. arts organization to assist nonprofit community arts organizations in applying for CETA money.

These then are the phony "needy" which will lose their "bare necessities" under Reagan's bi-partisan cuts. The truly needy will always be helped; but only if our system of government survives. the rhetoric ridden rally called Solidarity was the official public kick-off of a carefully orchestrated campaign of fear and propaganda which will attempt to make the American voter believe that Ronald Reagan is only interested in helping the rich at the expense of the poor.

In reality, Reagan is trying to help the poor by saving America's great economic system from collapsing under the weight of a trillion dollar debt caused by 40 years of liberal-socialist government programs—a debt which in turn has led to double digit inflation, high unemployment and high interest rates.

The AFL-CIO leadership, Benjamin Hooks and his NAACP, and other assorted fuzzy liberals should hide their heads in shame. They helped cause the problems and yet they will not help Reagan solve them. Shame, shame.●

SBA 8(a) PILOT PROGRAM

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. WOLF. Mr. Speaker, I want to bring to the attention of my colleagues the serious problems with the 8(a) pilot program which was intended to encourage small business development. The program was originally designed to assist minority-owned businesses that compete for high technology Government contracts. The program permits SBA to award contracts to minority-owned businesses without competitive bidding. In spite of its noble goal, the 8(a) pilot program has had a history of mismanagement and the clear possibility of corruption. What follows are articles that appeared in the July 27 U.S. News & World Report and the October 21, 1981, Washington Post. I hope every member will examine these articles before H.R. 4500, which would extend the 8(a) pilot program, is considered by the House.

WITH SBA HELP, HOT DOG VENDOR MAKES MILLIONS

(By Jack Anderson)

How does a hot dog vendor get to be a $8.9-million-a-year defense contractor on top-secret projects virtually overnight?

It can happen, if you're a minority businessman and you work through the Small Business Administration.

Buck Wong is a wealthy Chinese-American and, therefore a bona fide underprivileged minority businessman. He is president of Arcata Associates Inc., which held the hot dog franchise at the Stanford University stadium.

Since January, Arcata has also been the prime contractor for the Army Combat Development Experimentation Command, a top-secret facility that uses sophisticated computer analysis and laser technology to test tanks, helicopters and aircraft under simulated combat conditions.

Wong managed to beat out a multimillion-dollar engineering firm, BDM Corp., for the contract, even though his company's only apparent expertise in defense work consisted of a maintenance contract at an Air Force base. (Later, Wong hired some "technical consultants" with SBA funds including a typist who happened to be his girlfriend.) For five years, BDM had run the analysis program, and last year it confidently applied for a five-year, $44.5-million renewal contract. BDM had the Army's warm endorsement.

But it was Wong's company, with no experience in sophisticated computer testing, that got the contract. BMD subsequently sued.

Wong slipped in the back door, through the SBA's so-called "8A pilot" program, which was designed to help small businesses stay afloat by giving them non-competitive government contracts. It was aimed specifically at minority-owned companies.

At the time Wong got the defense contract, the head of the 8A program, William Clement, was a client of Wong's business-brokering service. As part of his brokering service, Wong placed an ad in The Wall Street Journal seeking a business for Clement to buy. Wong's firm also arranged a personal loan for Clement through New York banks and prepared a "buyer profile" that described Clement as a high government official who "will be able to use his numerous contacts to market effectively to the government."

Apparently, Wong expected something in return for boosting Clement. According to sealed court documents reviewed by my associates John Dillon and Ron McRae, former Wong associate Charles Hanes testified that "Wong struck up a very close personal relationship with Mr. Clement." Wong told Hanes that "one day Mr. Clement owed him."

The Army objected strenuously to the choice of Arcata for the contract. But SBA, which through its 8A program could virtually compel acceptance of its choice, gave assurances that the Arcata award was aboveboard. The agency then signed a contract with Arcata a few days before the Reagan administration brought in a new team.

Arcata didn't have anyone who could do the job the Army wanted, so it subcontracted over half the work to Planning Research Corp. That company in turn hired many of BDM's employes, who had been laid off when their firm's contract wasn't renewed.

The net result of the minority businessman's entry into top-secret defense work is this: the subcontractor that Wong's firm hired, using employes of the old contractor, is getting 35 percent of the money. Wong's firm is getting the other 65 percent in management fees. The Army is getting roughly the same services it got before.

The SBA's 8A pilot program expired last March and is up for congressional renewal. Because the Army objected to having its contracts assigned by the SBA, bills introduced in the House and Senate would require the president to designate a civilian agency to funnel the contracts to minority businesses.

[From the U.S. News & World Report, July 27, 1981]

SBA ENTERS THE FRAUD-AND-WASTE HALL OF FAME

(By Orr Kelly)

Only in a slapstick comedy would one expect to find a government agency that goes into business with the Mafia, bankrolls a con game, tinkers with the nation's security and showers money on "truly needy" millionaires.

But the story of the Small Business Administration is not a comedy for the taxpayers. It would be funny only if it did not cost so much.

An agency bedeviled by mismanagement, infested with politics and tainted by corruption, the SBA was established in 1958 to aid small businesses with low-interest loans and practical advice. It is also responsible for

handing out millions of dollars each year in disaster-assistance loans.

Since then, it has made 417,488 small-business loans worth 30.4 billion dollars and provided 1.9 million disaster loans worth 8.8 billion. It now employs 4,400 persons in 103 offices throughout the country and expects to grant loans or to guarantee bank loans totaling 6.4 billion dollars this year.

Serious problems ranging from criminal misconduct to millions in uncollected bills, plague SBA programs. Although the agency is supposed to recover most of the money it hands out, its records show that it has gone 5 billion dollars in the hole in its 23-year life.

Particularly irritating to investigators is the way some individuals have managed to live high on the hog because of dealing with SBA.

While one SBA-backed firm in Gaithersburg, Md., was running in the red, the net worth of its owner soared in four years from $153,500 to more than 1.1 million. And a Los Angeles contractor backed by SBA saw his net worth grow from a little more than a half-million dollars to 3.4 million dollars in a two-year period.

In another case, investigators found a consulting firm hired without competition, that was charging the government for tuition for the children of company executives and for the lease of a Jaguar, a swimming pool, a tennis court and oil paintings.

Here, gleaned from the records of the SBA's inspector general, the General Accounting Office and the Senate Small Business committee, are four documented cases that illustrate some of the more serious problems afflicting one of Washington's most seriously troubled agencies.

IN BUSINESS WITH THE MOB

While the U.S. government spends millions to fight the Mafia, the SBA went into partnership with Irwin Weiner, a Chicago man described in congressional testimony as linked to "major organized-crime figures" and "thought to be the underworld's major financial figure in the Midwest."

The unusual arrangement resulted from the SBA's effort to deal with a serious problem faced by small contractors. They are required to post bonds to guarantee that they will finish work they have contracted to do, but many of them find if difficult, if not impossible, to provide such a guarantee, known as a surety bond.

To solve this problem, the SBA set up a program in which insurance firms would provide bonds, with 90 percent of the amount guaranteed by the SBA.

The assumption was that, because the private insurance firms would be responsible for paying part of the losses, they would be just as careful with the federal money as they were with their own.

In many cases, the program has worked as planned. Some 30,000 small contractors have been aided in securing more than 6 billion dollars' worth of business. But the program is also subject to severe abuse, as investigators learned when they delved into the operations of Weiner's American Bonding Company.

From the beginning of the program in the early 1970s, Weiner's firm was among the most active in the Chicago area, writing 933 bonds worth 66 million dollars. But then, in 1978, a flood of claims descended on SBA because contractors bonded by Weiner's firm failed to finish their contracts. Defaults quickly mounted into the millions.

Theoretically, Weiner lost, too. But investigators suspect that the loss of his 10 percent share of the bonds was only a minor irritation. Unknown to SBA officials, companies like Weiner were brought in to finish up the jobs—at exorbitant expense.

In one case uncovered by the Better Government Association in Chicago, a contractor was hired to build a new structure for the Morningstar Baptist Church in Peoria, Ill., and obtained a surety bond through Weiner's firm.

Long before finishing the job, the contractor went bankrupt. Another company associated with Weiner finished the church—with the SBA footing much of the bill—for far more than the original estimate on the job. The cost to the taxpayers, which included a double payment for the roof on the church, totaled $339,930.

So far, the SBA has had to pay out more than 2 million dollars to cover defaults under the bonds Weiner's firm wrote—and the toll is still mounting.

Now, the whole SBA surety-bond program is being probed by a grand jury in Chicago.

BANKROLLING A CON GAME

When SBA officials heard that Sandra Brown wanted to form a Small Business Investment Company, they were delighted. She would be the first woman to head such a firm—a symbolic breakthrough in the government's effort to provide opportunities for women to compete in big-time financing.

An SBIC is a firm, usually controlled by a bank or wealthy investors, set up to make loans to small businesses. For a shrewd operator, it can be a license to make money.

The investors have to put up some money of their own, but most of the funds have been provided by the government or by banks through government-guaranteed loans. There are risks. But the government puts in as much as $4 for every dollar from the investor, and this leverage makes it possible for an SBIC to garner large profits on a relatively small investments—as many of them have done.

This opportunity for large profits was deliberately built into the program. The belief was that this would save government money in the long run by putting the responsibility for choosing and helping the small businesses on the private investors rather than on the staff of the SBA.

There have long been reports of problems with the program, as with so many of the agency's programs.

SBA Inspector General Paul R. Boucher took a look at the operations of the SBIC's over a three-year period and reported in a special survey last year that 42 percent of them had been cited for significant violations of rules or regulations. One SBIC, for example, was caught charging what amounted to 40 percent interest.

Nothing, however, had prepared SBA officials for their expensive brush with Sandra Brown. A New York wheeler-dealer involved in buying and selling businesses, Brown had published a magazine and written a column of financial advice in a national magazine as well as The American Express Handbook for Women. In 1977, she formed the First Women's Small Business Investment Corporation.

Officials of SBA did not check up on the companies that Brown's outfit was supposedly lending money to.

Many of the "small businesses" were simply paper fronts for a giant con game that victimized the SBA and a group of banks to the tune of more than 10 million dollars.

By the time Robert Morgenthau, Manhattan district attorney, took a hard look at her operations and secured an indictment early last year, Brown had taken the SBA for $3.4 million. Four lending institutions and her own firm had been hit for more than $6 million.

Investigators are still trying to find out where all the money went. Some of it, they found, paid for three townhouses, a condominium, a ski lodge, a horse farm, two boats and a helicopter—not exactly the kind of assistance to small business that the SBA had in mind.

Brown was convicted in December of 41 counts of grand larceny and conspiracy and is now free on bail pending appeal. And SBA officials are still trying to figure how they came to bankroll one of the biggest con games in New York history.

TINKERING WITH NATIONAL SECURITY

Starting in 1971, BDM, a research-and-development company based in McLean, Va., had operated a sophisticated electronic testing system for the Army at Fort Hunter Liggett, Calif. The tests—actually large-scale mock battles involving scores of tanks, planes and helicopters—are designed to tell the Army which tactics will work and which will not in actual warfare. How well the tests simulate the realities of battlefield situations could determine whether American forces win or lose in some future combat.

Early last year, when the 9-million-dollar-a-year contract came up for renewal, the SBA stepped in, took over the contract itself and handed it to another firm. Much of the successor firm's previous experience had consisted of serving hot dogs to football fans at the Stanford University stadium in California.

This extraordinary power by the Small Business Administration to pass out contracts without competitive bidding is part of a program approved by Congress to help minority-owned or economically disadvantaged businesses to get a foothold in the lucrative field of high technology.

In this case, the contract was given to Arcata Associates, Inc., of Burlingame, Calif.

Arcata, which is not related to the larger Arcata Corporation, qualified because it is headed by a Chinese American, Buck W. Wong, who also holds a master's degree in business administration from Stanford.

Although the Army found that Arcata was lacking in experience and management to handle the contract, SBA insisted that it was qualified. Army officials reluctantly went along on the deal.

Arcata quickly subcontracted 67 percent of the professional work to a large competitor of BDM.

In its first six months, Arcata got a satisfactory rating from the Army, but its performance was not good enought to win the full incentive award that it would have received had it done a first-rate job.

How much impact the takeover of the Army test program by the SBA will have on national security may never become apparent. But Army officials say that, if they had had the choice, a contract of this importance would have been awarded on a competitive basis to the best-qualified firm instead of being handed to an inexperienced firm.

There is the possibility that Arcata will learn enough from its Army contract to set out on its own, unaided by the SBA, in the field of high-technology contracting.

If it does, it will be a rare exception. The experience with the SBA's highly controversial program for providing government con-

tracts to small businesses is that most of the businesses never graduate. They cling to the program year after year, blocking other firms from participating. Of 4,598 companies in the program, only 166 have gone out on their own.

As a result, the General Accounting Office, which keeps an eye on federal programs for Congress, recently described this effort to aid small businesses as "a promise unfulfilled." The GAO went on to charge that the aid had gone to a select group of companies that "view the program as an end in itself."

PROFITING FROM DISASTER

When a devastating blizzard swept through eastern Massachusetts and Rhode Island on Feb. 5-7, 1978, the SBA came under intense pressure to provide help in a hurry.

The agency brought in two permanent employes and hired 180 temporary workers to verify storm-damage claims, authorize payments and disburse checks. Within weeks, they made 12,000 disaster-assistance loans totaling 121.4 million dollars.

The result was another disaster—for the taxpayer.

Among those hired were George Wattendorf, his daughter, his secretary and a number of personal friends.

They are now accused in federal indictments of using scores of aliases to obtain some 40 disaster loans totaling more than $500,000.

It was only because a clerk noticed that many loan applications carried the same Social Security numbers, but different names, that an investigation was launched.

According to the indictments, Wattendorf, who has since died, and his associates submitted phony loan applications buttressed by pictures of property owned by others that had been damaged in the blizzard. In its eagerness to help those in distress, SBA's inexperienced crew of temporary employes simply sent out the checks as fast as the applications came in.

Investigators are now trying to determine how widespread Wattendorf's operation was. They have already found records showing that he had obtained disaster loans in Florida and Kentucky and possibly in Mississippi and Texas as well.

What is even more worrisome is that SBA's get-the-money-out-fast policy may well have created other large losses of which it is not even aware.

Last year alone, 1.2 billion was handed out in 70,000 disaster loans. Although that amounted to 69 percent of the loans made during the year, the disaster-loan program has been treated as a nuisance, a "program that was constantly interfering with the agency's 'real' mission," according to a recent report by an advisory group made up of SBA employees.

Related to the sloppiness in handing out money to those who claim to be disaster victims is the agency's failure to collect on the loans. Earlier this year, the Senate Small Business Committee was told that nearly 1.2 billion dollars in disaster loans is past due, delinquent, deferred or in liquidation.

ROOTS OF THE PROBLEMS

Wherever investigators look, the SBA seems to overflow with problems, most of them stemming from pressure to disburse cash without provisions for adequate safeguards.

The agency has also been a political football. In a recent case, the U.S. Merit Systems Protection Board summed up the agency's reputation this way: "The SBA has long been regarded as an agency that is unusually subject to partisan political influence, and has often been involved in controversy over charges of political abuse of the merit systems."

Perhaps most ironic is the accusation that SBA officials have done much of the procurement for the agency through noncompetitive contracts, in effect squeezing out small businesses that might have competed for those contracts.

Some congressmen think the agency is so badly jinxed that it should simply be scuttled like a contaminated ship. But Senator Lowell P. Weicker, Jr. (R-Conn.), chairman of the Senate Small Business Committee, insists that SBA can be reformed and saved.

That task is now up to Michael Cardenas, a Fresno, Calif., accountant who is the SBA's new administrator. He says his first goal is to change the public image of the agency.

But he has been hampered by difficulty in finding qualified people willing to work for SBA. He has succeeded in signing on only a handful of applicants who meet his standards for approximately 100 vacancies.

Yet to be seen is whether the Reagan administration can rehabilitate a problem agency with a reputation for handing out government money in ways that has even some of its strongest supporters dismayed.●

"TEX" WILLIAMS: RETIREMENT BECKONS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ANDERSON. Mr. Speaker, this Friday the Los Angeles County Building and Construction Trades Council will host a dinner honoring the retirement of S. W. "Tex" Williams. Tex has served as business representative of the council for some 14 years now; his presence will be sorely missed.

Tex was born in—of all places—Abilene, Tex., in 1918. Graduating from Abilene High School in 1935, Tex served in the Army until 1940 after which he returned to his studies and completed courses in arc welding, acetylene welding, burning, and blue print in 1941. After serving again in the Armed Forces during the Second World War, Tex moved further west and finished a course of study in public speaking and labor relations at the Long Beach City College. A lifelong enthusiast of education, Tex completed a program at the Building Trades Business Agent's Institute at Berkeley University in 1977 at the age of 59.

Tex has been a dedicated fighter for the union cause all his adult life. In 1954 he was appointed a member of the Iron Worker's Local 433 Executive Committee. In January of 1955, he became business agent, a position he held until 1961 when Tex was elected business manager, financial secretary and treasurer of the local. During his tenure as business manager, Tex became involved in many activities including serving as trustee of the health and welfare plan, pension plan, vacation plan, and apprenticeship training program.

In 1967 Tex was appointed to his position as representative of the Los Angeles County Building and Construction Trades Council. In addition to his regular duties with the council, Tex found time to head the negotiating committee for the Harbor Pre-Cast Agreement in 1968, 1971, 1974, 1977, and 1980. He has also served on the Employment and Training Advisory Council of Long Beach, and he participated in the Negotiation of the Master Turf Agreement in 1977 and 1980.

My wife, Lee, joins me in wishing "Happy Trails" to Tex along with his wife, Haroldine, daughter and son-in-law, Susan and Bill, and granddaughters Jami, Shannon, and Gina.●

CONGRESSIONAL SALUTE TO THE HONORABLE EDWARD F. SADLOWSKI OF NEW JERSEY, DISTINGUISHED CITIZEN, COMMUNITY LEADER, AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ROE. Mr. Speaker, on Sunday, October 11, the people of the city of Passaic, my congressional district, and State of New Jersey gathered together at the Knights of Columbus Hall, Wallington, N.J., in testimony to a distinguished citizen, champion of veterans, outstanding community leader, and good friend, the Honorable Edward F. Sadlowski of Passaic, N.J., whose lifetime of good works and standards of excellence in his daily pursuits have truly enriched our community, State and Nation. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to him and share the pride of his good wife Stasia; their five children, Edward, Jr., Christine, Kathleen, Anthony, and Thomas; son-in-law Edward; and granddaughter Rachel in celebrating this milestone of achievements in their family endeavors.

Mr. Speaker, Ed Sadlowski is an outstanding individual who throughout his lifetime has earned the respect and esteem of all of us who have had the good fortune to know him. He is a nationally recognized champion of our veterans and their families and is a longstanding community leader in the city of Passaic.

He was educated in the Passaic public schools and graduated from Passaic High School. He is a graduate of the Famous Artists Schools of Con-

necticut and has attended evening classes at the Academy of Arts in Newark for 4 years, and Passaic County Technical School in industrial arts.

A long-time employee of the Manhattan Rubber Co., Ed is currently employed as a maintenance construction craftsman by the Garden State Parkway Authority.

A 4-year veteran of the U.S. Marine Corps, Ed has seen active duty in the Pacific theater during World War II. It was only natural that he would develop an intense sensitivity to the interests, needs, and well-being of his fellow veterans of all wars. He found expression for his concern through the American Legion, which for over a decade absorbed most of his available time and effort. He served 3 years as commander of Rosol-Dul Post 359, American Legion, 4 years as president of the Rosol-Dul Home Association, 4 years as vice commander of the Passaic County American Legion, 2 years as Passaic County membership chairman, one term as commander of the Passaic County American Legion, and commander of the Passaic Veterans Alliance. He held many other offices and served on numerous committees, as member and chairman, on both local and county levels. His enthusiasm and dedication has won him the profound respect and admiration of his coworkers and fellow Legionnaires.

Mr. Speaker, Ed has also made an outstanding contribution in promoting and encouraging community improvement and has actively participated in many charitable and civic endeavors to help improve the social, cultural, and educational endeavors of our community, State, and Nation. He is a member of the Holy Rosary Honor Guard, served 3 years as president of the Holy Rosary Elementary School Board, is past president of lower Dundee Improvement Association, and was a member of the Passaic Criminal Justice Planning Committee. He was a candidate for city council in Passaic during the spring of 1977, finishing sixth in a field of 14 and earning a place in the runoff election in which he placed fifth.

Mr. Speaker, several years ago I had the opportunity to join with you and our colleagues in extending our heartiest congratulations to Ed Sadlowski when he was chosen as a recipient of the highly coveted Annual Distinguished Citizens Award of the members of the most prestigious "We Are Fighting for Your Life" organziation, the Passaic Country Chapter, American Heart Association. It is a pleasure to again seek this national recognition of Ed's noteworthy contributions to the quality of life and way of life here in America.

For his personal commitment, richness of wisdom, warmth of friendship, and sincerity of purpose in everything he sets out to do as well as his dedicated leadership achievements on behalf of our Nation's veterans, we do indeed salute a good friend, distinguished citizen, outstanding community leader, champion of veterans, and great American—the Honorable Edward F. Sadlowski of New Jersey.●

A PARLIAMENTARY REFERENCE GUIDE TO THE CONGRESSIONAL BUDGET ACT

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. MICHEL. Mr. Speaker, I have assembled information which I hope will be of assistance to the Members in our deliberations with respect to the various technicalities of the Budget Act. I am placing in the CONGRESSIONAL RECORD today this material which the Members may wish to preserve for ready reference.

I have devoted considerable time and great care in preparing this documentary material and I hope it will prove to be of value to the membership of the House of Representatives.

PARLIAMENTARY REFERENCE GUIDE TO THE CONGRESSIONAL BUDGET PROCESS (TITLE III OF PUBLIC LAW 93–344)

Code	Title	Proper vehicle	Report		Passage		Committee of conference			Congress completes action
			House	Senate	House	Senate	Sent to Conference	Conference report agreed to by— House [1]	Conference report agreed to by— Senate	
1	First Required Concurrent Resolution on the Budget (Sec. 301) (H. Rept. No.—).	H. Con. Res. (or) S. Con. Res.	301(d).[2]	301(d).[2]	10 hr+4 hr debate:[3] 305(a).[4]	50 hr+4 hr debate: 305(b), 305(c).[4]	7-day limit: 305(d).	5 hr debate: 302(a), 305(a)(4), rule XLIX.	10 hr debate: 302(a), 305(c), 305(e).	May 15 deadline: 301(a), 302(a), 303.
1(a)	Permissible Revision of First Required Concurrent Resolution on the Budget (Sec. 304) (H. Rept. No.—).	H. Con. Res. (or) S. Con. Res.	304	304	10 hr debate: 305(a).	50 hr debate: 305(b), 305(c).	7-day limit: 305(d).	5 hr debate: 302(c), 304(a)(4), rule XLIX.	10 hr debate: 302(c), 305(c), 305(e).	302(c), [302(b)].
2	Second Required Concurrent Resolution on the Budget (Sec. 310) (H. Rept. No.—).	H. Con. Res. (or) S. Con. Res.	310(a).[5]	310(a).[5]	10 hr debate: 305(a).	15 hr debate: 305(b), 305(c).	7-day limit: 305(d).	5 hr debate: 302(c), 305(a)(4), rule XLIX.	10 hr debate: 302(c), 305(c), 305(e).	Sept. 15 deadline: 302(c), 310(b), 310(f), 302(b); no adj. until action is completed.
2(a)	Permissible Revision of Second Concurrent Resolution on the Budget (Sec. 304) (H. Rept. No.—).	H. Con. Res. (or) S. Con. Res.	304	304	10 hr debate: 305(a).	50 hr debate: 305(b), 305(c).	7-day limit: 305(d).	5 hr. debate: 302(c), 305(a)(4), rule XLIX.	10 hr debate: 302(c), 305(c), 305(e).	302(c), [302(b)].
	RECONCILIATION PROCESS									
2(b)	Reconciliation Bill or Resolution as Result of Directions in the Second Required Concurrent Resolution on the Budget [Sec. 310(c)(d)(e)(f)].	H. Con. Res. (or) S. Con. Res.	310(c)	310(c)	20 hr debate: 310(e), [305(b)].				10 hr debate: 310(a)[305(c)].	Sept. 25 deadline: 310(d), 310(f); no adj. until action is completed.

[1] Rule XLIX of the House of Representatives provides that the vote by which the conference report on the concurrent resolution on the budget was agreed to in the House (or by which the concurrent resolution itself was adopted in the House, if there is no conference report) shall be deemed to have been a vote by the House in favor of a joint resolution establishing the amount of the statutory limit on the public debt at the appropriate level set forth in the concurrent resolution on the budget. This rule was added in the 96th Congress by Public Law 96–78 (approved September 29, 1979, 93 Stat. 589).

[2] April 15 deadline.

[3] Report available for 10 days.

[4] The Full Employment and Balanced Growth Act of 1978 (Public Law 95–523, section 303(b)) amended this subsection by adding subparagraphs 305(a) (3) and (4), and making conforming changes, relating to debate and amendments on economic goals and policies during consideration of the first concurrent resolution on the budget in the House (a similar addition was made in section 305)(b) (3) and (4) relating to Senate procedure).

[5] May be filed anytime.

How To Use This Chart

This chart shows the different stages of the budget process in Congress and at each point the related sections of title III of the Congressional Budget Act of 1974.

The budget process consists principally of the passage of 2 required concurrent resolutions: The first (code 1) which is considered the "target" resolution to guide the Congress in their deliberations on the funding bills: and the second (code 2) which is the

final and binding budget for the oncoming fiscal year. The law allows the Congress to revise either at any time (code 1(a) and 2(a)). The second (code 2) or final resolution may require the Congress change, modify, or enact new laws to be able to stay within the levels set in the second resolution. Any such bill or resolution is entitled a reconciliation bill or resolution (code 2(b)).

To find the desired provision of the 1974 Congressional Budget Act, locate the measure of interest in the column labeled "Title." To find the requirements for particular action on that measure, follow the row across the page to the column labeled by the desired activity. Bracketed citations refer to sections which have partial application.

TITLE III—CONGRESSIONAL BUDGET ACT OF 1974 (PUBLIC LAW 93-344)

SECTION 300—TIMETABLE

SEC. 300. The timetable with respect to the congressional budget process for any fiscal year is as follows:

On or before	Action to be completed—
Nov. 10	President submits current services budget.
15th day after Congress meets.	President submits his budget.
Mar. 15	Committees and joint committees submit reports to Budget Committees.
Apr. 1	Congressional Budget Office submits report to Budget Committees.
Apr. 15	Budget Committees report first concurrent resolution on the budget to their Houses.
May 15	Committees report bills and resolutions authorizing new budget authority.
May 15	Congress completes action on first concurrent resolution on the budget.
7th day after Labor Day.	Congress completes action on bills and resolutions providing new budget authority and new spending authority.
Sept. 15	Congress completes action on second required concurrent resolution on the budget.
Sept. 25	Congress completes action on reconciliation bill or resolution, or both, implementing second required concurrent resolution.
Oct. 1	Fiscal year begins.●

HONORING A POSITIVE BUSINESS FORCE—FRANCHISING

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. SCHEUER. Mr. Speaker, all too often in recent months, we, as a nation, have been subjected to reports on the American economy that paint a dreary picture in drab colors. While we acknowledge the economic challenges that confront us daily, however, let us never forget the blessings that are ours as a people.

For it is by counting our economic blessings, concentrating on our successes, and honoring the positive business forces in our country today that we shall conquer the imminent specter of hunger, idleness, and want.

Today I bring to our attention a positive force within the American economy that deserves our honor and praise for the success it has generated in serving consumers both here and abroad. This positive economic force accounts for one-third of all retail sales in the United States today. It directly employs more than 4.6 million people. Not an industry itself, it is a way of doing business in more than 40 industries.

Mr. Speaker, the time has come to honor franchising.

Franchising, with its integrated networks of small businesses across the country and around the world, has helped many an American to get into business and stay in business. The U.S. Department of Commerce reports an estimated 388,000 establishments owned and operated by franchisees. Each year since 1971, the Department of Commerce has reported that more than 95 percent of franchisee-owned outlets have remained in business.

The International Franchise Association, a nonprofit trade association of franchise companies, now in its 23d year, recently surveyed its 350 members and found that fewer than 1 percent of the franchised outlets of respondent companies had closed as a result of business failure.

Franchising is helping minorities get into business. In 1979, minority-owned business format franchised outlets increased 5 percent. The comprehensive training provided by many franchisors has aided many minorities who have been deprived of the kind of experience needed to run a small business.

Women have similarly advanced their skills and horizons through franchising. Franchise training programs have allowed women to surmount societal handicaps and take an active role in corporate America, running their own businesses. Through franchising, women are proving their value even in fields that had heretofore been closed to them, ranging from accounting to sanitation to the auto aftermarket. Beyond direct franchise ownership and management, franchising has freed women to work in another way. By providing many of the products and services traditionally required of women in the family setting, franchising has enabled millions of American women to work outside the home and still care for their families.

Franchising is nothing less than an American institution. And as we look to future trade relations with other countries, we can see in franchising the high value of American know-how. Expansion of American franchising overseas is growing. Statistics show that the growth rate of foreign units has now exceeded that of domestic expansion. IFA member companies underscored the trend in international franchising, with 42 percent reporting last year that they already franchise internationally and an additional 21 percent reporting that they intend to do so in the near future. Thus, they assist in the balance of trade.

The success of franchising should not surprise any of us, even in these economically troubled times. Franchising's contribution has been one of consistent quality and service offered by individuals strong enough to work and free enough to dream.

It is time, then, that we honor the many who worked and dreamed to make a positive contribution to our Nation and the world through franchising.

Mr. Speaker, to that end, I propose, along with my good friend and distinguished colleague, Mr. BROYHILL, that we pass a House resolution designating May 4, 1982, as "International Franchise Day" to honor this great American institution.

The text of the resolution follows:

HOUSE RESOLUTION TO DESIGNATE MAY 4, 1982, AS "INTERNATIONAL FRANCHISE DAY"

Whereas, the franchise method of marketing has proven eminently successful in the aiding of small business men and women, the stimulating of economies, and the betterment of consumers the world over through quality product and service distribution; and

Whereas, franchising today accounts for nearly one-third of all U.S. retail sales, spans more than forty industries, and directly employs some 4.6 million people; and

Whereas, franchised businesses currently enjoy a success rate better than 95 percent; and

Whereas, our nation's women and minorities are especially aided in starting their own businesses through the training and management programs inherent in business format franchising; and

Whereas, franchising represents one of our nation's finest institutions, born and nourished in American free enterprise and thriving through its call to serve customers equitably; and

Whereas, franchising has enabled hundreds of thousands of Americans to fulfill their dreams of owning their own businesses and will continue to provide economic opportunity to people of all classes and backgrounds; and

Whereas, franchising permits the new and small businessman to compete on the same level as the large chains which are increasingly dominating our economic landscape; and

Whereas, franchises have led the battle for uniform disclosure laws to assure that prospective franchise buyers are fully aware of their rights and obligations before investing in a franchise; and

Whereas, franchising continues to expand internationally, effectively serving ever greater numbers of people the world over: Now, therefore, be it

Resolved, That the President is requested to issue a proclamation designating May 4, 1982, as "International Franchise Day," and calling upon the people of the United States and those who have been served by franchising throughout the free world to celebrate such day with appropriate ceremonies and activities.●

THE ALL-SAVERS FIASCO

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. LaFALCE. Mr. Speaker, this past summer as the debate on the various tax proposals raged on, I spoke out on why I felt that the provision of the tax bill providing for the sale of all-savers certificates was a costly and ill-advised provision. Since the certificates have gone on sale, virtually all of the evidence about the impact on the Treasury of these tax-free certificates has, unfortunately, confirmed my earlier fears.

In the past few weeks, I have submitted for the RECORD a report prepared by the Congressional Research Service outlining how all-savers certificates actually provide very little tax relief to the vast majority of American taxpayers. I have also inserted into the RECORD an excellent column from Forbes which concluded that our troubled savings and loan associations and savings banks—which were supposed to be the institutions aided by the sale of all-savers certificates—will actually be unlikely to get even half of the money which will be deposited in these savings certificates.

As part of an ongoing effort to inform my colleagues about this all-savers fiasco, I am submitting for the RECORD at this time three editorials: One from the New York Times, another from the Washington Post, and a third by columnist William Raspberry, printed in the Washington Post. These three have joined the ever-louder chorus of voices denouncing this irresponsible raid on the Treasury.

The editorials follow:

[From the New York Times, Oct. 6, 1981]

ALL SAVERS—AND ALL PAYERS

"Join the great tax revolution. . . . Make us your tax savings headquarters in your war against income tax." So urge the champions of free enterprise at one big savings and loan association. "Ours is five ways better," exclaims a competitor, borrowing imagery from an old bread commercial.

What they are shouting about is All Savers, the tax-free savings certificates Congress created at the behest of a "thrift" industry trapped between low earnings on old loans and the high cost of attracting new deposits. Promoters argue that the All Savers will channel money into the housing market while also giving a much-needed tax break to the middle class. The truth is less attractive: All Savers is a subsidy for banks and savings-and-loans that will cost the Treasury billions at a time when Congress is hard pressed to finance basic social programs.

For the next 15 months banks may issue one-year Government-insured certificates paying 70 percent of the interest on one-year treasury bills. The first $1,000 in interest—$2,000 for a family—is exempt from Federal tax. Bankers say this is a good deal for savers with taxable income exceeding about $30,000, provided they are willing to tie up the funds for a year. That's true, but it hardly amounts to a tax revolution. Investors with a few thousand dollars have long had the option of buying tax-exempt municipal bonds that pay about the same interest.

All Saver funds, the bankers point out, will go to a worthy cause: by law, 75 percent must be lent to home buyers. One could quibble over the premise. Why is housing more virtuous than, say, new municipal sewage systems or new factory equipment, which must compete for the same investment funds? But that argument is pointless; no one really believes that the legal requirement has any bite. One savings-deposit dollar looks pretty much like any other, and since banks would in any event expect to lend more for housing than they collect in All Savers deposits, they will easily comply without further loans.

Who, then, will benefit from All Savers? One slice of the pie will go to affluent investors who have never bothered to take advantage of tax-exempt municipal bonds. The rest will go to banks and savings-and-loans that will not have to pay market rates of interest to depositors. Just how much this indirect tax subsidy will amount to is not known. The Treasury puts the figure at $5.2 billion. But if sales of All Savers are brisk—as now seems likely—the subsidy could be twice that. And if the thrifts persuade Congress to extend All Savers beyond 1982, the loss of tax revenue would be even larger.

This is not the first time an interest group has masked a grab for Federal subsidies behind the cloak of high principle. But All Savers is particularly galling at a time when every revenue dollar is needed to finance social spending. Congress has, in effect, deprived the people who benefit from food stamps, free school lunches and Medicaid to ease the lot of the banking industry.

[From the Washington Post, Oct. 3, 1981]

ALL SAVERS FIASCO

The so-called All Savers certificate seems, in its first two days on sale, to be a huge success. Customers stood anxiously in long lines to buy them, and at least one savings and loan association kept its offices open until midnight Friday to handle the flow. But it's useful to recall the price at which this triumph is being purchased, and at whose expense.

Congress created the All Savers certificates to bail out the savings and loan industry, much as it earlier bailed out the Chrysler Corporation. The difference is that in the Chrysler case, Congress used only guaranteed loans. With the All Savers certificate, the government is paying actual tax subsidies to upper-bracket taxpayers—it benefits only people in a 30 percent bracket or higher—on the condition that they pass some of that subsidy on to an S&L association or a bank. What's the cost in tax losses? It's not yet possible to know. But it will certainly be larger than the congressional estimate of $3.3 billion over three years.

The losers in this deal, along with the Treasury, are the municipal borrowers. For the first time they have a tax-exempt competitor—and it's offering a much higher interest rate than the municipals have been paying. Congress evidently never thought of the effect on the municipal market when it created the All Savers certificate.

As for the housing industry and the mortgage interest rates, the new certificate seems likely to have little or no effect. Congress tried to write the law to require the S&Ls to share some of this bounty with the home builders. But it won't work. The certificate is a one-year investment, and not much of that money will be reinvested in 20-year mortgages.

The certificate will indeed help the S&Ls, with an infusion of money at interest rates lower than they can find anywhere else. But the method is grotesquely inefficient, for a very large share—probably half—of the certificates will be sold by banks, which hardly need the help. It is a classically bad policy, spraying enormous subsidies around wildly in the hope that some minor fraction of them will come to rest in distressed businesses. It would have been much cheaper if Congress had simply provided interest-free loans to S&Ls in trouble.

NOT QUITE ALL SAVERS

(By William Raspberry)

"That line's too long, too," I told the cabbie for the fourth time. "Keep circling until you come to a savings and loan with a shorter line."

"That's up to you, Mac," the cabbie said. "But I can tell you I've been all over town this morning, and there aren't any shorter lines. What the hell's going on anyway? There a run on the banks or something?"

"Surely you know about the new All Savers certificates," I told him. "They've finally gone on sale, and I'm not going to miss out on a good thing."

"Can't say as I blame you," the cabbie said. "If I make enough driving you all over the place looking for short lines, maybe I'll invest a few thou myself," he chuckled. "Seriously, though, I have to tell you, the whole thing makes no sense to me."

"How can it not make sense to earn a couple thousand dollars tax free?" I demanded.

"That's not what I'm talking about," he said. "The part that makes no sense to me is what good it will do for the economy. That's what it's supposed to be about, isn't it? How does it work anyway?"

I explained it to him. The certificates, I told him, are one-year instruments that pay 70 percent of the yield on one-year Treasury bills.

"So why don't I just drive you over to the Treasury Department. That way you can get the full 100 percent instead of only 70. And besides, there's no line at all over there."

I explained that 70 percent was a good deal because I would have to pay taxes on the earnings from a T-bill, while the earnings on an All Savers certificate are tax free, up to $2,000 for a married couple.

"That's enough to offset the 30 percent differential?" he asked incredulously.

"It is if you're earning 30 thou or more a year," I told him.

"I should have known," he said. "This is just another one of those damn loopholes for the rich. The little man pays taxes on every dime he earns, while you fat cats get a free ride. I guess you've already had your expense-account lunch."

I assured him that it takes a lot more than $30,000 a year to qualify as a fat cat and, besides, the All Savers certificates were a good deal for his "little man," too.

"It can't be good for me if I don't have the money to put up, No. 1; and No. 2, you've just explained to me that even if I did, I don't make enough to get in on your rich man's gravy train."

I hate teaching elementary economics, but I did have some time to kill. "Look," I told him. "All that money the people in these lines are investing will then become available for mortgage loans, which means that people like you—the 'little man,' as you say—will be able to buy homes. It works out for everybody."

"There's got to be a catch somewhere," he insisted. "Where did the people in the lines get the money to start with? It seems to me that people are just taking their money out of savings accounts and what you call your money market funds and stuff and then buying these All Savers certificates. How does moving money from one institution to another help me get a mortgage loan?"

I admitted that I had just cashed in some CDs to finance my intended purchase of an All Savers certificate, but I pointed out that S&L industry officials had predicted that a lot of the purchases would be made with "new" money.

"You kidding?" he said. "You mean you rich people have that kind of cash just laying under the mattress?"

"Lying," I corrected.

"I thought you were," he said. "But even if you were telling the truth, what's to guarantee that the people selling these All Savers certificates will lend the money out for mortgages?"

I assured him that the law requires them to do precisely that. At least 75 percent of the money will have to be lent to home buyers.

"They are going to put name tags on your dollars so they can tell them from any other dollars they have? It stands to reason that they are going to lend more money in mortgages than they take in with that All Savers jazz—in fact, they're lending out that much as it is. I don't see where that 75 percent requirement helps at all.

"And one more thing: you say this tax break is good for only one year, right? So you cash in your CDs and invest in All Savers certificates. And then what happens a year from now? You take your money out and put it right back in T-bills, that's what. The S&Ls get your money for a year, and then they turn around and lend it to me for 30 years? You better explain that one to me."

I would have, too, but just then I spotted a line that was only three blocks long. And just as well; he probably wouldn't have understood anyway.●

INTERIOR'S GONG SHOW

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mrs. SCHROEDER. Mr. Speaker, President Reagan's Secretary of the Interior, James Watt, has been yelping of late about environmentalist media stunts.

A few days ago, a bunch of folks in Idaho delivered some petitions to Mr. Watt demonstrating their support for him. Seems by the time they got the presentation organized, the media had drifted away. So Interior officials restaged the event the next morning at a special press conference.

It is OK by me if Mr. Watt wants to stage a presentation in the bowels of a coal mine, on top of Mount McKinley, or waist deep in the Everglades. But please hold the yelps about environmentalist media events.

For more details, read Charles Roos in the October 26, 1981, Rocky Mountain News, "The Watt Political Speech."

THE WATT POLITICAL SPEECH

(By Charles Roos)

Who could blame Douglas Baldwin, chief press agent for Interior Secretary James Watt, for hitting the ceiling in Washington last week? Not only did the Sierra Club collect a million signatures demanding that his boss be fired; the club called in the media and bragged about it.

Baldwin was indignant. This dump-Watt rally was purely a publicity stunt—a "Vietnam-type media event," he said.

Of course it was. I expect by now the Sierra Club is properly ashamed of itself.

And why oh why, asked the despairing Baldwin, do the media let themselves be used that way?

Don't ask me. I suppose they have no shame.

All Jim Watt really wants, you see, is to do his job and get a little respect. Here he is, a country boy from Wyoming, just doing his statutory duty toward the nation's miners, ranchers, oil men, loggers, sportsmen, wildlife and the environment—oh, yes, he would say, the environment too—while unruly environmentalists and Democrats throw rocks at him.

You would already know these things about the secretary if, like me, you had gone to Idaho the weekend before last to hear the Watt Political Speech again.

Did I mean to suggest there is only one Watt Political Speech? Yes, I did. The secretary may have a platoon of PR men and speech writers at his beck and call, but so far as I can tell he has only one political speech.

First of all, as you might expect, this all-purpose Watt Political Speech is chock-full of Ronald Reagan's accomplishments. Then it hits the highlights of Watt's regime at Interior: "I determined in my heart I would not leave until I brought that bureaucracy under control . . . I fired 51 lawyers, and I loved it . . . I looked for men and women who would sell their souls for America."

The Speech goes on to picture the secretary as a churchgoer. It reveals some of his thoughts while singing the "Star Spangled Banner." It warns of liberal extremists, to especially Democrats. If these Democratic liberals are allowed to have their way, Watt says, they will "snuff out America" and "snuff out our life."

"America has a destiny," he says, and "Republicans must fulfill that destiny."

I suppose some might quibble about that. I suppose some Democrats and independents will be hurt if they aren't allowed to help Fullfill Destiny.

Well you won't hear any of that from me. I have other things to do, like hang the storm windows. It is perfectly all right with me if Republicans want to take a crack at Fulfilling Destiny on their own.

Meanwhile, though, we probably should all be concerned about "media events"—about the editors, reporters, columnists and photographers who let themselves be exploited that way.

All I know about that is what I see and hear, so I will just report what I saw and heard at the Idaho meeting where Jim Watt delivered the Speech.

As Watt finished talking late that evening, after everybody's deadline, the television cameramen turned off their lights. The reporters put away their pencils and notebooks.

"Wait a minute," someone on the platform called to the departing TV crews. "We are about to make a presentation to Secretary Watt. Turn those lights on."

The media—perhaps suspecting an "event," perhaps just being disobedient—would not obey. The presentation went on anyway, uncovered.

Officials of the Farm Bureau, the Sagebrush Rebellion and other groups delivered bundles of letters, petitions and official resolutions of support for Watt. One fellow claimed these papers demonstrate support of 7 million people—seven times the Sierra Club's total. The media meanwhile drifted away, uncaring, to do whatever it is reporters and cameramen do after work.

But that isn't quite the end of the story.

Next morning, bright and early, Jim Watt had a press conference. A multitude of cameras and pencils were present. The TV lights were on.

Guess what happened.

Before reporters could ask a single question, before Watt could mutter "liberal Democrat" once, the Watt boosters showed up to deliver their bundles—the very same letters, petitions and resolutions they had delivered the night before. And Watt seemed just as proud and happy to get them on Saturday morning as he had been to get them on Friday night.

The stunt impressed me. But I don't know what the secretary's press agent would have thought if he had been there.●

SOUTHERN LEGISLATIVE CONFERENCE SUPPORTS LONGSHORE CHANGES

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. ERLENBORN. Mr. Speaker, economic corrosion of industries covered by the Longshoremen's and Harbor Workers' Compensation Act is more widely recognized as time passes; and support for amending this perverted workers' compensation program continues to grow.

Below is the announcement and resolution of the Southern Legislative Conference of the Council of State Governments advocating passage of my longshore bill, H.R. 25, and its Senate counterpart introduced by Senators NICKLES and NUNN, S. 1182.

The Longshore Act now covers all stages of shipbuilding and ship repairing, whether over navigable waters or in a gear shop five blocks away. In fact, by the expansive interpretation

given the act by the Fifth Circuit Court of Appeals in one recent case, coverage might be extended to downtown Houston. Whatever the logic of this legal reasoning under the terms of the present law, it does not diminish the absurdity of the result.

The Longshore Act was intended to fill a gap in workers' compensation coverage for employees injured over navigable waters who, according to an old—and some legal commentators would hold, erroneous—1917 Supreme Court decision, could not be covered by State workers' compensation laws. The act, thanks to the disastrous 1972 amendments and liberal judicial and administrative decisions, has strayed far afield of its original purpose. My bill returns the act to its proper scope by contracting jurisdiction, with respect to shipbuilding and ship repairing operations to the water's edge. It also exempts from coverage accidents on vessels under 65 feet in length, so that activities of a maritime nature but with a local impact character are not swept up by a statute whose existence was predicated on the Supreme Court's 1917 notion of assuring uniform interpretations of maritime law as required by the Constitution and the Judiciary Act of 1789. State workers' compensation laws would apply in these "exempted" cases.

I am pleased to have the support of the Southern Legislative Conference. Its members should be equally pleased that 22 of the 30 current cosponsors of H.R. 25 come from the member States of the conference, and that the administration has testified in support of legislation long the lines of H.R. 25 and S. 1182.

SOUTHERN LEGISLATIVE CONFERENCE OF THE COUNCIL OF STATE GOVERNMENTS,

October 6, 1981.

Hon. JOHN ERLENBORN,
U.S. House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE ERLENBORN: On behalf of the entire membership of the Southern Legislative Conference, I am pleased to forward the enclosed resolution to your office for your consideration, acknowledgment and response. This resolution was adopted at the 35th Annual Meeting of the Southern Legislative Conference held August 16-20 in Charlotte, North Carolina.

As you may know, the Southern Legislative Conference is comprised of state lawmakers and executive agency officials from fifteen Southern states and Puerto Rico. To clarify our role nationally, the Southern Conference is one of four regional legislative conferences affiliated with The Council of State Governments, a national organization serving all state officials with headquarters in Lexington, Kentucky.

As leaders in our respective states, members of the Southern Legislative Conference look forward to the on-going challenge of reshaping state responsibilities vis-a-vis the federal role.

Sincerely,
Representative JOHN E. MILLER,
House Majority Leader, Arkansas, 1981-82 Conference Chairman.
Representative MARK D. O'BRIEN,
Kentucky, 1980-81 Conference Chairman.

1. AMENDMENT OF THE LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Whereas, There has long been a recognized need to provide adequate and fair compensation for workers injured on their jobs through state authorized insurance programs; and

Whereas, Through a series of legal and administrative interpretations and a set of Congressional amendments in 1972, the Act has become a threat to the stability of every boat builder and shipyard in the country; and

Whereas, State government should be concerned when one if its prime industries is adversely affected and causes it to eliminate jobs, cut back the need for local suppliers and reduce the tax support furnished the state for essential services; and

Whereas, The boat and ship-building industry of this country is heavily concentrated in the Southeastern States; and

Whereas, The Congress of the United States, cognizant of the damages caused by the vagueness and unintended interpretations of the Longshoremen's and Harbor Workers' Act, will be considering significant corrective amendments in the current session;

Resolved, that the Southern Legislative Conference of The Council of State Governments urges the members of the United States Congress representing the fifteen-state region to co-sponsor and support Senate Bill 1182 or House Bill 25, to return the program to its original intent.

Resolved, That the President of the United States be asked to lend the assistance of his office to the passage of this worthwhile legislation.●

MOOREHEAD C. "MIKE" KENNEDY ON THE MEANING OF HONOR

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. GILMAN. Mr. Speaker, the manner in which the American hostages in Iran endured their captivity is a source of pride to all Americans and is honored throughout much of the world. Thus it was particularly fitting that Princeton University should ask a former hostage and a Princeton graduate, Moorehead C. ("Mike") Kennedy, to address the incoming freshman class on the meaning of honor.

Princeton operates under an honor system where examinations and other competitions are not monitored or supervised but are conducted under the understanding that the students—upon their honor—shall do only their own work.

Moorehead Kennedy spent many years in the Foreign Service and served as an economic officer at the U.S. Embassy in Tehran before its capture. I believe that his remarks, like his deeds, are of particular significance to us all. They not only reflect credit to his training at Princeton University but more important are of honor to our country. In order to share Mike Kennedy's thoughts with my colleagues, I wish to insert his remarks at this point in the RECORD as they appeared in the October 5, 1981 edition of the Princeton Alumni Weekly:

MIKE KENNEDY ON THE MEANING OF HONOR

(Moorhead C. ("Mike") Kennedy Jr. '52, the former hostage in Iran, addressed the Class of 1985 at the Honor Committee assembly during Freshman Week. The following is adapted from his remarks.)

The honor system has a lot to do with what I would call moments of truth. The expression comes from bullfighting. The Spanish philosopher Unamuno said it is when the bull is charging at the matador and he's got to make the kill. That is the moment when he is up against it, his moment of truth.

I don't think that's a very accurate way to describe it. The matador is there with people cheering, bands playing, trumpets blaring, the tremendous pressure of the bullring, of all his peers, the ladies and caballeros looking at him. The real moment of truth comes when you're alone, when nobody is watching and maybe nobody will ever know.

In any profession, in anything you do in life, there are moments of truth. The doctor can very easily prescribe an operation that he likes to do when the patient may not need it. Nobody will ever find out. And you know the reputation that I'm afraid some psychiatrists have, particularly in New York, keeping rich patients talking. Similarly, there's a moment of truth when a lawyer has to decide to advise his client to do one thing even though there would be a lot more money in it for the law firm if he did something else.

In diplomacy, my former profession, it happens all the time, particularly when you're out there representing the United States in an overseas ministry and you're talking to your opposite member in a foreign government. You have a list of points you have to make—that's what diplomacy is, to get them to understand what you are trying to tell them, what the United States wants of his country or wants his country not to do. And he has things he is going to tell you.

Then each of you goes back home to your office and you write it up and send it in—that's your memorandum of conversation. Nobody is going to know. There is a story of two diplomats who each wrote their memorandum of conversation thinking that nobody would ever find out what was really said. Each wrote the most glowing description of how well he had negotiated, of how brilliantly he had made his points, how he knocked over the over guy. About 20 years later both papers were published, enabling one to compare the official record of each side with the other. But it was impossible to tell that this was the same conversation, except for the date and time being the same.

This was a moment of truth when neither diplomat did his country honorable service, because it is important for your government to know the points you forgot to make, or the points you didn't do very well, the points that you flubbed, or the points that the other guy didn't accept. And that's

where your sense of honor comes in: when you are alone and nobody will know.

Even as hostages we had moments of truth. I remember one midnight when all of us were taken out into a cold corridor, stripped down—it felt like it was below zero, it was certainly freezing out—stripped down to our undershorts, blindfolded, and forced to lean up against the wall, with guns poked in the backs of our necks. At that point, I said to myself, Kennedy, you have nothing else going for you, you are at least going to die right with dignity and with integrity. And then we were led back to our rooms. It was a mock execution.

After it was all over, I realized then and there as I never had before that my integrity was the most important thing to me ever and always. When I came back, my friends said to me, "Sure you're the same, you talk a lot, the same old Mike Kennedy, but there's a new serenity about you." And it was because I had made my way deep down this personal commitment which is unshaken. Things ahead in life now look better than they ever did before.

I need not tell a group of your ability how this applies to your moments of truth—you'll have several here at Princeton—one certainly will be in the classroom, and one certainly will be in the examination room. There you're building the foundations for that integrity which, combined with the incredible intellectual experience you will undergo at Princeton, will lead you into, I am sure, creative, purposeful, and serviceable lives in the tradition of a very, very great university.●

LONG-TERM SAVINGS INCENTIVE ACT

HON. JAMES K. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. JAMES K. COYNE. Mr. Speaker, today I have introduced the "Long-Term Savings Incentive Act". This proposal is designed to: Restore long-term savings incentives for the American public and protect the ability of the average American to save for his own future by guaranteeing the purchasing power of his savings; significantly reduce interest rates—by returing to the concept of real interest versus the currently inflated nominal rates, and; stop the senseless practice of taxing nominal—unreal—gain—by limiting tax liability to real interest only.

The pool of long-term savings is almost nonexistent in this country for one main reason. That reason is the lack of confidence on the part of potential savers that their capital will be preserved. Fixed interest rates, however high, still place the burden of risk about future economic conditions, about future inflation rates, on the saver. I believe strongly that, if we eliminate this risk for the saver/lender, we will once again see a demonstration by the American people of their desire to save for their own future. It is, quite simply, the irresponsible fiscal policies pursued by this Government over the last four decades that have brought millions of Americans into the condition of being dependent upon the Federal Government for their financial support. Lavish spending and senseless tax policies have, for far too many years, emphasized to Americans that there is no point in saving, in deferring present consumption. Attempts by an average citizen to provide for his own financial future are increasingly futile in an environment where the value of savings is continuously eroded by inflation and where financial insolvency is rewarded by the provision of a protected income from the Federal Government. Is this at all reasonable—to assure a rise in income provided by the Government while assuring a real decline in income which individuals attempt to provide for themselves?

To date, the Federal Government has benefited from inflationary policies. The size of our enormous national debt is halved, in real terms, every 5 or 8 years, and unindexed Federal income taxes continue to provide an annual windfall for the Treasury—all, specifically from the continuation of inflationary policies.

We will only begin to make real headway in changing these policies when Government is forced to share the burden of inflation. My proposal will shift the risk of inflationary erosion from the lender to the borrower, and require that the Government reimburse those who lend their savings to the Federal Treasury with dollars of equal value to the dollars lent. Milton Friedman described such an instrument as "purchasing-power bonds" in a recent Newsweek article where he states the view, which I endorse, that issuance of such a bond would be the best way to make administration words and actions match. Inflationary expectations play a most important part in our economy, and we cannot possibly hope to succeed in dampening those expectations of continued inflation when the Treasury issues, as it did a few weeks ago, 20-year bonds on terms that would yield a lender 15.78 percent a year for the next 20 years. In this case, actions simply belie the words.

The provisions of my bill are as follows:

The Treasury is authorized to issue eight 20-year long-term "Constant Dollar Debt Instruments" as a means of financing up to 50 percent of the national debt; federally insured financial institutions are authorized to issue eight 20-year long-term certificates denominated in constant-dollar amounts—with such liabilities sheltered by corresponding constant-dollar assets; money market mutual funds are authorized to include constant-dollar long-term Treasury and bank securities in amounts up to 25 percent of their total portfolios, and the Internal Revenue Service is directed to define nominal appreciation of principal of these debt instruments as nontaxable preservation of capital.

The constant-dollar debt instrument is simply a loan for which the debtor promises to repay the principal with dollars that equal the value, or purchasing power, of the dollars received from the saver/lender. The GNP deflator is used to determine the value of this principal. The interest rate on such instruments will be far lower than the currently high nominal rates because it will not need to include a so-called "Inflation Factor." The interest rate, determined at auction, may be bid as low as 2 to 4 percent, as it was for decades in the past.

With the adoption of my proposal, we can finance the U.S. debt honestly—promising to repay lenders with fair value assets. The saver is guaranteed that his capital will be preserved, and that he will receive a real interest for the rent of his savings. We restore equity to our national financial system by paying real interest on our national debt, thus eliminating the nonreal interest components that compensate for future inflation and uncertain monetary conditions.

This proposal will vastly increase the supply of capital—which stems, of course, from savings. A private citizen could, once again have confidence in his ability to save for his own future. Currently, we save less than 5 percent of our GNP. If we can increase that to 15 percent, $3 trillion of new capital would be generated over the next decade. This would have the very important result of relieving pressure on public programs such as social security.

Also, by relieving the "crowding out" phenomenon—by removing some $60–$80 billion of Federal credit requirements from the short-term credit market—short-term interest rates will fall dramatically, and business will once again have access to the credit needed to finance its investments. Enactment of this proposal will also provide time for the benefits of the President's investment incentives to be felt.●

A MESSAGE FOR CANCUN

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. BONKER. Mr. Speaker, I would like to bring to the attention of my distinguished colleagues, a recent oped article by our esteemed colleague, TOM EVANS of Delaware, on the subject of U.S. participation in the International Development Banks. In the article entitled "A Message for Cancun," TOM EVANS discusses the in-

creasing need for international cooperation in the area of food production and hunger prevention, promotion of economic development, and promoting stability in the Third World. As ranking Republican on the International Financial Institutions Subcommittee of the House Banking Committee, TOM EVANS is very familiar with the role that the International Development Banks play in these and other important issues for the developing world.

It is my hope that the Reagan administration will give their full support to active U.S. participation in and support for the international financial institutions. As Representative EVANS writes:

In today's political atmosphere, there is less support for this type of assistance than at any time since World War II. And yet, there have been few times in our history when it has been more important. President Reagan has a marvelous opportunity for leadership on this issue. We should all hope he takes that opportunity.

The article follows:

[From the Philadelphia Inquirer, Oct. 22, 1981]

A MESSAGE FOR CANCUN

(By Rep. Thomas B. Evans, Jr.)

One of the central themes of the Cancun Conference will be United States' participation in the multilateral development banks—the World Bank and the three regional development banks.

Traditionally our foreign aid programs have been based largely on achieving humanitarian goals. Today, there are many pragmatic reasons to continue these programs. All of them stem from our interdependence with the Third World. The United States is critically dependent on developing countries for a whole range of strategic raw materials that are vital to our economy.

As the Department of Treasury recently reaffirmed, the World Bank and the regional development banks are the most effective form of development assistance yet designed. With some fine tuning to reflect more closely United States policy preferences, the Reagan administration could and should give the multilateral development banks the full weight of its support.

We simply cannot neglect the Third World if we are to serve our own interests. The explosive population growth in developing countries means that the world population will increase by two billion before the end of the century. Without cooperative attempts to greatly expand food production, widespread starvation will result in many parts of the world. This specter is something from which no developed country can insulate itself.

That these multilateral development institutions are the most effective vehicle for promoting economic development should now be quite clear. While this administration began its term with a healthy degree of skepticism regarding these institutions, a recent Department of Treasury draft report demonstrates once again that the multilateral development banks serve the interests of both North and South.

One of the conclusions in the Treasury Department's announcement deserves particular emphasis. The World Bank and the regional development banks are an extremely cost-effective means of supporting development, when compared to bilateral foreign assistance.

President Reagan gave the World Bank and its sister institutions a rhetorical pat on the back at last month's World Bank-IMP meeting, but it was clear from his statement that the central thrust of this administration's strategy for development is reliance on the private sector.

I agree with President Reagan on the importance of private sector development and on the need for free and open markets. But, practically speaking, that will not occur in most Third World countries without public sector involvement.

The missing ingredient is the existence of a sound economic and physical infrastructure. Without water and sewers, a country like Haiti cannot hope to develop a tourist industry. Without a functioning railway from Port Sudan to Khartoum, the Sudan cannot effectively develop its vast agricultural potential.

The private sector has traditionally left the construction of roads, dams, sewers, port facilities and the like to the public sector. Similarly, investments in human capital such as disease eradication, vocational education and training have typically been accomplished at least in partnership with the public sector.

Government participation in these efforts in the Third World is even more critical. In most poverty stricken Third World countries there is little hope of either private capital formation or government revenues sufficient to permit the developing country to finance its own infrastructure development.

As the Treasury report concludes, the multilateral development banks are ideally designed to finance and oversee the construction of those infrastructure-type projects which provide the foundation on which developing countries can build.

The President has reminded developing countries that the United States developed from a barren frontier to the world's foremost economic power with only the occasional infusion of foreign capital. While true, it must be remembered that there are many differences between the world of today and that faced by the emerging United States.

We were blessed by a favorable combination of bountiful resources, cheap energy, a hospitable climate, virtually unlimited markets and two wide oceans to afford us decades of safety from foreign influences. No developing country today faces such happy circumstances.

Even if conditions were perfect for economic growth in developing countries, we could not afford to wait for long-term, incremental development to catch hold in the Third World the way it did in the United States. Pressures from growing populations, social unrest, rising expectations and increasing economic deprivation have combined to give developing countries and their beleagured leaders little time to find solutions.

The United States created considerable anxiety at the recent World Bank-IMP meeting when the administration unveiled its tougher stand on multilateral lending. Whether intended or not, the message received by most foreign delegates was that America was beginning its withdrawal from the same institutions created decades ago at American insistence.

The message we should be sending is that we understand the value of the World Bank and the regional development banks to the countries of both the South and the North.

In today's political atmosphere, there is less support for this type of assistance than at any time since World War II. And yet, there have been few times in our history when it has been more important. President Reagan has a marvelous opportunity for leadership on this issue. We should all hope he takes that opportunity.●

THE ADMINISTRATION'S APPROACH TO HANDICAPPED ACCESSIBILITY IS ILL ADVISED

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. FRANK. Mr. Speaker, over the past several weeks I have become increasingly disturbed about the administration's policies regarding the minimum guidelines on handicapped accessibility issued by the Architectural and Transportation Barriers Compliance Board. It is the administration's desire, enunicated by the Vice President's Counsel, C. Boyden Gray, that these guidelines be rescinded altogther. Rather than seek to remedy problems which may exist in the present guidelines, the administration would scrap all the time, study, effort, and expense which went into the formulation of these guidelines. This approach makes little sense.

It would seem far more reasonable, if the ATBCB is going to reevaluate its guidelines, by beginning with the work which has already been done by the Board as well as by comparing the accessibility standards issued by the American National Standards Institute, of which Mr. Gray approves. The handicapped citizens of this country should not be asked to wait for the process, which is already long overdue, to begin yet again.

In addition, Mr. Speaker, I must take issue with the administration's assessment of the congressional intent in establishing the ATBCB. According to Mr. Gray, the four standards setting agencies—HHS, HUD, DOD, and the Postal Service—will develop their own set of standards which together with the ANSI standards will "provide the guidance Congress sought in requiring the ATBCB to establish minimum guidelines." However, under the express wording or section 502 of the Rehabilitation Act of 1973, as amended, it is the mandate of the ATBCB to "insure compliance" with the Architectural Barriers Act of 1968, including "enforcing all standards under that act". This responsibility cannot be delegated elsewhere by the administration and any attempt to do so should be met with stiff opposition from the Congress.

Mr. Speaker, I am also pleased that support for the ATBCB guidelines is

widespread. I am informed that hundreds of comments have been filed with the Board requesting that the guidelines not be rescinded. Included among these comments was one from Representative A. Joseph DeNucci, the House chairman of the Committee on Human Services and Elderly Affairs of the Massachusetts Legislature. Because of my great admiration and respect for the outstanding work Representative DeNucci has done for the citizens of my State, both disabled and nondisabled, I ask that a copy of his letter be printed in the RECORD.

Copies of my exchange of correspondence with Mr. Gray and the letter to the ATBCB by Representative DeNucci follow:

OFFICE OF THE VICE PRESIDENT,
Washington, D.C., October 2, 1981.

Hon. BARNEY FRANK,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN FRANK: The Vice President has asked me to thank you for your letter of September 14, 1981, in which you reiterated your concern about possible revision of the "Minimum Guidelines" issued by the Architectural and Transportation Barriers Compliance Board (ATBCB).

Let me assure you that the Administration is deeply committed to helping provide to the physically handicapped meaningful opportunities to lead full and productive lives. In this regard, we recognize that access to federal and federally funded buildings and facilities plays an important role.

As you know, those federal agencies whose buildings and facilities are most important to the handicapped community are required by the Architectural Barriers Act of 1968, as amended, to prescribe standards "for the design, construction, and alteration of their buildings to insure whenever possible that physically handicapped persons will have ready access to, and use of, such buildings." Under the Rehabilitation Act of 1973, as amended, the ATBCB is required to establish "minimum guidelines" for the standards to be prescribed by the standard-setting agencies under the Architectural Barriers Act. The ATBCB issues its "Minimum Guidelines" effective January 6, 1981.

It is the overbreadth of ATBCB Minimum Gudelines, not to the philosophy of access to the handicapped, with which the Administration takes issue.

As written, the ATBCB Minimum Guidelines are neither "minimum" nor are they "guidelines" in any accepted sense. The existing guidelines impose detailed and stringent standards which the various agencies are required to adopt. Congress wisely placed primary responsibility for implementing Section 504 in the agencies whose buildings are directly affected so as to gain the benefit of their experience and expertise. The ATBCB guidelines in effect have removed the standard-setting agencies from the rule-making process (except through their participation in the 22-member Board) and denies them the flexibility to promulgate access rules which are necessary and appropriate to their individual situations. Consequently, the Minimum Guidelines in many instances impose requirements which are unwarranted in light of demonstrated needs of the handicapped when balanced against costs (both monetary and non-monetary) to the public.

Many of the problems associated with the existing regulations may be illustrated by comparing the ATBCB Minimum Guidelines with the technical accessibility standards of the American National Standard Institute published in 1980. The ANSI standards were developed under a federal grant and are the product of substantial informed and balanced interaction among the handicapped, architects, builders, all levels of government, and other interested parties. The ANSI standards are in large part consistent with the ATBCB Minimum Guidelines, with both requiring accessibility when the costs of compliance are reasonably related to the benefits of the handicapped. They differ to their application to cases at the margin. The ATBCB Minimum Guidelines consistently require a high level of accessibility in these cases, notwithstanding the substantial costs of compliance and the lack of commensurate demonstrable benefits. The ANSI standards are more conservative, reserving judgment in these cases, and consequently, are more appropriate for use as "minimum guidelines" to guide the rulemaking efforts of those responsible for promulgating regulations to govern the actual construction or modification of facilities, such as the four standard-setting agencies under the Architectural Barriers Act.

At the last meeting of the ATBCB, held on Tuesday, September 22, the Board unanimously agreed to table the vote on whether to rescind the existing guidelines and to reopen the record to permit further comment and analysis. In addition, the Board agreed to form working groups composed of both private and agency members to identify more precisely the difficulties in the existing regulations.

However, problems within the ATBCB Minimum Guidelines are pervasive. In my opinion, it would be far better to rescind the Minimum Guidelines altogether than to attempt any ad hoc repair of the existing regulations. There is no compelling reason to retain in effect ATBCB guidelines which are the product of over-regulatory zeal and which in many instances impose substantial costs on the government and on society without generating any significant corresponding benefits.

Moreover, the existing ATBCB guidelines are unnecessary. Unlike, under past Administrations, the four standard-setting agencies under this Administration have worked both individually and together to discharge their responsibilities under the Architectural Barriers Act. We expect that they will agree within the next several months on an adequate and workable set of uniformed accessibility guidelines which parallel the ANSI standards. These uniform guidelines, together with the ANSI standards, provide the guidance Congress sought in requiring the ATBCB to establish minimum guidelines. Indeed, the adoption of the ANSI-based uniform guidelines comports with the recommendation strongly based by the congressionally chartered National Institute of Building Sciences that federal agencies adopt whenever possible nationally recognized voluntary standards instead of promulgating yet another new set of regulations.

Sincerely,

C. BOYDEN GRAY,
Counsel to the Vice President.

OCTOBER 22, 1981.

C. BOYDEN GRAY,
Counsel to the Vice President,
Washington, D.C.

DEAR MR. GRAY: Thank you for your letter of October 2. I must say that I am disappointed by your response.

I must take issue with your analysis of the Congressional intent in passing the Rehabilitation Act Amendments of 1978. It is the function of the ATBCB to "insure compliance" with the Architectural Barriers Act of 1968, including "enforcing all standards under that Act" (Section 502, 29 U.S.C. 792(b)). In addition it is the Board's mandate to establish not only "minimum guidelines" as you point out, but also to establish requirements for the standards issued pursuant to the Architectural Barriers Act of 1968" (Section 502). It is clear, therefore, that with respect to the question of architectural accessibility, as opposed to the more general mandate of Section 504, Congress placed primary development and enforcement responsibility with the ATBCB.

Therefore, your suggestion that the four standard setting agencies will develop their own set of standards, which will provide the "guidance Congress sought", flies in the face of the clear Congressional intention of placing primary responsibility with the ATBCB.

While you have stated that the ANSI standards, of which you approve, and the minimum guidelines issued by the ATBCB are "in large part consistent", I cannot understand why it is therefore necessary to rescind the minimum guidelines altogether. It would seem to me to be an incredible waste of the time, expense, and energy which went into the development of both sets of standards, to scrap that work completely. It would seem to be far wiser to begin the reevaluation of the Board's guidelines by starting with both documents and choosing the most appropriate approach from the work which has already been done.

In your letter, you make a statement which, quite frankly, very much puzzles me. You state that the minimum guidelines impose requirements which are unwarranted in light of the needs of the handicapped when "balanced against costs (both monetary and non-monetary) to the public." I simply do not understand what you mean by "non-monetary" costs. I would very much like an explanation of this statement.

While I do not claim that the ATBCB guidelines are perfect in every respect, I am very concerned about the Administration's apparent desire to undermine the fine efforts made by the Board in promulgating these guidelines. If you are sincere in your statement that the Administration is "deeply committed" to helping the handicapped, then it would appear far more reasonable not to throw out their work altogether. The handicapped community should not be asked to wait even longer to realize their right to participate fully in our democracy.

I ask, therefore, that the Administration reassess its position with respect to the minimum guidelines. I will await your reply.

BARNEY FRANK.

THE COMMONWEALTH OF MASSACHUSETTS,
HOUSE OF REPRESENTATIVES,
Boston, October 15, 1981.

CHARLES GOLDMAN,
General Counsel, A & TBCB,
Washington, D.C.

DEAR MR. GOLDMAN: I am writing to urge your abandonment of the proposed revocation of the minimum guidelines and requirements for standards for accessibility and usability of federal and federally funded facilities and buildings. Accessibility and mobility continue to be insurmountable problems for millions of Americans. All of our citizens have a fundamental right of access to their governmental institutions. However, this right means little to those citizens who are unable to enter public buildings because of their inability to surmount architectural barriers. Revocation of these minimum standards would be disastrous to thousands of disabled citizens in Massachusetts and throughout the country.

Your reconsideration of this most important matter is greatly appreciated.

Sincerely,

A. JOSEPH DENUCCI,
Chairman, Committees on Human Services and Elderly Affairs.●

BANNING HANDGUNS—THE CULT OF NONSENSE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 27, 1981

● Mr. McDONALD. Mr. Speaker, just last week I wrote a letter to a constituent reiterating my own position on the matter of banning handguns, or any guns for that matter. I stated in part to this constituent: There is no logical way to blame our soaring rate of murder, armed robbery, and aggravated assault on guns when it is the liberal policy of releasing murderers, and even rewarding them in some instances, which is really responsible.

This week, we shall find the National Coalition to Ban Handguns perpetrating their propaganda on the "Hill" and elsewhere on behalf of what they call "National Handgun Awareness Week."

Although I missed it at the time, probably one of the best refutations to the ban the handgun crowd, is contained in the July 17, 1981, issue of Political Gun News. The editor and author of this publication, Morgan Norval, appropriately titles this outstanding article, "The Cult of Nonsense."

Mr. Norval covers the subject from every aspect, and I call my colleagues special attention to the conduct of the U.S. Conference of Mayors' handgun control project, as well as the reprehensible conduct of Atlanta, Ga., officials requesting the names and addresses of all gun owners in the Atlanta area. The slayings of the black children in Atlanta was used as the excuse, despite the fact that only 1 of 28 deaths being attributed to the use of a firearm. Article by Morgan Norval follows:

[From the Political Gun News, July 17, 1981]

THE CULT OF NONSENSE

Liberal antigun advocates—and most antigunners are unabashed liberals—base their support of gun control in the form of gun bans on the premise that violent crime would be reduced if guns were outlawed. Yet when pressed on this assertion, the honest liberal will relunctantly admit that gun control would not prevent the determined crook from getting a firearm. Why, then, do they persist in attacking the gun, as they recently did in passing a handgun ban in Morton Grove, Ill.? Why aren't they directing their energies towards combating the individual brain controlling the trigger finger that sets of the gun?

The rationale behind the liberal antigunner's thinking is his adherence to an ideology that is, in the final analysis, nothing more than a cult of nonsense.

This cult, in simple terms, rejects the concept of individual free will. Man, according to the cult, is a passive product of his environment and not a rational thinking animal. External forces and pressures shape his destiny.

Viewed in this light, it is easy to see why liberals attack the gun and not the person using the gun. Because it is the external stimulus of the environment that causes behavior (so they believe), corrective steps must involve tinkering with or changing those environmental stimuli. In this process of tinkering or changing, the individual who is supposed to be affected by the action is treated like a mere pawn on life's chessboard, manipulated according to the whims of his social-engineering masters who are attempting to change his behavior. Changing his environment will, according to the theory, result in shifting the individual's behavior to that favored by the manipulators.

This type of thinking is not limited to the area of gun control. The liberal's devotion to forced school busing and enforcement of racial, ethnic or sexual quotas in employment are two examples out of many that come to mind.

In their approach to gun control, the liberal behavioralists' solution attacks guilty and innocent alike. Instead of devoting their efforts to the apprehension and punishment of those using firearms for evil and violent purposes—which would seem to be a rational, common sense approach—the liberals' solution is to abolish guns. They would treat like criminals the overwhelming number of law-abiding American gun owners because of the evil deeds of a miniscule number of criminals. The fact that the armed criminal is not about to hand over his gun doesn't seem to bother the liberal antigunner. In fact all the antigunner will have accomplished is to eliminate some of the risk involved in criminal activity: The unarmed potential victim will be at the mercy of his armed assailant.

Forget for a moment the vacuity of the liberals' philosophy and examine their current rhetoric.

Almost on cue, whenever there is a shooting of a famous individual, their clamor for more gun control rises—often as not accompanied by such statements as that ours is a sick society, etc. In view of their belief that man is the passive product of his environment, this is a logical statement. After all, if a man is the product of his environment and he did an evil deed, there must have been something rotten about the environment that caused him to act as he did. This defect, then, must be rectified to prevent future evil acts.

The massive flaw in this reasoning is the fact that not all those who share the same environment commit evil deeds. In fact, only a tiny portion of them do.

For example, less than 1 gun owner in 3,000 ever commits murder. Of those who do murder, over two-thirds have prior arrest records for major felonies. Since many of these prior felonies were directed against relatives and friends, the high two-thirds percentage is probably understated, as friends and relatives are less likely to press charges. Also, police often dismiss these incidents as "family disputes." It is intriguing to note that in close to 90 percent of domestic homicides, the police had been to the home at least once before to stop violent assaults. In half of these cases, the police had been there at least five times. One can reasonably conclude that murderers are clearly violent people with violent pasts.

Now, if the antigunner's theory were correct, something would have to be wrong with the 2,999 out of 3,000 American gun owners who don't use their guns to murder people. Are these nonmurdering gun owners therefore psychotic? You would think so if, and only if, you accept the theoretical basis of the antigunner's rationale: The dominant influence of environmental factors on a person's behavior.

Of course, it is patent nonsense to even think that the 2,999 out of 3,000 nonmurdering gun owners are psychotic. Yet, if you accept the antigunner's cult of nonsense, what other conclusion could you reach?

If we in the pro-gun movement do not expose the liberal antigunners' cult of nonsense for the senselessness that it is, then, as sure as night follows day, we can look forward to numerous handgun bans springing up throughout the nation. When that happens, it will be just a matter of time before our Second Amendment right to own firearms disappears.

We in the pro-gun movement must convince the vast majority of the people that our approach to the problem is the logical, rational approach.

We, as pro-gunners, view crime as the work of individuals making a free choice. Individuals commit criminal acts such as rape, robbery and murder because they choose to do so. Since man is a rational animal, he should be made responsible for his choices. Recognizing this, it is logical that the pro-gunners' efforts should focus on those who have chosen crime as a career. We pro-gunners support efforts (swift, sure punishment, for example) to deter or remove dangerous individuals from our midst, while rejecting policies such as licensing, registration and gun bans that punish the vast majority of law-abiding American gun owners.

A human being, after all, is the only creature on this planet that possesses a thinking, rational mind. This gives man the ability to pick and choose his actions, something other animals lack.

The fact that most violent crime is committed by repeat offenders shows that these people have no reluctance, at present, toward continuing a life of crime. They are, in fact, making conscious decisions to continue their careers of depredation.

We must stress over and over that it is the individual criminal, not society, who should be held responsible for his criminal deeds. We must reject out of hand the liberal antigunners' cult of nonsense.

To sum up: The pro-gun viewpoint treats each person as an individual who is responsible for his acts, while the liberal antigunner treats the individuals as a robot that responds to the whims of his societal environment.

America owes its greatness to the creative ingenuity of individual citizens exercising free choice and judgment. America's present decline can be traced to the overreliance of the past 40 to 50 years on the collectivist cult of nonsense, which is epitomized by their thoughts on gun control.

ANTIGUN PROJECT FUNDED AGAIN

The antigun U.S. Conference of Mayor's Handgun Control Project has been funded by the George Gund Foundation for the seventh consecutive year.

The handgun control project is part of the U.S. Conference of Mayor's Office of Program Development. Its function is to spread the antigun message to mayors in cities throughout the United States.

Queries to the U.S. Conference as to the size of the donation by the Gund Foundation were met with an icy rejection. It is known that the funding is over $100,000.

YOUTH FIRING BLANKS TRIGGERS NEW DEMANDS FOR GUN LAWS

The firing of six blank pistol shots at Queen Elizabeth II during a ceremonial parade on June 13 has aroused demands for tightening Britain's already stiff gun laws.

The youth accused of firing the shots, Marcus Simon Sarjeant, got within 15 yards of the Queen when he rushed out from the parade crowd. He fired six shots, all blanks, from a starter's pistol before being grabbed by police. He was charged under the 1842 Treason Act with "willfully discharging at the person of Her Majesty the Queen a blank cartridge pistol with intent to harm her."

The attack is believed to be the first such assault on a British monarch. It would certainly lead, said unidentified Scotland Yard sources, to a tightening of security around the royal family.

The occasion for the Queen's public appearance was the Trooping of the Colors, part of the official observance of her birthday.

No motive was given for the attack by the youth.

The youth's action has triggered the typical knee-jerk antigun demand for stricter gun laws by legislators in England and also by the head of the British police union. They want England's gun laws, already some of the most restrictive in the Free World, to be tightened further to include a ban on imitation guns.

ATLANTA SEEKS GUN OWNERS' NAMES

Like hovering, ghoulish vultures, the antigun forces seek to capitalize on the tragedy of others to further their goal of gun confiscation. A case in point is what is happening in Atlanta, Ga., where antigun city officials are using the slayings of 28 black youths as an excuse to compile a list of gun owners.

Public safety commissioner Lee Brown sent a form letter, dated June 4, to all pawnshops and sporting goods stores in the metropolitan area, asking for names and addresses of anyone who has bought more than one weapon since 1979.

Officials are seeking to justify this action by saying it is part of the investigation of the youth killings in Atlanta. However, only 1 of the 28 black youths—the first victim, Edward H. Smith, 14, who disappeared on July 20, 1979—was shot to death. Of the remaining victims, 17 were asphyxiated or strangled, 2 were bludgeoned to death, 1 died of multiple stab wounds and 7 died of undetermined causes. It seems, therefore, that firearms are not a significant factor in the deaths of the Atlanta youths.

It is apparent that the Atlanta authorities are using the tragedy as an excuse to compile a list of Atlanta gun owners.

Atlanta officials contacted by PGN would not comment on how the information they were attempting to gather would help in their investigations of the youths' slayings.

The officials indicated that they were getting a high degree of cooperation and response from gun dealers. This contention was vehemently challenged by one Atlanta gun dealer, John Lesher, owner of Chuck's Firearms.

"If they are getting cooperation, it may be from the pawnshops. They (Atlanta Police) have more of a hold over them than they do us. Most of the dealers I've contacted in a seven-county area are refusing to comply," said Lesher.

It appears that several gun dealers in the Atlanta area are refusing to comply with the commissioner's request.

Commissioner Brown's office indicated that as yet they haven't decided what action, if any, to take against the recalcitrant dealers.

This latest action in Atlanta (whose incumbent mayor, antigun Maynard Jackson, faces a stiff reelection challenge from the equally antigun former UN ambassador Andrew Young) shows that the antigun forces will stoop to any means to further harass the legitimate gun-owning citizen.

SOVIETS SUPPORT TERRORISM

Although there is no direct evidence that the Soviet Union had any hand in or direct knowledge of the recent shooting of the Pope, they support international terrorism and shouldn't be allowed to disavow the subsequent acts of their surrogates. This point was made by Robert Moss, a British journalist who has written extensively about international terrorism, in testimony before the Senate Security and Terrorism Subcommittee on June 26.

According to Moss, the Soviet Union and its allies support, train and finance both rightist and leftist terrorists.

"The unholy alliance of the swastika and the red star is one of the most bizarre elements in the present-day pattern of international terrorism," Moss said. "The Soviet block has sponsored neo-Nazi outrages in West Germany in an effort to discredit West German democratic institutions—one of the many examples of the unholy alliance between red (leftist) and black (rightist) terror."

Moss pointed out that the rightwing and neo-Nazi connection is a specialty of the East German intelligence service, which has been able to draw on archives of Adolf Hitler's security services captured by the Soviets in Berlin in 1945.

Moss also testified that he had learned from Italian security sources that Mehmet Ali Agca, the Turk accused of shooting Pope John Paul II, confessed that he acquired the gun he used and a false passport in Bulgaria.

Moss questioned Agca's alleged rightwing affiliations and said his visit to Communist-ruled Bulgaria should be seen "against the backdrop of established Bulgarian links with the terrorist movement in Turkey and the Middle East." He emphasized that Agca's presence in Bulgaria "does not add up to hard evidence of Bulgarian complicity in any attempt on the life of a Polish-born Pope." However, "it does serve to focus attention on the broader question of Soviet bloc involvement in international terrorism," he said in his lengthy prepared statement entitled "Terrorism: The Role of Moscow and Its Subcontractors."

"Without a clear and realistic picture of the support infrastructure for international terrorism, there is little prospect that Western governments will be able to adopt an effective response," he said. "The Soviet Union actively supports that infrastructure."

He might have added that strict gun laws won't help. Italy, where the Pope was shot, has very strict gun laws, as does the European continent as a whole. All the gun laws in Europe did not prevent the Pope's assailant from getting a gun and carrying out his evil act. The imposition of European-type gun laws, as currently advocated by Handgun Control Inc., the National Coalition to Ban Handguns, and Teddy Kennedy and company, will not prevent gun crimes either. ●

HOUSE OF REPRESENTATIVES—*Wednesday, October 28, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O Lord, our Lord, how majestic is Thy name in all the Earth.—Psalm 8: 1.

Gracious Lord, You have blessed our Nation with the abundance of Your goodness and You have bestowed upon us the spiritual sensitivity to respond to Your love. May we use the abilities we have received so that we are wise stewards of the resources of our land. Remind us that the richness of our Earth must serve the generations in the ages to come. Cause us to remember that You are the Creator of all things, of trees and fields and mountains and streams, and so teach us to use our land so that people will be served with equity and justice. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 661. An act for the relief of Blanca Rosa Luna de Frei;

H.R. 688. An act for the relief of Junior Edmund Moncrieffe;

H.R. 783. An act for the relief of Roland Karl Heinz Vogel;

H.R. 1469. An act for the relief of Madeleine Mesnager;

H.R. 1480. An act for the relief of Omar Marachi;

H.R. 1550. An act for the relief of Aurora Isidra Rullan Diaz;

H.R. 1785. An act for the relief of Gladys Belleville Schultz;

H.R. 2010. An act for the relief of Kai-Mee Chen;

H.R. 2185. An act for the relief of Hanife Frantz;

H.R. 2573. An act for the relief of Moses Bank; and

H.R. 2975. An act for the relief of Yuk Yee Li.

ELECTION AS MEMBER OF COMMITTEE ON THE BUDGET

Mr. LONG of Louisiana. Mr. Speaker, as Chairman of the Democratic Caucus, I send to the desk a privileged resolution (H. Res. 259) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 259

Resolved, That the following-named Member be and is hereby, elected to the following standing Committee of the House of Representatives:

Budget Committee: Mike Lowry, Washington.

The resolution was agreed to.

A motion to reconsider was laid on the table.

NICKLES AND DIMES

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, I hope we have all been reading the reports out of the Senate Budget Committee this week.

Our colleagues on the other side of the aisle, are beginning to realize what their enormous tax giveaways—like their $13 billion break to "big oil"—are going to mean. They are going to mean a huge and growing deficit.

And how are the Republicans on the Senate Budget Committee planning to shrink that deficit?

They are planning to nickle and dime the American taxpayer. They call it revenue enhancement.

They are talking about taking the extra dollar or two that their new tax code gives the average worker each week and pouring it back into the Federal Treasury in the form of higher taxes for gasoline, for telephone use, for beer and wine, and cigarettes.

They are talking about taxing medical insurance premiums, limiting the deductions on home mortgage interest. They are talking about taxing some social security benefits.

These nickle and dime proposals will add up to real dollars, Mr. Speaker. They will betray all the bright promises our Republican colleagues made to the American taxpayer this summer.

RAILROAD RETIREMENT

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, I take this time to relate to the House a very sad story. One I think many Members of this body have already dealt with or will be dealing with very soon.

Mr. Speaker, I received a letter from one of my constituents who asked why her railroad retirement pension had been reduced from $117 down to $100. This woman is retired, blind, and disabled and depends on this small pension to purchase medicine for herself and her disabled husband. The $17 reduction seriously affects an already tight budget. The last line of the letter seems to sum up the realization facing many Americans since the beginning of the new fiscal year. My constituent wonders: "Is there anyway I can get this reimbursed or has it just been washed down the drain?"

Mr. Speaker, what can I tell this poor unfortunate person? I can sympathize and express deep regret over the Reagan budget cuts, but the simple fact is that this President demanded this reduction in the railroad retirement program as well as other senior citizen programs in the budget reconciliation bill. I sincerely hope we stop and think about who is hurt by the next round of budget cuts before we vote. I, for one, do not want to write any more letters to the needy saying, "Sorry but the President and Congress cut your budget so the oil companies and wealthy could receive a huge tax break."

Mr. Speaker, let us stop Reaganomics before we hurt any more elderly, disabled, or underprivileged people.

NUCLEAR FREEZE WEEK

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I am very pleased to be from Colorado, one of the States that has recognized this week as Nuclear Freeze Week. I think it has been a very gutsy thing of Colorado's Acting Governor, Senator Regis Groff, to do. My State and other States who have also proclaimed Nuclear Freeze Week will be attacked by some as liberal, coo-coo, nuts, who do not want a strong America or what have you.

I want to say that Colorado wants a strong America, but we are very concerned about the rising spiral of numbers of nuclear weapons in the world. Colorado and other States are not asking for unilateral disarmament; they are not asking that we do freeze weapons by ourselves; they are asking for a nuclear freeze by all nuclear powers and that the freeze be verifiable.

I think it is very interesting that some States were dealing with this

issue with great political courage while this body debated and voted for National Mothers-in-Law Day. We might look at how frivolous such legislation appears in comparison to the seriousness of the international issues our State legislators are taking on. I wish we would be more concerned about some of those national and international responsibilities and dangers that seem to be mounting and concerning our citizens. I think they worry more about world peace and what is happening with the incredible rising international inventory of weapons than the status of mothers-in-law.

EUROPEAN COMMUNITY WOULD IMPOSE ONEROUS REQUIREMENTS

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, on Monday I discussed a proposal in the European community that would impose onerous reporting, accounting, and disclosure requirements on U.S.-based companies operating within the EEC.

I have been informed that Ivor Richard, the EEC commissioner in charge of the Vredeling proposal, recently described my contention that the Vredeling proposal was antibusiness as "rubbish."

Is it rubbish to demand fair treatment for U.S. investors?

Is it rubbish to ask the EEC to treat U.S. companies as profit-oriented mechanisms, and not socialistic trinkets designed to placate the prevailing political winds?

Mr. Speaker, the application of the Vredeling proposal to U.S. companies would be unacceptable. Our Government must not sit idly by while American businesses are systematically forced into a regulatory mold that they do not want and that international law does not tolerate.

THE ALL-VOLUNTEER FORCE IS WORKING

(Mr. PAUL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAUL. Mr. Speaker, there has been a lot of talk recently about how the All-Volunteer Force is not working, and that we need to return to the draft.

Yet the evidence points in the other direction—the AVF is working, and it is even getting better.

UPI reported on Monday that for the second year in a row, the U.S. Navy has exceeded its recruiting goals, and that the intelligence level of recruits exceeds the Navy's own requirements. The Navy also reported that new, alltime records had been set for general reenlistments, and for the recruitment of doctors.

This once again demonstrates that a free country does not need to use coercion of its young people to provide for the national defense. The All-Volunteer Force—consistent with our proud heritage of freedom and voluntary service—is working.

It is sad to see the IRS computers turned loose to run down and prosecute the 18-year-olds who have failed to register.

Our President has been a consistent and vocal opponent of a draft. Now is an appropriate time for him to ask Congress to repeal registration, and forget once and for all, the coercive notion of conscription, and restore the protection of the Privacy Act.

IS THIS COOPERATION?

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, the Wall Street Journal today carries a story with this headline:

O'Neill Says Reagan Must Admit Failure On Economy Before Democrats Offer Plan.

My first reaction was surprise that the Democrats have a plan. All they have been offering is name calling and criticism.

But on reflection I am appalled by this kind of tactic. It is the political equivalent of blackmail.

This threat of noncooperation comes from the Democratic leadership whose economic failures are known to the country and the world.

High inflation, high interest rates, low productivity, low rates of savings—that is the economic legacy of the Democratic leadership.

This President has a backbone made of granite, not of peanut butter.

He does not scare and neither do we.

I suggest the Democratic leadership start acting responsibly and stop trying to blackmail the President of the United States with threats of noncooperation.

There is a saying: "If you can't lead and won't follow, get out of the way." I suggest the Democratic leadership heed this.

AMENDING HOUSE RULE XLVII OF THE RULES OF THE HOUSE OF REPRESENTATIVES RELATING TO LIMITATION ON OUTSIDE EARNED INCOME

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 258 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 258

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 251) amending the Rules of the House of Representatives to increase the amount of outside earned income which a Member may have in 1981, 1982, and 1983, and to increase the amount of the maximum honorarium which a Member may accept. After general debate, which shall be confined to the resolution and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Rules, the resolution shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the resolution for amendment, the Committee shall rise and report the resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the resolution and amendments thereto to final adoption without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, this is a simple open rule which makes in order any germane amendments to the matter to be considered when the rule is adopted.

We have allowed what we think is generous time on the general debate so that Members may discuss the matter as much as they want, and I propose to reserve most of my comments until that time.

As I say, it is a simple open rule with one motion to recommit and germane amendments in order and I see no reason to debate it very much.

I reserve the balance of my time.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this rule. It is a completely open and straightforward means of allowing the House to work its will on the question of outside earned income limitations.

This rule will make in order House Resolution 251, which was reported yesterday from the Committee on Rules as a matter of original jurisdiction. The resolution would amend the rules of the House to raise the outside earned income limit for Members from 15 to 40 percent of their salaries during the calendar years 1981-83. In addition, the proposed resolution raises the limit on a single honorarium from $1,000 to $2,000.

While there may be differing opinions as to the merits of this issue, I do not believe there can be any controversy over this rule as a vehicle for considering the matter on the floor. Under this open rule, there will be 2

hours of general debate on the resolution, although I do not expect it will be necessary for this entire time to be taken. After the conclusion of debate, the resolution will be fully open for amendment under the 5-minute rule. One motion to recommit with or without instructions will be permitted.

Mr. Speaker, this question should be addressed by our membership. I suggest that we go ahead and adopt the rule as quickly as possible so that we may immediately get on with the consideration of the substantive issues at hand.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. BOLLING. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 251) amending the Rules of the House of Representatives to increase the amount of outside earned income which a Member may have in 1981, 1982, and 1983, and to increase the amount of the maximum honorarium which a Member may accept.

The SPEAKER. The question is on the motion offered by the gentleman from Missouri (Mr. BOLLING).

The motion was agreed to.

The SPEAKER. The Chair designates the gentleman from Kentucky (Mr. NATCHER) as Chairman of the Committee of the Whole and requests the gentleman from Pennsylvania (Mr. MURTHA) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 251) with Mr. MURTHA (Chairman pro tempore) in the chair.

The CHAIRMAN pro tempore (Mr. MURTHA). Pursuant to the rule, the first reading of the resolution is dispensed with.

Under the rule, the gentleman from Missouri (Mr. BOLLING) will be recognized for 1 hour and the gentleman from Mississippi (Mr. LOTT) will be recognized for 1 hour.

The Chair recognizes the gentleman from Missouri (Mr. BOLLING).

□ 1015

Mr. BOLLING. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, this is a very difficult and a controversial matter. It was held up in the Rules Committee for some time. A number of Members, a significant number of Members, including virtually all of the Democratic leadership and virtually all of the Republican leadership and a significant number of prominent Members on both sides of the aisle felt very strongly earlier in the year that something should be done about outside earned income. We started a process of considering the matter before the August recess.

Frankly, I was not at all sure that anything was going to happen in the Rules Committee on the subject; but then a couple of events transpired. I think it is very important for me to try to put them at least in my perspective.

In my opinion, most unwisely, the Congress decided to lift completely the limit that existed until it was lifted not too long ago on the expenses of Members in the District of Columbia. Now, I am not going to try to explain that at great length, but I think it is pertinent to this completely different subject that we are dealing with. They all relate to Members' benefits.

I think it was most unwise for the Senate and the House to lift that limit of $3,000, which long ago was made possible as a deduction from taxable income, because most Members had forgotten what that deduction was based on and what that was based on was that it gave Members of Congress a unique status different than other members of the society. Normally the IRS determines the real home residence of a businessman on the basis of a number of criteria. One of the criteria is pretty clear and almost always final. Where a person keeps his family is his home base, and he is not in a travel status when he is there.

Now, the unique thing about the treatment that we gave ourselves with most people not even understanding it was that although, in many instances, our families might be in Washington, D.C., our home base was our State or congressional district for tax purposes.

Now, I am not being supercritical about that. I understand why Members of Congress are desperate. They get large salaries and large benefits. It puts us in the upper 5 percent, but we, just like everybody else, are human beings. We and our wives and our families get used to a certain standard of living. When we first had a $60,000 salary, that meant quite a lot more than it does when inflation has just eaten it up.

Then we come to another problem. For one reason or another the Congress as a whole has demonstrated its incapacity to deal realistically with the problem of pay, remuneration for the job. I do not want to go into that at any length. Some of it has been, and I am not going to point the finger at either side, because of pure unadulterated cheap politics mitigated, I guess, by a deep conviction on the part of some that we should not draw large salaries. Also involved is sheer absolute complete cowardice on the part of a lot of people in Congress who are not prepared to deal with their own salaries.

Now, I am going to say something that is pretty extreme. I think it is a very serious question that the American people ought to look at, and it is whether people, a majority of whom, are unable to face up to the burden of dealing with their own salaries, might just conceivably be incompetent to govern the United States. But that is sort of an aside, because we are not dealing with that right now.

The only reason the Rules Committee decided to go with the approach in House Resolution 251 was what actually happened.

First, that serious mistake with regard to official expenses and the way it would be treated on income taxes.

Second, a performance by the other body that I cannot talk about.

I believe in comity, so I really cannot say anything about what they did, except that they did it. They took all of the limitations off the earning of outside income. I am not going to go into the past of that, how they played games with that; but the fact of the matter is that the House is left in a totally inequitable position with regard to this particular issue.

The Senate has no limit on outside earned income and the House has 15 percent; so although I did not like it particularly, I came to the conclusion that something had to be done about that.

The other issue that is involved here, which Members should know about, is that the Senate has much tighter conflict of interest rules than does the House of Representatives. There is much more opportunity for abuse in the earning of outside income in the House of Representatives than there is in the Senate through a combination of the rules and the statutes.

So what we have here, this increase in outside earned income from 15 to 40 percent, this increase from $1,000 to $2,000 in the amount that can be earned for any speaking engagement, article, or any one activity, are just a compromise in an enormously difficult situation.

Why do I think we ought to have a compromise now rather than facing the issue as we should now? Because I did not think it was possible. I did not think it was possible for Members to seriously consider the matter in this highly charged political atmosphere. I do not think I have ever seen things more partisan than they are right now, uglier than they are right now, and they are going to get worse. It is the worst possible time for us to deal with this subject on an objective and purely bipartisan basis. It is terribly complicated.

I am not even sure I managed to make it clear in what I have said. I

hope I did, but this is a compromise in a terribly awkward situation that is based on one key fact. We do raise the limit from 15 to 40 percent of salary for outside earned income and we do raise the amount that may be accepted as a fee for such performance, whatever it may be, from $1,000 to $2,000, but we also sunset the increase in the limit on outside earned income. It only applies to calendar years 1981, 1982, and 1983. It does not make it possible for a Member to have made a speech in January and then draw an extra thousand dollars in November of this year if it passes. It does not do that, but it does increase for the whole of this calendar year and thereafter the amount of a single honorarium. This approach of a temporary increase in outside earned income is done only to avoid having to deal with the broader issue this year and next year and to make it absolutely mandatory that whoever deals with it, whoever has the responsibility of running the Congress in 1983, faces up to the whole issue.

The CHAIRMAN (Mr. NATCHER). The time of the gentleman from Missouri has expired.

Mr. BOLLING. Mr. Chairman, I yield myself 2 additional minutes.

I repeat that. My own deep conviction is that the matter should be dealt with in a straightforward manner in regard to compensation and not with regard to fringe benefits and other activities. I do not abhor them. I make speeches for pay. I guess I have written articles for pay. I do not think there is anything criminal about that.

I think it is terribly important that it not be connected with one's duties in the Congress so that there is not a conflict of interest, but this a compromise in time and it is a compromise in substance.

I strongly urge its passage.

Mr. LOTT. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I suppose it is only natural to feel somewhat uncomfortable in publicly discussing one's own income. However, the very nature of our positions as Federal legislators dictates that from time to time we must address in this Chamber the matter of our personal finances. And that is what we must do in considering this legislation today.

We all know the facts which have made this resolution necessary. Since 1977, when our outside earned income limitation went into effect, Members of Congress have received only one cost-of-living adjustment; and we have absolutely no prospect for a salary increase until at least the beginning of fiscal year 1983. Yet, the inflation rate which we are seeking to combat is still very high, affecting us and our families just as it affects all Americans.

In a bipartisan effort to address this situation without going to the Treasury for a congressional pay raise, the Committee on Rules has reported House Resolution 251. I believe this measure is the best means available to us at this time for alleviating the problem. It is a compromise reached by many Members who have had divergent views on the extent to which Members should be allowed to earn outside income, and I applaud those who have worked on this matter for their willingness to accommodate differences of opinion on the issue. In particular, I commend the distinguished majority and minority leaders of this House, Mr. WRIGHT and Mr. MICHEL, for their leadership in bringing this matter to the forefront, and also the distinguished chairman of the Committee on Rules, Mr. BOLLING, for his work in conducting hearings and bringing this matter to the floor for discussion.

The substance of this rules change has been previously explained. I want to emphasize that we are breaking no new ground in adopting this resolution today. The proposal merely would adjust the figures in rule 47 in two instances. It would lift the percentage of congressional salary which any Member may earn as outside income from 15 to 40 percent for 3 calendar years, 1981, 1982, and 1983. Also, it would lift the maximum which may be received in a single honorarium from $1,000 to $2,000. Except for those two modifications, rule 47 would remain the same.

Aside from the simple fact that Members of this House need some degree of financial relief, there are other compelling reasons which make such a rules change justifiable today. First of all, when this rule was adopted in 1977, it was assumed that Members of Congress would be receiving regular cost-of-living adjustments for the foreseeable future. This would of course have had the effect of not only increasing our take home pay but also raising the level of permissible outside earned income. As we all know, for budgetary and other reasons, we have not collectively felt it appropriate or wise to provide ourselves with these increases. Second, the adoption of House Rule 47 was based upon the assumption that the other body would likewise impose upon themselves some restrictions on outside earned income. As we have seen, however, the proposed limitation in the other body has been first postponed and now apparently abandoned entirely. Further, the lifting of any statutory ceiling on the receipt of honoraria has left us with an even more unbalanced situation between the two Houses of Congress. I feel that it is not good policy to permit the present degree of disparity to remain unaddressed.

This resolution contains a sunset provision, which will cause the change in the permissible level of outside earned income to revert back to 15 percent at the end of calendar year 1983. I have long been an advocate of subjecting provisions to periodic termination as a means of reassessment of their merits, and my opinion is the same on this matter. Although the rules of the House must be considered anew at the beginning of each Congress, this resolution clearly anticipates that the House will try this increased limit for 3 years and then look at how the system has worked during that time.

Mr. Chairman, I strongly support this rules change and urge the adoption of the resolution.

□ 1030

Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, the gentlemen who have spoken previously I think have tried to put this resolution in the best possible light, have done about as good a job as one could expect them to do. I guess my question with regard to the resolution, the reason why I oppose the resolution, is a question of timing.

We are specifically going to the country at the present time asking the American people from top to bottom to make sacrifices on behalf of getting our economy back in order. We have asked considerable sacrifices of people in the very lowest income ranges of this country, and I think that to come before us today with this kind of resolution can be perceived in a very, very wrong way across this Nation.

I remember the President when he spoke on television a few weeks ago said that a question that had been asked at a Cabinet meeting is, "If not now, when; if not us, who?" Well, Congress, in responding to that particular message of the President, has not done very well on the budget issues. However, it seems to me with the resolution that comes before us today, Congress has translated those questions to an issue of compensation, and we now run the risk, in my opinion, of being seen across this country as hypocrites, people asking others to do what we ourselves will not do, namely, sacrifice.

If this is to be a time of sacrifice in the country, then it seems to me it is a time for equally shared burdens, and that is really the question that faces us today.

You know, you might be able to make a case in terms of fairness to ourselves; in a strictly selfish vein, you can probably justify the action here. But the question is not whether or not we are going to be fair to ourselves; the question is whether or not we are going to be fair to the country. We ought to be asking ourselves a modification of what the President asked of his Cabinet. It seems to me that at

this point, considering this question, we ought to be asking ourselves, "Why us; why now?" because those are tough questions when you are talking about potentially raising our income level by $15,000 a year.

That is really the question that we face here: Whether or not we are going to be fair to the country, whether or not burdens are going to be equally shared at a time that sacrifice is being demanded.

I would ask my colleagues to consider this issue and join me in opposing the resolution.

Mr. DICKINSON. Mr. Chairman, will the gentleman yield for a question?

Mr. WALKER. I am glad to yield to the gentleman from Alabama.

Mr. DICKINSON. I know the gentleman is sincere, but since there are absolutely no tax dollars involved, could you explain what you mean by levying a burden on the people of this country if we allow ourselves to go out and, by our own industry, moonlight in effect, what possible burden we are laying on anyone?

Mr. WALKER. Well, I would say to the gentleman the issue I raised is one of equally shared sacrifice. The American people will still visualize what we are doing as setting aside our time for purposes of raising income for ourselves at a time when we are asking everyone else to make sacrifices. And that is specifically the issue here.

Mr. DICKINSON. If the gentleman will yield further, what possible negative influence, what possible burden, are we putting on anyone, any taxpayer, to say that on our own time we can write an article, make a speech, or go out and earn additional income to help us increase our own pay? How can this possibly put a burden on anyone that you are talking about?

Mr. WALKER. I thank the gentleman for his question.

I think, first of all, the income limitation never applied to writing articles.

Mr. DICKINSON. It does. You are wrong.

Mr. WALKER. Well, as I understood it, and I may be wrong, the income limitations have not been on published material.

Mr. DICKINSON. Royalties are exempt; articles are included.

Mr. WALKER. I thought that was the case. But in terms of going out and making speeches, each of us who has done some of that knows that you involve considerable amounts of your time in order to do that, and that is time that I think the American people would see as time taken off of the job. I really question whether or not they will not see this as our attempt to find a way to increase our income at a time that they are being asked to make sacrifices themselves.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, generally I agree with the gentleman from Pennsylvania. But in this instance I do not understand his reasoning.

The gentleman talks about equity. What other segment of our society do we limit how much they can work, on how long they can work, how much they can earn? What other segment of our society do we restrict in this way? It is the great American dream that people may work hard and contribute; that they have the opportunity in this country, to be rewarded for their labors. But we seem somehow to want to put a shackle on ourselves.

I was in Chicago last night. I did not miss a vote. I left there at 5 a.m. this morning to get back here in time for first business today. I disagree with the gentleman entirely.

Mr. BOLLING. Mr. Chairman, I yield 10 minutes to the gentleman from Indiana (Mr. HAMILTON).

Mr. HAMILTON. Mr. Chairman, House Rule 47 limits outside earned income for House Members to 15 percent of their congressional salary, and limits the amount from any single honorarium to $1,000 per speech, appearance, or article.

The rule was added in 1977, along with several other ethical reforms, when we significantly tightened up the generally ineffective codes of conduct and financial disclosure rules adopted in 1968. The tightening up of congressional ethics followed a storm of public outcry in 1976 over congressional misconduct and scandals, such as the South Korean influence buying and the Wayne Hays affair. The reforms were the product of extensive work by the Obey Commission and three House committees, and the outside earned income limitation was accepted by an overwhelming vote of 344 to 79. House Resolution 251 would significantly liberalize House Rule 47 by raising through 1983 the limit on outside earnings from 15 to 40 percent of the congressional salary. I oppose this change.

1. STRICT LIMITATIONS WERE ADOPTED FOR THREE MAIN REASONS

Mr. Chairman, we adopted the outside earned income limitation for three very good reasons:

First, it minimizes the possibilities for conflicts of interest. Certainly the integrity of the legislative process is called into question when, for example, a committee chairman accepts thousands of dollars from groups with special interest in legislation before his committee, or when a Member makes his services available for large legal of professional fees.

Second, it avoids time being taken away from congressional work. Being a Representative should be a full-time job. But that certainly was called into question when Members spent substantial time earning several times their congressional salary in outside work, as happened before House Rule 47 went into effect.

Third, it avoids the appearance of cashing in on the congressional position. Receiving thousands of dollars in overpaid honoraria, in consulting fees for little work done, in salaries for adding one's name to a law firm—all strike the American citizen as someone trying to exploit his current status for financial gain.

On the basis of these arguments, we adopted the outside earned income limitations by a more than 4-to-1 margin. These reasons also, by the way, explain why we did not apply the rule also to unearned income. Two of these problems generally do not arise in typical cases of investment income: When a Member is simply receiving money from previous investments no exploitation of congressional stature is involved, nor is significant time taken away from congressional duties. So we applied the rule only to earned income where there is much more possibility for abuse.

2. PUBLIC DISCLOSURE IS NOT ENOUGH

We passed these rules to specifically limit certain outside earnings because we felt that mere public disclosure of the actions would not suffice. It will not do to tell a voter that if he thinks that a Congressman is engaged in improper outside earning activities, he should vote him out of office. In 434 of 435 possible cases, the voter simply cannot do that.

Each American is affected by the actions of all Members of Congress, yet he can vote disapproval of only his own Representative's actions. It is little consolation to him to have only public disclosure that, for example, an influential committee chairman has accepted $25,000 in honoraria from groups with special interest in legislation before his committee.

We need to assure each American that there are at least some minimal sorts of safeguards on the books trying to insure that each committee chairman, each influential party leader, each Member of Congress making important decisions that affect him dearly, is not engaged in such abuses.

3. BASIC REASONS FOR LIMITATIONS HAVE NOT CHANGED

Mr. Chairman, no one would maintain that this one rule is the cornerstone of all congressional ethics, the panacea for all congressional misconduct and impropriety.

However, it is a significant and meaningful provision. As Speaker O'NEILL said during the 1977 floor debate, this limitation is "the heart and soul of the entire package." Moreover, the outside earnings limitations have been thought important enough

to be applied to high-level officials of the executive and judicial branches. House Rule 47 is one step toward trying to insure that Members of Congress are in fact here working for the good of the American public, rather than for their own personal gain or for the good of high-paying special interests. I submit that whatever we can do to promote that ideal is worth pursuing.

House Resolution 251 would significantly weaken our ethical reforms of 1977. But as far as I can tell, the original reasons for adopting these limitations are just as valid today as they were 4 years ago:

I do not believe that in the past 4 years there has been any evidence showing a significant lessening of the possibility of abuse from outside earnings in terms of conflicts of interest, taking time away from congressional work, or cashing in on the congressional position.

I do not believe that in the past 4 years this rule has led numerous competent Members to leave Congress, only to have them replaced with less competent individuals. On the contrary, I can detect no recent deterioration in the caliber of Members of Congress.

I do not believe that in the past 4 years there has been a significant change in the number of Members who would be affected by House Rule 47. Estimates were that roughly one Member in six exceeded the limits before they went into effect, and a similar proportion of Members is approaching our current 15-percent limit. Then, as now, this rule affects primarily only a handful of Members of Congress.

I do not believe that in the past 4 years the American public has changed its thinking to now believe that House Members have less need of ethical reform than before. If anything, I would imagine that incidents of misconduct, from Abscam to payroll kickbacks, would make the American public think that there should be tougher restrictions on congressional conduct.

4. THE LIMITATIONS ARE AN ETHICAL, NOT A FINANCIAL MATTER

Mr. Chairman, one major change over the past 4 years that proponents of House Resolution 251 point to—which I think is correct—is the change in the buying power of congressional salaries. Salaries of Members have not nearly kept up with inflation. However, that is a totally financial matter that should be addressed by reviewing the process of pay increases for Members. It is not an ethical matter affecting our ethical codes. What House Rule 47 involves is an ethical standard, and the ethical reasons for its adoption are just as valid today as when it was first adopted, if not stronger. Congressional pay problems should be resolved by altering congressional pay practices—as apparently they have by provisions in the recently passed continuing resolution. They should not be resolved by overturning ethical reforms.

5. HOUSE SHOULD NOT BACKTRACK ON ETHICAL REFORM

Despite the mixed record of conduct by individual House Members in recent years, by almost any standard the House as an institution has made significant progress in its handling of congressional ethics. We have enacted tough new codes of conduct, set up a permanent ethics committee, punished far more Members for misconduct than ever before, and have given out tougher and more meaningful sanctions by overwhelming margins. It is not an overstatement to say that the past 10 to 15 years have marked the most significant period of institutional reform in the entire history of House ethics.

Given our impressive record of improvement, I would not like to see us take this first major step backtracking on ethical reform. In the past, the clear overall direction of our revisions in the House standards of official conduct has been one of toughening them up. But House Resolution 251, which almost triples the amount allowable outside earned income, would represent the largest step backward that the House has ever taken to overturn one of its previously enacted ethical reforms. All Members voting for it should be aware of the unprecedented nature of their actions.

6. HOUSE SHOULD NOT SHOW EXCESSIVE CONCERN FOR MEMBERS' PERSONAL INCOME

Most of our tough new ethical reforms enacted in recent years have been generally accepted by most Members. But House Rule 47 has cut into Members' personal income the most, and it is the one that has been fought the hardest: Members tried in 1978 to repeal it in the House even before it went into effect; Members have challenged it in the courts; many Members have openly stated that they would try to find various ways to skirt its provisions; on the Senate side, Members first voted to postpone the 15-percent limitation and then recently repealed the only remaining annual earned income limitation; and today House Members are trying to change the rules midsession, after having been elected to Congress last fall with the clear understanding that there was to be a 15-percent limitation on outside earnings or honoraria. Such actions make many Americans think that the feeling on Capitol Hill is that ethical reform is fine, as long as it does not hurt Members' pocketbooks. Moreover, we have recently cut back various Federal services and benefits for the average citizen to unprecedented degrees. Nevertheless, House Resolution 251 represents yet another attempt to provide additional financial benefits for Members. At a time of great sacrifice for the American people, we should not tell them that the only sacrifice Members of Congress are willing to make is one of sacrificing ethical reform for personal gain.

CONCLUSION

To sum up, we should start backtracking from our strong past tradition of institutional ethical reform only for extremely strong and convincing reasons. The desire of a small percentage of Members for more money is not one of them. The basic ethical reasons for the ethical standards embodied in House Rule 47 are as strong as ever. Mr. Chairman, I urge the defeat of House Resolution 251.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. HAMILTON. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the gentleman for yielding.

The gentleman has really made a very thoughtful statement, but I have several questions that I would like the gentleman in the well to respond to, and I will have to put them in detail, unfortunately.

Some years ago a special interest group came in to see me, and they said that they wanted to contribute to my political campaign. I asked them why. They said simply because they wanted to do it.

I said, "Don't you know my record has been one of consistently voting against you?"

They said, "Yes."

I said, "Do you think in any way that this is going to change if you make a contribution to my political campaign?"

They said, "No." They made the contribution, and I guess my record will show that I voted specifically against what this special interest group wants in its legislative program. Is it not quite possible to occur in terms of honoraria also?

Mr. HAMILTON. Sure, it is possible. There is not any doubt that it is possible. And my guess would be that that is the norm rather than the exception.

Nonetheless a question is raised in the minds of most Americans, I think, when a prominent Member accepts very large honoraria, for example, for a bill pending before his committee.

Mr. MITCHELL of Maryland. I have gotten the gentleman's response. Let me say for the record I do not get very large honoraria.

Mr. HAMILTON. I want to make very clear I do not condemn most Members or criticize most Members. Most of us have to accept political contributions. Nor am I opposed to the acceptance of some honoraria, but I think the limit on it is advisable.

□ 1045

Mr. MITCHELL of Maryland. Let me propound a second question to the gentleman. He talked about the length of time that Members would be away from their congressional responsibilities. Suppose a Member chose to take speaking engagements only on weekends, Friday night, Saturday night, and Sunday night, as some Members do. Would that in any way encroach on one's congressional responsibilities?

Mr. HAMILTON. I think if an individual Member makes that choice, he is a very conscientious Member.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. BOLLING. Mr. Chairman, I yield 1 additional minute to the gentleman from Indiana.

Mr. MITCHELL of Maryland. And then my third question: This House cut a billion dollars out of higher education, and that means that approximately 1 million young people will not go on to college next year. For some years, I have been giving a significant portion of my honoraria to three colleges and universities in my district. If indeed—if indeed the rule change is approved, I will continue to do this, and it is my own little personal way of saying to those students, "look, I know you need help and this is not much, but I am going to help as much as I can."

I just got a letter from one college president last week thanking me for four $500 scholarships given to four students. I could not do it out of my own pocket. I do it out of honoraria. Is that not another reason why we should not continue?

Mr. HAMILTON. I simply commend him because of the way he has handled his honoraria, but that does not necessarily mean every Member of this institution handles it the same way.

Mr. LOTT. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Chairman, I rise in opposition to House Resolution 251, which would raise the limit on outside earned income for Members of the House of Representatives from 15 to 40 percent, and the limit on a single honorarium from $1,000 to $2,000.

First of all, the point should be made that being a Member of Congress is a full-time job. That is what the people elect us to do, and they have a right to expect that we will be devoting our full energies and abilities to the Nation's business. There really should not be any time for "moonlighting" if a Member of Congress is doing his job.

And then, too, moonlighting might open Members to the charge of "conflict of interest," and raises questions in people's minds about just whose interests are being served in the legislative process.

Now, with regard to honoraria, we all as Members of Congress receive invitations to speak, and often an honorarium will be offered, it is my practice to refuse these honoraria. Public speaking is part of our job as Congressmen. It "comes with the territory," and there is really no reason why we should be making extra money for public speaking.

The points I have made thus far would be valid at any time, in any Congress. But in this particular Congress there is something else to consider. This is the Congress that is making deep, major cuts in Federal spending. These cuts are necessary—there is no doubt about that. The Federal debt now exceeds $1 trillion, our economy is in serious trouble, and the cuts simply must be made. We have told the American people that we are all in this together, that we must all be prepared to feel the pinch.

Yet let us look at what this Congress has done for itself thus far. Earlier in the year the travel and expense allowance was increased for Members of the House. Then there was a liberalization of the tax deductions Members of Congress may claim for away-from-home expenses. At the same time, future congressional salaries after 1982 were indexed for cost-of-living adjustments.

Some of us tried to fight each one of these benefits, but without success. Congress seems to have discovered a new way of getting benefits for itself: Slip them into a continuing appropriations resolution a short while before the start of a new fiscal year. That is guaranteed to stymie the opposition.

As if all these benefits were not enough, now comes this bill to increase the allowable outside earned income and honoraria for Members. At this rate, this Congress is going to go down in history as the Congress that called on the American people to sacrifice while meanwhile Members were busily feathering their own nests. Is that really the message we want to send back to our constituents? We have enough to do in dealing with the Nation's economic problems without devoting our time and energies to devising more benefits for ourselves. This resolution should be defeated. And then let us get on with the Nation's business.

Mr. LOTT. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Chairman, I thank my friend from Mississippi for yielding to me. I rise in strong support of House Resolution 251.

Many individuals in the Congress have expressed somewhat of a surprise that I would support this resolution, and I would like to explain my position. I have been known to be a strong advocate of ethical reform in Congress. For instance, I have introduced legislation that would limit our terms here. I would like to see limitation of congressional terms.

As far as the pay raise goes, I have been a strong opponent of the pay raise. I do not believe that we deserve a pay raise when the country is suffering from the policies that we impose on it. As a matter of fact, I have advocated that we take a pay cut at the rate of inflation in order to teach ourselves what inflation is all about.

I have also been a strong advocate of a limitation of junketing, like eliminating about 99 percent of all trips overseas, since I see that they provide no benefit to the American taxpayers.

Before I came to Congress I was under the impression that many Congressmen did not work diligently here. Since being here, I am convinced that essentially all Members are hardworking and very diligent. They do not neglect their duties, and they make most of their votes. My great concern is not the diligence that is put forth here in the House. The effort that we put forth here, I feel often is misdirected. I am convinced that if we spent less time here in Washington the people would be better off. It would be a benefit to the country if we spent half our time at home working someplace else rather than working here so diligently, spending more money, and making the inflationary problem so much worse.

The most important reason I believe that we should support this resolution, that we should allow outside income, is that the prohibition is so symbolic of the professional politician. As we come here and as our time is consumed and monopolized 100 percent, it becomes that one is an absolute slave to the political system, and therefore, one is no longer a citizen. The intentions of the Founding Fathers were that we would come as citizens, serve a part of the time of the year, receive a token payment, and go home and earn a living the rest of the year. That has changed, and I think it is symbolic now of the age, that we now are to receive all of our income from the efforts that we make here in the House.

The conflict of interest argument, I think that has some weight, but I do not think it is enough of an argument to oppose this resolution. There is, of course, conflict of interest whether we are receiving sums in our campaigns or whatever. The important thing to me is that this argument is symbolic of the type of system that we live under. Everything that we do here proves to be so beneficial or detrimental to some group, or so helpful to another group. It is a demonstration of what great size the Government has achieved. That is where the problem is. We cannot eliminate the conflict by putting rules on ourselves. We must elimi-

nate the temptation for the conflict by reducing the amount of power and authority that the Government has over the economic lives of so many groups.

I feel strongly that it is very unfair to those individuals who would have only earned income; just unearned income, those who have passive income and can make $1 million, and they are not restricted in any way. Why is it that a man goes out and works for a day on his weekend and earns some money and this practice is restricted? That does not make any sense at all, so I rise in strong support of this resolution and believe that those individuals who would like to see consistent ethical reform in the House of Representatives can still support this resolution with a clear conscience.

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I will be happy to yield.

Mr. MICHEL. Mr. Chairman, I would just like to commend the gentleman for his very forthright statement. Members of this House should know that the gentleman came to this body as a distinguished physician, a doctor in his own right. He came to this body feeling strongly that he could make a valuable contribution to our deliberations and the points the gentleman has made with regard to citizen input are very appropriate.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. LOTT. Mr. Chairman, I yield 2 additional minutes to the gentleman from Texas.

Mr. MICHEL. While the two of us might differ on whether or not it is appropriate to limit the terms of a Member of Congress, the point the gentleman made about the importance of citizen input into this body is important. I might say to the gentleman that in my foraging around the country from time to time for candidates to serve in this body among those who are successful businessmen, particularly small businessmen, they prefer to hold on to their family businesses and continue to participate in the decision-making process rather than be forced to incorporate. And that is what we are forcing some to do in order to serve in this body. The discrimination between so-called earned income and unearned income is ridiculous.

The rules are such that we can have $1 dollars of dividends and still be considered honorable and ethical, but if we earn a dollar over $9,700 we are unethical. When explaining these restraints and restrictions under which we have to serve, I have had any number of good prospective candidates simply throw up their hands and say, "I cannot afford to do it. I would love to, but under the conditions you have described, I just cannot do it."

By increasing the amount that can be earned from 15 to 40 percent of our salary base is a concession to meet part of the problem.

However, there are Members here who would argue that there is absolutely no need for limitations of any kind. To go that far here and now would be impractical for the moment. That is why I applaud the chairman for his spirit of compromise, for what he has done to bring to the floor this resolution to help us solve this vexing and controversial matter.

Again, I want to commend the gentleman for the contribution he has made to the debate.

Mr. PAUL. I thank the gentleman for his comments, and I certainly appreciate the compliments. I think it is so important that we distinguish the two things, the conflict of interest and the size of Government. We would not have that problem if Government were reduced to the proper size, and that if we as Members of the House were citizen politicians and plan to return to live under these laws we have placed on the people, the whole country would be better for it.

Mr. BOLLING. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, 5 years ago the gentleman from Indiana and I were given a very nasty job by this House. I was charged with responsibility as chairman of the Commission on Administrative Review to produce a new ethics code for the House, and I appointed Mr. HAMILTON as chairman of the task force dealing with financial ethics. Neither one of us enjoyed that job. I have probably regretted that job more than any other I have ever done, not because I thought what we did was wrong—I do not—but because of what it has done to the personal relationships that I have had with a number of people in this institution. I think, at least in the minds of some people in this institution, those scars remain until this day.

I am a realist. I know what is probably going to happen here today, but I want to repeat why we found it necessary to impose a rather stringent limit on outside earned income 5 years ago.

I frankly do not care how many Members spend full time on their congressional duties. In fact, I can think of a lot of Members of the House about whom I would feel a whole lot better if they spent a whole lot less time here.

But the fact is that we have at stake the question of whether we are going to be public servants or private servants. The question is whether we are going to have constituencies or clients, and I suggest to the Members that when they approach $24,000, $25,000 a year in outside speaking fees which Members of Congress are allowed to take, we cross a line we should not cross. And do not kid ourselves, we would not be speaking if we did not have that title of "Congressman." Most people who ask us to speak are not interested in our intellectual capacity. They are interested in the fact that we have that title of Congressman on our names, and they want to hear what we have to say because of that title, not because of the brilliance of our intellects.

I simply want to say that I think this is a major step backward in protecting the integrity of this institution. I also think it is going to leave us vulnerable in the future to the imposition of all kinds of ridiculous regulations which will seem justified because of the great amounts of outside income for which some of us will be eligible.

Let us not kid ourselves. All this is is a back door pay raise for a selected number of Members of Congress. There are about 60 people in this House who have approached the maximum in outside earned limitation. They legitimately resent the fact that they have not been able to keep up with the cost of living in terms of their own pay, and because this institution has not had the courage to deal through the front door with the issue of the appropriate level of congressional pay, it is looking like a bunch of ninnies in the way it is trying to go through the back door in order to provide selective increases in pay.

□ 1100

It has happened on the expense change which the gentleman from Missouri (Mr. BOLLING) mentioned just a minute ago, and it is also going to do it here today on this.

I would suggest that this country would be a whole lot better off if every Member of Congress were entitled to a salary of $80,000 or $90,000 a year and if there were a flat prohibition on outside earned income, because then it would be clear that Members have no financial conflicts of interest in terms of the use of their official time. It would be clear that they would be focused only on their public responsibilities.

Do we really want to create a condition in which, if you serve on a tax-writing committee, for instance, or if you control health care legislation, you are going to have a number of members of your committee who will be collecting $20,000 and $25,000 a year from groups which have a very direct interest in the subject matter that you are dealing with on your committee? I do not think you do. But you are going to get it if you pass this resolution, and if you do pass this resolution, then you will have pressure to adopt what is known as recommendation No. 4 from Common Cause.

Common Cause recommended to the Rules Committee that—

No Member shall accept any outside earned income from or serve as an officer or member of a board of any publicly held or publicly regulated corporation or business entity if the Member serves on a House committee which has legislative jurisdiction over any agency of the government charged with regulating the activities of that corporation.

That would in effect mean that the only things Members could speak about would be things they know the least about. That does not make any sense either, but if we do this today, we are going to make it easier, when the climate changes, to adopt these kinds of regulations.

I do not say there should be no outside income. What I do say is that we ought to keep it within reasonable and limited bounds, and this language certainly does not do that.

I say this to the Members: If you want to deal with the question of congressional pay, do it through the front door, not through the back door. And if you are going to do it through the back door, at least adopt the limitations that the Senate applies to its own Members on the income which you can receive from practicing law, for instance, or from other professions.

I know more about the personal finances of this institution than any other Member, because virtually every Member, when we adopted that code 5 years ago, came to me and explained to me his personal problems. I know what is bugging a lot of Members, but I want to tell you some things you may not know.

I remember one Member, a lawyer, who came up to me and said, "OBEY, you don't understand." He said, "I don't spend any time practicing law. It is just that as my seniority rises, the lobby groups put more of their business in my law firm, and I just get a piece of the action."

Now, is that really what you want to see again? If you care about this institution, as I do and as I know you all do, do not adopt this regulation without at least imposing the same limits on professional conduct and on money earned from a profession that the Senate has adopted. Let us at least do that much so that we do not have people trotting around here 3 years from now thinking that that kind of conduct is correct and so that we do not wind up in 5 years with more of the embarrassing newspaper headlines we had involving two or three of our Members 4 and 5 years ago, before this limitation was imposed.

There are a lot of problems with the present limitation. I understand the resentment Members have at not being treated identically with the Senate. I frankly do not think that there is a Senator around who gives a speech that is worth $2,000. There are higher values that ought to guide us than whether or not we are tied to the Senate in identical terms. I would make this point: Some Member on the minority side—I have forgotten who it was—asked the question, "Why should we be treated differently than any other citizen? Why shouldn't we be able to engage in an enterprise on our own time?"

The answer to that is very simple. We are a very special group of people. We are 435 people elected to do a very special job. The country has a right to expect that we will spend virtually full time doing that job. The people have a right to expect that we will protect this institution, not only from conflicts of interest but from the appearance of conflicts of interest which will certainly be generated if we increase to the amount being discussed here today the ability of Members to earn through honoraria and other devices large amounts of additional income.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, I should have asked the gentleman from Indiana (Mr. HAMILTON) to yield when he had the floor because I did want to associate myself with his remarks and to express my appreciation to him for his leadership in establishing the ethical standards of this House. I agree with him that the proposal before us today would be a step backward.

I am not going to trespass upon the time of the House by repeating the eloquent arguments that the gentleman presented, but I cannot in good conscience let this occur today without some protest. I am one of those who believe that Congressmen do not pay themselves enough money, and until we muster the courage to vote ourselves an increase in pay responsive to inflation, we ought to be very careful about indulging in sneak raises of the sort we accomplished several weeks ago and what we are about to do today. The present limitations in the law are reasonable. The reasons which prevailed when we adopted them in 1977 by a vote of 344 to 79 have not changed.

Mr. Chairman, I urge the Members to reject the proposal before us today.

Mr. BOLLING. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I will not take much time. I think the issue has been quite clearly stated. I particularly think that the statements by the gentleman from Wisconsin (Mr. OBEY) and the gentleman from Indiana (Mr. HAMILTON) clearly point out some of the problems with the passage of this resolution.

I should say that it was pointed out by one gentleman that unless we did this he would not be able to give the honoraria he received to his favorite charity. The answer to that is very simple. I say, "All you do is ask your people who are giving you the honoraria to contribute that to the charity rather than contribute it to the Member of Congress who gives the speech."

Surely we should have the courage here to do everything we do out in the open. As has been clearly stated, times have changed, and in my opinion the people who have said times have changed are correct. Times have changed, but I think it is a full-time job and I think we have to be extremely careful in this organization as to the influence money can cause within the organization. I think that has been clearly pointed out, and in my opinion we should do these things openly and above board. There should be recorded votes, and I particularly believe that if we are going to do anything to change our salary in any way, those changes should not take effect immediately but should only take effect during the next session.

Mr. Chairman, at the present, Members are restricted to accepting no more than 15 percent of their annual congressional salary as outside income. In addition, the current rule limits to $1,000 the amount that a Member may accept for any single honorarium.

House Resolution 251 would increase the amount of outside earned income which a Member may receive in 1981, 1982, and 1983 from 15 to 40 percent of his or her annual congressional salary. The resolution also increases the honorarium limit from $1,000 to $2,000 per speech.

My greatest concern about this resolution is that its approval would certainly broaden the opportunity for special interest groups to influence Members of the House by providing generous honorariums and other benefits to the Members for appearances before these groups. Allowing special interest groups to provide these speaking fees to Members of the House without a real restriction would greatly undermine current limitations on the amount of individual and corporate campaign contributions which are intended to lessen the likelihood that Members will be unduly influenced by outside groups.

Mr. Chairman, I was one of the most vocal advocates of the current limitation when it was adopted by the House in 1977, on a vote of 344 to 79. As my colleagues will recall, the current limitation was adopted in response to revelations that some Members of Congress had improperly used public funds and accepted large amounts of money from private sources.

If we are going to protect the integrity of the Congress, it is essential that we limit the opportunity for Members to benefit from outside income. An effective limitation is necessary not only to remove the real opportunity for Members to be unduly

influenced by outside groups, but also to reduce the perception on the part of the public that such an opportunity for abuse does exist.

Mr. Chairman, I urge my colleagues to oppose the resolution.

Mr. LOTT. Mr. Chairman, I yield 7 minutes to the gentleman from Alabama (Mr. DICKINSON).

Mr. DICKINSON. Mr. Speaker, unfortunately we have already seen an indication of what is happening here because the press has automatically labeled what we are attempting to do as a salary increase. The proposal under consideration has nothing to do with salaries, but the media will attempt to make it look a certain way just to tarnish the image of the House.

This has absolutely nothing to do with a salary increase; it has absolutely nothing to do with $1 of taxpayers' money. What we are saying is that a Member can go out on his own and moonlight, so to speak, if he so desires, and earn income to supplement his salary.

My wife works. It is surprising how many Members' wives work to supplement their incomes because they feel compelled to do so. It is surprising how many new Members move to town and find they cannot buy a house because the prices of houses in Washington are so inflated that a $60,000 house in my State would cost $120,000 to $150,000 here.

One thing that has not been mentioned so far today is the unearned income. Let us consider this, if you will. If you have a stock portfolio and you just collect dividends, you can collect $1 million and that is OK. If you write a book, if you sit in your own office and use clerical help and write a book, the royalties are not covered, but if you write a magazine article, that is covered. We have the most inequitable situation existing today that I can imagine, and we are trying to correct it with this proposal today.

What we are saying is that a person who has an interest in a family business—perhaps he practiced law or has an interest in a business or owns an abstract title business, perhaps he is a dentist or a doctor—can maintain some practice back home and not give it up irrevocably so that if he is defeated or retires, he has nothing to go back to. This applies to a person also who has a family business.

It was mentioned that nobody could speak here unless he were a Member of Congress. Well, we all remember our good friend, Tennyson Guyer, who died recently during this session of Congress. He was a professional speaker. That is what he did for a living before he came to the Congress. This cap was put on him and he could not practice his profession again.

So what we are saying is that if a person is so motivated and he wants to go out and supplement his income by writing articles or by maintaining his position in a family business, he should be on the same level as any other citizen.

The chairman of the committee, the gentleman from Missouri (Mr. BOLLING), alluded to the fact—and he is correct—that there was an income tax limitation with a deduction of $3,000. But we were always attacked by the press which said that we gave ourselves a special benefit because we got a $3,000 tax exemption on our pay. So we did away with it. We do not want to be treated differently; we want to be treated the same as any other citizen, but whatever we do, we are attacked and it is a no-win situation.

Let me say that I feel very strongly that if we have the ability and the will and are willing to make the sacrifice, we should be allowed on our own time to go out and earn additional income.

Let us not kid ourselves. In the last 3 years inflation has gone up over 30 percent. We have 30 percent less purchasing power than we did since our last pay raise.

But I think the most compelling argument is on the inequality of the two bodies. We should not compel ourselves to be second-class citizens as compared to the Senate. They have no limitation. They removed all limitations, and we should not say that we should not be treated the same as the Senate. If I go on a speaking circuit and sit opposite my counterpart in the Senate and we both make the same speech to the same people, I am limited to $1,000 per appearance, but the Senator can draw $2,000. I can only do this nine times; there is no limit at all on what he can do.

Mr. Speaker, I say we should not put ourselves in the position of being inferior to the other body. The Constitution says that we are coequal, and I think we would be exceedingly foolish not to at least allow the Members, by their own industry and skill, to go out and supplement their incomes if they so desire.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, I thank the gentleman for yielding.

The gentleman has made a very outstanding statement. The framers of the Constitution intended that this body would be a citizens' body made up of a cross section of our people. What we are saying here—and I do not disagree—is that we are working full time while we are here working for our country and our constituents. But what about a minister, a member of the clergy, who might still retain his church back home on Sunday? He is not really violating his obligation to his constituents here, but he is being denied the right to carry out the pursuit of his profession.

What we are saying here is that a minister who wants to continue to hold his church, who wants to fulfill his religious responsibility back home and also fulfill his civic responsibility here, would be under existing law limited to how much he could be paid by carrying on his profession. I do not think the framers of our Constitution or anyone else really believes this is what was intended. That is all we are saying here.

I think we are under existing law certainly putting ourselves in a straitjacket by making second-class citizens of ourselves, and we are violating the spirit of the Constitution which clearly identifies this as being a citizens' body.

□ 1115

Mr. DICKINSON. I thank the gentleman.

Just let me say in closing the argument is you do not want to put yourself in the position of a conflict of interest. Are you putting yourself more in a conflict of interest situation if you raise the honoraria you are entitled to from what you presently have? If you want to have a conflict of interest, you can do the same at 15 percent as you can at 40 percent.

Second, those who would detract from this, and who would criticize it are always going to try to color it as some sort of a pay raise that the taxpayers are going to pay for. This could not be further from the truth.

We are trying to get away from that. We are not asking for a pay raise. It has nothing to do with it.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because I wanted to thank the gentleman in his remarks for correcting an exchange we had before. We were talking about published material before. In checking the rules, the gentleman was exactly correct with regard to articles. This gentleman was referring to the receipt of copyrighted royalties on books, and I think there was some confusion in my mind. I thank the gentleman for correcting that and putting it in his statement.

Mr. DICKINSON. I thank the gentleman for recognizing the correctness of my position.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Wisconsin.

Mr. OBEY. I would just like to suggest that the public, the taxpayers, will pay for this. They will pay for it in terms of reduced confidence in this institution. They will pay for it in terms of the easy relationships which are developed over the years between

client, the fellow who pays the honoraria, and the person in this House trying to do the public's business.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, I thank the gentleman from Mississippi for yielding me this brief period of time. I want to address myself to what I think is probably the most important issue that has come up before this body.

We have a terrible post-Watergate syndrome that still permeates and taints this Congress for no justifiable reason. Our forefathers, we have talked about the framers of the Constitution, were all businessmen, lawyers, jurists, ship chandlers. They went back to their businesses after serving their country well for a brief period of time.

What we have to do, as Members of Congress now, is give up our businesses, give up our professions, and have nothing to go back to. Consequently we become professional politicians. When we reach the age of 50 and we have been here 10 years, we have no trade and no profession to go back to.

What, then, is our greatest fear? Losing an election. So what do we do? Then every vote we cast is based on the premise of will we or will we not be reelected if we vote a certain way on an issue, because we have no job to go back to, no profession. We have become professional politicians.

Then our greatest fear is losing our elected seat in this body and we start casting political votes.

We are not asking the taxpayers for one dime. We are asking them to allow us in our professions and in our businesses and in our trades to be able to remain citizen-politicians, or citizen-legislators, or citizen-Congressmen.

After all, that is what it was all about when this Congress was founded. I am asking my colleagues to vote in favor of this. If you cannot handle your duties that you have been elected to do, the first group to know it will be your constituents. Believe me, they will call you back in 1982 or in 1984. If you cannot handle their business, they will know it and they will bring you home.

I am asking my colleagues to vote for this amendment to the rules. If we handle the people's business expeditiously we will be justly compensated for it at $60,000, and then we can go about handling our own and receive no justifiable criticism from anybody who has asked us to represent them in this body.

I urge my colleagues to vote and on a rollcall vote or a voice vote, but have the courage to vote for what will not cost your taxpayers a dime. They will be better for it, the country will be better for it because maybe you will spend less time here. They will be better for it and you will, too, because you will spend more time with your families and more time with your businesses.

Mr. JOHNSTON. Mr. Chairman, will the gentleman yield for a question?

Mr. HARTNETT. I yield to the gentleman from North Carolina.

Mr. JOHNSTON. As I understand the situation, the Treasury will be allowed to tax these additional earnings, so we will actually be doing something for the American taxpayers.

Mr. HARTNETT. Not only that, but every honoraria you make has to be listed and they will know exactly where it came from, they will know who gave it to you, what you got for it.

We are not hiding anything, not hiding a thing. We are asking to be able to continue our trades and our professions.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. PHILIP M. CRANE).

Mr. PHILIP M. CRANE. I thank my distinguished colleague from Mississippi for yielding this time to me.

I had the opportunity to serve on the House Administration Committee when we initially imposed these limitations. They grew, in no small measure, out of a feeling of outrage by one of the colleagues here in this body over a colleague in the other body, one who had a readily identifiable nationality, who spoke before an organization representing that same nationalistic constituency. He had received an honorarium to the tune of $10,000, whereas his average honoraria were in the neighborhood of $250 to $300 maximum.

I shared this sense of outrage that that colleague felt when he said we have to prevent this, we have to guarantee that we put some limitations on what Members can earn.

I argued at the time, and I voted against what we did at the time, and I voted against this sort of thing that that is a decision, with full reporting, for that man's constituents to make. If they feel that he has been compromised as a result of accepting an honorarium from a particular group like that, then they will ultimately render a judgment at the polls. And my colleagues know that their opponents will be going after them and attack them on the grounds that they have possibly been compromised if one can show any correlation between accepting an honorarium and subsequent votes that have come before this body reflecting the interests of that group. We all go through that with PAC contributions already. My colleagues know that if you get PAC contributions that are heavily tilted to this interest group or that, that your opponent will use that against you in a campaign. The papers in your district will use it to question whether you have not conceivably been bought off by this group or that.

As a result, I would urge my colleagues to recognize that the Founding Fathers stipulated three conditions only for holding office here. One is that you be a resident of the State; two, you be a citizen for at least 7 years; three, you be at least 25 years of age. They also stipulated that States can put up no other conditions for holding office in this body.

To be sure, we can. But what I am suggesting is that when we impose the limitation on outside earned income increasingly we are transforming the composition of this body.

The previous speaker already touched upon one ingredient. That is the full-time professional politician, the person increasingly who cannot make it on the outside, and perhaps is holding the best job that he could ever hold in his life here as a Member of the U.S. Congress. If that does not potentially compromise a Member, I do not know what does.

The other is the millionaire who can afford to clip coupons and make $1 million a year or more in so-called unearned income and serve in the U.S. Congress. These two groups certainly do not accurately reflect the constituencies that we represent in this country.

I urge the Members to support this resolution. I am wholeheartedly in favor of it.

Mr. BOLLING. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Chairman, I now have a feeling of confidence that we are going to be able to pass this change in our rules. When the gentleman from Illinois (Mr. PHILIP M. CRANE) and myself are in agreement on these issues, I think that there is hope that we are going to make the right decision.

I have listened to this debate and I have heard several things that I think should be reviewed and looked at very carefully. One is the concern for the institution. I do not think there is a Member here who is not deeply concerned over this institution and how it is viewed by the public. I think we all are deeply concerned and we all recognize that responsibility.

We are Members of the House of Representatives in the U.S. Congress and there are very few honors any of us could have that could equal that. I believe we know it.

So I do not think any of us are going to deliberately do something to discredit this body. I do not believe that this body was looked on with more favor by the public before we put these restrictions in than since we have put them in. In fact, because of certain circumstances that happened along the way, maybe we are looked on with less favor today than we were before we put these restrictions in. I

do not know. All I know is we have not had any soaring gain in popularity.

What I do know is that Members have been placed under a continual strain financially to be able to serve our country, to serve the people we represent, and to stay in the Congress, and not get ourselves bound deeper and deeper into debt.

I feel, as I believe a majority of the Members feel, that if the opportunities present themselves due to the profession, due to the areas that the individual Member is working in where there may be an interest where he can speak out and where he can legitimately and honestly earn money above his salary, that should be available to him.

I would like to point out that under our own disclosure rules everyone knows what we are getting. If I get an honorarium from ABC Corp., I file that and everybody knows it. If anybody wants to argue that, or think I should not be elected because I have accepted that honorarium, that is the right of the public and they can make that decision.

But to say that I do not have the right to do that I think is absolutely wrong.

I also feel that and understand that in this proposal in 1983, at the end of 1983 we in the Congress will review what the impact of this legislation has been. I am sure if we find that the public is outraged, that if Members of Congress have been compromised somehow by this, the Congress at the end of 1983 will end all of this. I am not worrying about that. We will end it all.

But I will tell my colleagues I am convinced the public will not feel in any sense that we have betrayed them. If anything, they will have a respect for the fact that we have a capability that we are using, that we are disclosing and telling the public what we are doing, and also we are not costing the taxpayer anything for this. I think that is something that they will be very concerned about as well.

□ 1130

I think we ought to vote, on this issue. Someone said we should not try to pass it on a voice vote. I agree with that. I think there ought to be a vote, and I do not think Members will have any problem. We have the leadership on both sides of this House, Republican and Democrat, supporting this. We obviously have conservatives on the Republican side and moderates to liberals on the Democratic side saying, "Vote for this measure." I hope we will pass it.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman from North Carolina (Mr. JOHNSTON).

Mr. JOHNSTON. Mr. Chairman, we in this body are awfully fond of putting euphemisms on our various and sundry acts. I would like to think of this act as the earners' equity act, because it simply places those of us who are accustomed to earning our own money in private business and industry on parity with those in this House who have been fortunate enough to have an ancestor, a relative, who endowed them with a trust fund. It is remarkable, to me, that this body would permit me to literally draw hundreds of thousands of dollars a year in dividends from a small company but would deny me the right to pay myself $15,000 a year in director's fees from that same company, purportedly because a conflict would exist.

The last thing we need to do is spend more time in Washington, D.C. We need more time out there in the real world where the wealth of this country is produced, and we need more contact with the people who are producing it.

Some of my most valuable time as a Member of this House is spent in serving for free as a director of several small businesses. I hear described firsthand those experiencing the onerous effects of our excessive regulation.

Now, it is a shame that I have to serve for free because of this limitation.

The distinguished gentleman from Wisconsin has suggested that the taxpayers of this country are entitled to full-time Congressmen. That does not coincide with the wishes of the framers of our Constitution that operated so well when we did not have a professional caste of Congressmen, as mentioned by the distinguished gentleman from South Carolina.

One of the things I have noticed about this House is that the Members of this House who have the most attractive alternatives to serving in it are the ones who seem to maintain their independence. As a matter of fact, a distinguished gentleman from Georgia, who happens to also be a medical doctor, seems to function pretty much as he pleases because, after all, if he loses his $60,000-a-year job, he has got one that will pay him probably four times that much. I like the idea that we will maintain that independence from our congressional salary. But another factor that the taxpayers ought to consider is the fact that we are going to have to pay tax on all we earn, and in a House dedicated to balancing the budget, what better way to balance the budget than by taxing us more?

Mr. BOLLING. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. Mr. Chairman, each weekend, when I travel to my home district in western Pennsylvania, I have the opportunity to talk to many groups of people. I usually tell them that there are three good reasons why I have been invited to speak before them. One is that I come anytime I am asked. The second is that I do not talk too long. And the third is that I do not charge them anything.

I rise in opposition to this resolution. I regret that the other body has seen fit to circumvent the rules and regulations that we adopted jointly almost 4 years ago. But they have done so.

Last year, only 63 Members of this House approached the maximum income level established for speaking and outside engagements, truly less than one-sixth of this body.

This is a full-time job. We must devote our full time and energy to it. We manage $700 billion of other people's money in the time that we are here. In addition to managing these billions of dollars, the consequences of every action that we take in this body are felt not only throughout this country, but throughout the world. And although some Members have stood here and pleaded that we should be part-time Congressmen, that the people in general would be better off if we spent more of our time back in our districts, that is not the fact today. The fact today is that this is a full-time job. This is October. We have been here for 10 months. Next month we will have been here for 11 months, and we will probably be here on into December. When we are not here, we should be back listening to the problems of our constituents and meeting with our people, not traveling all over the country making money for ourselves.

Certainly the minister may go back on Sunday to preach in his pulpit, the physician may go back to his office to check on his practice, and I as a lawyer may go back to my office; but these are not full-time jobs. We abandoned our full-time professions and our full-time businesses when we accepted the responsibility of representing in this House the 500,000 people in our districts.

Certainly there are inequities. We need to consider addressing these inequities, but not by going backward on ethics reform. We must not support any activity that suggests the use of congressional office for personal gain.

We have improved the image, reputation, and yes, the conduct of this House, because as every individual Member knows, we have proven to be responsible for every district in this country, not only our own. And in working to maintain that reputation, and to sustain the high standards of conduct of this House, I think that we are all better off—and certainly so are our constituents.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I want to commend the gentleman for

his statement and associate myself with it.

Mr. MURPHY. I thank the gentleman.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, I, too, want to congratulate the gentleman. We have made great progress, particularly in the post-Watergate era. But there is still a good chunk of the American public that thinks we are bought and sold by the special interests. And there is still a good chunk of the American people who believe that you can take any six or seven Members of this body, just like dipping your hand into a barrel and selecting at random any six or seven, and they will take money in a brown paper bag. I think we have to address ourselves to that reality and that perception. I think that is what the gentleman is talking about. It has already become a reality for some Members of Congress that they do not have a ceiling at all on what they can earn. The gentleman knows that.

Mr. BOLLING. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, first of all, I would like to thank the gentleman from Missouri for yielding. Although I take a different view in this particular case, there is no one in the House who I respect any more, and I really deeply appreciate his yielding this time and wish to acknowledge my greatest respect for his leadership over a long period of time.

But, Mr. Chairman, this is a step backward in terms of ethics and integrity. Nearly 80 percent of the outside income in 1980 came in the form of honoraria. Typically, this comes from special interest groups. As the gentleman from Indiana and the gentleman from Wisconsin so clearly pointed out, this raises questions of conflict of interest both real and perceived.

I understand why this measure is being proposed. Frankly, very few Members of Congress earn less outside earned income or unearned income than I do. But we need to take our time in our districts and with our legislative duties: 24 times a year, at $1,000 a pop, or even 12 times a year, at $2,000 per speaking appearance, cannot be justified. Would you want people that you paid $60,000 a year to moonlight in this fashion? I suggest you not only would not want that, you would not even want your office staff to spend that kind of time outside of the duties they are paid to perform.

Consistency is important. This resolution is not fair to those Members of Congress who quit after this restriction was imposed in 1977 rather than to live under it. I do not believe there is anything that has happened since that time to suggest that we ought to take a step backward, in terms of our ethical rules or our standards and principles.

Now, finally, let me address an argument that has been made again and again about our being second-class citizens to the Senate.

I have the highest regard for the ethics, personal ethics, of the people I have met as colleagues here. But what the Senate has done is——

The CHAIRMAN. The gentleman will please suspend for just a moment. The gentleman knows full well the rules of the House pertaining to statements or characterizations concerning the other body.

The gentleman will please proceed in order.

Mr. LUNDINE. Emulating the lifting of the rules of the other body cannot be justified and cannot be used as a rationale for doing what we would not otherwise be engaged in. I plead with my colleagues that we should take another look at this. We should take a look at this a step back, in terms of how our constituents and others across America will look at this. While I understand some of the background and some of the reasons, I urge the Members to vote against this resolution.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. BURGENER).

Mr. BURGENER. Mr. Chairman, I rise in support of this amendment, this proposal, even though it will not affect me personally because I shall be leaving this House, with great reluctance, at the end of this term, and I shall miss it and all of the Members very, very much.

I have said in the past that if this House does not bite the bullet, face up to the fact that this House needs to be paid better and have better allowances, that within a very few years there will be two kinds of people serving here, millionaires and "ne'er-do-wells."

Now, there is not anything wrong with personal wealth, but the present rules discriminate heavily against those who do not have it.

Now, I used to say, facetiously, in my talks in the district, that one of the worst things to happen to this House and this Government and this Congress was the development of air-conditioning. And I said it somewhat facetiously, but I say it quite seriously now.

□ 1145

Back in the old days, when it got hot and muggy and sticky, before this place was air-conditioned, the Members went home in June and did not come back until January and caused no further mischief for about 6 months.

I used to say that tongue in cheek, but I am quite serious about it now.

It seems to me if this House would work 5 full days a week, which we do not, that is here in session in Washington, D.C., work Monday through Friday, diligently, for 6 months, and then go home and stay home, and work with our constituents, for the other 6 months, throughout the district, the net result would be fewer laws and better laws, a lot more carefully thought-out laws, more carefully attuned to the wishes of the people who we represent.

Now, if the net result we have produced as full-time, professional, "do nothing else with your lives but be legislators," if that has produced the mess that we are in today, it is a poor argument for professional legislators. I think we ought to be more closely attached to the real world and live more like our constituents do.

It is a financial penalty to serve here, a severe sacrifice and a real financial penalty, even though a great honor. We should eliminate any restriction that makes it such a penalty. The country would be better off. I thank the gentleman for yielding this time to me.

Mr. BOLLING. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I mean no disrespect to anyone in this body when I make three points.

No. 1, an increasing percentage of the Members of the House and the other body are millionaires. I do not mean that in disrespect to anybody. But we must ask ourselves whether that is a trend that is a healthy trend for the Nation.

And my conclusion is that people ought to be eligible to serve here regardless of income, but we should not encourage one particular economic sector.

No. 2, I hear a lot of confusion on the time part-time thing. I do not know Members who are not working full time. But let me give my colleagues a practical example of what this rule has done.

Many of the Members here served with Otis Pike, a Member of this body, a very fine Member of this body. Otis Pike happened to be an officer of a family corporation and when we passed the limitation rule Otis Pike did not run for reelection. I mean no disrespect to the man who succeeded him in this body to say that was no great victory for the House when we made that move.

It is very strange that if I am accepting $250,000 in dividends from Texaco, that is perfectly ethical. If I take $500 from them or anyone else as a speaking fee, that is considered unethical. That does not make sense to me.

If I could just make one further point and that is the answer in this field has to be disclosure. There is no other protection for the public. And our disclosure laws frankly ought to be tightened. We do not include spouse and minor children, as we should. That ought to be tightened. But to pretend that we are doing something for the public with the present rule, I think, is great PR.

Mr. LUKEN. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Ohio.

Mr. LUKEN. I thank the gentleman for yielding.

I would like to associate myself with the remarks of the gentleman and in respect to the complaint of the gentleman from New York that conflicts of interest will be set up; actually the conflicts of interest are inbred in the present rule. Therefore, I think it should be changed.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I thank the gentleman for yielding.

Mr. Chairman, I want to compliment the gentleman in his presentation of the same argument I was going to make, do we want a body of people or a body of elite and I want to thank the gentleman for his comments.

Mr. SIMON. I thank my colleague.

Mr. BOLLING. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Chairman, I have heard some interesting debate on what the Founding Fathers of this country did or did not intend. I rise to offer one other interpretation.

It is my impression from early schooling that the Founding Fathers of our country unselfishly took time off from building their barns to help build a nation. They put a premium on public service because they believed that public service was its own reward.

They seemed to know what we have forgotten, that service in the highest legislative body in this land is a special privilege and it is that special privilege and that special privilege alone that confers the special opportunities for financial rewards outside our daily constitutional duties.

I do not rise to debate how much pay is too much pay, but I simply would observe with the gentleman from Virginia, my friend (Mr. BUTLER), that one cannot cloak himself as a common man and expect to be rewarded as a prince.

In these days when the integrity of our most cherished institutions in this country are under attack—the family, the church, and government. I should think that by the adoption of this resolution we would lose more of that precious reserve of institutional integrity than we would ever gain in financial rewards for ourselves or our families.

I urge the defeat of the resolution.

Mr. BOLLING. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, I have been thinking a great deal about peer pressure lately, as the father of a 12-year-old girl, and I think the peer pressure on 12-year-olds is great, but there is a lot of peer pressure in this place, too, and I want to soft-pedal my criticism of this amendment because I am one who in all likelihood will not be seeking reelection to the House, and I urge my colleagues over on the other side of the aisle here not to cheer, because they may see me in another place.

It seems strange to me that under the guise of a citizen legislating, under the guise of what our friend from South Carolina mentioned, spending more time with our families, we might be about to pass this amendment.

I do not think it is a question of whether we are going to have professional politicians. I think it is a question of whether we can put ourselves in the position by passing this and looking like we have professional prostitution. We would not. But it will look that way in many respects.

It has already become a reality for some Members of Congress that there is no limit on what they can earn, and one can evision a situation where we can have some Members of Congress being virtually on retainer to the major corporations in the country. Fifty speeches, $2,000 each, $100,000.

So I think that we ought to at least think very hard about what we are doing and about our whole situation with regard to what it is like to serve here.

I disagree with the gentleman who earlier said serving here is a penalty. Serving here is an honor. Serving here is an honor and serving here is indeed a sacrifice, and it should be a sacrifice, and I say that as not one of those millionaires to whom I, of course, mean no harm, but as one who does not have resources of my own.

I am not against honorariums. Few of us are pure in this area. But we are going to the extreme here and especially these who support no limit at all on what Members can earn outside. That, I believe, is an unfortunate position that, in many ways, puts people who have a public trust up for hire by private interests.

The political arena has become contaminated with money, mainly through special interest contributions. It has gone much too far, much too far.

Let us not take the reasonable limits on outside income to the same unproductive extreme.

Mr. BOLLING. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. LAFALCE).

Mr. LAFALCE. Mr. Chairman, the present system of compensating Members of Congress, and the House of Representatives in particular, cries out for reform. Change is needed. I come to this particular change, though, with mixed emotions, because I think there is an element of good and an element of bad in it.

On balance, however, I have to reject this particular change.

First of all, on the issue of salary and various expenses, the press will criticize us, rightly so, for what we do wrong, but unfortunately, they will also criticize us for any really needed reform we would try to effectuate.

A case in point is the elimination of that $3,000 deduction limit. Anybody who is living back home in his own congressional district and also has to have a place to live here is spending about $6,000 minimum in housing expenses here, I would say, in addition to what he is spending for his house back home.

The press would not have us treat that as an ordinary and necessary business expense, as every businessman in the United States can do. That is absurd, which points out the difficulty we have in effectuating honest reforms that would simply treat us as ordinary citizens.

Actually what we should do, if we are going to be treated as ordinary business citizens, is to be given a per diem. A great many State legislatures, such as New York, give legislators per diem allowances, as do most corporations. But let us do that forthrightly. Let us not proceed via the back door approach. We must do this soon, also, as the cost of maintaining two homes, one here, and one in our district, is becoming virtually impossible. We are, therefore, forcing Members, and their families to become full-time residents of Washington, D.C., rather than their home districts.

Now, in this back door approach we have two different paths that we are taking. One is the limit on outside earned income, which would be lifted from 15 to 40 percent: Included within that is the limit on honoraria. Here is where I would distinguish. I do not like the 15-percent limit. I do not even like the 40-percent limit on outside earned income. I do not think we should have any overall limit. If, for example, a doctor wants to treat patients on a Saturday, both to maintain his medical skills and to retain his medical practice, so he can both supplement his income, and, most importantly, maintain his independence should he lose reelection, he should retain that right and option.

However, I think we should have a limit on honoraria, and I think that

the $25,000 limit, when we make a $60,000 salary, is just too much. A 15-percent or 25-percent limit on honoraria is much more reasonable.

Further, let us not kid ourselves. There are only a few legislators here who are going to, in effect, cash in on this charge. It would not be a prognostic charge for 435 Members of the House, but for about 10 or 20. Moreover, it would diminish their fervor for the other reform that are so absolutely necessary to adequately and fairly compensate all Members.

Mr. LOTT. Mr. Chairman, I yield 3 minutes to the gentleman form California (Mr. BADHAM).

Mr. BADHAM. Mr. Chairman, I have listened with great interest to this debate. It came to mind today what I thought was an interesting expression I heard some months ago, that there are a lot of people out there counting other people's money.

I would like to discuss that for a minute because I think it is eminently true in the context of this debate.

We all know that the financial needs and requirements of each Member of Congress are different. There are those Members who want to apply certain economic standards to all other Members for a variety of reasons. But I question whether it is appropriate for one Member to apply his standards to another.

I would ask my colleagues to come to the conclusion that we do have legitimately different financial requisites. There are married Members with no children and two incomes. There are married Members with lots of children and responsibilities. There are unmarried Members with no responsibilities at all, in some cases, but everyone is different.

So what we are trying to do here, I think unfortunately, is to buy ethics and impose a monetary system of ethics on others. Now I say to my colleagues, we cannot buy ethics. It is not the responsibility of one Member to tell another Member what he can live on and what he cannot.

We had some years ago in California, in my view, one of the most ridiculous circumstances I can imagine. We had boards and bureaus and commissions run by advisory boards and regulatory commissions in California that regulate all sorts of things from funerals to marriage counselors to schools to accountants, to lawyers. We had a proposal in California to say that the only people you could appoint to regulatory boards and advisory commissions were people who knew nothing about what they were regulating in the idea that they would be unsullied by knowledge. Therefore they could regulate honestly because they would not know anything about what they were regulating. That is a perfect analogy to what we are trying to do, that is live and legislate in a vacuum.

□ 1200

This is what we are being asked to do here. We are being asked to regulate somebody else's potential for using his expertise in the marketplace.

I think that this resolution is modest. The resolution is fair and should be adopted.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. BADHAM. I yield to my friend, the gentleman from California.

Mr. BURGENER. Mr. Chairman, I thank the gentleman for yielding. I would like to associate myself with his remarks.

I earlier mentioned that I felt it was a penalty to serve in this House. I would like to clarify that. I mean, of course, a financial penalty. I believe that sincerely.

It is, of course, a rare privilege to serve here, an honor that is accorded far fewer people to do it than actually seek it. I am sure we all share in that, but I subscribe to what the gentleman is saying and I want to associate myself with his remarks.

Mr. BADHAM. I thank the gentleman sincerely for his contribution.

I might add that the gentleman from California and I have served in legislative bodies together in the past. I agree with the gentleman in his statement that it is a distinct and great honor to serve in the House of Representatives of the United States of America.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. LOTT. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. BADHAM. The question is whether a person so selected by his constituents faces that honor honorably enough to be able to make speeches and receive an honorarium, to write articles and receive an honorarium, and to disclose his income to his constituents who rendered him that honor. I think the Members of this body are at least of that caliber.

And the Members should and most do disclose their finances to their constituents—that is proper—so that a Member's constituents can judge his worth to the district.

I hope the resolution is adopted.

Mr. BOLLING. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, back in 1921, Senator George Norris of Nebraska made the following statement. He said:

> If trusts, combinations, and big business are to run the government, why not permit them to do it directly rather than through this expensive machinery which was originally honestly established for the protection of the people of the country against monopoly and control?

He could well have made that statement today regarding this resolution.

I am not opposed to honorariums as such, but what I am opposed to is setting up a system, a dynamic, that will push Members of Congress to seek those honorariums and in so doing lessen the ability of Members of this House to function as public servants.

The gentleman from California corrected himself, and I am glad he did. This is the best job I will ever have in my life. It may not be the highest paying job, but it is the best job in the entire world, because it is a job of serving the public; but what this resolution will do, it will set up a dynamic to push Members out to seek honorariums. If the X Y Z Oil Co. wants to give you a $2,000 honorarium to speak at their luncheon, are you going to go there and tell that oil company that you thought the last tax bill was a ripoff for the oil companies? Of course not. You are going to go there and tell them what they want to hear. Or, as the gentleman from Georgia said, you can go and talk about baseball. That sets up a dynamic in this body whereby this body will then pander to those special interests.

Without any increases in salary, by increasing the per-unit limit on honorariums, plus raising the total limit on honorariums, I believe that Members in this body in the future will be tripping over one another to go out and seek those honorariums. I do not believe today Members really go out and seek them, but you let them make $24,000 a year and $2,000 a speech, and Members will be rushing to the doors to get their airline tickets to go out and seek those honorariums and thereby, I believe, giving the appearance of that conflict of interest which demeans the stature of this body.

Mr. LOTT. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, I have a great deal of respect for the speaker. I wanted to make the point, I would love to run against someone that starts taking $2,000 speaking fees or honoraria from the oil companies. That is what I think my friend is overlooking.

I voted originally—as the gentleman knows, I was a strong supporter of the original bill, including the cap. I have come to the conclusion that we have lost in this body many good men and women that should be here, but cannot afford to be.

I agree with my friend, the gentleman from Illinois (Mr. SIMON) who pointed out, that we may eventually become a Congress of millionaires. A lot of us are not millionaires.

My feeling is that the key word is disclosure. Like I say, if I go out and take an honorarium from some organization that I may be able to influence or have some impact on, then let my opponent, because of disclosure, raise

that as an issue in the campaign and make me defend that if I have done something unethical.

I think the key word is "disclosure" and I think the gentleman is raising some specters which are not accurate.

Mr. LOTT. Would the gentleman like 10 more minutes to speak along those lines?

Mr. Chairman, I yield 5 minutes to the gentleman from Wyoming (Mr. CHENEY).

Mr. CHENEY. Mr. Chairman, it had not been my intention today to take the well and address this particular issue, but as I listened to the debate and heard comments from Chairman BOLLING of the Rules Committee, from my good friend, the gentleman from Indiana (Mr. HAMILTON), I felt that it was essential that we try to put the resolution in some perspective.

I have enormous respect and admiration for the gentleman from Indiana (Mr. HAMILTON). I served with him in the Ethics Committee in the last Congress, my first term in this body. I do not believe that I am insensitive to the ethical issues that are involved with service in the Congress, having taken this well once before to argue for the expulsion of the only Member who has ever been expelled for misconduct; but I must disagree with those who are opposed to this resolution. I think it deserves approval.

As Chairman BOLLING has pointed out, it is a compromise between those who advocate the continuation of a limitation on outside earned income and those, of whom I am one, who are opposed to any limitation at all.

I think it should be pointed out that one of the organizations that has in the past been a watchdog of congressional ethics, Common Cause, did testify before the Rules Committee and state that the organization would support an increase in the limitation on outside income.

I think it is extremely important to be precise in pointing out what the resolution does not do. It does not affect campaign contributions. Those would still be covered by existing law with limits and with reporting requirements and with full and complete disclosure.

It does not affect the taxpayers' money. No public funds are involved.

It is not a pay increase. It does not increase the public compensation of any Member.

The resolution does deserve support because it moves us in the right direction.

We do need to consider the issues raised by the chairman of the Rules Committee in his opening remarks today. I think we need to reassess what the long-term impact has been on this body of the adoption of rule 47 and the other rules adopted in 1977.

As has been pointed out by the gentleman from Texas (Mr. PAUL) and the gentleman from Illinois (Mr. MICHEL), the distinguished minority leader, it has become increasingly difficult for a great many people to serve in this body. The more restrictions we impose, the more difficult we make it for people to accept the personal and financial sacrifices that go with membership in the House, the more we limit membership in the House to those who have great personal wealth or no prospects of ever earning more than they could through congressional service.

This rule change does not affect the disclosure requirements which apply to every Member. As the gentleman from Illinois (Mr. SIMON) has so eloquently stated, in the final analysis the utlimate judge of who serves in this body rests with the voters. As long as they have access to full and complete information about a Member's outside earned income or outside unearned income or campaign contributions, it seems to me we have met the requirements that service in the House imposes upon us.

The resolution does not completely solve the problem, but it does help. It will serve to encourage the kind of diversity this House must have if we are to effectively do our job. I would urge my colleagues to approve it.

● Mr. DERWINSKI. Mr. Chairman, I rise in opposition to this resolution to raise the limit on annual outside earned income for House Members as well as increase the amount allowable for a single honorarium.

When we debated the continuing resolution last month, I said that we should stick to the rules we have set on outside earned income and that I did not believe there was any necessity for the Senate to remove the ceiling on their outside earned income. However, the Senate, which already had a higher ceiling on this income, prevailed on the issue.

Mr. Chairman, since we all know that two wrongs do not make a right, we cannot in good conscience approve this resolution to give ourselves the same unjustified increase in the honorarium limit which the Senate has voted. There is also no reason for the House to increase the limit on outside earned income at this time just because the Senate has removed the limit for themselves.

I urge my colleagues to vote this resolution down. It is not necessary, it is not justified, it will naturally raise questions for any Members who devote time to outside interests rather than their legislative duties.●

● Mr. HANSEN of Idaho. Mr. Chairman, today's vote to remove outside income limitations is an honest effort to save Congress from becoming a body of political bureaucrats unable to understand and resolve the problems of the people they serve.

Congress has always been the citizens' voice in Government because it is composed of persons of all types and professions who are socially and economically a part of the people themselves.

When Congress, a few years ago, removed themselves from being part of the people by requiring arbitrary economic severance from their family businesses or professions, they created a body economically isolated from many of the problems of the people and dependent to an unhealthy degree upon their U.S. Government congressional pay for personal income.

Because of this type of restriction Congress is becoming a rich man's preserve where it is legal to clip stock coupons for outside unearned income, but not legal to take earned income from the family farm or business.

This country was instituted of, by, and for the people, not to become another foreign type operation ruled by the wealthy few.

The vote to knock out the arbitrary outside earning limitation is not to vote an increase in pay to Congress—in fact, it is a means of holding down on congressional pay increases at taxpayer expense. It is also guaranteeing that Congress will remain a voice of the people of whom they are a functional part—rather than becoming bureaucratic politicans far removed from the people and at the mercy of special interest groups to keep a job they might well become desperately dependent upon once they have been cut off from the independence of outside income possibilities which allow them to tell the pressure groups where to go.

And this legislation also restores Members of the House to the same privileges as Senators and the kind of individual freedom all other citizens enjoy.●

● Mr. FRENZEL. Mr. Chairman, in my judgment, as I have stated and restated here, it is unnecessary and counterproductive to limit outside earned income of House Members at all. This resolution raising the limits of outside earned income is therefore easy for me to support.

The resolution is before us because the Senate removed its limitation on all outside income. House Members understandably believe that what is sauce for the goose is sauce for the gander, too.

Personally, while I want no limit on general outside income, I strongly believe that there should be limits on honoraria income and that those limits should apply by law to both bodies. As a matter of fact, I had a strong role in passing the law that the Senate just repealed. Perhaps the limits needed adjustment, but we surely need limits because that kind of income stems directly from our service

here. Excessive seeking of honoraria detracts from that service.

Therefore, while this resolution providing a limit of 40 percent of salary on outside earned income is clearly temporary, and a compromise, it is just as clearly a good, temporary compromise. It ought to be passed.●

● Ms. FIEDLER. Mr. Chairman, I am unalterably opposed to the concept of raising the amount of outside earnings that can be made by a Member of Congress. I believe the people of my community elected me to be a full-time Member. I think people all across this country expect their Members to be full time.

Furthermore, we stand here today debating whether or not we should be allowed to earn an additional $15,000 a year in outside earnings while the House refuses to lift the earnings cap on social security recipients. Among those recipients are some of the people who most need to earn extra income, yet the Federal Government takes away benefits if they earn too much.

We are in a period of time when we have asked the American people to tighten their belts, to do with less from Government. Yet, although the earnings being debated here today are not Government funds, to alter Members' earning capacity upward is untimely.

Additionally, it is conceivable that while campaign laws restrict the ability of certain special interest groups to contribute to campaigns, those same groups could give a Member a $2,000 honorarium, thereby circumventing the Federal campaign limits.

Again, Mr. Chairman, I am opposed to increasing the outside earnings limitation. My commitment as a Member is to serve the people of my community full time. I hope that a majority of the Members will agree with me and vote down this resolution.●

● Mr. JEFFORDS. Mr. Chairman, I intend to vote against House Resolution 251, which would substantially raise the limits on our outside earned income. Because this is a sensitive issue, I wish to explain my reasons for opposing this potential indirect pay raise.

I oppose this resolution not because it would raise the overall limits on outside earned income, but rather because it would double the amount of money Members of this Chamber could receive through a specific source of outside income: legalized bribery, better known as honoraria.

For the purpose of regulation, I personally see no moral distinction between earned and unearned income. Under House rules, if a Member of this House sits in a broker's office all week and clips coupons, this is considered perfectly proper. But if a Member works on his farm or other business on evenings and weekends, such work is considered morally wrong and illegal. This is a double standard which has no basis in reason. In my view, the amount of time a Member spends on work in Congress is a political issue, not a moral issue. If his outside work interferes with his ability to devote sufficient time to congressional business, his activities can be appropriately—and effectively—challenged in the political arena. I believe the only time a moral issue is raised, and a legal issue should be raised, is when outside earned income is provided by virtue of the office we hold.

I recognize that small honoraria, to compensate a Congressman for his effort and inconvenience in addressing groups on vital issues, may not create any problem. But when a special interest group pays $1,000—let alone $2,000—for a short speech, it is clear that the payment is made for the purpose of influencing legislation.

In summary, I could have supported House Resolution 251 if its only effect were to raise, or even remove, limits on income actually earned by Members, provided that such income is not a result of the office we hold. But I can not vote for an increase in legalized bribery.●

● Mr. TRAXLER. Mr. Chairman, I opposed the resolution that was before the House today, as I have also opposed other recent efforts to indirectly, or directly, increase the pay of Members of Congress.

House Resolution 251 would have amended the House rules to raise the limit placed on outside earnings from 15 percent of congressional salary to 40 percent. The present 15-percent limit was one of the most important parts of the ethics code this body adopted in 1977. I supported the limit in 1977 and the reasons for enacting the ethics code at that time have not changed. There is no justification for backing down on the commitment we made just 4 years ago. Preservation of our ethics code is vital to maintaining the high integrity of this body.

Needless to say, I was very disappointed that the other body chose to raise its limit on outside earnings. The fact that they did, however, does not give this body reason for doing so. I do not believe that we should follow their lead. I voted against House Resolution 251 and I am pleased that the majority of my colleagues joined me in defeating this bill.●

● Mr. BONKER. Mr. Speaker, today, the House is expected to vote on House Resolution 251, which would raise the current limit on income earned outside official congressional duties from 15 to 40 percent of a Member's annual salary.

House Resolution 251 is being considered on the floor for one obvious reason: With the exception of a 5.5 percent cost-of-living increase in 1979, Congress has not approved a salary increase for itself since March 1976. During that same period, inflation has pushed living costs up 40 percent.

My concern is not over salary increases per se, for Members of Congress are entitled to the same modest, periodic increases as anyone else in today's inflationary economy. But I take strong exception to the enhancement of personal income in the extraordinary manner being considered today.

If I recall correctly, in 1977 Congress imposed a 15-percent limit on outside income, tied to a salary increase, intended to reduce once and for all the need for Members to seek outside income to supplement their Government salaries. By raising that limit today we are returning to the former practice of Members relying on honoraria and other sources of outside income to keep abreast of inflation.

There is also an inherent conflict of interest that arises whenever a Member accepts an honorarium for organizations interested in issues before Congress. That interest may or may not coincide with the Member's but the financial exchange brings into question the integrity of both the Congressman and the organization.

Last month Congress took another step which increases the disposable income of Congressmen. Included in the 1982 appropriations bill for funding the legislative branch was a provision which gave Members unlimited business deductions for expenses incurred while living in Washington, D.C. If fully used, a typical Member could increase his Federal income tax deduction by $13,500.

Congressmen are not prepared, nor should we be, to carefully record each and every penny used to maintain a Washington, D.C. home or to travel to and from the Capitol. The enormous problems in this country surely prove that our energies need to be directed at legislating, not at working to reduce or eliminate our personal tax liabilities at a time when our constituents suffer from heavy and often unbearable tax burdens.

I believe that every Member voting on House Resolution 251 should be fully aware of the consequences of this decision. Let us vote against reducing our own taxes and diverting our attention from the problems at hand. If we are convinced that we need and deserve a salary increase, let us make that decision after full and open debate on the floor of Congress.●

Mr. LOTT. Mr. Chairman, I have no further requests for time. I yield back the balance of my time.

Mr. BOLLING. Mr. Chairman, I yield myself the balance of the time.

I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I rise in opposition to the resolution, know-

ing full well that congressional pay is a subject that almost demands demagoguary. I will resist that temptation, but wish to make a couple of points.

Reasonable pay for a job well done is a matter of importance not only to the Members of this Congress, but to the Nation as well. Unfortunately this resolution does not focus on the issue of reasonable pay, but rather is a back-door attempt to benefit a few at the expense of the many.

Continued back-door attempts such as this could in fact promote avoidance of a thorough, honest review of congressional pay. Also, I oppose this resolution because we should never vote a pay raise to become effective during a Member's term of office. An election, the people's vote, should precede implementation of any pay raise.

Finally, I oppose the resolution because of its timing. We have asked the American people to assume a fair share of the economic sacrifice necessary to strengthen the country. For Congress to avoid a portion of this necessary spirit of sacrifice is wrong. Let us defeat the resolution.

Mr. BOLLING. I thank the gentleman for his resistance.

Mr. Chairman, I think the debate has been a very good debate. I think it demonstrates how divided the Members of the House are in their views. I think it almost proves my case.

I said in the beginning that this was a compromise that I felt necessary to get the matter behind us for a limited period of time.

It comes as no surprise, I suspect to any of you, that I believe that we very badly need to review the whole question of congressional ethics.

I think we have made a mistake so great that only a complete review will resolve it and that mistake is the one that we have made allowing tax exemptions for our expenses here in Washington.

I repeat that I think our failure to deal objectively and seriously with our salary almost disqualifies us as an institution from our right to serve in these important times with all these difficult issues; but I do think that this particular proposal, which I have found hard to produce, is a compromise that will work and that will impel us to deal again with the major problems that confront us in regard to public respect and trust in the institution.

Let me close by saying that this is only a little bit of the problem. The major dilemma that confronts the country today is money and politics. And unless we are able to deal with that, I think it is predictable that all our institutions would fail. That has to be done. The ethical problem in other fields has to be done. It has to be done I believe in the next Congress in the first year and it is the purpose, the only purpose, of this particular resolution.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

H. RES. 251

Resolved, That clause 1 of rule XLVII of the Rules of the House of Representatives is amended—

(1) by striking out "Except as provided by paragraph (b)" in paragraph (a) and inserting in lieu thereof "Except as provided by paragraphs (b) and (c)";

(2) by striking out "In the case of any individual" in paragraph (b) and inserting in lieu thereof "Except as provided by paragraph (c), in the case of any individual"; and

(3) by adding at the end thereof the following new paragraph:

"(c) With respect to any calendar year beginning on or after January 1, 1981, and ending on or before December 31, 1983, the term '15 per centum' in paragraphs (a) and (b) shall be deemed to read '40 per centum'.".

SEC. 2. Clause 2 of rule XLVII of the Rules of the House of Representatives is amended by striking out "$1,000" and inserting in lieu thereof "$2,000".

SEC. 3. The amendments made by this resolution shall take effect on the date of its adoption.

Mr. BOLLING (during the reading). Mr. Chairman, I ask unanimous consent that the resolution be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 2, strike out "January 1, 1981" and insert in lieu thereof "January 1, 1983", and strike out "December 31, 1983" and insert in lieu thereof "December 31, 1984".

Page 2, strike out section 3 and insert in lieu thereof the following:

SEC. 3. The amendments made by this resolution shall take effect on January 1, 1983.

□ 1215

Mr. HARKIN. Mr. Chairman, very simply, what my amendment does is something I feel very strongly about. It puts this off until after the next intervening election and then sunsets it during that same period of Congress in 1984.

Let me say at the outset that I agree with the gentleman from Missouri (Mr. BOLLING) that the House has not been able to face up to the fact that Members of this Congress, the House and the Senate, need pay raises periodically.

I believe further that he was right when he said that that has been a combination of cowardly actions here and also by the actions of others who honestly feel that the procedures were not correct.

I believe that the procedures for raising the pay and remunerations of Members of Congress must be reasonable, rational, and fair.

I also agree with the gentleman from Mississippi (Mr. LOTT) who says that we ought not to be different than Members of the Senate. But what sticks in my craw and what sticks in the craw of the people that I have talked to in this country is that they do not want Members of Congress raising their own pay during their term that they are serving.

James Madison, in 1789, proposed an additional two amendments to the Bill of Rights, the first 10 amendments to the Constitution. So, there were originally 12 amendments that were supposed to be the Bill of Rights, and the 12th amendment read as follows:

No law varying the compensation of services of the Senators and Representatives shall take effect until an election of Representatives shall have intervened.

Even at that time they recognized: First, the necessity of increasing Members' pay and remuneration, but second, that they wanted to put it off until after the next election, because there would be something inherently wrong with Members of Congress voting to increase their own pay and benefits while they were serving that term. Twenty-seven States now have this in their constitutions for their State legislatures. Iowa is one.

So what I am proposing is that we do just that with this resolution, to put this over until after an intervening election takes place and let it go into effect at that time, and then to sunset it during that same Congress.

I have never voted for a pay increase for Members of this body, but I have consistently taken this position: That as soon as a resolution comes out to increase the pay of this body and to do it after the next election I will consider voting for it, because I will not be voting to increase my pay, I will be voting to increase the pay of the office that I hold, and if the people do not want to return me to that office, they do not have to. They can put somebody else in there after the next election. So I would not be voting to increase my own pay.

If we do that, I believe we would get out of the fix that we find ourselves in around here almost every year, because I believe it is a reasonable and rational way to approach it.

But what this resolution does is totally push us in the opposite direction. It sets up, as I said earlier, a dynamic, a dynamic that will push Members of Congress out to seek honoraria. No increases in salary, increase the total limit, increase the per-unit limit, and what you have is a push on Members

of Congress to go out and seek those honoraria.

Members of Congress, I believe, will be tripping over one another to go out and get those $2,000 speaking engagements to increase their salary by $25,000 a year. And the dynamic that will happen then I believe will be to our detriment.

Mr. OBEY and Mr. HAMILTON are every bit correct. This is a major step backward. This is nothing more than a backdoor pay raise, a pay raise not from the public, not from the people that we are here to serve, but a pay raise from the private special interests of this country.

If one goes out to speak to farmers, you do not get any money. If one goes out to speak to poor, you do not get any money. If one goes out to speak to students, you do not get any money. But if one is asked to go out and speak to big business, they are going to have a nice big fat honorarium for you.

If the XYZ Oil Corp. wants a Member to come out and speak at their luncheon and they are going to offer a $2,000 honorarium, how many Members are going to go out and tell the oil company that the oil companies got a big ripoff in the last tax bill? Of course not. The dynamic is there for you to go out and tell them what they want to hear.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 4 additional minutes.)

Mr. HARKIN. So what we do, then, with the passage of this type of resolution is, we move closer and closer to a body that is less responsive to the public good and to a body that panders to the special interests of this country.

George Norris, as I read earlier, said it very clearly back in 1921 when he said:

> If trusts, combinations and big business are to run the government, why not permit them to do it directly rather than through this expensive machinery which was originally honestly established for the protection of the people of the country against monopoly and control.

Senator Norris was right.

So I have perhaps a modest proposal that I would like to throw out to this body in keeping with the philosophy of Senator Norris.

If, in fact, we want private industry and private business to pick up more and more of our pay and benefits, then I have a modest proposal. Let us have private business advertise in the CONGRESSIONAL RECORD; we could have ads for pantyhose and deodorants. Let us put up a nice big Coca-Cola sign over here on the wall in neon lights so all the people can see it. Why do we not go to the cigarette industry and tell them that we want to put some ads up in here on cigarettes? Let us find a nice, proper place for it. How about right up above that sign that says "In God We Trust"? Let us put up a cigarette ad. And then what we can do is, we can use that money that we would get from the advertisements in the CONGRESSIONAL RECORD, from the Coke sign and the cigarette signs, perhaps we could even put some inserts in our mail that we send out to constituents, with some ads in there, and we could use that money to supplement our income. In that way, the people of this country will not have to pay for it.

So if we are going to take this kind of a step, with this kind of resolution, let us start hanging some ads around this body and let us turn over the Government to the private interests once and for all, and do it in a clean, swift manner rather than surreptitiously through this type of resolution.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in support of the amendment.

Mr. Chairman, if the gentleman from Pennsylvania will withhold shouting "vote," I will try to complete my remarks within 5 minutes.

Mr. Chairman, I do not agree with a good deal of what the gentleman from Iowa (Mr. HARKIN) has just said, and I do not agree that the likely result of removing the present limitation on honoraria would result in Members running out to tell people what they want to hear for $2,000 speeches. I do not think that is the way it works here, and I have a much higher regard for Members of this House than to believe that would happen.

What I do think happens is something quite a bit more subtle.

The knowledge that we will have access to that kind of money creates the kind of associational relationships in our committee work which makes it very unrealistic to expect, that we will see Members consistently reviewing issues solely on the basis of their merit.

What it means is that subtly Members will have a great deal of difficulty in disassociating their judgments on individual items before us with the access that we will be likely or not likely to have to those larger speaking fees.

I do not think it will affect the content of speeches at all. I do think that it will have a much more subtle effect on the legislative product. I could care less about the product that people produce for their honoraria.

The reason I support the gentleman's amendment is simply this: When we imposed the limitation 5 years ago, we were advised by Chesterfield Smith, for instance, who was then the president of the American Bar Association, that we should have a flat prohibition on all legal fees. I have always wondered if we did not make a mistake on our commission—if we should not have simply prevented any income from law, because very frankly that is where the greatest potential for abuse comes, and second, if we should not have coupled that with the limitation on honoraria so that we would not have a select few, in the main committee chairmen or other big names in the House, who would be serving at what in reality is at higher levels of pay. I have often wondered whether we should not have gone that way, but we did not do it.

The advantage that the gentleman's amendment would have today is that it would at least allow us the time to make the other changes in rules that would be required to really make this a sensible tradeoff.

I recognize that we cannot expect to hold the present limit, given what the Senate has done. But it seems to me that we need, in the interest of protecting our own institution from abuse and criticism, to adopt rules which will tighten up on a Member's ability to engage in professional activities on company time, so to speak. And I think we can do that by adopting the Harkin amendment.

I would also say again, once more, I am not insensitive to the need to attract and to retain quality people in this institution. But I would suggest to the candidate recruiters who have mentioned it on that side of the aisle that if we do have a problem, let us deal with it forthrightly through the front door, through congressional pay. Let us not say, "Well, fellows, don't worry; you will get $60,000 on your congressional pay, but don't worry, there are arrangements under which you can pick up another $20,000 on the side." That is a much less clean way to do it.

The public is much better served if we face the question of congressional salaries directly, rather than trying to find back door ways of doing it, as we have done here, and as we did a couple of weeks ago. If we deal with it front door, everybody will receive the same amount of pay. If we deal with it through the back door, only the big names or those on committees with special clout will, in effect, receive a higher rate of pay.

I recognize the gentleman from Pennsylvania cannot wait to vote on this. But there is a little more at stake than his personal desires.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. OBEY was allowed to proceed for 2 additional minutes.)

Mr. OBEY. The gentleman from Pennsylvania is going to get his chance. John you are going to win. I would at least like to be able to express my concerns about the needs of

this institution without impolite interruption.

Mr. Chairman, all I would suggest is that for those Members who want to see a pay raise, what they are going to do is set up a structure under which there are going to be one-fifth of the Members of this House who do not have to worry about whether this a pay raise; they are going to get theirs on the outside from special interest contributions through honoraria. I do not think that is the best way to deal with it. The best way to deal with congressional pay is to see to it that everybody gets the same amount of pay, and they get it through the front door, not the back door.

I yield back the balance of my time.

Mr. BOLLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the organization on the outside that has worked the hardest and been the most helpful from my point of view, although some Members are bitterly resentful of it, Common Cause, proposed that there be an increase in the honoraria to 30 percent, and we said 40 percent. They also proposed that the honorarium increase last only to the 1st of January 1983.

□ 1230

While I greatly respect the point that Mr. HARKIN from Iowa made, and the points that Mr. OBEY has made, I repeat again that this is an expedient compromise, which I do not consider dishonorable, to get this Congress through the next year and a few months so that it can attend to the overall problem which is very much more complicated than this one thing, and attend to it properly in the first session of the next Congress.

Therefore, I do not see any reason to give even kindness to the proposal recommended by Mr. HARKIN because it keeps us with the problem that this resolution tries to temporarily resolve, and at the same time assure that it will be further considered later.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

The CHAIRMAN. Are there additional amendments?

If not, under the rule, the committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the resolution (H. Res. 251): Amending the Rules of the House of Representatives to increase the amount of outside earned income which a Member may have in 1981, 1982, and 1983, and to increase the amount of the maximum honorarium which a Member may accept, pursuant to House Resolution 258, had directed him to report the resolution back to the House.

CALL OF THE HOUSE

Mr. MURTHA. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device and the following Members responded to their names:

[Roll No. 281]

The SPEAKER. On this rollcall, 400 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

AMENDING HOUSE RULE XLVII OF THE RULES OF THE HOUSE OF REPRESENTATIVES RELATING TO LIMITATION ON OUTSIDE EARNED INCOME

The SPEAKER. Without objection, the previous question is ordered on the resolution.

There was no objection.

The SPEAKER. The question is on the resolution.

RECORDED VOTE

Mr. OBEY. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 147, noes 271, not voting 15, as follows:

[Roll No. 282]

NOT VOTING—15

Beard	Coughlin	Jones (NC)
Bliley	Dougherty	Lowery (CA)
Burton, John	Fary	Mollohan
Conyers	Florio	Pepper
Corcoran	Johnston	Stark

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Conyers for, with Mr. Jones of North Carolina against.

Mr. Pepper for, with Mr. Beard against.

Mr. Johnston for, with Mr. Corcoran against.

Messrs. DUNCAN, FORSYTHE, NAPIER, HOLLENBECK, HEFNER, and BARNARD changed their votes from "aye" to "no."

So the resolution was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BOLLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just considered.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PERSONAL EXPLANATION

Mr. PEPPER. Mr. Speaker, unavoidably I missed the vote on rollcall 282. If I had been present, I would have voted "aye."

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

APPOINTMENT OF CONFEREES ON S. 884, AGRICULTURE AND FOOD ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 884), the Agriculture and Food Act of 1981, with House amendments thereto, insist on the House amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Texas? The Chair hears none, and appoints the following conferees: Messrs. DE LA GARZA, FOLEY, JONES of Tennessee, BROWN of California, BOWEN, ROSE, RICHMOND, WEAVER, HARKIN, and WAMPLER;

Mr. FINDLEY on all matters except title IX of the Senate bill and modifications committed to conference;

Mr. JEFFORDS on all matters except title VII of the House amendment and of the Senate bill;

Messrs. HAGEDORN, COLEMAN, MARLENEE, THOMAS; and the following additional conferees solely for considerable of section 915 and title XI (except for section 1112 and subtitle B) of the House amendment and sections 1002, 1111, 1113, 1201-1203, and 1205 and title XIII of the Senate bill: Messrs. ZABLOCKI, FOUNTAIN, FASCELL, HAMILTON, BINGHAM, BROOMFIELD, WINN, GILMAN, LAGOMARSINO;

Solely for consideration of title IX of the Senate bill and modifications thereof committed to conference: Mr. PEYSER and Mr. STANGELAND in lieu of Mr. FINDLEY;

Solely for consideration of title VII of the House amendment and title VII of the Senate bill: Mr. LUNDINE and Mr. SKEEN in lieu of Mr. JEFFORDS.

DEPOSIT INSURANCE FLEXIBILITY ACT

Mr. ST GERMAIN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4603) to provide flexibility to the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Cor-

poration, and the Federal supervisory agencies to deal with financially distressed depository institutions; and pending that motion I ask unanimous consent to in one instance include extraneous material during the debate on the bill.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island (Mr. ST GERMAIN)?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Rhode Island (Mr. ST GERMAIN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4603, with Mr. PEYSER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, October 27, 1981, section 1 had been considered as having been read and open to amendment at any point.

Are there any further amendments to section 1?

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, during yesterday's general debate, frequent reference was made to the acquisition of Westside Federal of New York City and Washington Federal of Miami by Citizen's Savings and Loan Association of California. Citizen's is, of course, a wholly owned subsidiary of National Steel Corp. Part of the justification for the enactment of H.R. 4603 is to insure that interstate acquisitions of this nature do not take place until every reasonable effort is made to secure an intrastate solution, initially among like institutions wherever possible.

The gentleman from Georgia (Mr. BARNARD) advised the House of recent FSLIC interstate hustling efforts in Georgia notwithstanding the apparent ready availability of an intrastate solution in his compelling argument in support of H.R. 4603. I include at this point in the RECORD an October 22 article appearing in the American Banker describing in great detail FSLIC Director Beesley's road show seeking interstate merger partners for ailing thrifts with no apparent effort being made for intrastate-like institution solutions as required by H.R. 4603.

Failing thrifts are not toys in the playpen of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation. Congress by its passage of H.R. 4603, will clearly accept the responsibility for providing appropriate guidelines during the difficult days that lie ahead for many of our financial institutions.

FSLIC CHIEF SAYS AGENCY STEPS UP DRIVE FOR BUYERS OF AILING THRIFTS

CHICAGO.—The Federal Savings & Loan Insurance Corp. is stepping up its campaign to find potential buyers of failing thrifts and is encouraging both strong S&Ls and industrial firms like Sears Roebuck and National Steel to enter "the interstate game" early.

Making the unusual pitch for a heightened pace of merger deals was the FLSIC director H. Brent Beesley who said the agency, while being prudent in scrutinizing S&L acquirers, also welcomes the aggresive approach by those firms seriously interested in buying problem thrifts—be they intrastate or interstate transactions.

Speaking to an audience of Chicago area savings and loan executives and attorneys, the head of the insurance arm for federally chartered S&Ls said his agency is doing its part to promote the merger transactions, and has already taken a number of significant "liberalizing" steps in such areas as accounting rules, debt requirements and so-called creative financing techniques.

Now, he said is an especially attractive time for industrial firms and well-capitalized S&Ls to start examining the merger route—considering the favorable legislative climate in Congress where bills are being considered to markedly broaden S&L powers.

If the legislation is passed, "you'd buy an S&L and make it do like a bank," declared Mr. Beesley, a Salt Lake City attorney and, before taking the FSLIC post earlier this year, chairman of a small bank in the Utah city.

The FSLIC director said his office continues to receive numerous inquiries from banks about their purchase of failing thrifts. But for the time being his agency has told banks, "We are not interested in doing a deal with you."

However, he added, the time may come when the agency will be forced to look at banks as acquirers as a means of protecting the insurance fund, which, he emphasized, is the FSLIC's chief mission.

In his talk and question-and-answer session before a joint dinner meeting of the Financial Managers Society and the Chicago S&L attorneys committee, the FSLIC director emphasized that his agency was in no way putting out the welcome mat for interstate S&L mergers "for nonsupervisory cases."

However, any reading of the handwriting on the wall shows he said, that "interstate banking is already here and here to stay," based on the confluence of many new nonbank and non S&L players in the marketplace.

Mr. Beesley devoted a good portion of his talk to the methods and procedures potential S&L acquirers should use in approaching Federal Home Loan Bank district banks and supervisory officers to put together mergers.

"To all potential acquirers, contact the supervisory agent in the area you are interested in," he advised. "He will work with you and introduce you to a potential acquirer; he will help your find a strong association with whom you might merge. First on an intrastate basis and then on an interstate basis."

LOOKING FOR STRENGTH

The FSLIC, he said, is actively looking for strong parties from all industries to consider acquiring an S&L with financial troubles.

He noted that Sears Roebuck, National Steel Corp. of Pittsburgh, and Household Finance Corp. all own S&L's, "and we invite others to examine this opportunity."

"I must make one point to potential merger partners and for acquirers, if you are contemplating making a deal with a stock association," he said, "negotiate whatever you can with the stockholders."

"We will do all we can to facilitate the merger or acquisition and make the appropriate arrangements. But there will be no possibility for FSLIC financial assistance in situations where value is paid to stockholders equity if any should be used to offset the assistance which may be required by the FSLIC."

In trying to solicit interested acquirers, Mr. Beesley said, the agency had considered publishing a list in the Wall Street Journal of S&Ls facing imminent failure. We would use hypothetical situations, he said, such as "A Small-Town S&L in the Midwest for Sale," etc.

However, the idea was scrapped as impractical in favor of holding meetings around the country with interested S&L parties. One of the first such meetings was held in San Francisco on Oct. 2, and another is set for Nov. 3 in Atlanta. Three other additional sessions are slated with state S&L supervisors.

WON'T REINVENT THE WHEEL

In his talk, Mr. Beesley also noted that the agency is in the final process of standardizing all FSLIC forms "to avoid the need to reinvent the wheel on every deal. Negotiations can then focus on substance, not form."

These forms, he said, will be reviewed by a variety of outside counsel before they are printed, and a new bidders' package and informational brochure is being prepared to facilitate acquirers getting "to the heart of the economic issues."

The main thrust of solving problem cases, he went on, has now been delegated directly to the supervisory agents in the district banks.

Their objective is to work with management "to arrange for a plan to restore financial strength, such as the conversion to stock form along with an accompanying injection of private capital.

"I might say that many of the legal obstacles in the conversion process have been or are being eliminated. We are also liberalizing the use of subordinated debt and mutual capital certificates. I think you will find the Bank Board receptive to most reasonable efforts to help associations help themselves through these troubled times," he continued.

"We believe the merger process is especially useful. The wise use of purchase accounting is facilitating mergers. We applaud this trend. It also gives tremendous flexibility to manage the asset and liability mix and to take full advantage of any tax break," Mr. Beesley concluded.

□ 1315

Mr. WYLIE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to try to clear up some misconceptions about H.R. 4603 as a result of the debate yesterday. I say "misconceptions" because of the thrust of some of the questions asked of me by Members of this body about the bill. This confusion over the bill and what it contains is probably partly due to the inability

of the sponsors, including myself, to explain the bill better. But it is a very complicated situation in which we find ourselves. I must say there is a lot of sand in the air as a result of what I regard as misleading statements about what the bill does and what the bill does not do.

The savings and loan industry, I might say, is split down the middle on this bill. I think it is fair to say that, in my own State of Ohio, the chief executive officers of the healthier and stronger S. & L.'s are for the bill. The boogieman in this bill—and Halloween is just around the corner—is the word "merger," merger of a mom and pop bank with a big one-bank holding company from New York City.

Well, that just cannot happen under this bill. But a merger is a last resort solution which is provided for in this bill after other forms of assistance, such as the purchase of securities—capital infusion—or financial assistance through the Federal savings and loan insurance fund or the FDIC fund have been deemed not feasible.

If a merger is decided on for a failing institution—and I stress it must be failing—this bill says then the regulatory agencies must, make every reasonable effort to arrange a merger with an institution of the same type in the same state. Then, and only then, can mergers be arranged between institutions of different types in different States to prevent the institutions from failing.

Now, Mr. O'Connell, the president of the U.S. Savings & Loan League, objected to this last provision and, thus, to the bill. I asked him: "If an S. & L. is failing, by anybody's test, what is wrong with allowing a bank holding company from an adjoining State to merge with it, to prevent it from failing"?

He said, "We think it would be better to let it fail than to have it bought by a bank."

Now, that was very disconcerting to me, and I cannot subscribe to that notion. Is it not better to keep an S. & L. or a savings bank in business as a subsidiary of a bank holding company than it is to let it fail altogether? I certainly think so.

Chairman Volcker agreed with me, in response to a question which I asked of him. He did not agree that it would be better to let it fail. He added there is another consideration which is certainly relevant. This bill would allow us to do what is necessary at the least cost to the insurance funds and ultimately to the taxpayers of this country during a very difficult transition period. It is almost always more expensive to liquidate these institutions.

The State bank regulators and the independent bankers ought to be for this bill because it would make it more difficult than it is under the present law to merge. This bill establishes guidelines. The big banks ought to be against it because they have a better chance to merge under present law. And, besides, the more little banks that fail, the more business the big banks or a Sears bank will have. The foreign banks are practically shut out under this legislation, whereas they have an open invitation to buy a failed bank under the present law.

There is an additional factor. Small banks generally do not have the problems that the thrifts have. Small banks are doing fairly well. But even if a bank is failing, it must have $2 billion in assets before a merger can be affected. That is a pretty big bank. I do not think there are any banks that size on the problem list. But if there is, between now and September 30, 1982, when this bill sunsets, then we ought to prevent its failure if we can, even if that contemplates a merger. That is the bottom line for me, what is best for this country, and I think this bill meets that test.

Mr. ANNUNZIO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as the distinguished chairman of the full committee knows. I voted against this legislation both in the subcommittee and the full committee. While it will be considerably improved with the addition of several amendments on the floor today. I still have some reservations about the legislation.

However, I do plan to vote for the legislation, but I want to make certain that this bill will not be the vehicle that the Senate will use—as my colleagues on the committee know, that is the position I maintained in the committee—to change virtually every financial law in this country.

As my distinguished friend, the gentleman from Rhode Island, knows, the Senate is currently holding hearings on a far-reaching banking bill. It is my understanding that it will shortly mark up and move it to the Senate floor. It has been no secret that the plan of the Senate is to attach everything in the far-reaching bill to this so-called regulators bill and send it back to the House. The Senate hopes to add enough sweeteners so as to attract support in this body. The Senate bill would virtually wipe out every small financial institution in this country, and that bill is a dangerous bill.

I am concerned that the House will place itself in a position of making it easy for the Senate to get House consideration of its bill. In light of that, Mr. Chairman, I want to ask you this question: I wonder if you, as my good friend and the distinguished chairman of this full committee, who has worked so long and hard to bring this legislation to the floor, can give me assurance that under no circumstances—and I repeat, under no circumstances, no way, shape, or form—will you go to a conference with the Senate unless the entire scope of the House-Senate conference is limited to the regulators bill, with no extraneous amendments?

Unless I get such assurances, I cannot vote for this bill, because I cannot take a chance of loading the gun that will eventually be turned on the Members of this House. Mr. Chairman, may I have your comments, please?

Mr. ST GERMAIN. The Chair has answered this question previously, but will be happy to respond again. The Chair has answered that question to the gentleman from Illinois in the subcommittee on numerous occasions and in the full committee on numerous occasions. Yesterday afternoon, as appears at page 25418 of the CONGRESSIONAL RECORD for October 27, 1981, the Chair, in the first column, answered that question for the gentleman from Texas, the distinguished Mr. JAMES MATTOX. I have answered it.

Now, I would say to the gentleman that I was amused by those who said, "Huh, rush this bill through," the one before us. I remember the usury bill. We had hearings that went on a day and a half, and we had a vote the second day in subcommittee. I did not think we rushed it through. I thought we had thorough hearings. This bill before us had much more thorough hearings.

So I hope that in the future, before saying that the chairman has rushed something through, that Members will first analyze and look at other items. They will find that the Chair does not rush items through. I make that point because, if we are going to adopt further legislation in the area of financial institutions, it will be done under tier 2—this is tier 1—where we will begin with the discussion principles and have thorough hearings before the full committee and then assign various elements to the subcommittees of jurisdiction in the House Banking Committee, as well as, if necessary, other committees and subcommittees of other major committees.

So I assure the gentleman, there is no attempt to rush anything, and there will be no agreement on the part of this Member to Christmas-tree the legislation before us.

Mr. ANNUNZIO. I want to express my appreciation to the chairman. I in no way, manner, shape, or form said that we were rushing this legislation. We have had full and complete hearings. The only assurances I want—and I have received that assurance—is that we are not going to Christmas-tree this bill. Under those circumstances, I do intend to support the legislation.

I want to congratulate the chairman for his patience, his diligence in working out this situation, so that some of

us who have not supported the legislation in committee can now support this legislation on the floor of the House. I urge the other members on the committee who supported me in opposing the legislation that, as we proceed in marking up this bill today on the amendments, you will find that it is now a good bill, and I urge you to support the legislation.

AMENDMENTS OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. PAUL: Page 2, line 10, insert "or" before "to assume".

Page 2, line 11, strike out "or to make contributions to,".

Page 3, line 7, strike out "or contributions".

Page 11, line 18, insert "or" before "to assume".

Page 11, line 19, strike out "or to make contributions to,".

Page 12, line 17, strike out "or contributions".

Mr. PAUL. Mr. Chairman, my amendment is not complex. It merely strikes the words "to make contributions" on four occasions in the bill. It is to dramatize how loose I believe the language is in this piece of legislation.

I would like to read the first paragraph of the first section because if anybody is concerned about this piece of legislation increasing the power of the regulators, I think their concerns would be confirmed by listening to this:

The Corporation is authorized, in its sole discretion and upon such terms and conditions as the Board of Directors may prescribe, to make loans to, to make deposits in, to purchase the assets or securities of, to assume the liabilities of, or to make contributions to, any insured bank—

I think the words "to make contributions" is language which is much too broad, for me. Of course, it does conform to the title of the bill, the Deposit Insurance Flexibility Act, because indeed it will give a great deal of flexibility. But just the idea that the Government, the regulators, the FDIC, can give contributions is rather astounding.

I know that someone will get up and possibly give a new definition to "contributions." But the old definition was that it was something of a donation, something that we gave to our church or something that we gave to the United Fund. We gave a contribution.

□ 1330

But I believe it goes along with much of what we do here in Washington. We do give contributions. The tragedy is those contributions that we are always giving away happen to come from the pockets of the American taxpayers, either in the form of taxes or more inflation.

I think it is a reasonable request to tighten this language and to drop the word where it appears on four occasions, "contributions." We do not need to be in the business of giving contributions.

The significance of this bill coming up at this time, I think, needs some attention. The banking institutions are in trouble. I for one would recognize the seriousness of our banking institutions and the need for something to be done.

I would even concede to the authors of the bill that this bill will help on the very, very short run. But it is somewhat like giving another drink to the alcoholic who needs something to calm his nerves. It will certainly calm the nerves of the banking industry.

But to have a bill like this which means an unlimited source of funds to bail out banks, not only the ones that have failed but the ones who have a tendency to fail; yes, I think those numbers will grow significantly in the next several years and there will be great need for an infusion of large amounts of cash and new credit.

But to me that means a large infusion and a lot more inflation.

Some would argue this is not inflationary and it will not cost anything. Yes; it will cost something because I believe a lot of new credit and new dollars will be used to go into failing institutions.

So we are trying to stop the problem of inflation with creating more inflation.

To give a drink to the alcoholic calms his nerves, but it will not help him get on the road back to health. We must look at the real problem. If too much drinking is the problem for the alcoholic, too much money is the problem in the economy and in the monetary system.

Our problem is that we have been on an unrelentless binge of money creation. This has occurred especially since 1971. Up until 1971 there was a minor check held on the monetary authorities, because up until August of 1971 there was a connection of the dollar to gold. There was a limitation on how much new money the Federal Reserve could create, even though in a minor way.

Since that time we have seen astounding growths in the money supply, and interest rates at 20 to 21 percent.

So we are living in an age of a depreciated currency. It is the currency that is sick, it is not the banking institutions. The unit of account is the problem, not the management of our banking institutions.

If anything, our banking institutions have too much regulation. We do not have and never did have, but that does not mean that we cannot consider having a free market in the banking institutions as well as in other areas of the economy. Let them compete as other businesses compete, instead of propping them up, regulating them and bailing them out when they fail.

I see that great damage can be done by this bill in the way it is written at the present time. The clause that permits the interstate banking is quite a danger and yet in a free market system you do permit interstate banking, but it develops in a very normal and natural way. The way it will develop with this legislation could prove disastrous to the small institutions and beneficial to the large ones as mergers will occur through Government bailout procedures.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I oppose the amendment offered by our distinguished colleague, the gentleman from Texas (Mr. PAUL).

Existing law, not H.R. 4603, gives the FSLIC authority to provide contributions to thrift institutions. The FSLIC has been able to make contributions to ailing thrifts and thereby to facilitate mergers and acquisitions since 1935.

Granted, FSLIC is asking for some new conforming language to clarify that contributions can go to an acquiring institution as well as to the troubled institution directly, but the fact remains that FSLIC's basic authority to help carry out mergers has been on the books for 46 years.

Therefore, the amendment would have the effect of cutting back on the longstanding flexibility of the FSLIC in dealing with institutions needing assistance.

The FDIC section of the bill includes this "contribution" language, because the Financial Institutions Subcommittee adopted an amendment designed to make the FDIC and the FSLIC assistance sections parallel, so the existing FSLIC language became part of the FDIC portion of the bill.

I would oppose this effort to reduce rather than enhance the regulators' flexibility.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Texas.

Mr. PAUL. I thank the gentleman for yielding.

I recognize that this word "contribution" did exist in the law. I do not think that in itself is enough justification to continue this type of language if it is careless language.

I would like to know what the gentleman's definition of "contribution" is?

Mr. ST GERMAIN. A contribution is just what it sounds like. It is a way to

provide a subsidy to a troubled institution without requiring repayment. Now obviously it would be preferable to have FDIC and FSLIC provide assistance in the form of a loan that would be repaid, but in some cases that is simply not possible. Sometimes, if the agencies cannot offer a contribution to help effectuate a merger, the only alternative is liquidation and as the gentleman knows, and as the Members of the House know, that can be a very, very expensive route to travel.

For that reason, it is important authority for FSLIC to keep, since they have already had it for 46 years.

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Georgia.

Mr. BARNARD. I thank the gentleman for yielding.

The word "contribution," Mr. Chairman, perhaps does need to be clarified. Is it not true that this is not a contribution from the Treasury of the United States?

Mr. ST GERMAIN. That is correct.

Mr. BARNARD. It is instead a contribution from the FSLIC.

Mr. ST GERMAIN. The insuring fund. Actually it is made to avoid a larger cost to the fund should a failure and liquidation occur.

Mr. BARNARD. It is not management of the corpus of the insurance fund?

Mr. ST GERMAIN. Yes, sir.

Mr. BARNARD. Possibly the word contribution is an unfortunate word, but, I do not know any other word that can be used to permit this activity. This, as I understand it, would apply only where there is good management where the circumstances beyond the control of management have caused the problems. In such cases, the FSLIC would be able to make this type of contribution, maintain the present good management, and thus salvage a failing thrift.

Mr. ST. GERMAIN. To assist an acquiring institution to be able to indeed help a failing situation.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Texas.

Mr. PAUL. I would like to point out that this is true technically. This is right. FDIC would make the contribution. At the present time, FDIC has $11.5 billion in reserve and it protects $950 billion. So we have a very limited amount of protection—less than 1 percent.

But it is also true that even though the gentleman says the contribution comes from the FDIC, where did they get the money? They got it from other institutions. So in a way it is a tax on the healthy institutions——

Mr. ST GERMAIN. Wait a second. The insurance concept is exactly that. You have workmen's compensation insurance. Fortunately not everybody gets injured on the job. But just because the people who did not get injured on the job are not collecting, that does not mean you do not assist those people who have been injured on the job.

In this instance, there are institutions that have been injured on the job. The insuring fund is there for that purpose and, I submit further, the reason for utilizing this technique is to minimize the cost to that insuring fund, and, therefore, to all those other healthy institutions that have contributed over the years.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, this is not a conforming amendment, as the author, the gentleman from Texas (Mr. PAUL), would have us believe. This is a very, very restrictive amendment to the bill and, of course, must be opposed if we are to have any bill at all here.

Contributions to the FDIC and FSLIC funds come from member institutions. There is no taxpayer money involved so we are not talking about contributions of the taxpayers' money. We are talking about the ability of the FDIC and the Federal Home Loan Bank Board to make infusions to the capital base of these failing institutions—I might say with strong strings attached.

In most cases the chief executive officer or the officers of the failing financial institutions would be replaced and the regulator would require some security for repayment.

But as a general principle, this amendment would severely restrict the flexibility of the regulators to restore ailing thrifts to financial vitality.

Prohibiting contributions does not prohibit other direct forms of assistance as outlined in this bill, such as loans, deposits, purchase of securities and purchase of assets, and others. But, as might be expected, the regulatory agencies strongly oppose this amendment. The Bank Board opposes it on the ground that without this tool there would be many cases where the thrift would be in not only a failing position, but a failed position shortly thereafter.

Now, I might also say that one of the reasons the Office of Management and Budget was at first a little hesitant about supporting this bill was the possibility of some budget impact, and when it was pointed out that by allowing this capital infusion through FDIC and FSLIC funds that some of the budget impacts could be avoided, then I think their position changed.

Also, Chairman Volcker suggested that with this provision in the bill, or with this potential to make contributions, that something in the neighborhood of several hundred millions of dollars could possibly be saved by avoiding the cost of liquidation.

Alice Rivlin, I pointed this out yesterday in my remarks, said that this provision in the bill could save as much as $1 billion or more as far as exposure to the funds is concerned.

So, Mr. Chairman, I would say that I very, very strongly oppose this amendment and certainly hope it does not pass.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Texas.

Mr. PAUL. Mr. Chairman, I would like to point out there is a distinction between FDIC insurance and private insurance. Private insurance is something we go out and make a decision on and we voluntarily purchase. There is not much voluntarism in decisionmaking in subscribing to FDIC insurance.

So in this way I would claim that it is more of a tax than if it a true insurance.

Mr. WYLIE. On that point, there is no tax to the taxpayers of the United States. There is a contribution from the member bank or member institution.

Mr. PAUL. Only in the sense that this has to be passed on to the consumer, because if it takes away from the bank, it is then itself a cost to the banks, so it has to be passed on.

I would like to make one other point about a capital infusion not being as much concern to the Budget Office. It always amazes me how we handle this. In a budgetary sense, there is a big difference on whether or not it is going to be damaging to us. I think that our tendency so often is that we take capital infusions and subsidies and different things and put them off the budget and claim that it is not a problem. But every time we have a guarantee——

Mr. WYLIE. No, no; the gentleman missed my point, if I may reclaim my time. This is an on-budget item, and I do not think it should be an on-budget item because there is no taxpayers' money involved.

The point I am making is that if this capital infusion provision is not allowed, and if the regulatory agencies do not have the potential of restoring failing institutions to health, then there will be greater exposure through the liquidation process to this fund, and if there are enough of them that fail, so that the fund is depleted, then the taxpayers are exposed.

So, this amendment goes in the opposite direction, to my way of thinking, from saving taxpayers' money.

Mr. STANTON of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Ohio.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. WYLIE) has expired.

(At the request of Mr. STANTON of Ohio and by unanimous consent, Mr. WYLIE was allowed to proceed for 2 additional minutes.)

Mr. STANTON of Ohio. I thank the gentleman for yielding.

Now that the author of the amendment realizes and all of us realize this is more than a perfecting amendment, and I can see why the gentleman would be a little bit confused by the word "contribution"—now that we realize that it is one of the most meaningful things that the FIDC and FSLIC have as a tool in supplementing their obligation to help failing institutions, I wonder if the gentleman might want to withdraw his amendment.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Texas.

Mr. PAUL. No; I would like to see that everybody is on record as far as voting for something as loose as this.

Mr. STANTON of Ohio. Now that we will have this amendment before us, Mr. Chairman, I rise in strong opposition.

I do not really know if the gentleman is sincere.

The FSLIC tells us this is one of the most crippling amendments that we could have. It will probably destroy their procedure.

I would certainly urge a "no" vote on the amendment.

□ 1345

Mr. DORGAN of North Dakota. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have noted that the supporters of H.R. 4603 insist that this bill will not have the kind of wide-ranging impact that many of us are afraid of.

In fact, some insist that it really does not bestow any substantial additional authority on the FDIC or the FSLIC than they already have. If that is true, then probably the bill is unnecessary. But the fact is that this bill does provide additional opportunities for further concentration in the financial industry and that is precisely what many of us are worried about.

Because high interest rates have created a problem for some of our thrift institutions, we have this proposal as a remedy for the thrift institutions. That is treating the symptom, not the disease. That is concentrating on the headache and not the brain tumor.

The high interest rate policy pursued by the Federal Reserve Board is the curse on the American economy. That is what is threatening the existence of many thrift institutions. A number of savings and loans are in trouble and I agree with those who say we have got to recognize that problem. Recognizing the problem is virtuous, but proposing an improper solution to it is hardly beneficial to this country.

I think we ought to start seriously discussing the issue of the structure of the Federal Reserve Board and address the interest rate policy issue in this country. If we move back to a period of moderate interest rates, many of the problems these thrift institutions are facing will be alleviated.

To bring legislation to the floor of this House that proposes making the big financial institutions bigger as a solution to the problems caused by monetary policy in this country is just ignoring the real issue.

This bill does allow a large New York bank to buy a North Dakota credit union. The Senate has a bill that would extend to savings and loans virtually full banking privileges. That means that some of the larger financial institutions of this country are going to have a vehicle to go in and get deposits out of States that do not now allow branch banking. I know that the retort to that will be, "Well that's not what this bill intends." The fact is that the largest financial institutions of this country will make short work of the intentions of this legislation if they have any opportunity at all to go in and get deposits in States that do not now allow branch banking.

The late Senator Bill Langer once described who would always be on top if you put a big banker and a lawyer in a barrel and rolled them down a hill. Let us not be fooled. They will make short work of this type of legislation. We have a system of thrift institutions and independent banks that have served us well. I do not think the executives of Chase Manhattan are sitting in New York trying to figure out how they can best serve the financial interests or needs of Minot, N.D. But I am certain that they are sitting in their suites in New York drooling over the deposits they could get from our region of the country if only they could figure out a way to tear down the prohibition against branch banking that has been established by our State legislature.

What those financial institutions have not been able to get through our State legislature, they now want to get through the U.S. Congress masquerading it as a solution to some failing thrift institutions. Those who say, "trust us" are well meaning, but I believe this is leading us to a long-term homogenized financial industry in which the big get bigger and the small get bought out.

That is not the vision I have for this country's future and I predict that if the Congress passes this bill and other legislation moving in this same direction in the Senate, then in the future, it will be left with the hollow apology of T. S. Eliot who said, "That is not what I meant at all."

I urge my colleagues to oppose this approach and let us get about the business of dealing with the interest rate problem in this country. Let us stop wringing our hands and start getting to work and change the structure of the Federal Reserve Board and bring those interest rates back down to where they ought to be so we can have some economic growth and some economic health in this country. That is also the most important step we can take to restore health to the thrift institutions that are in some trouble.

Mr. PAUL. Mr. Chairman, would the gentleman yield?

Mr. DORGAN of North Dakota. Yes; I will be happy to yield.

Mr. PAUL. I would like to thank the gentleman for yielding and compliment the gentleman on his statement, especially on the portion dealing with monetary policy. That is the point I have been trying to make. I think the gentleman made it quite well.

The monetary policy is that which is wrong with the economy. The bank failures are the results, they are the symptoms and more Government intervention, more planning, and more patchwork will do harm in the sense that it will cover up the mistakes that were made with the monetary policy.

I would like to compliment the gentleman for joining me in asking that one day we in the Congress should investigate and understand exactly what the Federal Reserve is doing and have an audit of the Federal Reserve.

Mr. DORGAN of North Dakota. Well, what I am saying is that dealing with this issue rather than the issue of monetary policy is worrying about the headache and not the brain tumor.

The problem in this country is monetary policy. That is what is causing financial problems for the thrift institutions.

Again, I respect the committee and the committee chairman in their attempt to try to resolve some of these issues; but the major issue is ignored by this House. It is ignored month after month after month, as the Federal Reserve Board has strangled small business and farmers of this country with high interest rates. This does not make much sense to be pursuing this course when we ought to be pursuing the larger question of monetary policy.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas (Mr. PAUL).

The question was taken; and on a division (demanded by Mr. PAUL) there were—ayes 1, noes 10.

So the amendments were rejected.

AMENDMENT OFFERED BY MR. ROUSSELOT

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT: On page 16, line 7, insert after ".", "In

making a determination under this subsection, the State savings and loan supervisor of the State in which the insured, State-chartered institution to be merged, consolidated or acquired is chartered shall be consulted. The State supervisor shall be given a reasonable opportunity, and in no instance a period of less than twenty-four hours, to object to the use of the provisions of these paragraphs (1) and (2). If the State supervisor objects, the acquiring company or institution may use the authorities of paragraphs (1) and (2) only by a unanimous vote of the Federal Home Loan Bank Board. The Board Members shall provide to the State supervisor, as soon as practicable, a written certification of its determination."

The CHAIRMAN. The Chair would like to state to the gentleman from California that the amendment he is offering is in the section following the section we are presently on.

Are there any other amendments to section 1? The Chair hears none.

Does the gentleman from California ask unanimous consent to offer his amendment at this point?

Mr. ROUSSELOT. Mr. Chairman, I ask unanimous consent to offer the amendment at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROUSSELOT. Mr. Chairman, my amendment is basically a conforming amendment designed to provide to State savings and loan supervisors a role in the merger process similar to that provided to State bank supervisors, with respect to State-chartered institutions.

Under my amendment, if a State-chartered savings and loan association is to be merged, consolidated, or acquired, the State supervisor shall be consulted and given a reasonable opportunity—no less than 24 hours—to object to the use of the authority under paragraphs (1) and (2) of section 8. If the State savings and loans supervisor objects, a unanimous vote of the Federal Home Bank Board would be required in order to proceed. The Board shall provide to the State supervisor a written certification of its determination.

The State savings and loan supervisor for California, Ms. Linda Yang, has expressed her concern that the dual system of regulation of depository institutions would be jeopardized if Federal authorities could arrange a merger, consolidation, or acquisition involving a State-chartered savings and loan without the safeguards provided by my amendment.

I know that many of my colleagues share my desire to take reasonable steps to preserve the dual system. My proposal tracks the provision which applies to the State bank supervisors, and I hope that the distinguished managers of the bill (Mr. ST GERMAIN, Mr. STANTON of Ohio, and Mr. WYLIE) will be able to accept it.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. Of course, I yield.

Mr. ST GERMAIN. Mr. Chairman, I have no objection to this amendment. The provision would provide State savings and loan supervisors the same opportunities as State bank supervisors are provided in the FDIC merger and acquisition section. Thus, the supervisor would be notified by the FSLIC that an acquisition transaction is going to be used to resolve a problem case. The supervisor would have at least 24 hours to object. If he or she did, then the Corporation would need a unanimous vote of its trustees—the Federal Home Loan Bank Board—to approve the transaction.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the chairman's comment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the ranking Republican member of the subcommittee.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for yielding.

I find the amendment acceptable, also. As the gentleman points out, it does parallel provisions for State bank supervision agencies in those States where there are two agencies, because the authority over banks and savings and loan associations is not lodged in a single supervisor. In some States there is only one, of course, but where there are two this parallels it.

I understand with the adoption of this amendment that the gentleman is prepared to support the bill.

Mr. ROUSSELOT. Something like that. I appreciate my colleague's interest.

Mr. WYLIE. That is not as positive a response as I expected.

Mr. ROUSSELOT. I think I have already stated to the gentleman that I thought that this improved the bill very substantially, enough that I might even be able to support it.

Mr. PATTERSON. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from California.

Mr. PATTERSON. Mr. Chairman, I commend the gentleman on his amendment. I think it is a good one, particularly in our State of California, where we have an effective dual system of State and Federal financial institutions, and I join with the gentleman in support of it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT).

The amendment was agreed to.

Mr. ST GERMAIN. Mr. Chairman, I ask unanimous consent that the balance of the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

PARLIAMENTARY INQUIRY

Mr. WYLIE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WYLIE. Mr. Chairman, I thought we had done that yesterday, but apparently not.

The CHAIRMAN. We had only done section 1 yesterday.

Mr. McCOLLUM. Mr. Chairman, are we doing this section by section?

The CHAIRMAN. No; it is open now at any point.

Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The remainder of the bill is as follows:

CONFORMING AMENDMENTS

SEC. 2. Section 13 of the Federal Deposit Insurance Act (12 U.S.C. 1823) is amended—

(1) by redesignating subsections (f) and (g) as subsections (g) and (h), respectively; and

(2) in subsection (e)—

(A) by inserting "(e)" before "No agreement"; and

(B) by striking out the first paragraph of such subsection.

CONVERSION OF MUTUAL SAVINGS BANKS

SEC. 3. (a) Section 26 of the Federal Deposit Insurance Act (12 U.S.C. 1831c) is amended—

(1) by inserting "(a)" after "Sec. 26.";

(2) by inserting "mutual" after "Federal" the first two times it appears; and

(3) by striking out "or a savings bank which is (or within sixty days after the merger or consolidation becomes) an insured institution within the meaning of section 401 of the National Housing Act".

(b) Section 26 of the Federal Deposit Insurance Act (12 U.S.C. 1831c) is amended by adding at the end thereof the following:

"(b) In any case in which a State-chartered insured mutual savings bank converts, pursuant to section 5(o) of the Home Owners' Loan Act of 1933, into a Federal stock savings bank or a Federal stock savings and loan association, or merges with or is acquired by a Federal stock savings bank or a Federal stock savings and loan association, the Corporation shall fully indemnify and hold harmless the Federal Savings and Loan Insurance corporation, as agreed to by the two Corporations, for losses which may be incurred by the Federal Savings and Loan Insurance Corporation, during a period not to exceed five years, as a consequence of the Federal Savings and Loan Insurance Corporation's insuring the accounts of such institution.

"(c) In implementing subsection (b) and the indemnification agreement specified in subsection (a), the Corporation and the Federal Savings and Loan Insurance Corporation shall include, but not be limited to, those losses resulting from a decline in the market value of assets due to interest rate fluctuations.".

FEDERAL DEPOSIT INSURANCE CORPORATION ASSESSMENTS

SEC. 4. The third sentence of section 7(d)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1817(d)(1)) is amended—

(1) by striking out "and" before "(3) the insurance losses"; and

(2) by inserting before the period at the end thereof the following: "; and (4) any lending costs for the calendar year, which costs shall be equal to the amount by which the amount of interest earned, if any, from each loan made by the Corporation under section 13 of this Act after January 1, 1981, is less than the amount which the Corporation would have earned in interest for the calendar year if interest had been paid on such loan during such calendar year at a rate equal to the Corporation's average investment portfolio yield for such calendar year.".

WAIVER OF NOTICE REQUIREMENTS

SEC. 5. (a) Section 4(c)(8) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8)) is amended by striking out the semicolon at the end thereof and inserting in lieu thereof the following: ". Notwithstanding any other provision of this Act, in any case in which the Board finds that an emergency exists which requires the Board to act immediately on any application under this subsection involving a thrift institution, the Board may dispense with the notice and hearing requirement of this subsection and the Board may approve or deny any such application without notice or hearing;".

(b) Section 2(i) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(i)) is amended by—

(1) striking out "or" before "(3)"; and

(2) by inserting before the period at the end thereof the following: "or (4) a Federal stock savings bank or Federal stock savings and loan association organized under section 5(o) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(o))".

(c) The first sentence of section 3(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(d)) is amended by inserting after "no application" the following: "(except an application filed as a result of a transaction authorized under section 13(f) of the Federal Deposit Insurance Act (12 U.S.C. 1823(f))".

FEDERAL STOCK SAVINGS INSTITUTIONS

SEC. 6. (a) Section 5 of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464) is amended by adding at the end thereof the following:

"(o)(1) Notwithstanding any other provision of law, the Board, subject to the provisions of this subsection, may authorize (or in the case of an association require) under the rules and regulations of the Board—

"(A) the conversion of a mutual savings and loan association or mutual savings bank into either a Federal stock savings and loan association or a Federal stock savings bank; or

"(B) the chartering of a Federal stock savings and loan association or Federal stock savings bank to acquire the assets of, or to merge with, such a mutual savings and loan association or mutual savings bank.

"(2) No action may be taken under paragraph (1) unless—

"(A) such action is taken to assist an institution in receivership; or

"(B) the primary Federal supervisor has determined that severe financial conditions exist which threaten the stability of an institution and that such action is likely to improve the financial condition of the institution; or

"(C) the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation has contracted to provide assistance to such institution under section 406 of the National Housing Act (12 U.S.C. 1729) or section 13 of the Federal Deposit Insurance Act (12 U.S.C. 1823).

"(3)(A) The Federal Savings and Loan Insurance Corporation shall insure the accounts of any federally chartered stock savings bank.

"(B) The Board may condition its approval of the conversion or acquisition of a mutual savings bank under this subsection which was previously insured by the Federal Deposit Insurance Corporation upon the receipt from the Federal Deposit Insurance Corporation of full indemnification of the Federal Savings and Loan Insurance Corporation and upon the Federal Deposit Insurance Corporation holding harmless the Federal Savings and Loan Insurance Corporation for losses which may be incurred by the Federal Savings and Loan Insurance Corporation during a period not to exceed five years as a consequence of the Federal Savings and Loan Insurance Corporation insuring the accounts of such association, as agreed to by the Corporations.

"(4) In addition to engaging in any investment or activity permitted a Federal mutual savings bank under this section, a Federal stock savings bank created pursuant to this subsection may, to the extent authorized by the Board, but subject to the limitations of subsection (a), continue to engage in any activity in which the institution which it acquires was engaged on December 31, 1977, and retain and make any investments of a type that the institution that it acquires held on that date.".

(b) Section 403(a) of the National Housing Act (12 U.S.C. 1726(a)) is amended by inserting ", Federal stock savings banks," after "Federal savings and loan associations".

(c) Section 2(d) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1462 (d)) is amended—

(1) by striking out "or" after "Federal savings and loan association" and inserting in lieu therof ", a Federal stock savings bank, and"; and

(2) by inserting "and a Federal stock savings bank" before ", unless the context".

ASSISTANCE TO THRIFT INSTITUTIONS

SEC. 7. (a) Section 406(f) of the National Housing Act (12 U.S.C. 1729(f)) is amended to read as follows:

"(f)(1) The Corporation is authorized, in its sole discretion and upon such terms and conditions as the Board of Directors may prescribe, to make loans to, to make deposits in, to purchase the assets or securities of, to assume the liabilities of, or to make contributions to, any insured institution—

"(A) if such action is taken to prevent the default of such insured institution;

"(B) if, with respect to an insured institution in default, such action is taken to restore such insured institution in default to normal operation; or

"(C) if, when severe financial conditions exist which threaten the stability of a significant number of insured institutions or of insured institutions possessing significant financial resources, such action is taken in order to lessen the risk to the Corporation posed by such insured institution under such threat of instability.

"(2)(A) In order to facilitate a merger or consolidation of an insured institution described in subparagraph (B) with another insured institution or the sale of assets of such insured institution and the assumption of such insured institution's liabilities by another insured institution, the Corporation is authorized, in its sole discretion and upon such terms and conditions as the Board of Directors may prescribe—

"(i) to purchase any such assets or assume any such liabilities;

"(ii) to make loans or contributions to, or deposits in, or purchase the securities of, such other insured institution; or

"(iii) to guarantee such other insured institution against loss by reason of such other insured institution's merging or consolidating with or assuming the liabilities and purchasing the assets of such insured institution.

"(B) An insured institution described in this subparagraph—

"(i) is an insured institution which is in default;

"(ii) is an insured institution which, in the judgment of the Board of Directors, is in danger of default; or

"(iii) is an insured institution which, when severe financial conditions exist which threaten the stability of a significant number of insured institutions, or of insured institutions possessing significant financial resources, is determined by the Corporation, in its sole discretion, to require assistance under subparagraph (A) in order to lessen the risk to the Corporation posed by such insured institution under such threat of instability.

"(3) The Corporation may provide any person acquiring control of, merging with, consolidating with or acquiring the assets of an insured institution under section 408(m) of this Act with such financial assistance as it could provide an insured institution under this subsection.

"(4) With respect to an insured institution described in paragraph (2)(B), no assistance shall be provided under this subsection to such insured bank in an amount in excess of that amount which the Corporation determines to be reasonably necessary to save the cost of liquidating (including paying the insured accounts of) such insured institution, except that such restriction shall not apply in any case in which the Corporation determines that the continued operation of such insured institution is essential to provide adequate savings or home financing services in its community.".

(b) Section 406(b) of the National Housing Act (12 U.S.C. 1729(b)) is amended to read as follows:

"(b)(1) In the event that a Federal savings and loan association is in default, the Corporation shall be appointed as conservator or receiver and as such—

"(A) is authorized—

"(i) to take over the assets of and operate such association;

"(ii) to take such action as may be necessary to put it in a sound and solvent condition;

"(iii) to merge it with another insured institution;

"(iv) to organize a new Federal association to take over its assets;

"(v) to proceed to liquidate its assets in an orderly manner; or

"(vi) to make such other disposition of the matter as it deems appropriate,

whichever it deems to be in the best interest of the association, its savers, and the Corporation; and

"(B) shall pay all valid credit obligations of the association.

"(2) The Corporation shall pay insurance as provided in section 405. The surrender and transfer to the Corporation of an insured account in any such association which is in default shall subrogate the Corporation with respect to such insured account, but shall not affect any right which the in-

sured member may have in the uninsured portion of his account or any right which he may have to participate in the distribution of the net proceeds remaining from the disposition of the assets of such association.".

EMERGENCY THRIFT ACQUISITIONS

SEC. 8. (a) Section 408 of the National Housing Act (12 U.S.C. 1730a) is amended by adding at the end thereof the following:

"(m)(1) Notwithstanding any other provision of law other then subsections (e)(2) and (l) of this section, subject to the provisions of this subsection, the Corporation, upon its determination that severe financial conditions exist which threaten the stability of a significant number of insured institutions, or of insured institutions possessing significant financial resources, may authorize, in its sole discretion and where it determines such authorization would lessen the risk to the Corporation, an insured institution that is eligible for assistance pursuant to section 406(f) of this Act, to merge or consolidate with, or to transfer its assets and liabilities to, any other insured institution, or may authorize any company to acquire control of such insured institution or to acquire the assets or assume the liabilities thereof.

"(2) Mergers, consolidations, transfers, and acquisitions under this subsection shall be on such terms as the Corporation shall provide.

"(3) Where a merger, consolidation, transfer, or acquisition under this subsection involves an insured institution eligible for assistance and a bank or bank holding company, such insured institution shall be subject to the conditions upon which a bank may retain or establish and operate a branch or branches under the laws of the States in which such insured institution is located. In addition, no insured institution acquired under the provisions of this subsection by either a bank or bank holding company shall move its principal office or any previously established branch office after it is acquired which it would be prohibited from moving if the insured institution were a national bank.

"(4) In considering authorizations under this subsection, the need to minimize financial assistance required of the Corporation shall be the paramount consideration, except that the Corporation shall also make a reasonable effort to authorize transactions under this subsection in the following order:

"(A) First, between institutions of the same type within the same State;

"(B) Second, between institutions of the same type in different States;

"(C) Third, between institutions of different types in the same State; and

"(D) Fourth, between institutions of different types in different States.

"(5) No transaction subject to this subsection and involving an insured bank as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813) or a bank holding company as defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841) shall be permitted without the prior approval of the Corporation under this subsection and the primary Federal supervisor of such insured bank or bank holding company.

"(6) For purposes of this subsection, the term 'same type' means a mutual savings bank, a savings and loan association, a cooperative bank, a building and loan association, a homestead association, and a savings bank.".

(b) The first sentence of section 408(e)(2) of the National Housing Act (12 U.S.C. 1730a(e)(2)) is amended by inserting "or any transaction under subsection (m)," before "except in accordance with".

(c) Section 408(a)(1)(A) of the National Housing Act (12 U.S.C. 1730a(a)(1)(A)) is amended by inserting "or savings" after "or a cooperative".

ASSISTANCE TO FEDERAL HOME LOAN BANK MEMBERS

SEC. 9. Section 16 of the Federal Home Loan Bank Act (12 U.S.C. 1436) is amended by inserting "(a)" after "SEC. 16." and by adding at the end thereof the following:

"(b) Notwithstanding subsection (a) or any other provision of this Act, if the Board determines that severe financial conditions exist threatening the stability of member institutions, the Board may suspend temporarily the requirements of subsection (a) that a portion of net earnings be set aside semiannually be each Federal Home Loan Bank to a reserve account and permit each Federal Home Loan Bank to declare and pay dividends out of undivided profits.".

BORROWING AUTHORITY

SEC. 10. (a) The first sentence of section 402(d) of the National Housing Act (12 U.S.C. 1725(d)) is amended by inserting before the period at the end thereof the following: ", except that interest on loans from the Federal Home Loan Banks shall be not less than their current marginal cost of funds, taking into account the maturities involved, and loans from the Federal Home Loan Banks shall be adequately secured, as determined by the Board".

(b) The first sentence of section 402(i) of the National Housing Act (12 U.S.C. 1725(i)) is amended—

(1) by striking out "any other source" and inserting in lieu thereof "any source other than the Federal Home Loan Banks";

(2) by inserting "from the Treasury" after "*Provided,* That each such loan".

(c) Section 11 of the Federal Home Loan Bank Act (12 U.S.C. 1431) is amended by adding at the end thereof the following:

"(k) The Federal Home Loan Banks are hereby authorized, as directed by the Board, to make loans to the Federal Savings and Loan Insurance Corporation. All such loans shall be made in accordance with the provisions of section 402(d) of the National Housing Act.".

INSURANCE FUND RESERVES

SEC. 11. Section 404 of the National Housing Act (12 U.S.C. 1727) is amended by adding at the end thereof the following:

"(i) Notwithstanding any other provision of this section, the Corporation, upon a determination by the Board that extraordinary financial conditions exist which increase the risk to the Corporation, may terminate distribution of shares of the secondary reserve and utilize such secondary reserve on the same basis as the primary reserve. If otherwise authorized, the Corporation may resume such distribution upon its determination that such conditions no longer exist.".

ASSISTANCE TO CREDIT UNIONS

SEC. 12. Section 203 of the Federal Credit Union Act (12 U.S.C. 1783) is amended—

(1) in subsection (e), by inserting "from the Secretary of the Treasury" after "So long as any loans"; and

(2) by adding at the end thereof the following:

"(f) In addition to the authority to borrow from the Secretary of the Treasury provided in subsection (d), if, in the judgment of the Board, a loan to the fund is required at any time for carrying out the provisions of this title, the fund is authorized to borrow from the National Credit Union Administration Central Liquidity Facility.".

CREDIT UNION MERGERS

SEC. 13. Section 205 of the Federal Credit Union Act (12 U.S.C. 1785) is amended by adding at the end thereof the following:

"(h) Notwithstanding any other provision of law, the Board may authorize a merger or consolidation of an insured credit union which is insolvent or is in danger of insolvency with any other insured credit union or may authorize an insured credit union to purchase any of the assets of, or assume any of the liabilities of, any other insured credit union which is insolvent or in danger of insolvency if the Board is satisfied that—

"(1) an emergency requiring expeditious action exists with respect to such other insured credit union;

"(2) other alternatives are not reasonably available; and

"(3) the public interest would best be served by approval of such merger, consolidation, purchase, or assumption.

"(i)(1) Notwithstanding any other provision of this Act or of State law, the Board may authorize an institution whose deposits or accounts are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation to purchase any of the assets of or assume any of the liabilities of an insured credit union which is insolvent or in danger of insolvency, except that prior to exercising this authority the Board must attempt to effect the merger or consolidation of an insured credit union which is insolvent or in danger of insolvency with another insured credit union, as provided in subsection (h).

"(2) For purposes of the authority contained in paragraph (1), insured accounts of the credit union may upon consummation of the purchase and assumption be converted to insured deposits or other comparable accounts in the acquiring institution, and the Board and the National Credit Union Share Insurance Fund shall be absolved of any liability to the credit union's members with respect to those accounts.".

CENTRAL LIQUIDITY FACILITY ADVANCES

SEC. 14. Section 307(a) of the Federal Credit Union Act (12 U.S.C. 1795f(a)) is amended—

(1) in paragraph (15) thereof, by striking out "and" at the end thereof;

(2) in paragraph (16) thereof, by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(17) advance funds to the National Credit Union Share Insurance Fund under such terms and conditions as may be established by the Board.".

EXTRAORDINARY ACQUISITIONS

SEC. 15. Section 13 of the Federal Deposit Insurance Act (12 U.S.C. 1823) is amended by inserting after subsection (e) thereof the following:

"(f)(1) Nothing contained in paragraph (2) shall be construed to limit the Corporation's powers in subsection (c) to assist a transaction under paragraph (2).

"(2)(A) Whenever an insured bank that had total assets equal to or greater than 0.12 per centum of aggregate assets in domestic (United States) offices of insured banks (as determined from the most recently compiled Reports of Condition filed by insured banks) is closed and the Corpora-

tion is appointed receiver, then, the receiver may, in its discretion and upon such terms and conditions as it may determine, and with such approvals as may elsewhere be required by any State or Federal courts and supervisory agencies, sell assets of the closed bank to and arrange for the assumption of the liabilities of the closed bank by an insured depository institution located in the same State as that in which the closed bank was chartered but owned by an out-of-State bank or bank holding company. Notwithstanding subsection (d) of section 3 of the Bank Holding Company Act of 1956 or any other provision of law, State or Federal, the acquiring institution is authorized to be and shall be operated as a subsidiary of the out-of-State bank or bank holding company; except that an insured bank may operate the assuming institution as a subsidiary only if specifically authorized by law other than this paragraph. Any subsidiary created by operation of this section shall be subject to the conditions upon which a bank may retain or establish and operate a branch or branches under the laws of the State in which such insured institution is located. In addition, no insured institution acquired under the provisions of this subsection by either a bank or bank holding company shall move its principal office or any previously established branch office after it is acquired which it would be prohibited from moving if the insured institution were a national bank.

"(B) In determining whether to arrange a sale of assets and assumption of liabilities of a closed insured bank under the authority of this paragraph (2), the receiver, and in the case of a closed insured bank which is a State chartered bank, the State bank supervisor of that State, may solicit such offers as are practicable from any prospective purchasers they determine, in their sole discretion are both qualified and capable of acquiring the assets and liabilities of the closed bank.

"(i) If, after receiving offers, the highest acceptable offer is from a subsidiary of an out-of-State bank or bank holding company, or from an in-State insured depository institution or a subsidiary of an in-State bank holding company which, in the absence of an emergency, is not permitted to establish a branch or subsidiary bank in the locations of the closed insured bank, the receiver shall permit the highest acceptable offeror of any insured depository institutions and subsidiaries of bank holding companies permitted to operate in such locations to submit a new offer for the assets and liabilities of the closed bank. If this institution reoffers a greater amount than the previous highest acceptable offer, then the receiver shall sell the assets and transfer the liabilities of the closed bank to that institution.

"(ii) If there is no acceptable offer received from an existing in-State depository institution or subsidiary of an in-State bank holding company as provided in paragraph (i), or if there is no reoffer greater than the highest acceptable offer, then the receiver shall permit the highest acceptable offeror of any other existing in-State insured depository institutions and subsidiaries of in-State bank holding companies to submit a new offer for the assets and liabilities of the closed bank. If this institution reoffers a greater amount than the previous highest acceptable offer, then the receiver shall sell the assets and transfer the liabilities of the closed bank to that institution.

"(iii) If there is no acceptable offer received from an existing in-State depository institution or subsidiary of an in-State bank holding company, or if there is no reoffer greater than the highest acceptable offer, then the receiver shall permit the highest acceptable offeror of the subsidiaries of the insured banks chartered in States adjoining the State in which the closed bank was chartered and bank holding companies whose banking subsidiaries' operations are principally conducted in States adjoining the State in which the closed bank was chartered (if its offer was not the highest received by the receiver) to make a new offer for the assets and liabilities of the closed bank. If this subsidiary reoffers a greater amount then the previous highest acceptable offer then the receiver shall sell the assets and transfer the liabilities of the closed bank to that institution.

"(iv) If no offer under subparagraphs (i), (ii), or (iii) is received which exceeds the original highest acceptable offer, then the receiver shall sell the assets and transfer the liabilities of the closed bank to the highest acceptable offeror.

"(C) In making a determination to solicit offers under subparagraph (B), the State bank supervisor of the State in which the closed insured bank was chartered shall be consulted. The State bank supervisor shall be given a reasonable opportunity, and in no instance a period of less than twenty-four hours, to object to the use of the provisions of this paragraph (2). If the State supervisor objects, the receiver may use the authority of this paragraph (2) only by a unanimous vote of the Board of Directors. The Board of Directors shall provide to the State supervisor, as soon as practicable, a written certification of its determination.

"(D) The receiver shall not make any sale under the provisions of this paragraph (2)—(i) which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States; or (ii) whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of Trade, unless it finds that the anticompetitive effects of the proposal transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

"(E) As used in this paragraph (2)—(i) the term 'receiver' shall mean the Corporation when it has been appointed the receiver of a closed insured bank; (ii) the term 'insured depository institution' shall mean an insured bank or an association or bank insured by the Federal Savings and Loan Insurance Corporation; (iii) the term 'existing in-State insured depository institution' shall mean an insured depository institution that is chartered in the same State as the State in which the closed bank was chartered; (iv) the term 'in-State bank holding company' shall mean a bank holding company whose banking subsidiaries' operations are principally conducted in the same State as the State in which the closed bank was chartered; and (v) the term 'out-of-State bank or bank holding company' shall mean an insured bank having its principal place of banking business in a State other than the State in which the closed bank was chartered or a bank holding company whose banking subsidiaries' operations are principally conducted in a State other then the State in which the closed bank was chartered.".

EFFECTIVE DATES

SEC. 16. (a) The amendments made by this Act shall be effective only during the period beginning on the date of the enactment of this Act and ending on September 30, 1982. Beginning on October 1, 1982, each provision of law amended by this Act is further amended to read as it did on the day before the date of the enactment of this Act.

(b) The expiration of any amendment made by this Act shall have no effect on the continued legality of any action authorized while such amendment was in effect.

SHORT TITLE

SEC. 17. This Act may be cited as the "Deposit Insurance Flexibility Act".

AMENDMENTS OFFERED BY MR. M'COLLUM

Mr. McCOLLUM. Mr. Chairman, I offer amendments and ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. MCCOLLUM: On page 16, strike out line 20 and all that follows through line 25 and insert in lieu thereof the following:

"(4) In considering authorizations under this subsection, the Corporation shall make a reasonable effort to authorize transactions under this subsection in the following order and such effort shall be given equal consideration with the need to minimize the financial assistance required of the Corporation:". Page 17, after line 8, insert the following new paragraph:

"(5) The Corporation shall not authorize a subordinate transaction under this subsection, where an acceptable offer of an amount equal to or greater than a reasonable estimation of the cost to the Corporation of liquidating (including paying the insured accounts of the insured institution eligible for assistance) has been received, the acceptance of which would cause the authorization of a preferred transaction pursuant to the order of preference contained in paragraph (4).".

And redesignate the following paragraphs accordingly.

Page 22, line 23, insert "mutual savings bank or savings" after "insured".

Page 23, line 7, insert "mutual savings bank or savings" after "closed".

Page 23, line 8, insert "mutual savings bank or savings" after "closed".

Page 23, line 10, insert "mutual savings bank or savings" after "closed".

Page 24, line 4, insert "mutual savings bank or savings" after "insured".

Page 24, line 6, insert "mutual savings bank or savings" after "insured".

Page 24, line 6, insert "mutual savings bank or savings" after "State chartered".

Page 24, line 11, insert "mutual savings bank or savings" after "closed".

Page 24, line 18, insert "mutual savings bank or savings" after "insured".

Page 24, line 22, insert "mutual savings bank or savings" after "closed".

Page 24, line 24, insert "mutual savings bank or savings" after "closed".

Page 25, line 9, insert "mutual savings bank or savings" after "closed".

Page 25, line 11, insert "mutual savings bank or savings" after "closed".

Page 25, line 19, insert "mutual savings bank or savings" after "closed".

Page 25, line 22, insert "mutual savings bank or savings" after "closed".
Page 25, line 24, insert "mutual savings bank or savings" after "closed".
Page 26, line 2, insert "mutual savings bank or savings" after "closed".
Page 26, line 6, insert "mutual savings bank or savings" after "closed".
Page 26, line 9, insert "mutual savings bank or savings" after "insured".
Page 27, line 7, insert "mutual savings bank or savings" after "insured".
Page 27, line 13, insert "mutual savings bank or savings" after "closed".
Page 27, line 17, insert "mutual savings bank or savings" after "closed".
Page 27, line 20, insert "mutual savings bank or savings" after "closed".
Page 27, line 23, insert "mutual savings bank or savings" after "closed".

Mr. McCOLLUM (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. McCOLLUM. Mr. Chairman, these amendments are concerning two different matters. One of them is in section 15 of the bill. What it does is to restrict the provisions of the closed bank merger section to the mutual savings banks and saving banks and eliminates the current provisions in the bill which would affect the large commercial banks as well.

The second amendment concerns section 8 of the bill which deals with those savings and loan mergers that have been discussed so widely here today and yesterday.

At the present time the bill reads that the paramount consideration of the FSLIC in a merger situation shall be to minimize the loss of funds to that organization to the insurance fund. There is an order of preference which is given some casual mention in the bill that is to be considered but secondary to the paramount consideration.

What this other amendment does, the second amendment to section 8 does, is to eliminate the paramount consideration provision and provide that the order of preference that is in section 8 for the types of institutions to be considered, the order in which they are to be considered by the merging organization, will be given equal consideration with the need to minimize the loss of funds to the insuring agency, and further, it provides that in situations where there are offers which are acceptable from an institution falling into a higher category of preference which offers have contained in them sufficient funds, sufficient body and substance to return at least the estimated cost to the corporation of liquidating, that this particular offer has to be accepted over and above an offer from an institution falling into a lower sequence in the order of preference.

For example, if we go to the first particular order of preference, it says between institutions of the same type within the same State. If we have an offer made for a merger and acquisition dealing with an S. & L. with an intrastate situation where we are talking about the same type institution within the same State and within that offer there were sufficient funds involved that the insurance funds of the FSLIC are protected by their cost estimate, they are going to recover 100 percent of their costs—they are not going to have a loss to the Corporation because of cost involved for the FSLIC in the merger process. In that circumstance the Corporation would not be allowed to drop down to the second preference, such as B, C, or D. It would have to go with that offer or the best offer within that category or that particular preference—in this example, the first preference, A.

I believe that these two amendments make a substantial contribution to the bill. They eliminate my apprehensions with respect to the bill. If they are adopted and accepted by the committee, then I will be prepared to support this bill, because otherwise, as I stated yesterday, the savings banks are in trouble and we do need legislation dealing with that.

Mr. PARRIS. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Chairman, I rise in support of the amendment offered by my colleague, the gentleman from Florida (Mr. McCOLLUM). I congratulate the gentleman on his persistent and dedicated attention to this legislation and to his amendment in particular.

I think the gentleman has performed a significant service by limiting this legislation to financial institutions of immediate concern in these difficult times and in clarifying the fundamental purposes of this legislation.

I congratulate the gentleman for his work in the committee and thank him for his amendment.

Mr. BARNARD. Mr. Chairman, will the gentleman yield for a question?

Mr. McCOLLUM. I yield to the gentleman from Georgia.

Mr. BARNARD. Mr. Chairman, what happens in the gentleman's amendment if there is a package deal? As we know, just recently we had a tremendous package deal where three S. & L.'s were acquired, two were acquired by a third which was owned by National Steel. What would happen when there is a package that is developed where there would be certain amounts prescribed for salvaging, say, several institutions, but in a third or fourth institution the acquiring institution would have to accept it as it is.

Would the gentleman's language mean that each acquisition would have to be treated individually or how would this affect package deals?

Mr. McCOLLUM. Well, nothing would happen, because my language deals with equal consideration for the two reasons and the two fundamental principles guiding the merger organization, in this case the FSLIC. They are to consider equally the minimization of loss to the fund and the order of priority and preference in here; so you would have to look at each one of them. They would certainly have to look at them, but they could also consider and would be considering minimization of the fund, so it allows some degree of flexibility involved in this; but it also would emphasize that every effort needs to be made to live within the prescribed order.

Certainly they would have to consider the preferences and the order of preferences and the factor that maybe one of those merger partners is way down the line and maybe it is not such a good deal; but they have the flexibility within the bounds of what my amendment would do to make those types of mergers.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. McCOLLUM was allowed to proceed for 2 additional minutes.)

Mr. BARNARD. Mr. Chairman, will the gentleman yield further?

Mr. McCOLLUM. I yield to the gentleman from Georgia.

Mr. BARNARD. As an illustration, let us say that there is a major S. & L., say, in California that is seeking to acquire S. & L.'s, failing thrifts, in two or three other States, individual States, like North Carolina, South Carolina, Georgia, and so forth; would the intrastate opportunities be available?

Mr. McCOLLUM. Not if there was a better or acceptable offer intrastate. It would go by the order of preferences first.

Now, that depends on what is available, what kind of offer is available. it does not prohibit the merger concept, but it would establish and make meaningful the order of preference that is in here. If you had an intrastate partner of a like institution, somebody that wanted to hook up, made an offer on it, and they were able to satisfy the Corporation that their offer would be full enough to eliminate any loss of money to the corporation, in other words save the corporation's costs, the corporation could not go to any out-of-State offering institution or group of institutions. They would have to take the intrastate offer that was there.

□ 1400

If one had the situation where there was no cost saving or sufficient offer intrastate, surely one could go down the next order of sequence and prefer-

ences and look at the other offers there.

Mr. BARNARD. In other words, the gentleman would be looking at the savings on a package job as opposed to an individual transaction.

Mr. McCOLLUM. No, I would not be looking at savings in a package job. I would be looking at the bare minimum savings of cost to the corporation first in the order of preferences that we are dealing with. I do not want to see a premium, and the intent of this amendment is to avoid a premium being paid in a merger situation where an out-of-State bank or savings and loan, an out-of-State institution, comes in and says, "We will pay more than that," but an in-State institution says, "We will pay enough to pay for the cost and will not cost the FSLIC anything, and you do not have to go out of State with this."

To answer your question, no, sir, on that particular point you just made.

The CHAIRMAN. The time of the gentleman has again expired.

(By unanimous consent, Mr. McCOLLUM was allowed to proceed for 3 additional minutes.)

Mr. McCOLLUM. Mr. Chairman, I would like to explain something about language, and then I would like to yield to the gentleman from Rhode Island (Mr. ST GERMAIN).

The language that is in this bill in the first amendment to it which deals with subordinate transactions, the language "subordinate transaction" refers to those transactions which in the category of preference would be the second, third, or fourth, or whatever is subordinate in numbers and sequence.

The language "preferred transaction" is referring to the top (the first paragraph, A) and down in a sequential order so that it is clear in the record the congressional intent was there to make that language be clear.

Mr. SHUMWAY. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I yield to the gentleman from California.

Mr. SHUMWAY. Mr. Chairman, I would like to commend the gentleman on his amendments. I think they go to some of the basic infirmities of this legislation that I tried to address yesterday when this bill was first before the Committee.

I would like to state if these amendments are indeed adopted by the Committee, I am prepared to support the bill, since they do tighten it significantly, and since we do now have the assurance from the chairman that this bill will not become the vehicle for a Christmas-tree piece of legislation.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, when we started work on this bill—we wanted to develop a consensus in the regulated financial institutions industry—we thought we had it in H.R. 4603.

That proved not to be the case because of the provision which allows a bank holding company to merge with a failing out-of-state commercial bank.

We amended the bill to have it apply only to a failing commercial bank with $2 billion in assets. That would not apply to too many banks.

But if trouble develops for a $2 billion bank—we ought to be able to keep it from failing by interstate merger if necessary.

That is where I come out. Having said that. I do not want this bill to be the source of hard feelings.

With this amendment the Independent Bankers' Association support the bill. The State bank supervisors support the bill.

Congressman McCOLLUM is their champion and he should be. He has been persistent—he has done his homework and is to be complimented for his advocacy.

Since we have already adopted the $2 billion asset amendment, this amendment does not do that much violence to the bill. I personally think we should have a commercial bank merger amendment similiar to the savings and loan provision and the savings bank provision. But in the interest of getting a bill and winning friends and influencing people in the process—we accept the amendment.

Mr. McCOLLUM. I thank the gentleman from Ohio for his kind words. He has been certainly very constructive, and I think the entire process has come along in that fashion.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words, and I rise to address the two amendments offered en bloc.

Mr. Chairman, as to the equal consideration amendment to section 8, I have no objection to that particular amendment. As I understand its effect, the FSLIC would have to give equal consideration to minimizing its costs and to the merger priorities specified in section 8 of the bill.

In the event that a bill is received equaling or exceeding the FSLIC's cost of liquidating, which I feel, will be in very rare instances, then the preferred bidder under section 8's hoop system who offers to at least equal FSLIC's costs would get the award. Since this will only occur in very unusual circumstances, in most instances the FSLIC will only be bound by the general "equal consideration" language. Therefore, I do not object to the amendment.

Now, as to the amendment to section 15, I do indeed have serious reservations about this one. It would further tie the hands of the FDIC in dealing with problem institutions. The FDIC along with the other regulatory agencies came to the Congress and requested flexible yet limited authority to respond to problems they perceive. The Corporation, in particular, requested very limited authority to arrange, if necessary, interstate mergers or acquisitions of large commercial and mutual savings banks. Only 90 commercial banks and 10 mutual savings banks would be affected by the language. These institutions, because of their size, present the Corporation with its most difficult problems, and this new authority would provide more flexible authority to handle them.

However, because the bill contains a sunset provision and because the most immediate problem for the agency is indeed the mutual savings bank industry, I will not oppose the amendment. I would like to state this—that we will not have to come back here on an emergency one day and reinstate that which we are deleting with this amendment to section 15, that is: the authority for FDIC to assist commercial banks as well whose assets are $2 billion or more.

So under the circumstances, as I stated, I support the amendment to section 8, and reluctantly support the amendment to section 15.

Mr. ECKART. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. ECKART. I thank the gentleman for yielding.

Mr. Chairman, first I would like to commend the Banking Committee on its bipartisan initiatives to address the growing problems of the banking industry. I, too, share their concerns about the safety and soundness of our financial institutions in this period of economic duress.

Mr. Chairman, I am sure that we are all aware of and familiar with the difficult conditions which confront the savings and loan and thrift industry at this present time.

Punishing interest rates, a loss of deposits, greatly diminished home lending activity, and low-yielding portfolios are all quite serious problems.

However, I am deeply concerned that attempts are being made to use this situation to bring about a fundamental restructuring of our Nation's financial industry that might, in the long run, benefit only a few large banks and other financial conglomerates.

Such a change would clearly be detrimental to the overall interests of the Nation.

Mr. Chairman, I grew up in an industry which is quite dependent on the fiscal well-being of local lending institutions.

My father's career as a homebuilder has shown to me the importance of small, community-owned and community-oriented banks and S. & L.'s to the economy of our neighborhood.

I am fearful that this legislation, and similar legislation that is being considered in the other body, overlooks the vital and necessary role that small banks, credit unions, and thrifts have played in the past and will play in the future in providing needed financial services.

I am firmly convinced that the needs of any community are best served by decentralized financial institutions.

A decentralized, community-oriented banking system can be much more sensitive to local and national economic needs and trends because it allows for greater diversity, flexibility, and competition.

Mr. Chairman, I am totally against any fundamental restructuring of our Nation's financial industry which would lead to a massive concentration of financial resources and the elimination of thousands of local decision-making centers.

An "homogenization" of the financial industry, which could only benefit the large money center operations, would not be in the Nation's best interests, in the interests of millions of American consumers and would only serve to make our country's and my region's economic recovery more difficult.

Mr. LAFALCE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from New York.

Mr. LAFALCE. I thank the gentleman for yielding.

Mr. Chairman, if I understand the chairman of the full committee and the subcommittee correctly, he is accepting these amendments to this bill, which has a sunset provision, primarily because he does not think that there will be much practical effect of these amendments during that period of time; is that correct?

Mr. ST GERMAIN. That is correct.

Mr. LAFALCE. In other words, the vehement opposition that we have from groups such as the IBAA no longer exists and we have full support of the bill now simply because of the amendments which have virtually no practical effect; correct?

Mr. ST GERMAIN. This is the understanding that I have from the many players in the game.

Mr. LAFALCE. I just want to clarify that.

Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered en bloc by the gentleman from Florida (Mr. MCCOLLUM).

The amendments were agreed to.

Mr. STANTON of Ohio. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wish to discuss with my colleague from Virginia the amendment he added to H.R. 4603. The language I wish to discuss appears in sections 8 and 15. It provides that when a bank or bank holding company acquires an insured institution under section 8 or section 15 of the bill, the acquired institution will operate subject to the branching laws of the States in which it is located. Am I correct in assuming that the amendment is intended to have only prospective effect?

Mr. PARRIS. Will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Virginia.

Mr. PARRIS. The gentleman is correct. My amendment provides that the acquiring bank or bank holding company shall operate the acquired institution subject to the conditions of State law under which a bank may "* * * retain or establish and operate a branch or branches." The quoted language is common to both section 8 and section 15.

The amendment, of itself, will not require any acquiring institution to divest a branch of an acquired institution. A supervisory agency may require divestiture as a supervisory matter if it is required for safety and soundness or enforcement purposes. As an example, assume a bank or bank holding company acquires an Illinois thrift institution with a statewide branch system. The bank or bank holding company would not be required to divest itself of any of those branches under my amendment. It could move any of the offices under provisions governing the movements of offices of national banks. It could not open any new branches, however, because of the limited branching provisions of Illinois State law.

Mr. STANTON of Ohio. I thank the gentleman for clearing up this particular point.

Mr. Chairman, in conclusion, I do want to compliment our friend from Virginia, a very valuable member of our committee, for his contribution to this legislation.

Mr. MATTOX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I know that a lot has been said this afternoon about which group is for and against this legislation, and also which group has changed its position based on some amendments that do not mean anything. Those amendments do not mean anything so to speak.

I want to tell the membership unequivocally that if we pass this legislation we are making a serious mistake for the financial structure of this country. We are making a serious mistake when we allow the banking industry to buy the savings and loans, and also we are making a serious mistake to allow the purchases across State lines.

Mr. Chairman, if we wanted to do the correct thing today, it would be a very simple concept. We would very simply prohibit both the Home Loan Bank Board and the Federal Reserve from exercising the authority that they say and believe that they have; that is, of approving across State lines, and the cross-industry type mergers.

We are making a serious mistake for my colleagues on my side of the aisle who pride themselves in not being for big business and pride themselves in believing in competition. I assume that my colleagues on the other side of the aisle also believe in that competition.

Well, if Members honestly, deep down, believe this legislation is going to stimulate competition, you are sadly mistaken, because that is not what is going to happen. We are going to have the institutions in this country homogenized. We are going to see that they end up in the hands of the large, money-center banks. We are also going to see those transactions take place with more and more money drained out of the small banks and savings and loans.

Mr. Chairman, if you think the Chase Manhattan Bank is going to want to make a loan to some little farmer out in Odessa, Tex., you are sadly mistaken. If you think that the Chase Manhattan Bank or some of the other big banks are going to make housing loans, you are sadly mistaken. We are seeing the destruction of the homebuilding and housing industry by allowing the savings and loans to be turned into banks. It is a serious mistake.

The savings and loan industry was developed, authorized, and sponsored by this Congress because we could not get the banks to provide home loans to the people. It was put in because of their failure to do so. We are now reversing those important actions.

I apologize for my colleagues on my side of the aisle who are now supporting this bill, because we cannot and we will not be able to get those same home loans. I do not care what kind of amendments are offered, the bill needs to be defeated. If we want to address the simple problems of the mutual savings bank in New York City, I will be glad to join in that approach.

□ 1415

This action to destroy the financial base of this country for the sake of some kind of emergency legislation that even the regulators admit they are not really going to use is just a sop to the big money center interests.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. MATTOX. I yield to my colleague.

Mr. PAUL. Mr. Chairman, I appreciate the gentleman's comment, and would like to ask a question. What is the gentleman's impression about the

cost of this bill? The authors say it will cost nothing. What is the gentleman's understanding of what it might cost the American taxpayer?

Mr. MATTOX. I have absolutely no idea. I think the gentleman asks an excellent question. If this bill is not going to cost us anything, if the regulators say they really do not need it and are not going to use it, and if the chairman admits that the amendments being accepted really mean little or nothing, why in the world are we passing it?

What we ought to be doing is passing a law that prohibit the regulators from engaging in the anticompetition type of abuse in which they are engaging. I wish that I could explain to each Member the concern I have over this piece of legislation. I have fought it in subcommittee, fought it in committee, and I am doing my best to fight it on the floor. I hope the Members have the good sense and good wisdom to oppose this legislation and vote against its final passage. I think it will pass, but I think it is going to be a real disservice to the people of this country.

I would hope that if the Members have not taken the time to visit with the small financial institutions in their districts, that they would pick up the phone now and call a couple of them. They will tell you that they are opposed to this legislation up and down the line. Members should ask whether you received any pieces of mail from your small institutions askings for you to support this legislation. It is a mistake for us to pass this kind of legislation. What we are doing is simply going along with the trust-building ideas of this current administration. I apologize for the folks on our side of the aisle who would engage in allowing these kinds of things to happen.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the opponents of this legislation express fears that it will lead to elimination of the barriers which exist in statute to interstate banking and the dual banking system. I, for one, do not view the bill in the same manner. The provisions of the bill, in fact, limit the cases in which the agencies can use the authority to arrange interstate mergers. It is a bill with a limited scope; it is emergency legislation; and it has a sunset provision.

The real concern should not be focussed on what can happen with the bill but rather what happens if the bill is not enacted. The agencies have told the Congress that they have the authority to allow transactions which go beyond anything contemplated by the opponents. The agencies can close a mutual savings bank or a commercial bank, divest it of its commercial loan portfolio, and sell a newly created retail depository institution to the highest bidder. What bidders might be involved? From the reports we hear they might be Bank of America, Chase Manhattan, Sears, McDonalds hamburger shops, First National Bank in Japan or Germany or France, or even Atlas Sporting Goods.

The bill provides guidelines and procedures for the use of authority to arrange mergers and acquisitions which assures consideration of local needs, local banking interests, and the dual banking system. Without a bill the agencies will have to use their perceived powers and the results might well not be what we, the Congress, would prefer. This bill is needed and it is needed now.

Mr. WYLIE. Mr. Chairman, since this has been a bipartisan effort from the very beginning, I believe it is appropriate for me to express my wholehearted agreement with the remarks of the distinguished chairman.

I have stated several times during the debates on this bill that one of the major concerns which motivated me to support this bill is that if there were failures of commercial banks, the authorities would have no alternative but to arrange a takeover by a foreign bank. This has happened in the Franklin National case and in several other widely publicized cases in the past. It is for this reason that Dr. Arthur Burns proposed several years ago that the regulators be authorized to arrange interstate mergers of large failing banks so there would be an alternative to foreign takeovers.

I join the chairman in expressing some dismay that this provision has been deleted from the bill. It is my hope that we will not come to regret it and that no large commercial bank will encounter financial problems in the future.

The gentleman from Texas (Mr. MATTOX) does not like the bill but he does not propose an alternative except to suggest that little banks ought to be protected. That is precisely what we are trying to do in this bill.

You cannot have it both ways—no Government regulation on the one hand and no intervention except with money on the other.

If he is so determined to preserve the present character of banks and savings and loans in the face of highly adverse economic conditions, the money to do that has to come from somewhere—ultimately from the same little people the gentleman seeks to protect. Either he ought to be for this bill or explain where we should get the necessary funds to preserve the financial system.

Mr. McKINNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that perhaps my chairman, whom I deeply respect, would just as soon I sat down, but one of the things that fascinates me, Mr. Chairman, is that no one has offered, an alternative. I have spent a lot of time looking at this industry for 11 years. I think I have sounded a little to most bankers as if I were speaking Chinese because everyone sort of looked at me with a blank stare.

I would suggest to you, Mr. Chairman, that the newer banking industry on the west coast is not that badly affected. The Northeastern thrift institutions, representing an older part of the country, are terribly affected. I would suggest on top of that, that the worst affected is the farm belt, where a mortgage is a mortgage and you live with it for 25 years.

I was appalled, Mr. Chairman, to find out that in Greenwich, Conn., an executive "go-go" community, that over 55 percent of even the commercial banks' mortgages yield less than 10 percent when they are paying 15.5 percent for money. This is not an issue of monopoly or nonmonopoly. I would suggest to my good friend who just spoke, whom I am very fond of, and whose opinion I respect, that Sears, Roebuck & Co., which probably has a catalog store and no other investment except for lease next door to the bank, the small local bank in that community, is already into the banking business with no regulations, no restraints, no safeguards, no protection, no anything. The biggest consumer ripoff being perpetrated on the United States today is a nonregulated money market fund because people are putting their money into a place where there is no safety net for them. Meanwhile the Federal insurance funds have a total of $13 billion, 9 in one and 4 in the other.

Mr. Chairman, those funds would not last for 6 months against the catastrophe we are facing. We were lucky with the West Side S & L. The fact of the matter is, Mr. Chairman, if you and I and my colleagues who all are concerned with this issue, leave this institution for 30 days without giving the regulators the vehicle, this hammer, to handle this problem, we have done this country a tremendous disservice. Let us get over the fact that it is commercial versus thrift versus credit unions: a walk on one financial institution in the United States of America is a walk on all financial institutions. The regulators have got to have this power.

I want to credit the chairman and my ranking member for bringing this bill forth, and I would say to you, Mr. Chairman, that in the 11 years that I have been in this body I have never heard coming from the outside some of the people I talked about in my supplemental views. I think I should say, Mr. Chairman, that in my supplemental views I struck a reference to, "ravenous, albeit well-dressed dogs running

up and down the halls of the Rayburn Building."

I have never heard so much misinformation passed out by the various special interest groups, every single one of them across the board. They have put their personal interests, their self-interests, above the interests of this country, and the banking institutions and the banking philosophy that depositors are protected. I think their information is wrong, it is incorrect, it is inaccurate; it is quite frankly, irresponsible.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words. I know the amendments adopted earlier will bring about easy passage of the bill, but I have some reservations. I hope the amendment purporting to knock interstate banking does the job. Interstate banking possibly could give a few banks control over where industrial development takes place in the country.

I was here in the Truman administration when we were confronted with the Korean war. We were going in the opposite economic direction at that time. We had an excise tax increase we voted on on New Years Day. We adopted some controls, and the interest rate to a degree was controlled during the Korean war. But what we are doing here today is opening up the door for a monopoly in the banking business in this country, in my judgment.

Now, we are never going to balance the budget as long as we go in this direction. We are sending a signal to the Federal Reserve and the metropolitan area large bankers in this country that they have a free rein to go ahead, and that the Congress of the United States has surrendered its right to regulate the currency of the United States. That is going to be the message that is going to the metropolitan bankers of this country.

Now, I read this bill last night—and I highly respect the distinguished chairman of this committee. I know that he has brought forth a lot of good legislation along with the minority ranking members, but after reading this bill, and knowing of the adopted amendment, I would like to ask the chairman of the committee a question.

Starting on line 18 of page 26, the bill proposes to prevent the sale of a financial institution which would result in a monopoly situation, but does not the language, starting with the second word on line 1 of page 27 and ending with the last word on line 4 of page 27, neutralize the prohibition against a monopoly sale? And does it not leave it up to a receiver to determine what "clearly outweighed" means so far as justifying a monopoly sale; and should not the language be redrafted to make the prohibition much stronger?

I hate to see the little banks throughout the country interfered with. I know the gentleman told me yesterday, and his amendment today may to some degree have taken care of the situation when he stated the interstate banking would not interfere with the bank with assets of less than $2 billion, and I am asking if the gentleman still tells the committee and tells me that the bill only applies to a bank of $2 billion or more.

Mr. ST GERMAIN. If the gentleman will yield, as a matter of fact, we adopted an amendment a little earlier that now restricts its application to mutual savings banks and savings banks, so we have deleted the commercial banks entirely. Second, with respect to the language the gentleman quoted, pages 26 and 27, that language has been in the present law, in the Bank Merger Act and Bank Holding Company Act, for many years.

The reason for that particular language is to preserve the local bank, and so we were not changing any law but merely reiterating present law. As I say, an amendment earlier adopted to the legislation totally does away with any effect on commercial banks of $2 billion or more, or less, or anything. We restrict it to mutual savings banks.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, the language on page 26 at line 18 is what we call boilerplate antitrust language which applies to banks under the Bank Merger Act and the Bank Holding Company Act. It simply says, "The receiver shall not make any sale under the provisions of this paragraph which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize, or to attempt to monopolize the business of banking in any part of the United States," so the gentleman's fears have been satisfied in the language which the chairman said is law right now.

Mr. PERKINS. Well, there were so many little people that I represent, thousands and thousands of farmers, and I talked to a lot of them last weekend. They are worried about their financial condition. They tell me they are going broke. And I am afraid the people in this country have not yet realized the plight of the farmers. The prices they are receiving are depressing, and I think the high interest rates are bringing this about to a great degree.

□ 1430

But we should be thinking about the main problem here. I think we should roll back interest rates and start allocating credit under a priority system so the small businessmen, the farmers, and the homebuilders can survive. That is a drastic thing, but I am afraid we are going to have to proceed in that direction, with the financial situation in this country like it is.

I believe that the Federal Reserve System intends to put the small people through a wringer, without any intention of trying to do anything constructive about this situation, and I believe that somewhere along the line the people are going to wake up and find out that the Congress can do something about this situation.

Mr. Chairman, until this Congress takes hold of that problem, I say to my friends that we are going to see high interest rates and we are going to break hundreds of thousands of small businesses in this country, and put this country in a recession.

Mr. PARRIS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I was one of those members of this committee who were initially opposed to this legislation. I take this time in the well to congratulate the chairman of the committee and the ranking Republican members, the distinguished gentleman from Ohio (Mr. STANTON) and the gentleman from Ohio (Mr. WYLIE), whose actions in their search for a consensus, have very considerably improved this legislation.

I intend now to support the adoption of the bill for a number of reasons, not the least of which is my understanding that its provisions do in fact include sunset legislation. This bill will be in effect for about 10 months. There is an opportunity for considerable mischief in that time, but I think that is a calculated risk that the circumstances require.

In view of the chairman's representations in regard to the limitation of changes that may be accepted in conference and the fact that this legislation applies only to thrift institutions or to mutual savings banks of over $2 billion in assets and applies to mutual savings banks largely in the Northeast section of this country in which their exists a truly frightening situation, along with the fact that we have now removed commercial banks totally from its provisions, and with the inclusion of what I might modestly suggest was my amendment adopted in the committee which materially reduced the concerns expressed by the local and generally smaller financial institutions around this Nation about unfair competition, I do support the bill. The question of the posture of the financial industry on this bill which I would categorize is generally in support of this legislation. Mr. Chairman, as one of a frenzy of apathy at this point.

So I submit, Mr. Chairman, that this legislation might be very helpful. Certainly, it cannot be terribly damaging,

so I hope it will be the pleasure of the House to adopt it in its present form.

Mr. McCOLLUM. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Florida.

Mr. McCOLLUM. Mr. Chairman, I wish to join the gentleman from Virginia (Mr. PARRIS) in commending the chairman of this committee and the ranking minority members, both of the committee and the subcommittee, the gentleman from Ohio (Mr. STANTON) and the gentleman from Ohio (Mr. WYLIE), for their work and for their willingness to meld together the interests that were involved and the concerns that all of us have had in obtaining support for this bill, even though we initially opposed it.

I also wish to commend the gentleman from Virginia (Mr. PARRIS) for his amendment, which was a critical one in the committee itself, that was adopted so we could find a balanced position to save the savings banks in the Northeast. Yet I wish to say also that I am still very much opposed to interstate commercial banking. I do not think that the bill provides that, and I am happy to say that the fears and apprehensions that were present are not present at this time since the amendments have been adopted.

Mr. Chairman, I appreciate the cooperation of the gentleman, and I thank him for yielding.

Mr. PARRIS. Mr. Chairman, I thank the gentleman from Florida (Mr. McCOLLUM) for his comments. I suggest to him that I think interstate banking is the greatest nonevent in contemporary financial history. However, we will address that subject at some other time.

● Mr. WIRTH. Mr. Chairman, I commend Mr. ST GERMAIN for moving forward quickly, and responsibly, on this legislation.

This bill is a necessary stopgap measure, crafted to deal with a potentially serious drain on the deposit insurance funds. With the expanded authority given to the regulators to assist problem institutions, it is hoped that we may be able to prevent failures. The bill further clarifies the power of regulators to facilitate mergers of failing institutions, giving first purchasing priority to institutions in the same location as a failing one.

Without this bill, the drain on the deposit insurance funds could be severe. All taxpayers would suffer, and confidence in our Nation's financial institutions could be severely damaged.

This bill does not solve the serious problems faced by many of the Nation's financial institutions, which are suffering under this administration's economic program. If interest rates stay near current levels, the Nation's thrift industry may be devastated. This bill does address an immediate and critical problem, however, and will give us the needed time to look for long-term solutions to the problems facing our financial institutions. The bill's sunset provision of September 30, 1982, insures that this Congress will seek those long-term solutions.

With this immediate problem addressed, we should undertake a comprehensive review of the Nation's financial institutions and financial regulatory policy. Such a review is long overdue, as technology, mergers between different types of institutions, and a fluid and uncertain economic climate have called into question aspects of the legally mandated separation of markets among financial institutions.●

The CHAIRMAN. If there are no further amendments, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. SABO) having assumed the chair, Mr. PEYSER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4603) to provide flexibility to the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the Federal supervisory agencies to deal with financially distressed depository institutions, pursuant to House Resolution 253, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. STANTON of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 371, nays 46, answered "present" 1, not voting 15, as follows:

□ 1445

The Clerk announced the following pairs:

Mr. Jones of North Carolina with Mr. Lowery of California.
Mr. Young of Missouri with Mr. Rhodes.
Mr. Florio with Mr. Dougherty.
Mr. Brooks with Mr. Bethune.
Mr. Dellums with Mr. Stark.
Mr. McCurdy with Mr. Holland.
Mr. John L. Burton with Mr. Bonker.

Mrs. SCHROEDER, Messrs. KOGOVSEK, BEVILL, FLIPPO, and YATES changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

ENERGY CONSERVATION DAYLIGHT SAVING ACT OF 1981

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 236 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 236

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4437) to promote energy conservation by providing for daylight saving time on an expanded basis and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 236 provides for the consideration of H.R. 4437, the Energy Conservation Daylight Savings Time Act. The provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce. It is an open rule, allowing any germane amendment to be offered under the 5-minute rule. There are no waviers of points of order.

Mr. Speaker, H.R. 4437 changes the beginning of daylight saving time from the last Sunday in April to the first Sunday in March each year. It has been estimated that during this additional 7 or 8 weeks of daylight savings time, our Nation will conserve as much as 100,000 barrels of oil equivalent daily due to reduced demand for electric lighting. Moreover, this substantial savings can be achieved with little or no expenditure by the Federal Government.

The bill also takes steps to lessen the minor adverse consequences of extending daylight saving time. H.R. 4437 preserves the exemptions from daylight saving currently enjoyed by various States and empowers the FCC to grant before-sunrise broadcasting permission to any "daylight only" AM radio stations that would lose the profitable commuter hour under the bill's later sunrises.

Mr. Speaker, expansion of daylight saving time is long overdue. I urge my colleagues to begin consideration of this important measure by adopting the rule.

□ 1500

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 236 is a simple, 1-hour, open rule under which the House will consider H.R. 4437, a bill that expands our daylight saving time system from 6 months to eight months.

As the distinguished gentleman has explained, this rule is notable for its lack of complexity. It contains no waivers of our rules, and places no limits on germane amendments.

The bill, which comes to us from the Committee on Energy and Commerce, will be read for amendment under the 5-minute rule; and one motion to recommit is provided for.

Mr. Speaker, unless amendments are adopted that substantially change this bill, I certainly hope a motion to recommit will be offered and will prevail because this does not deserve to pass.

The Energy and Commerce Committee is apparently not content to leave well enough alone when it comes to interfering in the daily lives of millions of rural Americans—now it wants to rush springtime even further, in the misguided hope that our Nation will save energy simply because Washington has decreed that our clocks should be moved forward sooner in the year.

The essence of this bill is to require the Nation to observe 8 months of daylight saving time, apparently on the theory that 6 months of it is not good enough.

Mr. Speaker, I have searched through the committee report, and for the life of me, I cannot find where there is substantial energy savings to be had.

One of the so-called needs for this legislation, we are told by the committee—and I urge my colleagues to read this report—is the fact that we have "an imbalance in the present 6-month daylight saving time system."

We do not live in a perfectly symmetrical world, it seems, and it is just a doggone shame. But our current system "includes 4 months after the date with the longest day of the year

(June 21), but only 2 months before it."

Having "symmetrical patterns of available daylight before and after June 21 (the summer solstice) * * * now that is what the committee seems to think is important here.

But nowhere in the committee report can I find anything to indicate that the committee could find any solution to this problem except expand daylight saving time from 6 to 8 months.

No one seems to have considered keeping our present 6 months, and simply moving the time period of required daylight saving time to the period from the end of March to the end of September.

Mr. Speaker, aside from having a calendar that is not in symmetrical balance with daylight saving time, the committee would have us believe there is a considerable amount of energy out there to be conserved if we would only change our clocks in early March.

To back up this claim, we are offered two studies done nearly 7 years ago that "inferred" a savings of 1 percent in electrical usage.

The committee report does not mention that many rural Americans are opposed to this extension of daylight saving time. Not only does it not mention the real hardship and inconvenience that will be forced on rural America by this bill, it does not even extend the courtesy to the American Farm Bureau Federation of describing their opposition to this bill.

This bill is supported primarily by a group of Government bureaucrats, who have nothing better to do than dust off a series of studies done in 1972 and 1975, and analyzed in 1976.

Mr. Speaker, we all realize the importance of reducing energy consumption, and I think the American people have made great strides toward a goal of conservation since 1973 and 1975.

It appears to me, however, that since we added the jurisdiction of energy to the Committee on Interstate and Foreign Commerce, they might have been a little more energetic about presenting the House with some current information about a truly pressing need.

Mr. Speaker, there is no opposition to this rule, but the bill it makes in order should be defeated by the House, so we can save ourselves and the Nation the trouble of more daylight saving time.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. OTTINGER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4437) to promote energy conservation by providing for daylight saving time on an expanded basis and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. OTTINGER).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4437, with Mr. PEASE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New York (Mr. OTTINGER) will be recognized for 30 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Energy Conservation Daylight Saving Act of 1981, H.R. 4437, is a straightforward bill which can conserve energy by extending daylight saving time by 2 months. Under the provisions of H.R. 4437, daylight saving time would begin on the first Sunday in March, rather than the last Sunday in April. The bill was ordered reported without amendment by a bipartisan vote of 31 to 8 by the Energy and Commerce Committee.

I am pleased to cosponsor this bill with the gentleman from California, the distinguished ranking minority member on the Subcommittee on Energy Conservation and Power (Mr. MOORHEAD) and thank him for his support and assistance. I also appreciate the support of our other cosponsors. I am also pleased that the administration strongly supports the legislation.

The bill will enable the Nation to realize the additional benefits of later sunsets without facing any mornings darker than we now face under current daylight saving time. Let me emphasize that point. The latest sunrises which will occur as a result of this bill will be approximately no later than the sunrises which now occur in October. This is because the legislation merely extends daylight saving time to make it symmetrical with respect to the summer solstice, the longest day of the year. Under the bill, we would have daylight saving time for 4 months before, and 4 months after, the solstice.

The subcommittee paid close attention to the issue of schoolchildren having to go to school in the dark, and facing traffic safety risks. This was a concern raised in 1973, when we experimented with year-round daylight saving time. I can guarantee you that no member of our committee would have supported this legislation, unless we were thoroughly convinced that there were absolutely no increased safety risks to children. Both the Department of Transportation and the National Bureau of Standards reviewed traffic safety statistics from the 1973-74 experiment and concluded that there was no risk to schoolchildren from extending daylight saving time in March and April. In fact, the statistics indicate that increased daylight saving time can actually decrease traffic fatalities by as many as 200 per year. Schoolchildren will be going to school on days with sunrises no later than they currently are in October.

Just to make matters certain, I requested one further review. I asked the Department of Transportation to review recent traffic accident statistics to determine whether there is any increased danger to children during daylight saving time. They again found that "* * * the results indicate that daylight saving time had no significant effect on schoolchildren morning fatalities during the spring and fall transition periods in 1979 and 1980."

Now let me turn the benefits of this legislation. According to the Department of Transportation, we can save about 100,000 barrels of oil equivalent per day during the 2 extra months. This is a savings which we can get year after year, in a painless manner, and reduce our costly dependence on imported oil.

The legislation will also be an effective crime stopper. According to studies done in the District of Columbia daylight saving time can reduce violent crime by 10 to 13 percent.

The legislation will also provide increased recreational time and extend prime shopping hours. In fact, the legislation has been endorsed by the Southland Corp., operators of 7-11 stores throughout the country. In their expression of support for the bill, they note the increased benefits of more leisure time and allowing people more flexibility to accomplish their shopping needs. The bill is also supported by the National Association of Convenience Stores.

Another group of Americans who will be aided by this bill are the hundreds of thousands afflicted with night blindness. The Retinitis Pigmentosa Foundation urges passage of this legislation so that their members would receive an extra period of sight and mobility during the evening.

Let me add that I recognize that despite public opinion polls which show that the public favors increased daylight saving time by 2 to 1, there remains a sincere minority which would prefer to keep the period the same of shorter. I would only remind my col-

leagues that this legislation will continue the authority for any State to opt out of the system, or for a portion of a State to opt out if it is divided into more than one time zone. Currently Arizona, Hawaii, and portions of Indiana do so.

□ 1510

I want to share with you one of the more important expressions of support for H.R. 4437. It comes from a group of eighth graders from White Plains Middle School. It reads as follows:

DEAR MR. OTTINGER: We have read the New York Times editorial, September 24 on your proposal concerning the extension of daylight saving time and wish to express our enthusiastic support. May we offer our help even though we are only Eighth Graders?

We hope Congress passes the bill that would save oil not only for us today but for the future. We are studying the Constitution and are very proud of our system of government and would like to take this opportunity to show our support for those representatives who are working on our behalf.

We will urge our parents, friends, teachers, and neighbors to join us in this search for new ways to conserve that crucial resource, oil.

With the greatest respect and hope that we will hear from you soon we remain,

Most sincerely yours,
THE ENERGY PROJECT OF THE
WHITE PLAINS MIDDLE SCHOOL.

The letter is signed by 43 schoolchildren whose appreciation of our system of government and whose understanding of the need to conserve energy is refreshing and encouraging.

This legislation is a simple step we can take for energy conservation, crime reduction, and economic recovery. The administration has expressed its strong support for the bill. Public opinion polls show that extension is favored by the American people who have consistently expressed support for increased daylight saving time by a 2-to-1 margin. I strongly urge favorable action on this legislation.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank the gentleman for yielding.

I am very interested in what the gentleman has had to say in support of this legislation, especially in regard to the energy savings and to the traffic safety and to the rest of the gentleman's arguments, but I have here some material from the Congressional Research Service that really indicates just the opposite and I would like to perhaps engage the gentleman in a colloquy to basically get at the bottom of this problem.

The gentleman has said in his "Dear Colleague" letter on the floor that there is energy savings of about 100,000 barrels of oil, and yet when I quote from the summary of the bill, it says here that the Department of Transportation study showed that a very modest benefit might be realized by a shift in the time; but the report also indicated that these potential benefits were small and difficult to isolate from the larger effect from seasonal variations.

We really could not find any difference between seasonal variations and daylight saving time. I want to know if the gentleman could respond to that.

Mr. OTTINGER. DOT testified and came out very strongly that their best estimate, based on the actual experience we had with year-round daylight saving time, was 1-percent savings, which comes to 100,000 barrels of oil a day. The National Bureau of Standards said that is speculative for the reasons the gentleman indicated.

But the actual experience was a substantial savings and today, of course, the value of those savings is greatly enhanced over what it was at the time those studies were made.

The gentleman from Tennessee before had indicated also that this was speculative but the actual experience at the time we had year-round daylight saving time was a substantial savings. He said it was based on old data. The data that was used by the Department of Transportation was——

Mr. ROBERTS of Kansas. The 65.

Mr. OTTINGER. From the 1973-74 experiment, and they said to try to update and that would be unduly expensive because it would have to be an empirical study now, whereas it was an actual study back then.

I think this is the best evidence that we have that there would be a considerable savings. Undoubtedly it is going to change depending on what the weather is at the time.

Mr. ROBERTS of Kansas. If my friend and colleague would yield further, further down in the report it says the National Bureau of Standards' evaluation using a corrected data base also found no conclusive evidence of any savings from daylight saving time on energy in terms of electricity.

I wonder if the gentleman would respond to that.

Mr. OTTINGER. The National Bureau of Standards used a very small sampling to do that and they did not contest that there were savings. They said it was just speculative as to what those savings would be.

I think that both logic and the actual experience we had indicate that there would be considerable savings. I do not think they are measurable, as the gentleman has indicated, with exactitude. They are not measurable because of changes in weather conditions which do indeed affect the situation.

With respect to electricity, there was a clear savings during 1973 and 1974 when we actually had year-round daylight saving time.

Mr. ROBERTS of Kansas. I would point out in terms of savings, I doubt very seriously if any tests were conducted in our rural areas and I can assure the gentleman with another hour of darkness in the morning we would have energy losses because of extra energy used.

I have, "No significant daylight saving time related decrease in motor fatalities was found." That was in opposition to what the gentleman said and it goes on to say——

Mr. OTTINGER. It confirms what I said, there is no increase in fatalities. In fact, there was a slight reduction of about 200 deaths.

Mr. ROBERTS of Kansas. Well, OK, if the gentleman would yield further, however, there was a significant increase in fatalities, which is the point I was trying to make, in school age children found in the morning during the winter months.

Mr. OTTINGER. But not during March and April, which is the time we are extending it. At that time we had year-round daylight saving time and you get into very late dark mornings when you get into November, December, January, and February.

The findings of the study were by two independent bodies, the Department of Transportation and the National Safety Council. There was no increase during March and April and indeed the conditions in March and April are identical to what the schoolchildren presently go through in September and October.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. I thank the gentleman for yielding.

I also come from a rural area. I find generally that the people I hear from are supportive of daylight saving time and I rise today to commend the gentleman on this legislation. It makes sense. It would save over 100,000 barrels of oil a day, and as the gentleman told us, the fatality record did not change when we had the longer daylight saving time and I appreciate the gentleman bringing this bill to the floor and giving us an opportunity to vote for it.

Mr. OTTINGER. I thank the gentleman from Mississippi.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentlemen yield?

Mr. OTTINGER. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank the gentleman for yielding.

I would simply point out that the gentleman has made the point that there is no difference in the hours of daylight if we in fact move to DST during the spring months as opposed to what we have now; and I would point out to the gentleman that the

Sun rises in western Kansas right now in my 57 counties at 7 o'clock.

In March, if we move to daylight saving time, it will be 8:12 when the Sun rises.

So we do have that hour difference in western Kansas and it does pose a hardship to our citizens in our rural areas and I just checked with the National Weather Service in Dodge City to confirm those figures and so we do have a difference in our rural areas.

Mr. OTTINGER. There should not be any more than 5 to 10 minutes difference.

I would also like to point out the National Bureau of Standards with respect to child fatalities also looked at this question and using the same DOT data they conclude that there was no school-age fatality increase during daylight saving time during the months of March and April.

I would be very concerned indeed if there were increased child fatalities, but that clearly was not the case.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Kentucky.

Mr. ROGERS. Did not the National Bureau of Standards testify at the hearings that during a 1974 experiment on daylight savings there was an actual increase in fatalities of school age children during that experiment in 1974?

Mr. OTTINGER. Not in March and April. There was an increase in fatalities in the winter months. That is why it was abandoned.

There was no increase in March and April, as I pointed out before. The situation with respect to that is identical at the present time in September and October.

Mr. ROGERS. If the gentleman will yield further, in Kentucky, March, and April, particularly March, are very severe winter months, especially in the mountains, and I am very concerned about the possible increase of school fatalities on those schoolbuses on icy roads in the middle of the night in March.

Mr. OTTINGER. The reverse is true, because on their way home they would be subject to the same darkness conditions if it proves stormy, were we not to have this extended daylight.

Mr. ROGERS. They would be going home in daylight hours.

Mr. OTTINGER. They would be going home in darkness were it not for the daylight savings.

Mr. ROGERS. No; I beg the gentleman's pardon, they would be going home in daylight regardless of the change. What I am concerned about is traveling to work, to school on those mountain roads in different sections of the country during those March weeks and days in the western side of our time zones where a majority of the population now live, as a matter of fact.

Mr. OTTINGER. Well, there is no question under any scheme the people in the western side are going to be affected more than the people in the eastern side.

During the full-time daylight saving time experiment some schools that were concerned actually changed their school hours to be able to accommodate that and, of course, that is available to any school district that might be concerned, but the statistical record is that there was no increase in child fatalities.

□ 1520

Mr. MOORHEAD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 4437—the Energy Conservation Daylight Saving Act of 1981. This legislation is a bipartisan bill reported without amendment to the House by the Energy and Commerce Committee by a consensus vote of 31 to 8.

Section 3 of the bill amends the Uniform Time Act of 1966 by advancing the daylight saving time starting date from the last Sunday of April to the first Sunday in March. It also provides for the continuation of State exemptions and partial exemptions for States with parts in more than one time zone.

Section 4 of the bill provides the Federal Communications Commission with the authority to grant variances with respect to the hours of operation of daytime AM radio stations and their operating power levels.

Section 5 of the bill makes the act effective on the date of enactment unless that date occurs in any year after March 1, in which case the act takes effect the following year.

I have for several years introduced and supported legislation that reasonably expands daylight saving time. H.R. 4437 will conserve daylight hours by extending daylight saving time to 8 months from the present 6 months. A March to October daylight saving time period would make more efficient and symmetrical use of longer daylight days by providing an equal number of longer daylight days on either side of the summer solstice. The introduction of March and April to daylight saving time will extend the benefits we are presently experiencing in September and October. H.R. 4437 provides us with a potential of an electricity savings of approximately 100,000 barrels of oil equivalent per day during the months of March and April. That represents a net decrease of approximately 1.03 percent in total U.S. electricity consumption.

Unlike some energy conservation measures this is one that will not require an army of bureaucrats to enforce. It will not impose a mandatory regulatory scheme permeated with redtape that adversely effects economic productivity on the taxpayer. This conservation program will not require additional funding and overhead at the Department of Energy.

In addition to the energy savings, H.R. 4437 may very well have the following positive effects: First, a reduction in traffic accidents. This could mean 200 fewer traffic fatalities in the United States; second, a reduction in violent crime; third, more daylight recreation time; fourth, expanded economic opportunity through extension of daylight hours to peak shopping hours; and fifth, as the Retinitis Pigmentosa Foundation indicates, this legislation will provide welcome relief to those with visual handicaps. For all of these reasons the following organizations and Government agencies strongly support the passage of H.R. 4437: The International Council of Shopping Centers, International Association of Amusement Parks and Attractions, the Southland Corp., the National Association of Convenience Stores, the Retinitis Pigmentosa Foundation, Taft Broadcasting, Inc., the city of Los Angeles, the Department of Transportation, and OMB.

We have very carefully looked into the matter of schoolchildren waiting for schoolbuses in the morning under the expanded daylight saving period in accordance with H.R. 4437. The subcommittee received a considerable amount of evidence on this matter. Studies conducted by the Department of Transportation and the National Safety Council indicate that under daylight saving time in March and April, school age children are not subject to greater involvement in accidents than the general population in any period of the day. Since the amount of daylight hours in March and April are essentially the same as the daylight hours during September and October there is no reason to believe that the additional 2 months provided for under this legislation would have any adverse consequences. Few people object to daylight saving in September and October under present law. The evidence clearly shows that the American public is behind a reasonable expansion of daylight saving time. Reliable polls have confirmed this information. Newspapers across the country from the New York Times and the Los Angeles Times have editorialized in favor of this legislation.

I urge my colleagues to support H.R. 4437 without amendment.

Thank you, Mr. Chairman.

I yield 5 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today in strong support for the bill H.R. 4437 which will extend the period of daylight saving time. I wish also to commend

and congratulate my colleague, Mr. OTTINGER of New York, for his persistence and leadership in pushing this important bill through the House of Representatives.

There are few bills which this Congress can pass which will have a more immediate, direct, and noticeable effect on the quality of life for the American people than this measure to extend the period of daylight saving time to the first Sunday in March. Yet, nothing in this bill is revolutionary or radical in scope. It simply equalizes the period of daylight saving in the spring with the period now in effect for the fall. Americans are certain to notice in the spring, just as they did a few days ago when this year's daylight saving period ended, that the time at which the Sun rises and sets has a powerful effect on the way in which we lead our daily lives.

Mr. OTTINGER correctly points out that this bill goes far beyond simply improving the quality of life for millions of Americans who will benefit from extended hour of daylight in the evening for recreational or other activity. This bill may, in fact, contribute significantly to the large strides in energy conservation our Nation has already made. By providing 1 less hour during which home lighting, business lighting, and heating and cooling systems may be required to operate, these savings could be substantial.

Furthermore, the extra hour of prime time daylight may well reduce traffic accidents, reduce crime, and increase the constructive use of our parks and recreational facilities.

Mr. Chairman, I urge my colleagues to support this worthy piece of legislation without dissent.

Mr. MOORHEAD. Mr. Chairman, I yield 4 minutes to the gentleman from New Hampshire (Mr. GREGG).

Mr. GREGG. Mr. Chairman, I appreciate being able to speak to this issue and rise in support of the bill. If this bill passes, and I want to get into the specifics of what it will actually do, because there has been a lot of rhetoric, but if this bill passes, the nearest Sunday in March to March 1 happens to be March 7, where the Sun rises at 6:10 a.m. standard time, and 7:10 a.m. daylight saving time, and sets at 5:42 standard time or 6:42 daylight saving time, for a length of day of 11 hours and 31 minutes.

□ 1530

Thus, there would be more daylight available on this day than on October 31 where there is presently only available this year 10 hours and 33 minutes of daylight.

So unless you are going to change the October 31 date, it is absurd to say that the March 7 date is unrealistic, unfair, or a change in the way that the sunlight is affecting us.

What really causes the danger here, which has been discussed, is the fact that Mother Nature exists and shortens her days as the Sun moves toward the Equator from the Tropic of Cancer. The shortest day of the year, the solstice, is on December 21, and is where the Sun rises at 7:12 a.m. and sets at 4:17 p.m., allowing 9 hours and 5 minutes of daylight. There is nothing we can do about that fact. The fact is that on that day children get up in the dark, go to school in the dark, and often come home in the dark. We also must milk our cows and take care of our farm animals in the dark.

Remember, again, that if you wait until April 30 to switch over, you miss the entire months of March and April during which you could use early morning light. The Sun rises on standard time at 4:44 a.m. on April 30. Assuming a great many people of this country, and I assume most people of this country, arise between the hours of 6:30 and 7 o'clock in the morning, or averaging 6:45, you have lost 2 hours of sunlight to work with if you have daylight saving time going into effect on April 30. Even as March goes along, the rising of the Sun advances so rapidly that by March 15 the Sun is rising at 5:57, and on March 31 it is rising at 5:29.

The effect of that, again, is that you are losing light, early hours of operable daylight when people could be using it. The reason that this occurs, by the way, is that when we are moving toward the solstice in December, in late fall, the Sun's declination is at a slower rate than when it is moving out of the solstice going into the spring where the sun rises, its declination, its angle to the Earth, rises faster. This is Mother Nature's way of giving nature more sunlight, and it behooves us to take advantage of that sunlight.

Ben Franklin also pointed out, even during the Revolution, that if we used daylight saving time and began it in March, we would be saving candles.

It seems to me that if we vote against this bill, which by the way is really a supply side bill because it creates more productivity—no question about it, in the marketplace because we do not waste those daylight hours in the morning—if we vote against this bill, we are not only voting against sunlight, which I cannot imagine that any farm community would want to do, but we are also voting against Ben Franklin, and I challenge anyone in this room, or this Congress, to vote against Ben Franklin.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I will yield to the gentleman from Indiana.

Mr. HILER. Mr. Chairman, can the gentleman explain again how this is a supply side bill?

Mr. GREGG. Well, as the gentleman knows, being one of our leaders of supply side economics in the newly elected class, if people have the opportunity to get up and use daylight to their advantage, then they are going to be more productive. If we are losing 2 hours of daylight, such as we are, and we are losing 2 hours of daylight if we do not move daylight saving time back to the first Sunday in March, on that first Sunday in March, on the last Sunday in April, there are 2 hours of daylight from the time the Sun rises to the time the average American gets up and goes to work which are completely wasted.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS of Kansas. Mr. Chairman, I rise in opposition to this bill.

I would respond to my colleague from New Hampshire to indicate to him that despite what he says about Mother Nature, you cannot fool Mother Nature, and also to say that I have it on good authority, when the Honorable Benjamin Franklin came out in favor of daylight saving time he was on one of his many junkets to Paris, France.

The dear colleague, in behalf of this bill, mentioned several things. I will repeat my opposition. They allege energy savings of 100,000 barrels of oil. If you read the report, the report actually says that there has been no significant measure of energy savings that could be attributed to daylight saving time, only to seasonal change.

The report goes on to claim 200 fewer traffic fatalities when in actuality if you read the rest of the report there has been no significant increase in safety due to DST.

The dear colleague goes on, in soliciting my colleagues' support for an extra period of sight and mobility for the hundreds of thousands of Americans suffering from night blindness. There are just as many of these folks blind in the morning when we have darkness as in the evening, if these folks would care to get up in the morning.

The gentleman also referred to the study done by the Department of Transportation alleging that there was no harm to school children in terms of riding school buses. I would challenge any Department of Transportation bureaucrat to come out to Highway 36 in my district and stand on the side of the highway in total darkness where cars go by at 60 and 55 miles an hour and say that that is not a hardship or a threat to that child.

There have been some additional comments in regard to what problems this causes radio stations, and the fact they can go to the FCC for relief. This is a serious problem when, in fact, we

have to come on the air and warn our farmers and stockmen of impending weather. I would only point out I have broadcasters that report to me they have tried to seek relief from daylight saving time for 4 years at a cost of thousands of dollars. That speaks to the ability of the FCC to respond to these requests.

There is only one simple reason as to why my urban colleagues are for daylight saving time, and they are correct when they cite increased recreational time, tourism, and extension of prime shopping hours. It is a matter of convenience. But, Mr. Chairman, it is a matter of inconvenience to rural areas. In New York or in other metropolitan areas, if you want to play golf, if you want to walk your dog, if you want to go jogging, fine. But do not do it at the expense of our rural areas.

The gentleman from New York said our farmers can simply get up an hour earlier to do the chores. That is just simply not the case. We have a full day's work and more, not just 8 hours. The work is governed by when the Sun comes up and when the Sun goes down. We just cannot automatically adjust.

I think the best amendment we could offer to this bill would be an amendment that would set the clock back 1 hour in the spring and then set the Nation's thermometers back 10 degrees. Then when the clock is set forward in the fall, we can set the Nation's thermometers 10 degrees up, and obviously we will not have summers as hot and we would have energy savings, and we also would not have winters as cold. That makes just about as much sense as this bill. I urge my colleagues to oppose what should be labeled the "Urban Convenience Act of 1981."

Mr. ROGERS. Mr. Chairman, I rise in opposition to this bill, strongly so. I commend the chairman and the ranking member of our subcommittee for their concern about and desire to cut back on oil consumption, which we all would like to do. But there will be serious side effects to this change, and at best only marginal energy savings by changing daylight savings time until early in March. The side effects, in my opinion, strongly outweigh whatever advantages may be gained.

Let me tell the Members about a few of the side effects in my judgment.

First, and most importantly, is children's safety. I urge you to consider that for those of us who live on the western side of these time zones—and the latest U.S. census showed that a majority of us do—get light later in the morning than the eastern side. And I am greatly concerned for those children who ride those school buses, especially for those kids on buses in the mountains of the Appalachian areas. This bill would force them to ride those buses in the middle of the night, on icy roads, snowy conditions in the wintertime. And March is a winter month in most of the country. It centainly is in the mountains of Kentucky. And for those children to be required to get out in the middle of the night, walk to the bus, wait on a lonely road, on ice and snow, and ride a bus to school under those very dangerous conditions, I think is too much of a risk and burden to ask for the little benefit that might be gained by changing the time.

This change would cause special problems in the rural areas, as my colleague from Kansas mentions. We do not have lights on many of the streets, highways and roads; we often have no raised sidewalks for these school children to use; and mountain roads are slippery throughout the winter months.

Let us mention to you an evaluation by the National Bureau of Standards relating to child fatalities. They testified that during the 1974 experiment with daylight saving time that there was an increase in fatalities of school-aged children.

Frankly, Mr. Chairman, as long as there is any possibility that our schoolchildren would be endangered, it would be nothing short of cruel for the Congress to enact this legislation. There is no parent who would choose to endanger his child's life in order to conserve a questionable barrel of oil.

And, Mr. Chairman, the problems extend beyond those faced by children. Consider the effect on farmers.

Now the Congress may be powerful, but it can not legislate when cows will need to be milked. And this legislation would throw farmers entirely off of schedule, both for their work on the farm and their transactions in town.

Other workers who rely on daylight would also be seriously affected. For example, construction and warehouse workers would face additional work-related hazards if they tried to continue working in the morning hours.

And the problems would not be confined to rural areas. There would be difficulties in suburban and urban areas, where commuters would be forced to drive to work in the dark.

So there is no denying that severe hardships would result from the enactment of this legislation. But, Mr. Chairman, I submit that these hardships would be endured for very little purpose. The record indicates minimal, if any, energy savings would result.

In commenting on the studies regarding the impact of extended daylight saving time, the Bureau of Standards said that the studies "do not lead to any conclusion on possible energy savings." And I am convinced that in the western portions of time zones, there might even be regional increases in energy consumption, considering the additional use of gas and electricity in the morning hours.

And of course, if additional States choose to opt out of daylight saving time altogether, opposing the extension, they would end up using more energy than before.

So, Mr. Chairman, the record is clear. We are being asked to jeopardize the safety of millions of schoolchildren. We are being asked to disrupt the work of farmers throughout the country. And we are being asked to make many workers' jobs more dangerous. And we are being asked to take these steps for the sake of energy savings, even though those savings would at the very best be extremely slight. Mr. Chairman, it seems clear that the disadvantages far outweigh any possible advantages.

I urge my colleagues to join with me in voting against this bill.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I would be happy to yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, this is a question which I think has really got a lot of people concerned. I think it is important we not mislead people.

In accordance with the DOT study and the National Safety Council study, and confirmed by the National Bureau of Standards when they reviewed this and had some questions about energy savings, they did confirm that during the months of March and April, when we are extending this, there were no increases in child fatalities.

□ 1540

I do appreciate the concerns that the gentleman suggests with respect to the western part of the State, particularly States such as his own where they have very severe weather conditions. I would suggest that there are two options. One is that, as the gentleman knows, the State can exempt themselves from daylight saving time. The more practical thing is that where there is a special situation in one section of the State, such as the gentleman has, there is a possibility of adjusting school hours.

Mr. ROGERS. I suggest the reverse side of that alternative would be for us to keep the time system as it is and allow New York to opt for added daylight time.

Mr. MOORHEAD. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Chairman, on April 24, 1980, I addressed the House to urge my colleagues to support the extension of the daylight saving time provision of the Uniform Time Act of 1966. Today, I rise in support of H.R. 4437 which would extend daylight

saving time to include 8 months of the year, from the first Sunday in March through the last Sunday in October. The arguments I presented in favor of the 8-4 month plan 18 months ago are still pertinent today.

In fact, new evidence shows that extended daylight saving time will benefit the entire Nation. Department of Transportation studies indicate that we will save nearly 100,000 barrels of oil equivalent per day during the 2 months of prolonged daylight. The National Highway Traffic Safety Administration predicts 200 fewer traffic fatalities per year if the 8-4 month plan is implemented. Studies conducted in the District of Columbia reveal that violent crime—a problem reaching epidemic proportions in our Nation—could be reduced as much as 13 percent with longer daylight hours. Finally, recent public opinion polls show that the American people support extending daylight saving time by a 2-to-1 margin.

Mr. Chairman, the facts are compelling and the time is right for the extension of the daylight saving provision of the Uniform Time Act of 1966. I urge my colleagues to support H.R. 4437.

Mr. MOORHEAD. Mr. Chairman, I yield 4 minutes to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, I rise in strong opposition to H.R. 4437.

I would like to first talk about energy. According to the committee report, daylight saving time could save the equivalent of 100,000 barrels per day in March and April. But, this data is challenged by the National Bureau of Standards, which finds no conclusive evidence of any savings.

I would like to point out that in northern Minnesota and the northern borders of this country, if we were to rise an hour earlier in the morning, at a time when the day is the coldest, the few hours before daylight and the hour after, we are not going to save energy, but use more, because those thermostats get turned up when folks get up for breakfast, when they get up for breakfast to feed those young children when they have to go out there 2 hours before daylight to catch that bus. Even if there were some identifiable savings, I question whether they would ever be realized. History shows that once daylight saving time approaches 8 months, States on the western borders of three of the four continental time zones tend to drop out of the program. During year-round daylight saving time in 1974-75, most of Michigan dropped out during March and April of 1975, as did Idaho and part of Oregon in 1974.

The committee does not project what the dropout rate would be under the proposed 2-month expansion. The dropout would not be for just March and April. Daylight saving time is an all or nothing proposition. If a State did not want the expansion, its only recourse would be to drop out completely. If some States decided not to go on daylight saving time because of the expansion, not only would there be a loss of the claimed energy savings, but also a loss during the other 6 months, the 6 months that we presently have daylight saving time.

In this way, the net energy savings expected from this bill could well turn into a net energy loss.

By refusing to go on daylight saving time a State would also create confusion in communications. The rapid growth of sophisticated communications technology has made our Nation in one respect a small and intimate place. The time differences in the respective time zones so far have not hampered this progress. This is due in large part to our being used to the 1, 2, or 3 hour differences almost uniformly followed within the respective zones. All of this would be thrown out of whack if States began quitting daylight saving time. The lack of time uniformity within the zones could lead to chaos in communications.

Another concern I have about daylight saving time is safety. In my district and those of many of my colleagues, rural schoolchildren leave their homes very early in the morning to make their way to school. Despite the fact that the Sun rises about the same time in March and April as it does in September and October, the weather is more wintry during March and April. The weather between 6:30 a.m. and 7:30 a.m. daylight time in March and April is much more likely to be icy, making the roads more slippery. Rural schoolchildren usually have no sidewalks to walk on. They walk on the sides of roads to their bus stops or schools. By 6:30 a.m. daylight time the Sun will not have had enough time to burn off that nightly ice cover.

Finally, in the western portion of the three time zones, darkness has not yet lifted by 6:30 a.m. daylight time. Add up all of these factors, and if you push the clock ahead an hour during these months you are going to make going to school a dangerous venture for these children.

I think the whole talk about daylight saving time is itself a misnomer. I would like to disagree with my colleague and friend from New Hampshire. You do not save daylight time. The Sun rises in the morning and sets in the evening, and in that framework, from the time that Sun comes up and until it goes down is a certain period of daylight, and no law can lengthen that day and no law can shorten that day. We have so many hours of daylight on any day of the year, and no law changes those hours.

Mr. Chairman, it is my feeling that passage of H.R. 4437 would be a mistake. The questions regarding energy savings, time uniformity, and safety have not been sufficiently answered. So, I oppose H.R. 4437 and I urge my colleagues to do the same.

Mr. MOORHEAD. Mr. Chairman, I yield 4 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in opposition to this legislation extending daylight saving time an additional 2 months by changing the starting date from the last Sunday in April to the first Sunday in March. This is an unwise and unneeded bill.

We of Nebraska are morning people. Many of the day's activities are accomplished during the morning hours. This legislation, by eliminating an hour of daylight in the morning, adversely affects our work habits. The lost hour cannot be made up at the end of the day, as every farmer knows. There are certain farm chores that must be done in the early part of the day—feeding livestock, setting irrigation equipment, and so on—whether in darkness or in light, which cannot be altered by an act of Congress. It is no wonder that Nebraskans resent this intrusion by the Government into their lives.

The principal argument put forth by proponents of this legislation is that the bill will save energy. The evidence in support of this assertion is not overwhelming. In fact, the Bureau of Standards during Energy and Commerce Committee consideration of this issue asserted:

> The available data do not lead to any conclusions on the possible energy savings, except that further studies would be extremely expensive to perform.

It is my impression that there may be a net increase in energy consumption rather than a decrease under daylight saving time. Additional shopping and recreational trips would be made under daylight time. One of the original purposes of creating daylight time was to allow citizens more daylight hours for shopping and recreation in the afternoon when they get off work. If they are going to use those hours which are so generously provided by Congress, they will be using more fuel. Families that rise before sunup will require additional energy for lighting and heating.

School superintendents are forced to start their furnaces earlier in the morning in order to get buildings warm in time for school to start. Since buildings are colder earlier in the morning, it requires an additional amount of heating oil or natural gas under daylight time. Also, many parents feel that it is necessary to drive their children to school rather than to let them stand in the dark waiting for a schoolbus or walk or ride a bike to

school during hours of darkness. This results in additional gasoline use.

The Bureau of Standards has something to say about schoolchildren as well, Mr. Chairman, and it is frightening. In the same testimony that I quoted previously it says:

School-aged children suffered an increased number of fatal accidents in the morning during the four months, January to April, in 1974 under daylight saving time, as compared to the same period in 1973 when daylight saving time was not in effect.

This is the issue of greatest concern to the people of the Third District of Nebraska.

I am aware that a great many things can be shown with statistics, and we can argue all day about the meaning of these fatality statistics, but that will not change the opinions of my constituents who believe that sending their children off to school in the cold dark increases the danger they face. Forcing small children to leave their homes before dawn will not solve the energy shortage.

Mr. Chairman, for these reasons the House should reject this legislation today. Congress should not leave the citizens of this Nation in the dark once again.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Chairman, during the past several months I have had the opportunity to participate in the debate on this issue in subcommittee, in committee, and now, of course, here in the Committee of the Whole House. I believe it is fair to say that this is not one of the most Earth-shaking issues we will face during the course of this year in Congress, but it is an issue that is of significant importance to those who are directly affected by it.

I have not, admittedly, had a lot of experience on the farm, but my farmers tell me that when cows have to choose between God's time and Government's time, they give milk on God's time. It is because of that fact that this creates a considerable havoc in the rural communities of our country.

Now, I think that it is also important to note that many of these rural residents are worried about the fact that this forces their children to wait for the bus in the early morning hours when it is cold and when it is somewhat dangerous to those children. Now, these things in and of themselves may not seem as if they are matters of great importance, and they affect perhaps a relatively small portion of the population, but the key factor is this: In this daylight saving time law, there is a provision which allows States to opt out. If even one additional State should opt out of the entire program for the entire year because we are extending the program 2 months, we would lose the energy savings that this bill supposedly offers us.

□ 1550

I would suggest that extending this daylight saving time period into the cold months of the earlier part of the spring of the year is going to cause at least one more State to opt out because of the opposition which will be generated against daylight saving time as a whole in that State.

I believe that if that happens, we will lose all the energy savings that are supposedly being achieved through this bill, and we would have actually taken a step backward.

So for that reason, Mr. Chairman, I hope the Members of the House will recognize that we are dealing here not just with the issue of extending daylight saving time but we are also dealing with the issue of keeping those States that are already on daylight saving time in the position of maintaining that time system.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, will the gentleman tell this Member, who, quite frankly, knows remarkably little about farming and cows, something that he has always wondered about?

I understand the impassioned pleas from colleagues who represent agricultural districts, particularly apparently those who represent dairy areas. I do not understand, however, what difference it makes to the cows what time we think it is.

Mr. TAUKE. Mr. Chairman, it does not make any difference to the cows because they stick with God's time. That is what the farmers tell me.

Mr. STUDDS. That is what I thought.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. TAUKE) has expired.

Mr. OTTINGER. Mr. Chairman, I yield 2 additional minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Chairman, the problem is that when the cows are operating on God's time and everybody else, all the people other than the farmers, are operating on Government time, we have a conflict between the two, and the farmers find it difficult to adjust their schedules to accommodate this difference in time. That is why they would prefer to keep the times together, if you will.

Mr. STUDDS. So, I was right in my provincial and unknowing assumption that those cows do whatever cows do according to natural time and not according to what time we think it is?

Mr. TAUKE. That is correct.

Mr. STUDDS. So the imposition would not be so much on the cows as it would be on those who milk them?

Mr. TAUKE. That is correct; the imposition would be on those who milk them.

Mr. STUDDS. And those Members who represent those who milk the cows are telling us it is difficult to somehow adjust their schedule for an hour; is that correct?

Mr. TAUKE. That is what I understand. But the key issue is not about that. The key issue is that this arouses substantial emotional opposition in States like my own.

For whatever reason, an attempt to extend this time now for an additional 2 months perhaps will bring us to the point where we will lose daylight saving time completely in a State like my own, and that would, of course, wipe out any energy savings that would be achieved through this legislation.

Mr. STUDDS. Mr. Chairman, if the gentleman will yield further, I think he probably has put his finger on at least the irrational, if not the rational, basis of the emotional nature of the opposition to this proposition.

Let me suggest to the gentleman what happened—and I understand the gentleman was not here at the time—when we first debated this issue in 1973 or 1974. The gentlewoman from Colorado (Mrs. SCHROEDER) received a letter from an especially irate constituent of hers in Denver, and she shared the letter with us at the time. At that time it was the first term of the gentlewoman from Colorado and of this Member, and the gentleman will recall how very particularly anxious we all are in our first terms not to say or do anything that might even possibly offend or irritate or upset any of our constituents, and that is especially true in our first term. We are apt to have a very firm rule in our first term that all correspondence, regardless of whether it appears to be particularly rational or not, must be answered and must be answered promptly.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. TAUKE) has again expired.

Mr. OTTINGER. Mr. Chairman, I yield 1 additional minute to the gentleman from Iowa (Mr. TAUKE).

Mr. STUDDS. Mr. Chairman, if I may proceed and if the gentleman will yield further, he can imagine the quandary of the gentlewoman from Colorado who received a letter to this effect from one of her constituents who was extremely irate and threatening her with those kinds of things that we all are confronted with from time to time.

The lady, who, I believe, was a housewife in Denver, said that she and 75 members of her group "will do all I possibly can to see that this is your last term, as well as your first term, if you support an extension of daylight saving time. My lawn cannot possibly stand 1 more hour of daylight."

The problem, of course, that the gentlewoman was confronted with

was: How do you respond to this without insulting the constituent in question? I think that was based upon the fear that this body might be sufficiently arrogant to try to do something that I do not think the most courageous of our colleagues have ever suggested; namely, to lengthen the number of hours in a day.

Let me suggest as a strong supporter of this legislation that as one examines the actual language, as well as the answers involved, there is every reason in the world, notwithstanding the understandable concern of the cows in question, to support this legislation.

Mr. Chairman, I thank the gentleman for yielding.

Mr. MOORHEAD. Mr. Chairman, I yield 3 minutes to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Chairman, I thank my colleague for yielding, and I rise to ask a question.

The Uniform Time Act of 1966 provided that the eastern part of the State of Indiana would be in an eastern time zone and the western half, or approximately that, would be in the central time zone.

That was not satisfactory to Indiana, and several of our States were affected by that particular 1966 act.

Shortly after that, or a couple of sessions later, we did provide that certain States could exempt themselves, and we redrew the boundaries, including those in Indiana, so that today a region in the western part of Indiana is in the central zone, a few other counties are in the central zone and the rest of Indiana is in the eastern zone. We have exempted these areas and those remaining in the eastern zone from ever going on daylight saving time.

As I understand it, on page 3, section 3, in line 14, it provides that any law in effect, including these amendments, shall not be changed by this act.

My question is this: Is it the intent of this act to continue the exemption of those States where the legislature does not want to go to daylight saving time? Can they exempt themselves?

Mr. MOORHEAD. Mr. Chairman, if the gentleman will yield, this act as it is presently drawn continues the possibility of those objections from those areas that now have them and that want to exercise them to exempt their areas. They could not exempt them for a portion of the daylight saving time; they would have to do it over the entire period that daylight saving time was going to be in effect.

Mr. MYERS. Mr. Chairman, if the gentleman will yield further, they can exempt the entire area from ever being in daylight saving time, but, as the gentleman says, they cannot change the applicable dates?

Mr. MOORHEAD. That is right. They still have to go to the 8 months? It would be entirely too confusing if they ever tried to change those dates. No one would know what time it was in any portion of the State.

Mr. MYERS. If the gentleman had cows, they would not know when they would be milked, or the grass would not know when it would get mowed.

Mr. OTTINGER. Mr. Chairman, if the gentleman will yield, I would like to confirm what the gentleman said, that those States presently opted out are grandfathered in under this legislation, so the States that have opted out in whole or the States where there are two time zones and part of the States has opted out will continue in that status after this legislation, unless they take some other action.

Mr. MYERS. As I understand it, Indiana is in two different zones, and the eastern zone would not have to go on it and the other zone could go on it if they so desired, or they might not; is that correct?

Mr. OTTINGER. That is correct.

Mr. HARTNETT. Mr. Chairman, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from South Carolina.

Mr. HARTNETT. Mr. Chairman, I think what the gentleman was asking was, under the present law States can now exempt themselves if their legislatures vote to do so under the provisions of the daylight saving time provsions; is that correct?

Mr. OTTINGER. That is correct.

Mr. HARTNETT. I believe what the gentleman was asking was, could they vote to exempt themselves for the additional 2 months?

Mr. OTTINGER. No, they could not.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. MYERS) has again expired.

Mr. MOORHEAD. Mr. Chairman, I yield 1 additional minute to the gentleman from Indiana (Mr. MYERS).

Mr. HARTNETT. Mr. Chairman, if the gentleman will yield further, let me ask my next question.

Who is going to wake up the rooster that is going to wake up all the farm hands? The roosters and the chickens are going to sleep long past the time the farm hands should be aroused, and I wonder if we can in this body say who will be the official rooster waker-upper so we can get all the people up. That is what I was wondering.

● Mr. SOLARZ. Mr. Chairman, I rise in opposition to the passage of H.R. 4437, the Energy Conservation Daylight Saving Act.

This legislation would amend the Uniform Time Act so that daylight saving time would be observed for 8 months, from the first Sunday in March to the last Sunday in October. States would be granted the option to exempt themselves from this extended daylight saving time if they so wish, but this measure would still create a hardship for thousands of Americans.

In 1973-75 an emergency extension of daylight saving time was enacted, and thousands of schoolchildren were forced to wait for buses or walk to school in the dark. This created a real safety and health problem, particularly during the cold winter months for these schoolchildren and for other workers who had to leave their homes before sunrise to reach their offices and factories on time.

Finally, extending daylight saving time for the entire month of March would adversely affect thousands of observant Jews who must complete their morning prayers before sunrise. Daylight saving time would mean that some of these Americans would be forced to choose between their religious obligations and their employment. To further explain the impact of this provision on the Jewish community, Mr. Chairman, I include the following letter in today's CONGRESSIONAL RECORD:

AGUDATH ISRAEL OF AMERICA,
New York, N.Y., September 28, 1981.

Hon. RICHARD L. OTTINGER,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN OTTINGER: I want to bring to your attention a serious religious problem that would affect many thousands of Jewish citizens of our nation, as a result of the Daylight Savings Time bill, H.R. 4437, which has already been approved by the House Commerce Committee. I understand that the bill you sponsored would extend daylight savings time from the current 6 months to a proposed 8 months. Although I fully support your motives, I am sure that you would want to take into consideration the freedom of religious practice of a large number of our citizens.

Permit me to spell out clearly how your bill would affect religious Jews. According to Jewish religious law, the earliest time when morning prayers can commence is one hour before sunrise. Reviewing charts issued by the U.S. Naval Observatory, it is apparent that the morning prayers in several cities will be seriously delayed, seriously disrupting the daily schedule of thousands. For example, in Los Angeles on March 2nd, prayers could not commence until 6:21 A.M., which is 22 minutes later than the latest time of the year of January 1st. In Miami, a Jew could not pray until 6:44 A.M., which is 36 minutes later than January 1st. There are smaller time differences in such cities as New York, Baltimore and Cincinnati, but it is clear that almost every large city would be affected.

Since prayers last from 30-50 minutes, the earliest time that a religious Jew can leave from services either for breakfast or to his place of employment in a city like Miami would be somewhere in the vicinity of 7:40 A.M. In our society where most people live almost a half hour to one hour distance from their place of employment, this would create an anomalous situation for the thousands of religious Jews whose employment requires their presence prior to 8:00 or 8:30 A.M.

I want to point out to you that when a measure to extend daylight savings time for the entire year was under consideration in New York State, the bill was withdrawn for similar considerations after we brought to

the attention of the sponsors the religious implications involved.

I do want to note that our study shows that if the bill were to take effect on the third Sunday in March, it would not have any appreciable effect on the schedules of religious Jews. However, if the bill would extend into November, it could create an even worse situation than in March. I hope that you will modify your bill to take into consideration thousands of Orthodox Jews around the country whose lives would be seriously disrupted unless daylight savings time began the third Sunday in March.

I hope that you will be able to modify this bill and thus do away with the anxiety that has been aroused amongst the rabbis and laymen throughout the country who are deeply concerned over the implications of the bill.

All good wishes.

Sincerely,

Rabbi MENACHEM LUBINSKY,
Director of Government and Public Affairs.●

● Mr. WEBER of Minnesota. Mr. Chairman, what we are discussing here today is a basic issue of safety.

Extension of daylight saving time will put thousands of schoolchildren in needless danger. The Sun rises late in the morning in Minnesota during the months of March and April. Many schoolchildren must stand alongside narrow icy country roads, without sidewalks, as early as 7 a.m. waiting for the schoolbus; 1 hour of extra daylight in the morning could make the difference between a child being seen clearly—and that child being struck and killed.

Many of the fathers of those children rise even earlier to milk their dairy cows. By extending daylight saving time, we are not only imperiling their children—we are sentencing them to work an additional hour in the morning without sunlight. Most people who live in cities work indoors and begin their workday hours later than Minnesota farmers. But the farmer often begins his daily chores before 6 a.m., feeding and milking his cows, cleaning his barn and loading hay and silage. An extra hour of daylight would not only save energy and increase work efficiency—it would create a more safe working environment.

Rural America has historically opposed any extension of daylight saving time. It goes beyond the scope of the Federal Government to impose an unwanted change in the daily routine—and the essential safety—of rural Americans.●

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 4437

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Energy Conservation Daylight Saving Act of 1981".

SEC. 2. The Congress hereby finds—

(1) that various studies of governmental and nongovernmental agencies indicate that daylight saving time over an expanded period would produce a signficant energy saving in electrical power consumption;

(2) that daylight saving time may yield energy savings in other areas besides electrical power consumption;

(3) that daylight saving time over an expanded period could serve as an incentive for further energy conservation by individuals, companies, and the various governmental entities at all levels of government, and that such energy conservation efforts could lead to greatly expanded energy savings; and

(4) that the use of daylight saving time over an expanded period could have other beneficial effects on the public interest, including the reduction of crime, improved traffic safety, more daylight outdoor playtime for the children and youth of our Nation, greater utilization of parks and recreation areas, expanded economic opportunity through extension of daylight hours to peak shopping hours and through extension of domestic office hours to periods of greater overlap with the European Economic Community.

SEC. 3. (a) Section 3(a) of the Uniform Time Act of 1966 (15 U.S.C. 260a(a)) is amended by striking out "last Sunday of April" and inserting in lieu thereof "first Sunday of March".

(b) Any law in effect on the date of the enactment of this Act—

(1) adopted pursuant to section 3(a)(2) of the Uniform Time Act of 1966 by a State with parts thereof in more than one time zone, or

(2) adopted pursuant to section 3(a)(1) of such Act by a State that lies entirely within one time zone,

shall be held and considered to remain in effect as the exercise by that State of the exemption permitted by such Act unless that State, by law, provides that such exemption shall not apply.

SEC. 4. Notwithstanding any other law or any regulation issued under any such law, the Federal Communications Commission shall, consistent with any existing treaty or other agreement, make such adjustment by general rules, or by interim action pending such general rules, with respect to hours of operation of daytime standard amplitude modulation broadcast stations, as may be consistent with the public interest, including the public's interest in receiving interference-free service. Such general rules, or interim action, may include variances with respect to operating power and other technical operating characteristics. Subsequent to the adoption of such general rules, they may be varied with respect to particular stations and areas because of the exigencies in each case.

SEC. 5. This Act shall take effect on the date of the enactment of this Act, except that if the date of enactment occurs in any calendar year after March 1, this Act shall take effect on the first day of the following calendar year.

□ 1600

Mr. OTTINGER (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. HARTNETT

Mr. HARTNETT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARTNETT: Page 4, after line 10, by adding a new section to be appropriately numbered. The new section shall read as follows:

Not withstanding any other provisions of law; The provisions of this act shall not apply to South Carolina, Kentucky, or any other state whose governing bodies shall vote to exempt their states from the provisions of this act.

Mr. HARTNETT. Mr. Chairman, I appreciate the deep and abiding interest of this House of Representatives in the welfare of the people of South Carolina and other States of this Nation. But we in South Carolina do not want, nor do we need, 8 months of daylight saving time.

We are very conservation conscious. We cut our lights on very dimly in the early morning hours.

We do a lot of farming. We have schools that are located in rural areas in our State and the State law says any children that live within 1½ miles of the school are not eligible for bus service, they must walk to school. It is going to be awfully dark for many months in South Carolina now, and it is in your States, and States that neighbor South Carolina, and there your young children are going to be walking to school. You have heard all of the arguments, but you have turned a deaf ear to that.

Let me carry you back a few weeks to when we had the discussion on the terrific Voting Rights Act extension and those of you who told me what I needed in South Carolina, and I had to accept what you told me I needed. I needed the provisions of that act to apply to South Carolina, to a portion of this great Nation, not to the entire Nation as a whole.

I am telling you thank you for that and now grant me one more special little privilege, and that is to allow my little, tiny South Carolina to come without the provisions of this act.

We do not mind the 6 months that you so graciously gave us earlier in the last decade. I think you told us then we had to have 6 months of daylight saving time, although I think it ought to run from May 1 to September 1, because that is the good summer months when we do a lot of water skiing and fishing in South Carolina. We are just not interested in sending our babies to school who walk, because our State law requires them to walk, those who live within a mile and one-half of the school along rural roads where there are no sidewalks, where there are deep drainage ditches, and they must walk in the roadway. We are not interested in those young children going to school in the middle of the night.

As I so tongue in cheek asked who was going to wake up the rooster, our

farmers, quite frankly, do not want to be trying to tend their fields in the middle of the night. We enjoy the extra hours of daylight in the good summer months when the temperature is fine and the golf courses are green and the water temperature is just right for bathing. But quite frankly, in March and April, in February, we do not need it, and I do not think New York needs it. I do not think Indiana needs it. I do not think New Hampshire needs it. I know Kansas does not need it. And, God knows, that the tobacco is probably going to burn up from that extra hour of sunshine they are going to get in Kentucky. So it is for sure Kentucky does not need it.

Just last week, look what we did for the farmers and the tobacco farmers especially. Why not do one more thing for the farmer. Do not let his crop burn up.

Just think about how big the mushrooms are going to be with that extra hour of darkness.

We just have to be fair about this thing. It is not that much of a conservation measure. Believe me, believe me, the statistics that were cited here for you—seriously, it is great to be a little humorous because a little nonsense now and then is relished by the best of men—but let us be serious about this. Suppose three school children are lost in South Carolina to traffic accidents. We have 16-year-old schoolbus drivers in South Carolina. We impose a tremendous responsibility upon those young people. They can be 16 years old and drive a schoolbus. It is awfully dark at that hour of the morning on the rural roads of South Carolina.

Let us have a little order, Mr. Chairman. I am just not getting, like Rodney Dangerfield, I am not getting any respect at all. My colleagues just do not know something serious. They think it is the staff that was doing all of the talking, but you do not know something serious when you hear it. I went to the committee room, Mr. Chairman, myself. I hand-wrote this amendment. I borrowed a typewriter. I do not know whose typewriter, but it was a good IBM typewriter, and I typed the amendment myself. I am dead serious about it.

We can carry this thing just a little bit too far. There are no States in this Nation—if South Carolina can enjoy outdoor activities during those 2 months—there are very few other States that cannot, with the exception perhaps of Florida.

I am telling my colleagues that in the interests of the safety of the young children of all of our States, we do not need to send those children to school in the wee hours of the morning when it is pitch black dark. I urge you to show a little compassion, as you did to my great State in imposing upon us the provisions of the Voting Rights Act, and not impose upon us now.

What I am doing here, I would say to the gentleman from Massachusetts (Mr. STUDDS), I am leaving the provisions in here that our State legislature, we can come from under this act now, but if we want to come from under it on daylight saving time, we have to come from under the whole thing. We do not want to do that.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

(By unanimous consent Mr. HARTNETT was allowed to proceed for 5 additional minutes.)

Mr. HARTNETT. What my simple little amendment does is say that my State, and the State of my good colleague, Mr. ROGERS, would be exempt from the 2 additional months, and if any of your States also want to exempt themselves from the 2 additional months, all your State legislatures would have to do would be to act. We are not trying to bring you from under the provisions of the original act where we all enjoy 6 months of daylight saving time.

It is perhaps a conservation measure, although the air-conditioning units and the lights of these buildings are burning day and night, 24 hours a day, 7 days a week. The lights in that office now are burning and nobody is in there. The lights in many of the offices in this building are burning and nobody is in there. If we want to really conserve energy, we should put in the little step that when you walk across that door then you turn out the light switch, the last man out cuts the light out, if you want to conserve energy.

What I am telling my colleagues is that we do not need 2 extra months in the dead of winter to send our children to school along dark, rural roads in South Carolina. This amendment which I have offered, in all good faith, and in all seriousness, says that South Carolina, not Kentucky, would be saddled with the 2 additional months and if your State did not want to be then you could come from under.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Let me say to the gentleman as a cosponsor of the bill I am practically reduced to shame by the gentleman's characterization of its effects. Would the gentleman characterize his amendment as a nullification or an interposition?

Mr. HARTNETT. Does the gentleman mean nullifying the entire act?

Mr. STUDDS. I was being semifacetious to the gentleman's State's history. But the gentleman is confusing the gentleman from Massachusetts, which, as he knows, is not difficult. I have had enough difficulty trying to keep up with the cows. The gentleman has brought in roosters, and then he has brought in mushrooms.

As I understand it, there is another ingredient in addition to darkness which is essential to the healthy growth of mushrooms. Is that not correct?

Mr. HARTNETT. The gentleman is correct. We have a lot of that on the floor of this House also.

Mr. STUDDS. The gentleman has caught exactly the drift of my comments.

Let me also say to the gentleman, if I may, that the schoolchildren about whose safety he expresses concern, in those what would be additional weeks of daylight saving time in the event this bill were adopted, unamended, in March and April, as I understand it, darkness or light rather in the morning would come at precisely the same time in March with these changes as it now does in October in South Carolina as well as in the rest of the Nation. So that we would not be imposing upon the children of South Carolina any changed circumstances than those under which they currently in the fall months go to school.

Mr. HARTNETT. That is correct. Unfortunately, if I had my way, as I mentioned to the gentleman earlier, I would make the daylight saving provisions applicable from May 1 to September 1. As it goes into the last Sunday in October I cannot do anything about that now, but adding 60 more days that those children would have to traverse those roads in the dark, and it is 30 days in which they have to do it now, and there is nothing we can do about that. But my legislation would have to come from completely under this.

□ 1610

But you are adding 60 days under which they must travel to school in the dark, and it is that many more days in which there is an opportunity for an accident to occur.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from Texas.

Mr. KAZEN. Do I understand that the gentleman's amendment makes the 2 additional months discretionary with the States?

Mr. HARTNETT. Yes.

Mr. KAZEN. And that is all that it does?

Mr. HARTNETT. It exempts South Carolina and Kentucky and makes the other States discretionary for the 2 additional months, yes. That is exactly right.

Mr. KAZEN. Does it exempt South Carolina and Kentucky from all of the provisions of the bill?

Mr. HARTNETT. No, sir. From 2 additional months, and it permits any

other State who would like to come from under the 2 additional months to do so.

Mr. KAZEN. Well, I understand the gentleman's amendment now; but I do not understand why he does not treat the rest of us the way he treats those two States.

Mr. HARTNETT. Well, I do treat you that way. I would be happy to add any other States. I did not have a chance to ask around. Any other States that would like to be exempt from the 2-month provision, I would be happy to list them in this amendment and we can amend it further.

Mr. KAZEN. I can understand a bill that would purport to extend for 2 months daylight saving time, with the proviso that it be discretionary with the individual States.

Mr. HARTNETT. But it does not do that, sir. This bill says it is only discretionary to the entire daylight saving time completely, which would be the full 8 months if this bill is adopted. Then the only discretionary power that the legislature would have would be to come from under the entire 8 months or stay under all of it.

Mr. KAZEN. I agree with the gentleman, except he is usurping the power of the State legislature by doing this. You are taking the shortcut and not leaving it up to your legislature.

Mr. HARTNETT. Just in my little old State of South Carolina, but not in all the other 48 States.

Mr. KAZEN. I have got a little old State of Texas, a little bitty place in the South of this country that feels the same way.

Mr. HARTNETT. Yes, sir, but, see, under the provisions of this amendment, sir, your legislature could vote to come from under the 2 additional months, and that is all. I think that is only fair.

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has expired.

(On request of Mr. ROBERTS of Kansas and by unanimous consent, Mr. HARTNETT was allowed to proceed for 2 additional minutes.)

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. Mr. Chairman, I want to compliment my colleague, the gentleman from South Carolina, for his very industrious attempt to introduce and successfully introduce this amendment. I would reply only to my colleague, the gentleman from Massachusetts, there used to be a sportscaster in this town who always qualified for the boo of the week, and I would think, without question, you, sir, have qualified for the boo of the week in this regard.

This is a good amendment. Despite all of the frivolous comments, it does allow my State of Kansas, if it so chooses, by action of the State legislature, to exempt itself from this additional 2 months of daylight saving time. I think this is the proper way to do it, rather than going State by State, in that we do have some areas in Kansas on the eastern side—and, by the way, we do not grow tobacco; it is wheat that the gentleman meant to say, in terms of that extra hour of time—we do have some metropolitan areas where, doubtlessly, they will want this extra 2 months. But that should be a decision that should be made by the State legislature.

I applaud the gentleman's amendment. I stand in favor of it. The gentleman has done a good job.

Mr. HARTNETT. I thank the gentleman. I appreciate that very much.

Mr. NAPIER. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to my good colleague, the outstanding young Congressman from South Carolina.

Mr. NAPIER. I would just like to ask my colleague, if we give discretion to these other States, would the gentleman be willing to modify his amendment and give that same discretion to South Carolina? I think we all ought to be treated the same.

Mr. HARTNETT. Yes, I would be happy to do that if my good colleague, the gentleman from Kentucky, would be agreeable. We could amend my amendment by striking out and just saying that this shall not apply to any States whose governing body shall vote to exempt themselves.

Mr. NAPIER. So we are really making it an issue that the State legislatures can determine?

Mr. HARTNETT. That is correct. The 2 additional months.

Now, I will say to the gentleman from South Carolina, as he knows, I have listed South Carolina and Kentucky in here. I would be happy to strike South Carolina and just let all 50 States determine under the provisions of the bill.

Mr. NAPIER. I think that would be a good idea because I would hate for this body to be making a determination for South Carolina and not making it for the other States. I think we ought to treat them all alike.

Mr. HARTNETT. South Carolina is kind of special, but other than that——

The CHAIRMAN. The time of the gentleman from South Carolina (Mr. HARTNETT) has again expired.

(On request of Mr. GREGG and by unanimous consent, Mr. HARTNETT was allowed to proceed for 2 additional minutes.)

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to my colleague, the gentleman from New Hampshire.

Mr. GREGG. As the gentleman knows, I rose in favor of this bill. I strongly support the bill. But I also think that the gentleman's amendment, if he strikes South Carolina and Kentucky as acceptable and returns to the States rights approach, which I like to see, clearly, it also jeopardizes the uniformity issue. But I believe that if the State desires to make that decision within its own commercial framework, then the State has made that decision and I think that is reasonable.

Mr. HARTNETT. I thank the gentleman for his comment.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to my colleague, the gentleman from Kentucky.

Mr. ROGERS. I will be happy to agree to the proposed amendment striking Kentucky and South Carolina from the language, and I appreciate the gentleman's action.

Mr. HARTNETT. I thank the gentleman for his support.

If I have 1 minute left, I would say to the gentleman from South Carolina and to my colleagues that the new amendment would read this way:

Notwithstanding any other provisions of law; The provisions of this Act shall not apply to any State whose governing bodies shall vote to exempt their States from the provisions of this Act.

I ask unanimous consent to substitute the revised amendment for my original amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. OTTINGER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, while there is a great deal of appeal to allowing the States the flexibility that the gentleman from South Carolina desires and puts forward in this amendment, it would cause havoc in our commerce. You would have plane schedules and train schedules that would be confused, and the communications system and the network programs on the television that would have to be adjusted by jurisdiction. Indeed the act that we are amending here is called the Uniform Time Act and was originally passed so that we could do away with all kinds of different time jurisdictions that were in the country many years ago. Because of our modern-day communications and because of the transportation systems that we have, various airlines having to produce schedules that people can rely on, and so forth, the multiplicity of different times that are possible under this variation would just be too complex.

The administration testified on this. Indeed, Mr. ROGERS, the gentleman from Kentucky, had suggested this in subcommittee but the amendment was defeated because the industrial groups which support this bill would oppose

the amendment, and because the administration, which strongly supports this legislation at the present time, would oppose it if we created that kind of multiplicity of jurisdictions.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, the pending amendment destroys the spirit and intent of the Uniform Time Act. I support the Energy Conservation Daylight Saving Act of 1981. We are all well aware of the potential benefits which this simple 2-month extension of daylight saving time will bring to the Nation. The conservation of electrical energy, the positive effects with respect to traffic safety, and the increased sight and mobility for those afflicted with night blindness are all strong reasons for the passage of this legislation. But as a member of the Judiciary Subcommittee on Crime, my major interest in this bill is its potential to reduce violent crime. A study conducted by the Law Enforcement Assistance Administration on the impact of daylight saving time on the incidence of crime was most instructive. It was done in Washington, D.C., and used property and violent crime statistics which were available for each hour of each day during the period, January 1, 1973, to March 31, 1975. The study revealed consistently less violent crime for daylight saving periods when compared to similar periods of standard time. Specifically, when 28 weeks of standard time were compared with the same weeks of other years when daylight saving was in effect, it was found that violent crime was 10 percent less under daylight saving time. Further, when 2-week periods before and after five daylight saving time periods were combined, it was discovered that violent crime was 13 percent less during the daylight saving time periods.

Mr. Chairman, as a founder of the organization known as National Victims of Crime, I am strongly committed to the reduction of our Nation's tragically high incidence of violent crime. I am certain that all here share that commitment. This bill would have the effect of reducing crime while not imposing any additional burden on the American taxpayer. It is a simple measure which does not create a whole new bureaucracy to execute it. I urge passage of the Energy Conservation Daylight Saving Act of 1981.

Mr. OTTINGER. Mr. Chairman, I would like to make it clear that, as the law now stands, any State may opt out of daylight saving time altogether. So you have that variation.

In those States in which there are multiple time zones, either of the time zones may opt out. They must opt out altogether so that you only have two variations. If you allow these additional variations, then you would have a multiplicity of different time zones all across the United States, some of which added 2 months, some of which did not add the 2 months. It would just create too great a complexity for the transportation and communication industries, in particular, to be able to deal with. For that reason, I cannot support it.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding, and I thank him for qualifying the Uniform Time Act. While it is the Uniform Time Act, States do have the option to opt out, and so there is no reason why State legislatures cannot determine if they want to create a problem with train schedules, or whatever they want, that they had not ought to have that option to determine if they want to go longer.

I think what you are missing, if I could just prevail on my friend for 1 minute, is the concern of the problem that this kind of extension creates in the northern part of the country, where we have got cold weather yet in March and April. So I have to oppose the bill, but I support the amendment. I think it is a good amendment.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to my friend, the gentleman from Texas.

Mr. KAZEN. I can understand the gentleman's position, but the mere fact that the title of the bill has the word "uniform" in there does not mean anything. We can always change that.

Now, as far as changing the time zones in various States, the State of Arizona has never gone to eastern daylight saving time, and yet it has not bothered the television programs, it has not bothered the airline schedules. I think it is a good idea.

Mr. OTTINGER. The gentleman is generally correct. I would like to point out that there was compromise reached in passing the Uniform Time Act, and it was decided that some flexibility ought to be left to the States, so States were allowed to opt out. Indeed two States have, Hawaii and Arizona, and Indiana has opted out in one time zone. But that creates only a very limited number of different time situations within the country that our commercial system has to deal with.

Now, if you start having some States allowing daylight saving time 2 months more and some States not, and parts of some States 2 months more and parts of some States not 2 months more, then you get a whole multiplicity of time zones that the commercial people came in and told us that they could not live with.

□ 1620

Mr. KAZEN. If the gentleman will yield further, we will have the 6-months mandatory. What is wrong with leaving a 2-month discretion?

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

(By unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. KAZEN. If the gentleman will yield further, what the gentleman is telling the States, is you opt out altogether, the whole year, or not at all.

Mr. OTTINGER. That is correct, and the reason we do that is a compromise between the transportation systems and communications systems and other businesses that would like uniformity and giving the States some flexibility. Where the States feel strongly about it, we have provided the States can opt out in whole.

If, however, we provided that parts or all of States could opt out for different periods of time, which is what this amendment asks for, then it creates a great deal of complexity.

Mr. KAZEN. Not parts of States.

Mr. OTTINGER. Parts of States which are in two time zones could opt out for part of the time.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I thank the gentleman for yielding.

I have to ask my colleague though, is not the original time frame for the Uniform Time Act not designed with some consideration of the school schedules that we have been debating here? That is my understanding of the history of this legislation, that that was one of the reasons why that timeframe was established.

If that is the case, it seems to me most reasonable what our colleague from South Carolina has suggested be considered that we now are considering an extension of this time and for the very reasons that we initially established this 6-month period we now should allow an additional reason for States to opt out.

Mr. OTTINGER. Sunrises in March and April school months are the same as those in September and October are, and daylight saving effects are exactly the same.

The reason that I cannot accept the amendment is because it creates just too much complexity for our commercial system in terms of the number of different time zones that would be in effect during those 2 months.

Mr. WEBER of Minnesota. If the gentleman will yield further, I understand fully the complexity.

I understand the complexity the gentleman is talking about. It is a little different for some of us representing rural States, Northern States. The gentleman is talking about nuisances and difficulties. We are talking about serious health hazards.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has again expired.

(At the request of Mr. COATS and by unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. COATS. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Indiana.

Mr. COATS. I thank the gentleman for yielding.

The point has been made over and over in this debate that March and April are the same as September and October. That may be the case in the gentleman's State, but that is not the case in the Northern States, in the Mountain States, in States that have significantly different weather in those months than they do in September and October.

Our schoolchildren face an entirely different set of circumstances in March and April than September and October.

Mr. OTTINGER. I do not disagree with the gentleman and, as I said at the outset, there is some inconvenience to some people who were involved in here. At the same time, there are some additional conveniences to a lot of people like handicapped people. There is a considerable energy savings that is possible. There is a considerable reduction in crime that was in fact demonstrated during those months when we had year-round daylight savings time, and there was a slight overall reduction in traffic accidents.

So, I think that that tradeoff the people are going to have to decide and I understand representing one's people that that inconvenience may indeed be an overriding consideration. I do not think, however, because of the concerns from the people in transportation and communications industries which are big industries in our country, that we can have the multiple time zones and multiple time periods permitted under the amendment.

Mr. COATS. I think the gentleman used the word "inconvenience." I think the better word is the danger. We are trading a barrel of oil for the life of a child. Does the gentleman think this is a very good tradeoff?

Mr. OTTINGER. There was no demonstrated increases in fatalities when we had daylight saving time during March and April. I cannot emphasize that strongly enough.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has again expired.

(At the request of Mr. ROGERS and by unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Kentucky.

Mr. ROGERS. There must a recognition that there are some extremes of the application of the Uniform Time Act. This substitute recognizes that there may be such extremes and allows those States in such extremes to opt out of the additional time.

In the gentleman from New York's home, it gets light 57 minutes before it does in Louisville, Ky., even though they are in the same time zone. Louisville is on the western edge of the time zone and the gentleman's home, of course, is on the eastern side of that zone. At least give us the possibility to opt out of the application of the additional daylight saving time where it would be prejudicial to our children and to the operation of our farming community.

Mr. OTTINGER. As the gentleman knows, I was disposed to want to accept the gentleman's amendment and provide that flexibility in committee. When we inquired into it we found there was a serious commercial disadvantage to a number of cities and industries and that the administration objected to it largely on those grounds. So we felt constrained not to press the issue.

It is a question of compromises here, what makes the most sense overall, and since there would be serious injury to the transportation and communications industries in particular, we felt we should not go along with it.

I understand the basis on which the gentleman does advance it and it would provide more flexibility particularly to situations such as the gentleman described.

Mr. ROGERS. Do I understand the gentleman to say he is agreeing with the substitute that has been offered?

Mr. OTTINGER. No; I said quite clearly that I had to oppose it even though I recognize for conditions like the gentleman's it would provide a great deal of advantage; but it has a tremendous disadvantage to a number of different industries, particularly communications and the transportation industry where they feel this multiplicity of time zones would cause them grave problems.

Mr. MOORHEAD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise with reluctance to oppose the amendment. I certainly would like to accommodate those gentlemen from some of the farm areas who find the additional 2 months inconvenient or find different things wrong with it but the mischief that would be done to the Uniform Time Act if we would allow States to pick and choose among the months which we have daylight saving time would be so great that the cost to American customers would be substantial, the difficulties in our communications and transportation systems would be extremely great, and actually if this amendment were adopted, it would undoubtedly do tremendous damage to the chances of this bill.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentleman for yielding.

I think we have a double-edged sword here. I came here thinking I was going to support this bill, and now I think I am going to oppose the bill, but I think we have to oppose the amendment.

If we accept this amendment we are clearly going to have a checkerboard time zone in America that is going to look like a chess table. If we do not accept the amendment and the bill passes, what is going to happen? I predict that a large number of States are going to opt out of the time zone entirely because it is not that terribly popular. So I would say, leave well enough alone. Let us oppose the amendment and oppose the bill.

Mr. MOORHEAD. That is a decision they can make if they want to opt out altogether. I seriously doubt if very many of them will because the advantages of daylight saving time to the vast majority of the people in this country is tremendous and the advantages of this bill, as drafted with the 2 extra months, is extremely advantageous to the people of this country, the vast majority of them, who want this bill enacted into law.

□ 1630

Mr. HARTNETT. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from South Carolina is recognized for 5 minutes.

There was no objection.

Mr. HARTNETT. Mr. Chairman, now that we have all had our say, as my good friend, the gentleman from Tennessee says, it is time to gourd.

But anyway, we have all had a lot of fun here today, but I think it is pretty obvious from the chairman who has done a good job in defense of this bill that a vast majority of the Members of this body here on the floor would like to give their State legislatures the option to opt out.

I would just say, Mr. Chairman, that this will not be any great loss. The bill is going to pass as we send it out of committee. All States will be covered by the entire 8-month provision,

unless those State legislatures opt to bring them out from under.

We are being consistent with the original act, as my colleague from the Sixth District of Minnesota pointed out. The original act allowed the States to opt from the 6-month provision entirely. This amendment would allow them to opt from the 2-month additional provision.

The bill will be passed as it came out of committee, encompassing all 50 States with 8 months of daylight saving time, unless the legislatures reverse that. The chances of that happening are probably slim; but at least they would have that right.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina (Mr. HARTNETT).

The question was taken; and on a division (demanded by Mr. STANGELAND) there were—ayes 36, noes 18.

RECORDED VOTE

Mr. OTTINGER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 170, noes 242, not voting 21, as follows:

[Roll No. 284]

Burton, John	Jones (NC)	Stark

Mr. MITCHELL of New York and Mr. EVANS of Iowa changed their votes from "aye" to "no."

Mr. GINN and Mr. NELLIGAN changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1650

AMENDMENT OFFERED BY MR. JACOBS

Mr. JACOBS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JACOBS: Page 3, line 3, strike out "(a)" the first place it appears.

Page 3, beginning on line 6, strike out the period and all that follows through line 17 and insert in lieu thereof a comma and the following: "and by striking out "; however, (1)" and all that follows through "lying within any time zone".".

Mr. JACOBS. Mr. Chairman, this amendment will not take very much time. It is the precise reverse of the amendment that was just offered. It would in fact not allow States to opt out of the present law.

Those favoring the daylight saving time approach, those who believe that bad guys usually sleep late and do their dirty work in the early afternoon or in the evening, might want to support this amendment.

My State is divided according to time. In Indianapolis, the city that I represent, we have problems of crime, as is the case with any other metropolitan area. As a matter of fact, our former colleague from Indiana, Mr. Ray Madden, former chairman of the Rules Committee, claims that on one occasion a man walked into the bus station in Indianapolis and asked the ticket salesman, "When does the bus leave for Lebanon?"

The salesman said, "Ten o'clock."

He said, "When does the bus get to Lebanon?"

The salesman said, "Ten o'clock."

So, the man walked away, came back and said, "When did you say that bus leaves for Lebanon?"

The ticket salesman said, "Ten o'clock."

The man said, "When did you say it gets there?"

"Ten o'clock."

So he walked away again, and the salesman said, "Say, do you want to buy a ticket to Lebanon?"

The fellow came back and said, "No, I don't, but would you mind if I stayed around and watched that bus take off?"

There are certain States that are likely to be two-timed. Indiana has been two-timed. If you like daylight saving time, if you believe it ought to be uniform, if you believe no crime occurs in the early morning when the bad guys are sleeping, but occurs in the late afternoon or evening, then

you probably would like this amendment.

Mr. OTTINGER. Mr. Chairman, I rise in opposition to the amendment.

Much as I love and respect my colleague from Indiana, I have to oppose this amendment because it does away with the compromise that produced this legislation. It would eliminate any kind of State option or the option for part of a State. The legislation was put together so that any State that in fact did not want to go along with this could in whole opt out. In fact, two States with special problems have done so, the State of Arizona and the State of Hawaii.

Part of the State of Indiana has done so. Whenever we have these arbitrary lines, we are going to have anomalous situations such as described by the gentleman from Indiana.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would like to know if present law as it presently exists, may States still opt out?

Mr. OTTINGER. A State may still opt out in entirety. This amendment would eliminate that.

Mr. MOORHEAD. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I will be glad to yield, and I would like to say that the gentleman from California has been tremendously helpful in this legislation, in drafting it, in the hearings, and in the presentation of the bill on the floor. I want to personally express my thanks to him.

Mr. MOORHEAD. Mr. Chairman, I also rise in opposition to the amendment. Our law has been working with the opportunity of the States to option out of the whole daylight saving time program if they desire to. Very few have selected that path, but I think to change the law at the present time or to add it to this bill would be working in the wrong direction, and I ask for a "no" vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. JACOBS).

The amendment was rejected.

The CHAIRMAN. Are there further amendments? There being none, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. DANIELSON) having assumed the chair, Mr. PEASE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4437) to promote energy conservation by providing for daylight saving time on an expanded basis and for other purposes, pursuant to House Resolution 236, he reported the bill back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. ROBERTS of Kansas. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 243, noes 165, not voting 25, as follows:

[Roll No. 285]

□ 1710

The Clerk announced the following pairs:

Mr. Alexander with Mr. O'Brien.

Mr. Jones of North Carolina with Mr. Dougherty.

Mr. Long of Maryland with Mr. Kemp.

Mr. Solarz with Mr. Lewis.

Mr. Stark with Mr. McEwen.

Mr. Florio with Mr. Conable.
Mr. Derrick with Mr. Butler.
Mr. Luken with Mr. Lowery of California.
Mr. Beilenson with Mr. Pritchard.
Mr. Dellums with Mr. Bethune.
Mr. Breaux with Mr. Wortley.
Mr. John L. Burton with Mr. Bonker.

Mrs. BOUQUARD, Mr. CHAPPELL, and Mr. NELLIGAN changed their votes from "aye" to "no."

Mrs. SCHNEIDER changed her vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REMOVAL OF NAME OF MEMBER FROM LIST OF COSPONSORS OF H.R. 3364

Mr. AKAKA. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of H.R. 3364.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

1980 ANNUAL REPORT BY SECRETARY OF HEALTH AND HUMAN SERVICES AND 1977, 1978, 1979, AND 1980 ANNUAL REPORTS BY THE SECRETARY OF LABOR ON OCCUPATIONAL SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

In accordance with Section 26 of the Occupational Safety and Health Act of 1970, I transmit herewith the 1980 annual report submitted by the Secretary of Health and Human Services, and the 1977, 1978, 1979, and 1980 annual reports submitted by the Secretary of Labor on occupational safety and health activities during the previous Administration.

RONALD REAGAN.

THE WHITE HOUSE, *October 28, 1981.*

□ 1720

AWACS SALE TO SAUDI ARABIA IS A DARK DAY FOR THE UNITED STATES

(Mr. HARKIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARKIN. Mr. Speaker, today Congress approved the sale of the AWACS, to Saudi Arabia.

I do not believe a more important vote has been taken in this body in this Congress and a vote which I believe holds more dark clouds and more of an ominous threat to the State of Israel than this action of the Congress.

I believe that the State of Israel now will be under siege like it never has been in the past, with the AWACS planes going to Saudi Arabia.

I think this a dark day for us in the United States. It is going to be a very dark day in the history of the State of Israel. I hope, I just hope and pray that we come to our senses in this body in the future and recognize that, when we provide that type of weapons system to unstable governments whose sole purpose has been stated time and time and time again to destroy the State of Israel, we are not only threatening the survival of the State of Israel, we also threaten the survival of our own values and our own security and, indeed, we threaten the survival of democracy throughout the world.

ORDER OF BUSINESS

Mr. GILMAN. Mr. Speaker, under the special orders, I ask unanimous consent to speak prior to the time allotted to the gentleman from Virginia (Mr. BLILEY) and to limit my time to just a brief 2 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

TAKING OUR FRIENDS IN THE NONALINED MOVEMENT AT THEIR WORD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 30 minutes.

Mr. GILMAN. Mr. Speaker, I am privileged, along with Congressman IRELAND of Florida, to serve as a congressional representative to the current United Nations General Assembly and I consider it an honor to represent our country in the important tasks of seeking truth and understanding between all nations.

However, it has been disturbing to observe some nations exploiting the U.N. membership for selfish political gain.

It has been customary for the nations of the so-called nonalined movement to use the opportunity of the U.N. General Assembly sessions to discuss matters of mutual interest. The result of this year's meeting, as spelled out in a nonalined nations communique, was unparalleled in its harshness, onesidedness, and an almost wholly anti-American tone. While many of the 97 nations who supported this effort can hardly be said to be allies or partners of the United States, a large number are in fact at least considered to be friendly and do willingly accept vast amounts of U.S. economic assistance and military assistance.

In response to this all too frequent practice of wholesale slander, our Ambassador to the U.N., Jeane Kirkpatrick, wrote a letter to more than 40 members of the nonalined who had signed this year's communique. In her letter, Ambassador Kirkpatrick expressed her shock that so many of our friends willingly joined in this endeavor. She further sought from them their individual views and reservations about their joint statements in the communique.

It should be noted that this year's nonalined chairmanship is held by Cuba, hardly a nonalined nation. This total lack of objectivity cannot be overlooked. While the United States was singled out for attack some nine times by name and dozens of other times by implication, the Soviet Union's aggression was not once mentioned.

I share the belief of the Ambassador that what the United States says publicly is to be taken seriously. We would under no circumstances sign any document which we did not endorse solely because we were part of a group or bloc. If we are led to believe that the nonalined statement is not to be taken seriously, totally at face value as implied by some signers, then how are we to know what should be taken seriously? If those nations which endorsed that document really intended to do so, then we should act accordingly.

In response to the nonalined action and Ambassador Kirkpatrick's letter, the Senate last week adopted an amendment offered by former U.N. Ambassador, Senator PATRICK MOYNIHAN that fully supports Mrs. Kirkpatrick's concerns by making them into law. The Moynihan amendment would require that in considering U.S. aid to members of the nonalined movement, that their endorsement and/or reservations should be taken into account.

Today, the gentleman from Florida (Mr. IRELAND) and I are joining Senator MOYNIHAN in this effort to support our Ambassador's declaration by introducing a similar resolution in the House. Should the foreign aid bill reach the floor, we will offer the language of this resolution as an amendment to that bill. I urge our colleagues to join us in this endeavor.

For the further information of our colleagues I will insert at this point in the RECORD the text of Ambassador Kirkpatrick's letter, on October 14, 1981, New York Times article entitled "Mrs. Kirkpatrick Asks 40 Nations To Explain Their Anti-U.S. Stand," and a list of those nations receiving the Ambassador's letter. I would also like to direct our colleagues attention to page S11883 of the October 22, 1981, CONGRESSIONAL RECORD for Senator MOYNIHAN's comments and the full text of the nonalined communique.

The material follows:

THE REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE UNITED NATIONS,

October 6, 1981.

YOUR EXCELLENCY: Since coming to New York as the United States Permanent Representative to the United Nations some ten months ago, I have come to appreciate more warmly the positive role of the United Nations, and to greatly value relations between the United States Mission and that of many other Missions here at Turtle Bay.

Because I sincerely value the good relations between our Missions and the strong bilateral ties between our nations, I wish to share with you now my thoughts on a matter of some importance.

Quite frankly, I was startled to find your government associated with the Communique of the Ministers of Foreign Affairs and Heads of Delegation of the Non-Aligned Countries which was issued on September 28, 1981 in New York.

I well realize, Your Excellency, that your country is but one of some one hundred members of the Non-Aligned Movement, and that the Movement itself is a body of divergent nations. Nonetheless, I am startled that you or your government would or could associate yourselves with a document composed of such base lies and malicious attacks upon the good name of the United States.

I can assure you, Your Excellency, that I would never allow the United States to be associated with any document from any group—no matter how large or diverse—that contained such vicious and erroneous language against your country.

The communique has no more claims to being truly non-aligned than does the Permanent Mission of Cuba which issued it. In a year which sees a continuing military occupation of Afghanistan, Kampuchea and Chad—all with the support of the USSR, the non-aligned communique contains no mention of the Soviet Union. Yet it negatively mentions my country—which invades and occupies no one, and undermines no one's independence—nine times by name and dozens of times by implication, making the most absurd and erroneous charges such as:

That the U.S. perpetrated "aggression" against Libya last August, an "aggression" which "constitutes a threat as well as flagrant violence against the sovereignty, independence and territorial integrity on non-aligned countries" and "a threat to international peace and security" (page 13); and

That the U.S. participates in "attempts at destabilizing the Government of Grenada, the exertion of economic and other pressures, destabilizing maneuvers against Nicaragua" (page 17).

These, Your Excellency, are only two of the fabrications and vile attacks against the United States, which fill this 21-page document.

I need not elaborate all the falsehoods, nor need I explain to you the truth on these and other issues. For I believe, Your Excellency, that you know the truth about these matters and that, by and large, our countries share values and principles of basic human decency, national independence, self-determination, and non-aggression.

In fact, Your Excellency, I think that you no more believe these vicious lies than do I and I do not believe they are an accurate reflection of your government's outlook. And yet, what are we to think when your government joins in such charges, for that is what you have done in failing to disassociate yourself from them.

I think you will understand how disturbed I feel about this communique and your government's association with it. If only you imagine how you would react to having friendly nations level such charges against your government.

The fact that the United States is a large and powerful nation does not make us less concerned about our good name or the reliability of our friends.

Convinced that this communique does not represent your views, I would very much appreciate hearing from you about it.

With all good wishes, I am

Sincerely yours,

JEANE J. KIRKPATRICK.

[From the New York Times, Oct. 14, 1981]

MRS. KIRKPATRICK ASKS 40 NATIONS TO EXPLAIN THEIR ANTI-U.S. STAND

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., October 13.—Jeane J. Kirkpatrick, the American delegate, has privately asked 40 nations to explain their support for a document of "base lies and malicious attacks upon the good name of the United States."

The letter, addressed to third-world nations that identify themselves as nonaligned, was sent on Oct. 6, Mrs. Kirkpatrick said. It complained that the "vicious and erroneous language" in a communique issued after a meeting Sept. 28 of foreign ministers and delegation heads from 93 other third-world nations.

Mrs. Kirkpatrick also says that many of those to whom she wrote have responded favorably. She would not name them, on the ground that "it would be inappropriate."

WHAT ARE WE TO THINK?

Diplomats here could not recall a letter to match the tone of Mrs. Kirkpatrick's. "Your Excellency, I think you no more believe these vicious lies that I do," she wrote, "and I do not believe they are an accurate reflection of your Government's outlook. And yet what are we to think when your Government joins in such charges, for that is what you have done in failing to disassociate yourself from them."

Mrs. Kirkpatrick concluded by telling the mission chiefs, "I would very much appreciate hearing from you about it."

Several delegates to the meeting have commented in private that the communiqué, a 21-page summary of the state of the world, was one-sidedly anti-American. Some attributed this to the chairmanship of Cuba's Foreign Minister, Isidoro Malmierca. Egypt and Pakistan succeeded in changing language they considered too harsh on the United States.

Other delegates said because of third-world opposition to the Reagan administration's growing ties to South Africa and its proposed "strategic alliance" with Israel, there had been no disposition to challenge passages assailing the United States.

The third-world bloc does not vote on such documents. It approves them by consensus, which means that any passage can be stricken on the objection of one member.

Members of the third-world group range from close allies of the Soviet Union, like Ethiopia, Afghanistan and Vietnam, to staunch friends of the United States, like Singapore, Somalia and Egypt. Most of the 93 nations, however, swing between the United States and the Soviet Union, depending on the issue being discussed.

Mrs. Kirkpatrick said she chose the 40 recipients of her letter on the basis of personal contact that she or a senior American official had had with the foreign missions. In effect, she chose missions regarded as friendly to the United States.

Mrs. Kirkpatrick said today that she had received 15 replies and all of them accepted her thesis. Delegates from nine nations, she said, told her, "We don't believe it," meaning that they do not accept the attacks on the United States, Three others said they were not present at the meeting, and three showed her letters they had sent, disassociating themselves from the document. She added that she expected further favorable replies.

A random check of some missions turned up a cooler response. Yusufu Maitima Sule of Nigeria said that his government was studying the letter and that "there will be no rush to reply." Ghassan Tueni of Lebanon said he had spoken with Mrs. Kirkpatrick personally and told her he did not agree with her letter.

"I told her," he said, "that if she wanted more than polemics, she should abandon the epistolary style and meet with some of us."

This was an allusion to Mrs. Kirkpatrick's recent absences from the United Nations.

In her letter, Mrs. Kirkpatrick contended that the communiqué "has no more claims to being truly nonaligned than does the Permanent Mission of Cuba, which issued it."

She singled out two examples of what she called "absurd and erroneous charges" and "fabrications and vile attacks." One was the document's assertion that the United States had committed aggression when the Navy in August shot down over the Gulf of Sidra off the Libyan coast two Libyan planes that Washington had said fired first. The other instance was the communiqué's claim that the United States was trying to "destabilize" Grenada and Nicaragua.

NO CRITICISM OF RUSSIANS

Mrs. Kirkpatrick was indignant over the absence of criticism of the Soviet Union in the communiqué "in a year which sees a continuing military occupation of Afghanistan, Cambodia and Chad."

About 85,000 Soviet troops remain in Afghanistan. Cambodia is governed by a regime installed by Vietnam, a country closely tied to the Soviet Union. Libya, also pro-Soviet, has stationed troops in Chad since last December.

The letter was sent to the following members:

Meguid—Arab Republic of Egypt.
Zentar—Kingdom of Morocco.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from New York.

Mr. BIAGGI. I thank the gentleman for yielding, and I commend him for the resolution. Mr. Speaker, I associate myself with his remarks.

Mr. GILMAN. I thank the gentleman for his support.

FINANCIAL CRISIS CONFRONTING SOCIAL SECURITY SYSTEM IS CHALLENGE TO CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. BLILEY) is recognized for 60 minutes.

GENERAL LEAVE

Mr. BLILEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore (Mr. RAHALL). Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. BLILEY. Mr. Speaker, solving the financial crisis confronting the social security system is perhaps the greatest challenge confronting this Congress. Social security taxes are already too high, and they are scheduled to go even higher. Yet revenues remain insufficient to meet current benefit obligations. Every minute of every day, the social security system trust funds are losing $12,300. Something must be done. It is up to us to do it, and to do it together.

I think you can understand my disappointment when a constituent expressed his anger to me at having received this letter. Harmless enough on the outside, packaged in a brown, official looking envelope, proclaiming, "Important: social security notice enclosed." Upon opening the letter, my constituent found himself the lucky recipient of a Democratic National Committee fundraising letter. This letter purported to describe the true dilemma of the social security system, and the authoritative solution to the financing problem.

He was told that unless he acted quickly "social security benefits could be drastically reduced or destroyed." And that "the President and his hatchetman, David Stockman," thought of social security as charity. He was told that the Republican Party was out to destroy social security, and that Ronald Reagan had shown his true colors and was out to gut social security.

But alas, there is a solution the letter claims. If only the Democratic National Committee can raise an extra $50 million—social security can be saved. How is the Democratic National Committee going to save social security with $50 million? By my calculations, that would make up the system's deficit for fewer than 3 full days. Hardly a long-term solution to the trust funds' financial problem.

Mr. Speaker, my constituent is disgusted and I am disgusted. Disgusted to think that any Member of this House would sanction the use of his signature on this kind of scurrilous fabrication. Yes, outright fabrication. The social security system is in trouble. There is no question about that. But $50 million in the Democratic National Committee coffers is hardly a solution. In fact, if we look at the record there is good reason to believe that another $50 million in the Democratic National Committee treasury might even make a bad situation worse.

Before we point fingers and scream wildly that the President and the Republican Party are out to destroy social security, it would be good for us all, particularly those on the other side of the aisle, to focus on how we got into this mess in the first place. Let us take a good hard look at the bankrupt economic policies that have been fostered under the liberal leadership of the Democratic Party in the Congress over the past 25 years. Let us remember who has been running the show. The American people have a right to know that it is the same liberal democratic leadership which brought our economy to its knees, that threatens to bankrupt our social security system through this kind of irresponsible action.

Mr. Speaker, it is the obligation of this Congress to the retired men and women who depend on social security for survival, and to the working men and women of America who support the system with their payroll taxes, to find and to enact a permanent solution to the social security system's funding crises.

All alternatives should be examined fully. However, Congress should not enact any legislation that creates an additional hardship for those senior citizens who depend on social security as their primary means of support. Furthermore, the Congress should not enact legislation that will jeopardize those who have already based their plans for the near future on the benefits available under the current retirement system.

I am convinced that working together we can find a bipartisan solution to the social security funding crisis. Together, we can make social security better meet the needs of the elderly and the disabled—those whom social security was originally designed to serve. At the same time, we can restore to social security a measure of fiscal certainty which older Americans deserve and have a right to expect.

Mr. Speaker, I hope that you, and Members on your side of the aisle, will demonstrate your commitment to reaching a bipartisan, permanent solution to the social security funding crisis. Scurrilous, petty, and downright false statements like those contained in this letter will not provide the answers we need to solve the social security system's illness. Pleas for contributions to the Democratic National Committee treasury will do nothing to galvanize the social security trust funds. And I trust that the necessary steps will be taken to stop the circulation of this piece of chicanery.

Let us work together. That is what the American people need, that is what they want, and that is what they deserve.

□ 1730

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Mr. Speaker, I wish to commend my colleague from Virginia (Mr. BLILEY)

for offering this special order so that the record may be set straight in regard to the social security issue.

Over the past several months there have been many misleading claims and statements about this system which have unnecessarily confused and angered citizens across the Nation. The promoters of this fear and alarm have one goal in mind: The advancement of their political careers and party at all costs.

Twenty-eight years of Democrat-controlled Congresses have brought the social security system into disrepair. The fact is that social security's financial problems are not new. These problems did not happen overnight; we have known about them for some time now. In every year since 1975, social security costs have exceeded revenues. And in the long term, it has been calculated that social security will owe $1.6 trillion more in benefits than it will be able to pay over the next 75 years. Yet from recent bumper stickers which urge one to "Save Social Security, Vote Democratic," one would be inclined to believe that the Democrats would be the saviors of the system rather than the instigators of many of its problems.

Unfortunately, this same type of political double-talk continues. I was quite frankly disgusted upon reading the contents of the letter circulated by the Democratic National Committee which solicits compaign contributions by claiming that the Republican Party has turned their backs on social security beneficiaries. Nothing could be further from the truth. It is apparent, from the misleading nature of this letter and from the many falsities in it, that the Democrat Party wants to play politics with social security—even at the expense of the 35.6 million social security beneficiaries and the 115 million American workers paying taxes to the-system. Mr. Speaker, the Democratic National Committee uncovers the true intentions of the Democrat Party in regard to the social security system.

For the sake of the system and its beneficiaries, allow me to cite some of the falsities from this letter in order that the true record may be known.

The intended deception of the Democratic Committee letter is immediately revealed on the envelope, which resembles an offical social security acknowledgment. It reads: "Important Social Security Notice Enclosed." Instead of finding a notice pertaining to benefits, the recipients of the letter are confronted with a solicitation for political contributions to the Democratic National Committee.

This is only the beginning of the deception. The very first sentence of the letter states:

> Social Security is no longer secure. Unless you and I act—and act immediately—Social Security benefits could be drastically reduced or destroyed.

A few paragraphs down, the letter adds:

> The Democratic Party has set as its number one priority the goal of saving the Social Security system.

I only wish the Democrats would make it their No. 1 priority, but this is not apparent in Congress. The truth of the matter is that the Democrat leadersip does not want to enact legislation to save the system. The Speaker of the House told the chairman of the Subcommittee on Social Security not to hold any more comprehensive meetings on a bill to reform the system, except for interfund borrowing. This is after Chairman J. J. PICKLE, in a very responsible and bipartisan manner, had been moving our subcommittee since June 23 to mark up legislation which would remedy the insolvency of the system. By tying Chairman PICKLE's hands, the Speaker has literally brought to a halt the House's deliberative process on social security reform. How contradictory it is for the chairman of the Committee on Aging to call for "immediate action," while the Speaker of the House prevents the subcommittee from proceeding with its work. Talk about chutzpah. The Democrats are in the process of reestablishing the meaning of this word.

One of the main reasons "social security is no longer secure" is that the Democrat-controlled Congresses have added many benefits through the years without giving thorough consideration to the proper financing of these increases. In 30 years, benefits have been adjusted upward by 699 percent. In fact, since 1940, the first year that social security benefits were issued, Congress has enacted more than 23 separate benefit increases. The profligacy of the Democrat-controlled Congresses has overridden the original intent of the program without properly changing the finance structure of the system to pay for their benefit expansions. And this reckless management accounts for a large part of the reason why the system is in such trouble now.

Another sentence of the Democratic Committee letter states:

> Over the years it has been the Democratic Party which has enhanced Social Security in the belief that a strong Social Security system is essential for a free society, a growing economy, and a stable nation.

This so-called enhancement was done by the same party that enacted the largest peacetime tax increase in the history of our Nation. As the record clearly shows, it was these Democrat tax increases in the social security amendments of 1977 about which President Jimmy Carter proclaimed:

> [They] will guarantee that from 1980 to the year 2030, the social security funds will be sound.

It is this same legislation, enacted by the Democrat Party, which will increase the maximum social security tax next year by almost 10 percent, to $2,170.80 per employee. I do not call that an enhancement to the system.

The so-called campaign to save social security outlined in the Democratic Committee letter consists of a battle plan to insure the Democrats' election and to guarantee the solvency of—not the social security system—but the Democratic national political fund.

Their battle plan does not address or discuss any of the system's problems, or for that matter, any real solutions. We know what the problems of the system are, and we have many alternative proposals from which to choose, as contained in packages presented in both the House Social Security Subcommittee and the Senate Finance Committee. All we need is decisive action to enact specific legislation. This letter does not discuss any of these alternatives; it only addresses the need to increase the Democrats' campaign chest. Those who actually send contributions to the Democratic National Committee will only insure the safety of Democrat seats. But I must ask: If the Democrats are not ready to make the hard decisions now, what insures that they will be able to after their reelection? If they refuse to act now, how will beneficiaries be any better off after the 1982 elections?

The letter ends by exposing the real motive behind it: asking for an emergency—political—contribution. And so, without really addressing the problems the system faces, by misrepresenting the facts, and by hiding behind many falsities, the Democrates' letter concludes:

> Because you care about your community, the society you live in, and your own future, I hope you will help us in the Campaign To Save Social Security.
>
> Your emergency contribution of $15, $25, $100, or whatever you can afford will help launch this campaign.

If the Democrats really cared, they would now be marking up reform legislation to save the system.

Democrats can see the political opportunity in this issue, and want to take advantage of it. But this is one concern which we must undertake on a bipartisan basis and with which we cannot play politics. The reality of the situation is that the social security trust funds remain in a very precarious state. For the sake of the 35.6 million present beneficiaries as well as for future beneficiaries, it is of the utmost importance that we, as elected Representatives, proceed with great care in the matter of consideration of restoring the financial solvency of the social security system.

In the political arena we cannot lose sight of the main objective: to save the social security system. I urge that my Democrat colleagues stop their politi-

cal doubletalk and join us in a constructive, bipartisan legislative action.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

I am also very pleased that the gentleman would bring this subject to the attention of the entire membership of the House. As one who represents a district who has a large number of senior citizens in it. By census data my hometown of Long Beach evidently has the largest percentage of senior citizens of any city of its size in the country.

I have one community of 10,000 people, approximately, where the average age is 75 and every third person is 83 or above.

I have tried to maintain contacts with that community, and certainly discussed with them over the past several months the problems we have with social security. And I can tell the gentleman that they were very upset to see a letter such as this circulating.

Mr. Speaker, as one who certainly is not a newcomer to politics and political technique, I have seen a large number, as I am sure many of us have, of political tactics utilized over the years. Some have been forthright and honest, some have tended to stretch the truth a little here and there, and some techniques have dealt almost exclusively with half-truths.

But never do I think I have seen a technique so questionable and downright cruel as this recent fundraising letter sent out to thousands of social security recipients soliciting funds for the Democratic National Committee.

The message is, as the gentleman in the well pointed out, eeceptive from the very outside envelope to the last sentence pleading for money. The outside envelope proclaims an official looking print that the letter is "Important Social Security Notice Enclosed," an obscure Washington, D.C., address is posted, leaving the casual observer to believe that the letter is an official communication from the Government.

Inside the appeal employs a basic manner of hyperbole and appeals to fear. The Director of the Office of Management and Budget, our former colleague from Michigan, is called a hatchetman. Members of the minority party are referred to as those ultra-Conservatives and wealthy businessmen; those who are working to alter the system as a means of staving off insolvency are said to be out to "destroy the social security system while at the same time lining the pockets of big corporations and giving blank checks to defense contractors."

Well, Mr. Speaker, the members of the very party who were making these wild accusations are those who told us in 1977 that if we accepted the largest peacetime tax in the history of the American people, that we would somehow solve the difficulties with the social security system.

As a matter of fact, when we had one of those people from the previous administration before our Committee on Aging, who was lambasting what the administration was suggesting, I asked him, "Were you one of the people who suggested that with the increase in 1977 we would save the system for 30 years?"

He said, "Well, not really." He said, "I was saying we would save the system until the year 2030."

Four years later those people, who asked for our trust and the trust of the American people in solving the problem, are telling us now that what the President is trying to do is destroy the system, and one party, one party will save it and make it a partisan issue.

Unfortunately, the signer of this terrible appeal for cash is a most distinguished member of the Committee on Aging.

The SPEAKER pro tempore (Mr. RAHALL). The Chair would advise the gentleman to confine his remarks to parliamentary and legislative issues and not refer to Members of the body individually.

Mr. LUNGREN. I refer to a most distinguished member of the Committee on Aging.

Let me suggest that when the question was asked during our Committee on Aging hearings about what the option would be, other than what the administration has suggested, it was suggested that a bill that has emanated from the leadership of the Aging Committee would be the answer. What is that? That is to take money from the general revenues of the Federal Government for the next 5 years. It has been calculated that will cost between $82 and $157 billion.

Now I would ask the leadership on the other side of the aisle, who are telling the American people of social security age that they have the solution to the problem, where are they going to get this money? Are they going to take it out of other social programs? Are they going to take it out of defense?

Maybe they are going to raise taxes by $157 billion for the next 5 years? Or maybe they are suggesting we can stand an additional deficit of $157 billion for the next 5 years.

The present changes in the social security structure represents suggestions for badly needed adjustments if we are going to save the system.

Nowhere in the letter that we are talking about that talks about what we are attempting to do here in the House, and in the Senate, and in the White House, is there a criticism of what the President has suggested, merely more and more rhetoric.

Some may consider a letter such as this to be sheer demaguery. All I know is that it is a terrible letter. From the first aspersion it casts on members of a single party, to the minuscule 2-point trim, which identifies or perhaps I should say seeks to obscure the source of the "Important Social Security Notice" as the Democratic National Committee.

I would just suggest that a couple of years ago in the Aging Committee we were concerned with the problem of deceptive tactics utilized by insurance companies making sales of insurance to senior citizens.

□ 1740

We were so concerned about the use of fine print, we even suggested that the law require a certain type of print to be utilized. I would say that anyone who has taken a look at this letter can see that the print that is utilized here to identify the Democratic National Committee is the same minuscule print that we suggested was deceptive when insurance companies used that, when it was being directed at senior citizens.

Mr. Speaker, I would suggest that I have my remarks today printed in that same type and was going to ask that they be printed in the RECORD in that same type, but I have been instructed that we do not have print that small to appear in the CONGRESSIONAL RECORD and that someone would need a microscope to look at it.

Now, why is it deceptive when an insurance company uses that kind of type to try to put something over on the senior citizens of America, but a distinguished political party of this Republic to which many people have given their time and their effort over the years can utilize that same print to obscure where the message came from to the senior citizens of this country. As one who is very concerned about the senior citizens of this country, as one who is extremely concerned, but we in this House have done the damage to the system, Democrats and Republicans alike, in allowing the system to get into the position it is now, as one who believes that we should not play on the fears of the senior citizens of America all I can say is I would hope that the Democratic National Committee and the Democratic Members of this House would ask that this letter be taken back, would apologize for this letter and would suggest to the senior citizens that it was not their intent to make this a partisan issue, that they want to accept the President's challenge to join in establishing a 15-member panel to come up with recommendations to solve these problems so that in fact it will not be a partisan issue. It ought not to be. We need Democracts and Republicans to solve this issue.

If we are going to stand here on this floor and take pot shots at one another from a partisan viewpoint, we will never solve the social security problem.

It is an issue that I have had Republicans say to me, "Let's put it over. Let's put it off 3 years."

One Member of the House said to me, "Let's put it off 10 years."

My response to that was that if we feel that fearful of attempting to deal with an issue that is of prime importance, we ought not to be in this House. I do not care whether you are a Democrat or a Republican. If you do not have the guts to deal with the issue when we have a problem, you should not be here. We should not make it a partisan issue.

I am frankly upset and concerned and even mortified that a partisan effort would be made on this issue which is of such importance at a time when we have a distinguished Member of the Democratic Party, the gentleman from Texas (Mr. PICKLE) as chairman of the subcommittee dealing with this problem attempting to bring us a solution here and sometimes it appears that restraints are being placed on him so that we may not be able to work the will of the American people.

I thank the gentleman for this opportunity to speak and I commend the gentleman for bringing it to the attention of the House.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I would be happy to yield to my colleague, the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, I thank the gentleman for yielding and I congratulate him for bringing this outrageous situation to the attention of the House.

Mr. Speaker, I too have received several complaints from my constituents regarding a mailing they recently received from the Democratic National Committee which was labeled "Important, Social Security Notice Enclosed."

The notice was, in fact, a campaign solicitation from the Democratic National Committee, a solicitation which I understand was characterized by the well-known national columnist Mr. Dave Broder of the Washington Post as the most deceptive political solicitation letter he had ever seen—a solicitation which abused the name of one of our distinguished colleagues—a solicitation which declared that the election of conservative candidates in this Nation would mean the end of social security and that the election of Democratic liberal candidates will save the social security system.

Mr. Speaker, I am a Republican. I am also moderately conservative. But I will take a backseat to no one in my dedication to preserving the social security system for qualified and deserving beneficiaries.

What concerns me about this particular letter, even more than its distortions, even more than its blatant partisanship, is the way it preys on the fears of the hundreds of thousands of retirees in this Nation who depend each month on the social security system.

This Congress and this administration are not about to leave the Nation's retirees to face the skyrocketing living costs, living costs caused by previous Democratic administrations and previous Democratic Congresses, without taking those actions which are necessary to protect social security recipients, actions which will not penalize those persons currently receiving monthly social security checks.

I might add that I am not only disappointed that the liberal Democrats would misuse and abuse the great name of our respected colleague by attaching it to this outrageous piece of correspondence, but I am sincerely troubled that those who claimed only 2 years ago when they adopted the largest tax increase in history that they had reformed social security to make it financially secure until 1990 would now try to turn additional attempts to save the social security system to partisan advantage.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I would be happy to yield to the distinguished gentleman from Mississippi.

Mr. LOTT. Mr. Speaker, I would like to first of all commend the gentleman from Virginia for giving us this opportunity to comment on this very important issue.

Mr. Speaker, I am sure many people were surprised recently to receive a social security check in the mail. Or at least it looked like a check. So imagine the shock when they opened the envelope and found that it was not an official communique but a political fundraising device accusing Republicans of an effort to destroy the social security system. The rhetoric of that letter is no more truthful a representation of the situation than is the cartoon showing the Speaker cinching a saddle on an elderly woman in order to ride the political issue of social security to election gains.

I know the Speaker and the Democrats do not intend simply to use the social security issue for political purposes at the expense of the fiscal integrity of the system. And the chairman of the Aging Committee does not believe Republicans want to destroy social security either.

It is time for a cease-fire. The President offered the olive branch in his September 24 speech. He implored all parties to stop the political rhetoric and to work to find a bipartisan solution to the serious funding problems faced by social security.

Estimates differ slightly but all agree that by 1984 at the latest, one of the social security funds will be bankrupt and the others will be nearly insolvent. This is a crisis and to use it as a political football for partisan politics only further endangers the system. I only ask the chairman of the Committee on Aging to use his great knowledge and influence to help solve the social security financing problems.

As a model, I suggest the chairman of the Social Security Subcommittee, JAKE PICKLE. Chairman PICKLE has all along stated that the system is in deep trouble. I have disagreed with some of his specific proposals, but never with his determination to face the problem. He has said that we cannot walk away from this problem. We can only save the social security system by facing and answering the tough questions. Let us not make it more difficult to solve this problem by crassly using our senior citizens for personal political gain.

Mr. RITTER. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I would be happy to yield to the gentleman from Pennsylvania.

Mr. RITTER. Mr. Speaker, I would also like to commend the gentleman from Virginia for bringing this issue to the floor of the House and to the attention of the American people.

I think what we have witnessed here is one of the lower acts to be performed by one of the two major political parties in a very, very long time. I think it is a question of abuse. I think it is a question of abusing one of the most distinguished Members in the House and his name for gross partisan activity and a distortion of reality and a distortion of the truth hardly equaled in recent years.

I say that I personally am very disappointed in that the Democratic National Committee would so abuse the name of one of our most distinguished Members.

I have been sitting here listening to this debate and I have been asking myself why at this time such an abuse of common courtesy, decency, and political honor?

□ 1750

I have come up with this response, and it seems perhaps the only logical response: That the Democratic National Committee is so devoid of ideas, it is so devoid of an alternative program to that which is being proposed by Democrats as well as Republicans that it has taken to the streets and has taken to a kind of firebombing in the late hours of the night in desperation.

Their own intellectual bankruptcy has led them to this desperate attempt to defraud the good will and the fears of our senior citizens.

That is the only explanation I can come up with.

Mr. Speaker, I thank the gentleman from Virginia for yielding.

● Mr. HUNTER. Mr. Speaker, I wish to join Congressman BLILEY and my other colleagues in the House of Representatives who abhor the use of the current social security dilemma for purely partisan political purposes.

The social security program is in trouble. A recent report by the House Republican Research Committee stated that, even under optimistic economic assumptions, the old-age and survivors insurance fund, the largest of the social security trust funds, will have depleted its reserves as early as the fall of 1982. This means that unless the Congress takes some immediate action to correct the situation we will be unable to pay timely benefits to over 32 million people in less than a year.

The importance of the social security program cannot be underestimated. In talking with hundreds of senior citizens throughout my district in San Diego, I have come to realize that social security payments are an economic mainstay for many over 65, and, in fact, constitute at least 50 percent of the total income for two out of three persons in this age group. These retired workers paid into the social security fund with the full expectation that they would be covered during their retirement years.

Current workers have similarly paid into the fund with the expectation that they will receive their well-deserved benefits when they become eligible.

We have an obligation to put the social security program back on a firm footing and to preserve the benefits on which so many have planned. I am personally committed to seeing that we do just that.

The only way that we can solve this problem is by working together. The Congress cannot afford to let this opportunity to save the social security system go by while we squabble among ourselves. It seems to me that some issues, especially social security, should be above partisan politics. In their partisan sniping, the Democrats will only be hurting the social security recipients.

We all want the same thing: A solvent social security system which provides a benefit package adequate to meet the needs of the recipients. We can achieve this by working together.

Let us unite and see this done.●

● Mr. EDWARDS of Oklahoma. Mr. Speaker, right now, more than 35 million Americans are receiving social security payments. One in every two Americans are contributing to that system with the expectation of receiving the benefits that will have been earned over a lifetime of work.

Unfortunately, those expectations will be destroyed unless Congress can effect some changes in the system that will restore its solvency, and more importantly, provide the benefits which have been promised to all who have worked so hard to earn them.

The system is in a state of crisis. That crisis has been precipitated by a number of changes that have occurred over the lifetime of the system, since 1956, basic benefits have been enlarged to include disability pensions, survivor benefits, and student benefits. In addition, the benefit level was indexed to the CPI in 1972.

No one would argue that any of these changes are intrinsically bad. But it is clear that these changes, coupled with the changing demographics of this country have strained the system far beyond its original design.

In 1950, the system has 12 years worth of benefits in present, at 1950 level of payments. In 1980, that reserve level had dropped to 3 months, and is still dropping. If the level of reserves dips below 1 month, there will be no social security checks forthcoming to the millions who have earned them and depend on them for survival.

The system was never designed to cope with an economy that would suffer prolonged periods of both inflation and unemployment. Since over 90 percent of the income, and therefore outgo, of the system is geared to current payroll taxes, and, since the benefits are geared to the CPI, a high inflationary and high unemployment economy produce a near fatal result.

Mr. Speaker, as deeply concerned as I am over the fate of the social security system, I am more concerned over the actions of the members of the Democratic Party who have tried to use the crisis for political gain.

The Democratic National Committee recently sent a fundraising letter out which was disguised as an official announcement concerning social security, that letter attacked the administration as being opposed to social security and aiming at its destruction.

That letter represented fear-mongering at its worst, there are millions of people in this country for whom a brown envelope bearing the words "Social Security" represents not only a lifetime work, but their only source of income. To send a fundraising letter in the guise of an official notice and to scare people into contributing to a political party is a tactic more in line with a loan shark than a responsible political party.

Mr. Speaker, as I have already stated, the social security system was never designed to cope with an inflationary economy suffering from high unemployment. It is your party, Mr. Speaker, that has controlled a Congress for 25 years that has run our economy into the ground. We have had a never ending string of deficits and rising taxes. It is your party that has helped precipitate the crisis in the social security system. And your response to this crisis is to point an accusing finger and blame anyone but yourself.

The President had called for a bipartisan effort to solve this problem. I call on you, Mr. Speaker, and members of your party, to stop playing with lives of millions of people who depend on social security and join us in a serious effort to insure that the promises made to the American people will be honored.●

F-16 SALE TO PAKISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

● Mr. BINGHAM. Mr. Speaker the package of security assistance for Pakistan proposed by the administration poses for me, and I am sure other Members of the Congress, an unfortunate dilemma.

Chairman ZABLOCKI and I were perhaps the first to endorse the idea of taking the initiative to revitalize our relations with Pakistan and restore security assistance after the Soviet invasion of Afghanistan. On January 3, 1980, the chairman of the Foreign Affairs Committee and I proposed an arms aid package, expressing our view that it is "important to world stability as a whole that the United States take steps now to help a friendly nation improve its ability to withstand the new and dramatically magnified threat of Soviet aggression which it now faces," and that such a package would "work in the interest of our nonproliferation policy as well" by reducing Pakistan's perception that it might need nuclear arms to defend itself. I remain committed to those views. Indeed, in recent weeks I have been working on a revised version of the Symington and Glenn amendments that would clear the way for resuming security assistance to Pakistan, and I am prepared to support such a measure.

Unfortunately, however, the administration has made the sale of 40 F-16 aircraft the centerpiece of the proposed security assistance package for Pakistan. This is a highly sophisticated and expensive weapon system that would, in my view, destabilize the political-military situation in south Asia, inviting new threats to Pakistan's security that would more than offset the system's usefulness as a deterrent to the Soviets. Furthermore, it is a weapons system that is not particularly well suited to the limited types of Soviet border incursions Pakistan is most likely to have to counter.

I would be less concerned about providing F-16's to Pakistan if I could not so easily visualize it becoming the new

test and penultimate standard of U.S. friendship for dozens of nations around the world that may be even less able to afford the F-16, and have even less need for it, than Pakistan. But that is just what I visualize. Provision of the F-16 to Pakistan, largely as a symbol of our commitment to them, will encourage Venezuela and other nations around the world to demand the same symbolism. This is likely to help them regardless of the danger to regional military stability, elevating local arms races to signficant new levels of intensity and expense, and putting the United States again in the dubious position of catering to appetites for excessive military hardware.

Our new security relationship with Pakistan must be based on mutuality of interests, and it concerns me that Pakistani leaders are so adamantly seeking to satisfy what they perceive to be their own need for this aircraft with so little appreciation for the broader implications of such a sale for U.S. foreign policy.

Mr. Speaker, there are many advantages to the United States of a close and lasting security relationship with Pakistan, based upon the bilateral security agreement we signed with that country in 1959. Not the least of those benefits is what I consider to be a greatly reduced likelihood of Pakistan proceeding to manufacture and test a nuclear device. I would hate to see this relationship founder on the question of 40 F-16's. However, I believe members of the Foreign Affairs Committee should have an opportunity to examine closely that particular aspect of the administration proposal and take a stand on it.

With that in mind, and with the hope that it will be possible to go forward with a mutually acceptable security assistance package for Pakistan that will be the beginning and foundation of a reliable and friendly relationship with that country, I am today introducing a resolution pursuant to section 36(b) of the Arms Export Control Act disapproving the sale of F-16 aircraft to Pakistan. I expect also to join shortly with other members of the Foreign Affairs Committee in introducing a bill that would authorize a first installment of $100 million in economic assistance to Pakistan. This latter proposal will also strengthen in several respects the long-standing policy of the United States of suspending foreign assistance to any country that takes steps to develop a nuclear weapon, but will permit the President to waive suspensions subject to congressional veto. Such a waiver could be used to resume security assistance to Pakistan.●

HOUSE ADMINISTRATION TO BEGIN CONSIDERING FUNDING REQUESTS FOR 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 10 minutes.

● Mr. FRENZEL. Mr. Speaker, 3 months from now, the Subcommittee on Accounts of the Committee on House Administration is expected to begin considering the standing and select committee funding requests for 1982.

In the early days of this 97th Congress, funding resolutions generated spirited debate as Members of the House attempted to impose long overdue economies on our committee system. As we all realize, the growth in committee costs and staffing, during the last decade, has been awesome. Standing and select committee budgets spiralled from $7.5 million in 1970 to $32.1 million in 1981. The size of House committee staffs jumped from about 700 in 1970 to around 1,900 last year.

I believe, Mr. Speaker, that 1981 represented a significant turning point. Committee budgets, in contrast to the perfunctory treatment of the past, were subjected to careful review. The Subcommittee on Accounts sliced nearly $4 million from committee requests which totaled more that $37.8 million. Much of the credit for these savings can be attributed to the efforts of the new chairman of the Accounts Subcommittee, Representative FRANK ANNUNZIO, and the ranking minority member, Representative BOB BADHAM, who sought to hold the line on committee costs.

Despite the subcommittee's action—and the additional reductions adopted during floor action last March, the Republican minority of the House Administration Committee remains convinced that deeper cuts were necessary and appropriate.

Yet even though the House has displayed, to some degree, a recognition of the need for restraint in committee spending, it is apparent that the committee funding process—as presently structured—is incapable of achieving the goal of fiscal economy. The funding resolutions, considered by the Committee on House Administration—and, subsequently, the full House—reflect less than half of total committee operating costs. By rule or regulation, the salaries of statutory staff, committee printing, a substantial share of supplies and telephone expense are not contained in the funding resolutions. In fact, two committees of the House—Appropriations and Budget—are completely exempt from the rigors of the funding process. We can never expect to bring committee budgets in line if the very process obscures these costs from our review.

In large measure, the growth in committee budgets reflects the unchecked expansion of committee staff. Yet our staffing practices are so outmoded, or counterproductive, that savings are difficult to achieve. We retain obsolete distinctions as to statutory and investigative staff. The rules of the House, by way of clause 5(d), gives sustenance to independent subcommittee staffs. A new concept—associate committee staff—has recently been grafted on the committee structure.

Mr. Speaker, the House will be unable to gain sufficient control over committee costs until the funding process itself becomes more accountable and staff hiring procedures are revised. To that end, I am pleased to introduce today, along with several of my colleagues from the Committee on House Administration, three resolutions which are described below.

ASSOCIATE COMMITTEE STAFF

This first resolution would reduce the number of permanent employees to which a Member is entitled pursuant to his clerk-hire allowance by one for each associate committee staff person employed by that Member. Additionally, the amount of money allocated a Member under his clerk-hire allowance would correspondingly be reduced by the prorated equivalent of the annual salary of the staff person.

Associate committee staff, although a common fixture in the other body, is a relatively new phenomenon in the House of Representatives. The concept allows a Member, merely as a consequence of his membership on a committee, to hire one staff person to assist in committee-related work. At this time, only three standing committees of the House—Rules, Appropriations, and Budget—utilize associate committee staff, although at least one other—Ways and Means—attempted, unsuccessfully, to institute this practice a couple years back.

From an institutional perspective, the use of associate committee staff serves to fragment committee organization. Such staff, as a result of their selection and assignment, are basically tied to one Member, their links to the committee often tenuous. Associate committee staff usually function as a parallel hierarchy poorly integrated with committee employees hired according to the standard procedures. Further, such associate committee staff arrangements, by awarding Members an additional personal legislative aide, circumvent the limitations imposed by the clerk-hire allowance. The resolution seeks to counter that unwarranted advantage.

5(d) SUBCOMMITTEE STAFF

At the beginning of the 94th Congress, one of the amendments incorporated into the rules of the House provided that the chairman and ranking minority member of each standing

subcommittee on a standing committee—up to six standing subcommittees per committee—could appoint a staff person to assist with committee work. Such employees have commonly been referred to as "5(d) staff" after the specific clause in the rules which authorizes their hire.

Earlier this year, when the Subcommittee on Accounts conducted hearings on the funding resolutions, several committees criticized the "5(d)" concept for balkanizing committee staff. The impact of "5(d)" has been to spawn independent subcommittee staffs, which promote subcommittee autonomy at the expense of full committee authority. Additionally, clause 5(d) seems to offer an incentive for Members to create and maintain otherwise nonessential subcommittee units as a means of securing additional staff.

This resolution, by reducing the number of subcommittees per committee entitled to "5(d)" staff from six to four, seeks to achieve some control on both the growth of subcommittees and of staff.

"STATUTORY" AND "INVESTIGATIVE" STAFF/ ONE-THIRD MINORITY STAFFING

The third resolution eliminates the distinction between statutory and investigative committee staff now embodied in the Rules of the House. Moreover, it establishes the right of the minority party, on request, to receive one-third of the committee funds allocated for the hiring of staff.

Statutory positions were first established by the Legislative Reorganization Act of 1946; the intent was to provide committees with a permanent base of staff expertise. Presently, each standing committee of the House with the exception of Appropriations and Budget, is authorized thirty statutory slots.

However, it was recognized that, in undertaking special studies and short-term projects, additional staff would be necessary. In order to augment statutory staff, moneys are provided in the annual committee funding resolutions for the hiring of so-called investigative staff. Although such "investigative" staff were once perceived as a temporary complement, in recent years they have generally been viewed as permanent adjuncts to the committee network.

Even though the salaries of investigative staff are contained in the annual funding resolutions, the salaries for statutory staff are not. Consequently, when the House considers the budgets of the various committees, a significant proportion of staff costs are totally ignored. In 1980 alone, statutory staff expenditures (excluding the Appropriations and Budget Committees) amounted to $20 million; this enormous cost was never taken into account as Members debated priorities for committee spending.

To correct this anomaly, the resolution discards the outmoded classification of statutory and investigative and requires that all staff salaries be incorporated in the funding resolutions.

No committee reform has had as frustrating a history as the minority quest for an equitable allotment of committee staff. In 1970 and 1974, the House approved amendments earmarking for the minority a one-third share of the moneys in committee funding resolutions allocated for staff hire. But, in each case, the Democratic Caucus subsequently nullified the one-third provision. Although the minority receives a one-third protection as to statutory staff, the bulk of committee employees are hired pursuant to the funding resolutions where no such guideline applies; as a result in 1980, only 20 percent of the committee staff were Republican-assigned.

The resolution permits the minority, on request, to receive one-third of the funds allocated for staff. The proposal, however, stipulates that the Committee on Standards of Official Conduct would not be subject to this provision; likewise, committees which desire to maintain nonpartisan or unitary staffs could so continue.

The question of minority staffing is not a partisan issue, rather it is one of equity. It would be a beneficial complement not only to the capabilities of the minority party, but more importantly to the institution as a whole. This reform is worthy of the House's immediate attention.

EXEMPTIONS FOR THE BUDGET AND APPROPRIATIONS COMMITTEES

Mr. Speaker, I would like to take this opportunity to comment on a related resolution, being introduced by Representative JAMES K. COYNE. That initiative would eliminate the present exemption accorded both the Committee on Appropriations and the Committee on the Budget from the committee funding process. Currently, neither committee is required, as are all other standing and select committees, to introduce a funding resolution for consideration by the Committee on House Administration and, thereafter, the full House.

In 1980 Appropriation Committee expenditures, including statutory staff, exceeded $6.7 million; budget's total was over $2.9 million. It seems somewhat illogical that these two panels are not held accountable, in like fashion, as are all other committees of the House for their operating expenses.

Mr. Speaker, the committee funding process is one that cries out for greater accountability, equity and fiscal control. These resolutions, I suggest, represent beneficial reforms which will strengthen the process and insure increased accountability in our committee operations.●

EXEMPTING THE VETERANS MEDICAL PROGRAM FROM CONTRACTING OUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MOTTL) is recognized for 5 minutes.

● Mr. MOTTL. Mr. Speaker, I have introduced a bill which would amend title 38, United States Code, to exempt the VA's Department of Medicine and Surgery from the policies and directives of the Office of Management and Budget on contracting out for commercial and industrial type functions. As many Members know, OMB Circular A-76 directs that cost benefits studies be done on some 27 areas involved in the provision of health services to veterans that OMB has determined are commercial-industrial type activities. These studies would have to be done at a cost of $30 million.

The first three of these studies have already begun. They are in the areas of food services, custodial services, and maintenance services. The three studies alone would cost in excess of $10 million and could adversely affect over 22,000 employees who currently perform these functions.

Mr. Speaker, on October 20, 1981, the full committee on Veterans' Affairs conducted the second in a series of oversight hearings on this subject. Witnesses included representatives of the Office of Management and Budget, the Veterans' Administration's Central Office, key staff of some VA hospitals, two representatives of the special medical advisory group to the VA Administrator and Chief Medical Director, two well-qualified hospital administrators from the private sector with experience covering several years of contracting for services, and the American Federation of Government Employees. With the exception of OMB, all of the witnesses opposed this concept as it would be applied to veterans hospitals. Their greatest concern was that the application of this directive would adversely impact on the quality of care delivered to eligible veterans.

Dr. Howard Green, the chief of staff of the VA Medical Center in White River Junction, Vt., and Ms. Yvonne Moody, chief of the nursing service of the VA Medical Center in Minneapolis, Minn., both cited one of the greatest concerns I have about the implementation of this circular. They stated that should the contractor fail to deliver services comparable to those being performed by the VA, the VA nursing staff would be forced to take up the slack. Of course, this would make it even more difficult for the VA to attract and retain sufficient nursing staff. I am sure Members are familiar with the tremendous shortage of nurses throughout the country and the fierce competition that is now in

progress to recruit these professionals. The private sector hospitals can offer salaries and fringe benefits that are impossible for the VA to meet. Add the burden of additional housekeeping chores to the nursing staff and you will see a mass exodus of these highly motivated individuals from the VA to these better paying positions.

Mr. Speaker, it is for these reasons I have introduced this bill. I urge all Members to support it, and cosponsors are welcome.●

NATIONAL GUARDSMEN AND RESERVISTS ARE PROTECTED BY THE VETERANS' REEMPLOYMENT RIGHTS PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, a most important program, which comes within the jurisdiction of the Committee on Veterans' Affairs, is the veterans' reemployment rights program. Under this program, not only do persons who become active members of the military have a right to reemployment, but also the jobs of persons who join or are called to active duty in the National Guard or Reserves, are protected.

This committee has received information that some employers object to their employees being a member of the National Guard or a Reserve Unit. During this 1st session of the 97th Congress, this matter was reviewed at some length by the Subcommittee on Education, Training and Employment which is chaired by BOB EDGAR of Pennsylvania.

In this regard, there recently came to my attention a news release from the Department of Labor stating that a Missouri National Guardsman has been awarded more than $4,000 in lost wages by a Federal district court, which ruled he was discharged by his employer for requesting 2 weeks of military leave to attend mandatory training.

This decision affirms a key provision of the veterans' reemployment rights program. National Guardsmen and reservists take part in weekend, monthly, and yearly training sessions to keep current with their military responsibilities. Almost all military trainees need time off from their jobs for the training. Absences which may last for a few hours to a few weeks call for temporary adjustments by the trainee and the employer adjustments by the trainee and the employer. Under the Veterans' reemployment rights program, an employer is required to excuse a worker for military training duty, and the employer must grant the leave. All employees, in all kinds of employment, are covered by this Federal program, except those who hold temporary positions. The coverage now extends to not employees in the private sector and the Federal Government, but also to employees who work for State and local governments.

So that the Members will have the benefit of the most recent decision upholding the rights of employees to take military training as National Guardsmen or reservists without being fired, I request that a copy of the press release from the U.S. Department of Labor on this matter, dated October 22, 1981, follow my remarks:

MISSOURI GUARDSMAN WINS BACK PAY IN REEMPLOYMENT RIGHTS CASE

A Missouri Army National Guardsman has been awarded more than $4,000 in lost wages by a federal district court which ruled he was discharged by his employer for requesting two weeks of military leave to attend mandatory training.

David P. Ledbetter of St. Louis worked for the Slay Transportation Company, Inc. also of St. Louis. On June 16, 1978, Ledbetter informed the company that he had received orders to report for two weeks of summer duty with the Missouri National Guard. The company fired Ledbetter the same day.

Ledbetter contacted the Labor Department's Office of Veterans' Reemployment Rights (OVRR) in St. Louis, claiming he was terminated because of his military obligation, a violation of his rights under the federal veterans' reemployment rights law. Attempts to negotiate a settlement with Slay Inc. failed and OVRR referred the case to the Justice Department which decided to file suit.

In court, Slay Inc. argued that Ledbetter was a probationary employee and that he was fired so his job could be given to another employee, not because of Ledbetter's military obligation.

The United States District Court for the Eastern District of Missouri ruled that Ledbetter was terminated because of his reserve status and because of the "perceived inconvenience engendered by plaintiff's military commitment."

The veterans' reemployment rights law states that a person holding a job "shall not be denied retention in employment because of any obligation as a member of a Reserve component of the Armed Forces."

Ledbetter had requested reemployent, seniority, and lost wages from his employer, but because of his poor health and recorded difficulty in attending and holding other jobs since his dismissal from Slay Inc., the court limited damages to $4,360. These were losses Ledbetter could reasonably claim as a result of his wrongful discharge, the court ruled.

The decision was handed down on September 15, 1981.●

JAPAN SHOULD SHARE DEFENSE COSTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, today I am introducing a resolution that would finally allow Japan to underwrite the cost of its own security and, in the process, improve the U.S. balance of trade and reduce the Federal deficit.

Mr. Speaker, Japan has experienced unparalleled prosperity under the security umbrella provided by the United States over the years, growing from a devastated country to an economic superpower fully capable of financing its own defense. Yet Japan's annual defense budget represents less than 1 percent of its gross national product, a commitment considerably less than that of any major nation. The United States, by contrast, annually spends on defense an amount equal to more than 7 percent of its gross national product. I hasten to point out, however, that Japan should not be faulted for this disparity, since that country is limited in how much it can spend on defense by political, constitutional, and psychological constraints, reinforced by U.S. policies. I would also argue against efforts to attempt to compel Japan to substantially increase its own defense program—a move other nations in the region might naturally view with alarm. This seems to present us with a dilemma, but I think there is a solution.

I would propose, Mr. Speaker, that the President seek an arrangement with the Government of Japan, whereby that nation would pay an annual security tax to the United States equal to 2 percent of its annual gross national product—2 percent of Japan's GNP would amount to about $20 billion—to partially compensate the United States for expenditures related to the security of Japan and that of the free world. The United States, of course, does not expend $20 billion on the direct defense of Japan each year. I would argue, however, that Japan's security is not only dependent on the Armed Forces assigned to the immediate vicinity of Japan but is ultimately contingent upon the security of the free world, to which the United States commits a substantial portion of its comparatively enormous defense budget. Essentially, Mr. Speaker, I think it is time that Japan joined the rest of the major nations of the non-Communist world in our mutual defense.

Mr. Speaker, Japan currently enjoys a $15 billion trade surplus with the United States and many American industries are being financially squeezed by Japanese imports. Despite Japan's superior trade position, however, the American taxpayer is expected to continue to foot the bill for Japan's security. In my opinion, this is an unhealthy situation that threatens to drive a wedge between our two nations. I think most of my colleagues would agree without hesitation that our continued cooperation and friendship with Japan are mutually beneficial and, in fact, critical to our own defense needs. Therefore, it is vital that we work to avoid further erosion in our relations. I would think our rela-

tions with Japan would receive a much needed shot in the arm if Japan were to substantially and dramatically increase its financial contribution to our mutual security. No longer would Japan be considered a defense freeloader.

At this point, Mr. Speaker, I would like to express my appreciation to Mr. Ronald A. Morse, to whom I am indebted for this idea. Mr. Morse is currently the secretary of the east Asia program at the Woodrow Wilson International Center for Scholars. It is his considered opinion that the Japanese might welcome such a proposal, since Japan would have much to gain from the improved relations with the United States that would naturally result from reducing the fiscal burden on the U.S. taxpayer. The Japanese Government might also favor such a proposal because it would allow it to avoid the politically sensitive issue of directly increasing its own defense forces to meet modern security needs and commitments.

Finally, Mr. Speaker, the United States-Japanese Treaty of Mutual Cooperation and Security was negotiated some 20 years ago and, while the military assumptions supporting the treaty remain valid, the economic ones do not. My proposal, in essence, would modernize the treaty without having to renegotiate it, which I understand is not favored by either country. I would urge my colleagues to take a careful look at the problem and my proposed solution and to get back to me if they have any questions or comments or if they would like to cosponsor my resolution.●

IS THE POSTAL SERVICE ACCOUNTABLE?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, the General Accounting Office recently issued a report entitled "A Case Study of Why Some Postal Rate Commission Decisions Took As Long As They Did." One might deduce from the title of the report, which is based on an examination of two cases—each of which took some 15 months to decide—that it is an indictment of the PRC. This is not the case.

In the first case GAO reviewed, the Postal Service proposed restructuring parcel post rates. The case drew enough interest and was so complex that 16 parties participated in 21 days of hearings, creating 4,800 pages of hearing record. The other case examined by GAO involved the Postal Service's proposal to enter the electronic message service arena. The hearing record, in the so-called E-COM case, was 7,400 pages. It resulted from 29 days of public hearings with 33 parties participating. Interest, which equates with potential impact, and complexity were, however, not the only factors contributing to the length of time needed by the Postal Rate Commission to make a determination. The GAO found that the situation was compounded by the Postal Service which: Submitted cases that were deficient; objected to general discovery efforts and at those aimed at overcoming initial deficiences; changed its testimony and witnesses from one appearance to another; revised testimony after it was formally submitted; and disagreed with other parties over the nature and scope of the cases.

The GAO report concludes that: The congressional expectation that the Postal Rate Commission and the Service's Board of Governors would work as partners in establishing postal rates, fees, and classifications has not been realized. It may be time for the Congress to again consider revising the system if it desires a more timely and harmonious ratemaking process.

While I am not so sure the Congress really expected a harmonious relationship between the Commission and the Postal Service, there is little doubt that it expected the system to provide checks and balances. Unfortunately, the system has evolved to a point where we have no checks and the scale is out of balance in favor of the Postal Service.

To give you an example of just how out of balance the system has become, let me tell you what I found when my Subcommittee on Government Information and Individual Rights held an oversight hearing on the Postal Service's E-COM plan. E-COM, as you will recall, was one of the cases GAO studied because the PRC's decision was 15 months in the making. The Commission approved a rate of 26 cents per page based on a capital investment by the Postal Service of some $7 million. The Postal Service plans to offer E-COM at the approved rate beginning next January. However, the Postal Service has more than quadrupled the capital investment figure upon which that rate was based. In doing so, the Postal Service Board of Governors is ignoring not only the Commission but is thumbing its nose at the highly competitive private sector telecommunications industry. This is the same Board that, on the recommendation of postal management, voted to override the Commission and raise the first-class stamp to 20 cents.

Paul J. Krebs, who was a member of the Commission on Postal Service established in 1976 to study the situation, hit the nail on the head when he said: "The Postmaster General is accountable to the Board of Governors (of the U.S. Postal Service). But who is the Board accountable to? The answer is: No one."●

A FRIENDLY REMINDER TO OUR FRIENDS IN THE NONALINED MOVEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. IRELAND) is recognized for 60 minutes.

● Mr. IRELAND. Mr. Speaker, Mr. GILMAN and I are privileged, as you know, to serve as the two congressional representatives to the present session of the United Nations General Assembly.

In that capacity, we frequently come into contact with the foreign ministers and the heads of delegation of the various members of the nonalined movement, particularly those with friendly relations with the United States.

Many of those nations also enjoy significant degrees of economic and security assistance from the United States, just as we enjoy cordial trade and other relations with them.

Unfortunately, Mr. Speaker, the relations between our country and many of the nonalined nations are not as reciprocal as they should be; specifically, many of them apparently feel that while they are happy to receive our economic and military assistance, they have no concomitant responsibility to at the very least avoid making unfounded and pointless rhetorical attacks against us at the United Nations, and in other arenas.

We cannot legitimately expect that members of the nonalined movement, regardless of their aid relationships with us, will actively promote our interests. They would not be nonalined, of course, if they did that. But surely we have a right to expect the opposite—that they will not actively join in unwarranted and baseless attacks upon the United States and our policies.

I am sure that we all noted with interest and approbation the efforts of our Ambassador to the United Nations, Mrs. Jeane Kirkpatrick, when she wrote on October 6 to the Ambassadors and heads of delegation of the nonalined nations regarding their annual communique as issued on September 25 and September 28 of this year.

Ambassador Kirkpatrick pointed out in no uncertain terms that the communique contained the most vituperative, slanderous statements concerning the United States and our policies that could be imagined. She further pointed out that such language was hardly supportable in view of the commitment to nonalinement professed by the nations signing the communique, and she noted that no words of criticism for the Soviet Union were contained in the document.

Finally, and going to the heart of the matter, Mrs. Kirkpatrick asked each of the Ambassadors and heads of delegation to respond to her as to

whether in fact their nations subscribed to the language of the communique. She invited these nations to dissociate themselves from the document.

Some 40 of the 97 or so nonalined nations received Ambassador Kirkpatrick's letter, Mr. Speaker, and it is our understanding that while it caused some anguish in the professional ranks of the State Department, the fact is that her letter is being well received, and that a number of nations have already availed themselves of the opportunity to dissociate themselves from the September 25 and 28 communique.

Last week, the Senate, with commendable alacrity and foresight, adopted an amendment offered by Mr. MOYNIHAN, a former U.N. Ambassador, converting the thrust of Ambassador Kirkpatrick's letter into law. The Moynihan amendment was adopted in the form of a sense of the Congress resolution to the Foreign Assistance Act and the Arms Export Control Act to the effect that no nations which had failed to dissociate themselves from the September 25 and 28 communique of the nonalined movement should receive economic and military assistance from the United States.

Mr. GILMAN and I are today joining in presenting the amendment as passed by the Senate in the form of a separate bill, so as to insure that the House will get a chance to express its sentiments in the event that the foreign aid bill does not reach the floor.

Should the foreign aid bill reach the floor, however, we will offer the operative language in our bill as an amendment to parallel the Senate action.

At this point in the RECORD, Mr. Speaker, I am presenting a copy of Ambassador Kirkpatrick's letter and a list of recipients, followed by an excellent editorial from the Wall Street Journal of October 19 which places the events we have been discussing in their proper perspective.

THE REPRESENTATIVES OF THE UNITED STATES OF AMERICA TO THE UNITED NATIONS,

October 6, 1981.

YOUR EXCELLENCY: Since coming to New York as the United States Permanent Representative to the United Nations some ten months ago, I have come to appreciate more warmly the positive role of the United Nations, and to greatly value relations between the United States Mission and that of many othe Missions here at Turtle Bay.

Because I sincerely value the good relations between our Missions and the strong bilateral ties between our nations, I wish to share with you now my thoughts on a matter of some importance.

Quite frankly, I was startled to find your government associated with the Communique of the Ministers of Foreign Affairs and Heads of Delegation of the Non-Aligned Countries which was issued on September 28, 1981 in New York.

I well realize, Your Excellency, that your country is but one of some one hundred members of the Non-Aligned Movement, and that the Movement itself is a body of divergent nations. Nonetheless, I am startled that you or your government would or could associate yourselves with a document composed of such base lies and malicious attacks upon the good name of the United States.

I can assure you, Your Excellency, that I would never allow the United States to be associated with any document from any group—no matter how large or diverse—that contained such vicious and erroneous language against your country.

The communique has no more claims to being truly non-aligned than does the Permanent Mission of Cuba which issued it. In a year which sees a continuing military occupation of Afghanistan, Kampuchea and Chad—all with the support of the USSR, the non-aligned communique contains no mention of the Soviet Union. Yet it negatively mentions my country—which invades and occupies no one, and undermines no one's independence—nine times by name and dozens of times by implication, making the most absurd and erroneous charges such as:

That the U.S. perpetuated "aggression" against Libya last August, an "aggression" which "constitutes a threat as well as flagrant violence against the sovereignty, independence and territorial integrity on nonaligned countries" and "a threat to international peace and security" (page 13); and

That the U.S. participates in "attempts at destabilizing the Government of Granada, the exertion of economic and other pressures, destabilizing maneuvers against Nicaragua" (page 17).

These, Your Excellency, are only two of the fabrications and vile attacks against the United States, which fill this 21-page document.

I need not elaborate all the falsehoods, nor need I explain to you the truth on these and other issues. For I believe, Your Excellency, that you know the truth about these matters and that, by and large, our countries share values and principles of basic human decency, national independence, self-determination, and non-aggression.

In fact, Your Excellency, I think that you no more believe these vicious lies than do I and I do not believe they are an accurate reflection of your government's outlook. And yet, what are we to think when your government joins in such charges, for that is what you have done in failing to disassociate yourself from them.

I think you will understand how disturbed I feel about this communique and your government's association with it, if only you imagine how you would react to having friendly nations level such charges against your government.

The fact that the United States is a large and powerful nation does not make us less concerned about our good name or the reliability of our friends.

Convinced that this communique does not represent your views, I would very much appreciate hearing from you about it.

With all good wishes, I am

Sincerely yours,

JEANE J. KIRKPATRICK.

[From the Wall Street Journal, Oct. 19, 1981]

EXPLAIN YOURSELF

Something that shouldn't pass without comment happened at the United Nations the other day. Delegates from the nonaligned nations met and issued a consensus statement that excoriated the United States for all kinds of sins while remaining silent on the subject of the Soviet Union. This, of course, was nothing new. But this time Ambassador Jeane Kirkpatrick wrote individual letters to many of the envoys involved, asking them explicitly whether they really believed the lies they had attached their countries' names to. It is a healthy precedent.

The document in question was the communique of ministers of foreign affairs and heads of delegation of the nonaligned countries, put out after a meeting of these notables in New York on Sept. 28. Chairing the meeting was the Cuban Foreign Minister, and this fact showed in the final product. The "nonaligned" nations accused the U.S. of "aggression" against the hapless nation of Libya and against the nonaligned world in general; they excoriated us for trying to "destabilize" Grenada and Nicaragua, two new Soviet bases in the Caribbean region.

There was no mention of current events such as the Soviet role in Afghanistan.

The U.S. letter asked the less antagonistic among the nonaligned to explain for themselves what they meant by all this. These are "vicious lies," the letter said, "and I do not believe they are an accurate reflection of your government's outlook. And yet what are we to think when your government joins in such charges." Such actions, the letter suggested, are hardly compatible with a general posture of friendly relations.

We are told that some of the nonaligned have sent back written or oral word that they have, in fact, dissociated themselves from the Cuban communique. Others, it seems, are rather miffed that they have been called on the carpet. Some are saying that they let the unfriendly language go through because they are mad at the U.S. for being increasingly soft on South Africa and for actually contemplating an expanded strategic alliance with the pariah Israel. The ambassador from Lebanon, who should know something about the Soviet role in world affairs, is reported to have met the issue with a courageous demand for fewer letters from the U.S. and more personal meetings.

We hope the U.S. delegation stirs up this species of ferment again and again. One of the most persistent features of UN life has been the habit of its delegations to speak one way in private and another in public. They express perfect understanding of U.S. interests in personal conversation and can be counted on to vote the opposite, professing their problems, their difficulties, their delicate situation. They know we will understand. Unfortunately, we usually do.

The habit is not going to change until we become a little less understanding and a little more respectful—until, that is, we develop a consistent pattern of treating our nonaligned colleagues as adult nations responsible for the words they utter. This letter was a step toward that new pattern, and it will be refreshing if it proves to be the first of many.

Mr. Speaker, as Mrs. Kirkpatrick's eloquent letter points out, we are not seeking to punish nations for exercising their legitmate rights to differ with us. We are seeking to achieve a greater degree of mutual respect in international forums, and it seems to us that nations which happily accept our economic and security assistance should also accept some degree of responsibility in their actions toward us.

Our resolution speaks for itself, at this point, Mr. Speaker, so without further ado we are pleased to present it for the RECORD, and to urge our colleagues to join in cosponsoring the resolution as a signal to our friends in the nonalined movement that we fully support Ambassador Kirkpatrick in her actions, and that we, too, demand an accounting from them regarding their actions.

After all, the United States is not just a convenient punching bag which also happens to dispense money. Our friends can hardly be surprised if we react to unfounded criticism, just as they would. The resolution follows:

H. RES. 261

Resolution expressing the sense of the Congress regarding providing foreign assistance to nonalined nations which joined in the communique of September 25 and September 28, 1981, at the United Nations

Whereas the united States provides foreign military and economic assistance to various nations with which it enjoys friendly bilateral relations, a number of which are members of the Non-Aligned Movement;

Whereas the Ministers of Foreign Affairs and Heads of Delegation of the non-aligned states sponsor annual meetings to discuss problems of special concern to them, and to prepare and circulate a communique describing their major concerns;

Whereas the United States fully supports the principle of the free flow of information and exchange of ideas as fundamental to democratic societies, but finds repugnant unbalanced attacks on the reputation of the United States;

Whereas the recent communique of the Meeting of the Ministers of Foreign Affairs and Heads of Delegation of the non-aligned nations contained unfounded, unbalanced accusations against the United States: Now, therefore, be it

Resolved, That—

(1) In considering whether to provide assistance, make sales, extend credits, or guarantee loans under the provisions of the Foreign Assistance Act of 1961, or the Arms Export Control Act, to any country represented at the Meeting of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Aligned Countries to the 36th General Session of the General Assembly of the United Nations on Sept. 25 and 28, 1981, the President shall take into account whether such country has dissociated itself from the communique issued following the meeting.

(2) Within thirty days of enactment of this act, the President shall send a report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate setting forth the countries which have dissociated themselves from the nonaligned countries communique together with a full description of the method of dissociation and the forum in which the dissociation has been made. The President shall transmit with the report a copy of each statement of dissociation.

(3) Within thirty days after the receipt of a statement of dissociation from any country the President shall transmit a copy of the statement of dissociation together with a full description of the method of dissociation and the forum in which the dissociation is made to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate.●

EXPLANATION AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was concluding a meeting of the House Judiciary Committee on Tuesday, October 27, 1981, when the House voted on rollcall No. 279, and agreed to resolve itself into the Committee of the Whole for the consideration of H.R. 4503, to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982. The vote was yeas 382, nays 4, one Member answered "present", and 46 Members did not vote. Had I been present, I would have voted "yea."●

CONSUMER CREDIT DEREGULATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, I want to take a moment to congratulate the House Banking Committee's Consumer Affairs Subcommittee on the excellent hearing it held last week on legislation to allow the Federal Government to preempt State interest rate ceilings on consumer loans.

Mr. ANNUNZIO, the subcommittee chairman, thoroughly and fairly aired the issue. I was especially pleased that his subcommittee held its first hearings devoted to this important issue. As I mentioned during my appearance before Mr. ANNUNZIO's subcommittee, Federal preemption of State usury ceilings on consumer loans is an important consumer and small business issue.

It is important that consumers who need credit and want to use it have it available. It is important to allow lenders to recoup their costs and allow retailers, automobile dealers, and recreational vehicle manufacturers, among others, to offer credit to sell their goods. It is important that we do not engage in credit allocation through the back door by preempting usury ceilings on business, agricultural, and first-mortgage loans while refusing to lift the caps on consumer loans. It is important that a national problem be solved on a national basis.

I must confess that I was disappointed by the press coverage of the hearings. What especially concerned me were the stories in the New York Times and the Wall Street Journal of October 22, which reported that the Consumer Affairs Subcommittee had rejected H.R. 2501, which I introduced, that would preempt State usury ceilings on consumer loans. That simply was not the case. The subcommittee voted to table the legislation and to delay consideration of the issue. The substance of the legislation was not voted on. I want to make clear that H.R. 2501 has not been rejected; consideration in the Consumer Affairs Subcommittee has only been deferred.

I also want to note that Chairman ST GERMAIN of the House Banking Committee has said that usury will be included as an issue to be considered during hearings he has scheduled on the state of the financial services industry.

Because of the continued importance of this issue, I place in the CONGRESSIONAL RECORD an excellent editorial from the Washington Post of October 19, 1981, supporting usury preemption legislation. I wholeheartedly

concur with the editorial's admonition that existing consumer protection laws be protected by this legislation. I have explicitly done that in H.R. 2501, and I stated at the Consumer Affairs Subcommittee hearings that any preemption legislation I introduce would specifically protect consumer protections on the books or that would be adopted in the future.

Following is the editorial.

[From the Washington Post, Oct. 19, 1981]

DEREGULATING CREDIT

Congress is considering legislation to remove the ceiling on interest rates that lenders may charge across the country. The Credit Deregulation and Availability Act of 1981 would overrule all local usury laws in an effort to make it more profitable to lend money, while making more credit available to consumers.

Opponents of the bill don't quite see it that way. Jim Boyle of the Consumer Federation of America told a Senate Banking subcommittee that the bill would eliminate protections against loan sharks for uniformed people and would "cost borrowers billions in additional finance charges, precipitate thousands of new bankruptcies and allow lenders to impose a variety of extra fees that will make comparison shopping for loans difficult, if not impossible."

The most controversial aspect of the measure would remove all local controls on interest rates, late payment penalties and other loan fees. In the District, for example, the law would erase prohibitions against excessive penalties for early repayment of loans. Stanley Silverberg, director of research for the Federal Deposit Insurance Corp., reports that one-third of the states have recently made substantial increases in their usury rates. But the states, he notes, have generally decided not to do away with all interest rate ceilings. The horror stories cited by opponents of the bill have to do with states that have removed all such ceilings, as in Arizona where they say some used car dealers now offer loans at 50 percent.

The arguments against the credit deregulation bill are really arguments urging consumers to use caution when entering into any loan. They are not arguments for keeping usury rates below the rate of inflation, as they are now in many states. In a national economy, usury rates should be set nationally. To set them state by state is anachronistic. Low usury rates in any one state will simply drive lenders elsewhere and make people go out-of-state to find loans—or go to loan sharks.

Where the proposed deregulation of credit goes wrong is in removing all protections against corrupt charges and fees that can be amended to loans. Legitimate lenders do not benefit from such freedom; it only opens the door to fly-by-night companies that would issue loans with the hope of taking advantage of consumers. Congress must think twice before it legalizes loan sharking. The states, which up to now have been policing the loan business, have an assortment of laws to stop corrupt activity. Congress should look them over before making sweeping changes on credit that go too far to accomplish some good.●

A STUDY OF CIVIL RIGHTS AS IT RELATES TO GOOD MEDICAL CARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 60 minutes.

Mr. STOKES. Mr. Speaker, the major goal of American health policy since the mid-1960's has been the attainment of equal access to health care; that is, access that does not differ because of income, race, or age differences between individuals. However, in the 1980's as the new administration begins to tackle the health care financing and delivery issues facing the U.S. health care system, concern will undoubtedly begin to focus on the relationship between Federal health budget reductions and potential reduced access to medical care by the poor and elderly. This may require the application of civil rights principles to the delivery of health services in the context of an ever changing political and economical environment. Consequently, a new emphasis on civil rights as a means to protect health benefits may be needed to continue the public debate over equal access to medical care, as a right for all Americans even during a time of economic austerity.

The delivery of medical care in the United States through the use of expensive technology has fostered spiralling health care costs and the development of one of the largest service industries in the Nation. However, access to medical care is limited for many Americans with low incomes and who lack adequate health insurance protection. During the past 15 years, medical care for the poor and elderly has been subsidized primarily under the medicare and medicaid programs. These programs help transfer a traditional welfare and charity arrangement of financing medical care into new attempts to mainstream medical care for the indigent populations. This emphasis on making the availability of medical care more equitable has increased the purchasing power for the indigent, and has helped to close the gap in health services and health status between black and white Americans. Moreover, recent attempts to expand the health care purchasing power of the poor, along with removing discrimination barriers have been instrumental in assuring equity and accessibility in the delivery of medical care. Now this trend is being reexamined to reduce Federal and State health expenditures and to develop more prudent methods of financing medical care for the poor.

The two major health care financing laws were created in 1965—medicare and medicaid programs—to help assure equal access to medical care for the elderly, poor, and disabled. Medicare established uniform hospital and medical benefits which are administered as part of the social security program for all elderly persons regardless of income or place of residence. Now 16 years later, despite the dramatic rise in public spending for health care, the aged pay more out of pocket for health care than they did before medicare began.

The medicaid program was designed to aid and encourage the States to provide minimum health benefits for at least those individuals receiving Federal income protection assistance—AFCE and SSI. In 1975, many States began to liberalize entitlement and benefits for medicaid to individuals meeting specific categorical and income eligibility requirements. The Federal and State governments attempted to fulfill national expectations to make health care available to all, even those unable to purchase private health insurance. However, runaway health care costs began to exceed public expenditures to meet this goal. In 1978, States began to take measures to reduce expenditures under the medicaid program, through lower fees to medical providers, elimination of optional benefits, and reducing the number of persons classified as medically needy for enrollment in the program. The result of these policies was to reduced access to medical care for many of the poor, as States began to restrict budget allocations for programs such as medicaid. This required many indigent patients to rely on charity hospitals and other facilities that were funded by local government to obtain medical care. Thus, many of the poor and elderly have been subjected to segregated facilities based upon inadequate purchasing power. This time segregation was not on the basis of race, but based upon low incomes and inadequate health insurance protection.

Racial discrimination has been offered as an explanation for racial differences in the utilization of nursing homes between blacks and whites. Many have concluded that racial discrimination plays a major role in nursing home admission procedures. This may also account for the low percentages and inadequacies of nursing home care used by blacks and other minorities. Contrary to some reports, these differences, cannot be viewed based simply upon disparities in life expectancy between blacks and whites; since recent mortality data identifies few differences between racial groups

above the age of 70. Furthermore, lower rates of nursing home usage among blacks cannot be attributable simply to more superior health status. This stance is supported by recent data which suggest that there is a higher incidence of disabilities among black elderly which may require institutionalization than among elderly whites. For example, the black elderly are more likely than elderly whites to reside as a part of an extended family living at home, because they lack the resources to be supported by nursing homes or other alternative living arrangements.

Aside from racial discrimination, economic limitations play a major role in reduced nursing home utilization. Additionally, nursing home beds are in short supply in many urban areas, and blacks with limited and lower incomes have relatively fewer chances of obtaining admission. Consequently, the black elderly are more likely than white elderly to be institutionalized in settings other than nursing homes, such as mental and chronic disease hospitals. Moreover, reliance on social security and medicaid for income and health insurance protection reduces their ability to receive quality nursing home and home health services. A form of economic discrimination is thus created because many nursing homes are not willing to accept medicaid recipients.

It is well known that title VI of the Civil Rights Act prohibits discrimination violations on the basis of race, color, or national origin in any program or entity such as a hospital, home health agency, community health center, and nursing home facility receiving Federal assistance.

But relatively little is known about the application of this provision on eliminating access barriers to Federal health benefit programs for the general population. For example, the Department of Health and Human Services, Office of Civil Rights (OCR) was involved in litigations during the 1970's over patterns of racial segregation among hospitals in New Orleans, La., and other urban areas. Similarly, in 1978 OCR became concerned about potential cases of discrimination against minorities due to reductions, relocations, and closures of hospital facilities in urban communities. Currently, we are not certain what position OCR will take under the new administration to guarantee equal access to medical care for the poor, elderly, and handicapped citizens of this Nation. We can only hope that this office will continue its efforts to reduce barriers and practices of discrimination.

The primary cause of hospital closures facing many urban communities, is the amount of care they provide to patients who cannot afford to pay for services and who lack adequate health insurance protection. Recent estimates indicate that at least 200 hospitals closed during the 2-year period between 1975 to 1977. This fact is often related to the large numbers of individuals who lack medical insurance. For example, recent data has reported that over 23 million persons have no health insurance coverage in the United States and another 20 million have inadequate coverage. Many of these individuals are considered the working poor with incomes above State medicaid eligibility levels but are inadequate to purchase private health insurance or to pay directly for the medical care they need.

Many of the poor and working poor would be eligible for medicaid if it were not for limited income eligibility requirements imposed by States. These limitations on eligibility and scope of benefits contribute significantly to the gaps in coverage that exist among the medically indigent under the medicaid program. These gaps have become even wider in many States due to limited State expenditures to finance medicaid. This requires many charity and public hospitals to provide expensive medical care free to individuals without health insurance.

In the past, it was possible for private and voluntary hospitals to recoup a portion of their losses on services to uncovered patients by passing this loss on to private-paying patients. Public general hospitals deficits for providing free care to a sizable number of their patients were usually subsidized by local governments. Now, due to shrinking tax revenues for innercity areas many public general hospitals are in great financial distress since many local governments can no longer support them.

In a number of urban areas, public hospitals which are the major sources of primary care and the only source of emergency and trauma services began to close. Moreover, these closures have begun to be seen as a serious threat to reducing access to medical care for urban residents and viewed as a legitimate civil rights issue. For example, a recent study identified that the percentage of minority residents of the community around the hospital is directly related to the proportion of hospital closing or relocating from the area.

In neighborhoods 0-25 percent black in 1970, for example, only 14.2 percent of the hospitals had closed or relocated between 1937 to 1977. But neighborhoods 70 to 100 percent black in 1970, fully 46.9 percent of hospitals—almost half had disappeared. Other consequences of hospital closures include: First, departure of the few remaining primary care physicians in private practice from the community surrounding the hospitals; and second, loss of health service employment opportunities for community residents. These conditions have further reduced the effectiveness of the urban health care delivery system, and to reduce assurance of equal access for many urban residents who have limited medical care purchasing power.

A number of cases now pending before OCR are designed to determine whether reductions in the availability of medical care due to hospital closures violate title VI. Since these actions occur more readily in minority and poor communities, many have viewed these closures as an act of racism. Cases involving Homer G. Phillips Hospital in St. Louis, Mo., and the New York City Health & Hospitals Corp. which have either closed or reduced health services in recent years are major litigation disputes for OCR. The complaints allege that proposed reductions in medical services by hospital closures in predominantly black communities would reduce access to health care, since few alternative health care resources were available.

Contrary to earlier civil rights legal cases which involve hospitals and other health facilities practicing discrimination in the provision of medical care to minorities and handicapped individuals, present cases have not gained national attention. However, as more hospitals and community health centers either close or reduce services due to recent Federal health budget reductions, we may expect future civil rights debates to be concerned with reduced access to federally funded health programs.

One major objective of title VI of the Civil Rights Act, in regard to the delivery of health services, was to prevent minority patients who are seriously ill from being turned away from hospitals and community health centers. Legal disputes involving patients who were transferred from private to public hospitals, or subjected to long delays for medical care, are now being considered as a violation against Federal civil rights statutes. These problems of discrimination appear to be most frequent for blacks, Mexican Americans, Asian immigrants.

A number of civil rights regulators have recently examined policies of proprietary hospitals that require patients to pay advance payments prior to receiving treatment and the diagnosis of illness. In addition, the failure of proprietary hospitals to inform patients of their "free care" obligations which they must assume in accepting Hill-Burton funds can be considered an attempt to prevent poor patients from receiving equal access to medical care in private health facilities. These examples of discrimination practices in the delivery of health care services may have to be resolved within the context of civil rights protectionism.

79-059 O-85-36 (Pt. 19)

Civil rights in the delivery of medical care may gain prominence in the 1980's to assure equal access to medical care for the poor. Heightened public concerns about the relationship between Federal budget cuts, greater control by State governments, and efforts to reduce access to medical care may be a concern of many black elderly. Yet the entrenched coalitions and ideological commitments to reduce inflation will continue to influence the debate on mainstream medical care for the poor and elderly. We can only hope that concerns over whether blacks and other minorities are discriminated against by the private health system may be raised as a major public policy issue.

In this round of debate, as in others that consider equal access to medical care, the major issue will undoubtedly relate to an individual's ability to purchase medical care. This argument is highly needed based upon recent attempts to reduce medicaid recipients' freedom to choose health providers which may encourage the poor to receive substandard care in so-called medicaid mills. Ironically, the Government's new emphasis to convert categorical health programs into block grants, to reduce medical care inflation, has been opposed most vigorously by opponents that this will encourage States to reduce funding to urban health facilities that serve the minority poor.

Conventional public opinion suggests that few solutions other than legal disputes are most likely to emerge during this period of Federal budget reductions. Congressional leaders must understand the importance of Federal health funds as a necessary ingredient to assure minorities and the poor equal access to medical care. Only in the event of strong and coordinated leadership committed to the ideas of civil rights and equal access to medical care can we expect that the poor and elderly will fare better during this decade.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RITTER) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, for 10 minutes, today.

Mr. GILMAN, for 30 minutes, today.

(The following Members (at the request of Mr. DONNELLY) to revise and extend their remarks and include extraneous material:)

Mr. MOTTL, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. NEAL, for 5 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Mr. STOKES, for 60 minutes, today.

Mr. IRELAND, for 60 minutes, today.

Mr. DANIELSON, for 5 minutes, today.

Mr. LAFALCE, for 15 minutes, today.

Mr. DYMALLY, for 5 minutes, today.

Mr. ALEXANDER, for 60 minutes, on November 4.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. RITTER) and to include extraneous matter:)

Mr. NELLIGAN in three instances.

Mr. MICHEL.

Mr. SILJANDER.

Mr. SKEEN.

Mr. GREEN.

Mr. ASHBROOK in two instances.

Mr. CONTE.

Mr. DAUB.

Mr. WEBER of Ohio in two instances.

Mr. WOLF.

Mr. COATS.

Mr. DREIER.

Mr. RITTER.

Mr. HYDE.

Mr. JAMES K. COYNE.

Mr. WINN in two instances.

Mr. CAMPBELL.

Mr. NAPIER in two instances.

Ms. FIEDLER.

Mr. MOORE.

Mr. GILMAN.

(The following Members (at the request of Mr. DONNELLY) and to include extraneous matter:)

Mr. REUSS.

Mr. OTTINGER in three instances.

Mr. LUKEN in three instances.

Mr. HAMILTON.

Mr. SKELTON.

Mr. ADDABBO.

Mr. LELAND.

Mr. JACOBS.

Mr. LAFALCE.

Mr. STARK.

Ms. FERRARO.

Mr. RATCHFORD.

Mr. BINGHAM.

Mr. MINISH in two instances.

Mr. GUARINI.

Mr. EDWARDS of California.

Mr. TRAXLER.

Mr. WIRTH.

Mr. HUGHES.

Mr. FAUNTROY.

Mr. LEHMAN.

Mr. BONKER.

Mr. JENKINS.

Mr. MOFFETT.

Mr. SOLARZ.

ADJOURNMENT

Mr. STOKES. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock p.m.), the House adjourned until tomorrow, Thursday, October 29, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2428. A letter from the Secretary of Labor, transmitting the final report of the National Commission on Employment and Unemployment Statistics, pursuant to section 13(a) of Public Law 94-444; to the Committee on Education and Labor.

2429. A letter from the Assistant Legal Adviser for Treaty Affairs, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2430. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend title 18, United States Code, to include certain employees within the scope of section 1114; to the Committee on the Judiciary.

2431. A letter from the Deputy Assistant Secretary of Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of Potawatomi Band's share of the Potawatomi judgment funds awarded in Dockets 15-K, 29-J, and 217 and Dockets 15-M, 29-K, and 146, purusant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

2432. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Tuna Conventions Act of 1950, and for other purposes; to the Committee on Merchant Marines and Fisheries.

2433. A letter from the Secretary of Commerce, transmitting the final draft of the national climate program annual report for fiscal year 1980, pursuant to section 7 of the National Climate Program Act of 1978; to the Committee on Science and Technology.

2434. A letter from the Acting Under Secretary of Agriculture for International Affairs and Commodity Programs, transmitting the initial commodity and country allocation table showing the planned programing of food assistance under titles I and III of the Agricultural Trade Development and Assistance Act, pursuant to section 408(b) of the act, as amended; jointly to the Committees on Agriculture and Foreign Affairs.

2435. A letter from the Vice-Chair of the Merit Systems Protection Board, transmitting a special study on whistle blowing and the Federal employee, pursuant 5 U.S.C. 1205(a)(3); to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MITCHELL of Maryland: Committee on Small Business. H.R. 4500. A bill to extend through fiscal year 1983 SBA pilot programs under section 8 of the Small Business Act (Rept. No. 97-304). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 4854. A bill to provide that U.S. citizens residing outside the United States shall be represented in Congress by a Delegate to the House of Representatives; to the Committee on House Administration.

By Mr. EMERY (for himself and Mrs. SNOWE):

H.R. 4855. A bill relating to the establishment of a permanent boundary for that portion of the Acadia National Park as lies within the town of Isle au Haut, Maine; to the Committee on Interior and Insular Affairs.

By Mr. LELAND:

H.R. 4856. A bill to amend the Public Health Service Act to improve the provision of services for minority individuals who have cancer, and for other purposes; to the Committee on Energy and Commerce.

By Mr. NAPIER (for himself, Mr. BAFALIS, Mr. DREIER, Mr. BEDELL, Mr. BURGENER, Mr. EDGAR, Mr. EMERSON, Mr. ERDAHL, Mr. HOPKINS, Mr. JOHNSTON, Mr. LUJAN, Mr. MCGRATH, Mr. MITCHELL of New York, Mr. NEAL, Mr. SMITH of New Jersey, Mr. SOLOMON, Mr. WHITLEY, Mr. STUMP, Mr. ROGERS, Mr. HARTNETT, and Mr. ROBERTS of Kansas):

H.R. 4857. A bill to amend the Internal Revenue Code of 1954 to provide for the awarding of reasonable court costs and certain fees to prevailing parties in civil tax actions, and for other purposes; to the Committee on Ways and Means.

By Mr. WEBER of Ohio (for himself, Mr. FARY, Mr. ROTH, Mr. STANTON of Ohio, Mr. HILER, and Mr. DUNN):

H.R. 4858. A bill to establish a national policy of promoting and facilitating the operation, maintenance, and development of deep-draft seaports, inland river ports, the Saint Lawrence Seaway and related channels, and waterways necessary to domestic and foreign waterborne commerce; and to require recovery of certain expenditures of the U.S. Army Corps of Engineers for the operation, maintenance, and construction of inland shallow-draft and deep-draft navigational channels and other projects as appropriate; and to forgive all related construction debts owed to the United States; jointly, to the Committees on Public Works and Transportation and Merchant Marine and Fisheries.

By Mr. WEISS:

H.R. 4859. A bill to amend the Railroad Reviatlization and Regulatory Reform Act of 1976 to require the Secretary of Transportation to conduct a study of rail freight service in the Northeast corridor; to the Committee on Energy and Commerce.

By Mr. WYDEN:

H.R. 4860. A bill to establish a national policy of promoting and facilitating the operation, maintenance, and development of deep-draft seaports, inland river ports, and domestic waterways necessary for foreign and domestic waterborne commerce; and to require recovery of a portion of certain expenditures of the U.S. Army Corps of Engineers for the operation, maintenance, and construction of inland shallow-draft and deep-draft navigational channels and other projects as appropriate; jointly, to the Committees on Public Works and Transportation and Merchant Marine and Fisheries.

By Mr. ASHBROOK:

H. Con. Res. 208. Concurrent resolution authorizing a bust or statue of George Washington Carver and a bust or statue of Booker T. Washington to be placed in the Capitol; to the Committee on House Administration.

By Mr. DYMALLY:

H. Con. Res. 209. Concurrent resolution disapproving the proposed sale to Pakistan of F-16 aircraft; to the Committee on Foreign Affairs.

By Mr. NEAL:

H. Con. Res. 210. Concurrent resolution expressing the sense of the Congress that the President of the United States should seek to negotiate an agreement with the Government of Japan, whereby that nation would pay an annual "security tax" to the U.S. Government equal to 2 percent of Japan's annual gross national product, to more equitably compensate the United States for expenditures related to carrying out the provisions of the United States/Japanese Treaty of Mutual Cooperation and Security, and for the security of the free world; to the Committee on Foreign Affairs.

By Mr. BINGHAM:

H. Con. Res. 211. Concurrent resolution disapproving the proposed sale to Pakistan of F-16 aircraft; to the Committee on Foreign Affairs.

By Mr. JAMES K. COYNE (for himself, Mr. FRENZEL, Mr. BADHAM, Mr. THOMAS, and Mrs. MARTIN of Illinois):

H. Res. 260. Resolution amending rule XI of the Rules of the House of Representatives to eliminate certain exceptions relating to the Committee on Appropriations and the Committee on the Budget, and for other purposes; to the Committee on Rules.

By Mr. IRELAND (for himself and Mr. GILMAN):

H. Res. 261. Resolution expressing the sense of the Congress regarding providing foreign assistance to nonalined nations which joined in the communique of September 25 and September 28, 1981, at the United Nations; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. OXLEY and Mr. EVANS of Iowa.

H.R. 116: Mr. HUTTO.

H.R. 374: Mr. ROTH.

H.R. 1140: Mr. MITCHELL of New York.

H.R. 1353: Mr. WALGREN.

H.R. 1499: Mr. BROWN of California.

H.R. 1603: Mr. CORCORAN and Mr. SILJANDER.

H.R. 1937: Mr. SMITH of New Jersey, Mr. O'BRIEN, Mr. ROE, Mr. GEPHARDT, Mr. SWIFT, Mr. WEBER of Minnesota, and Mr. HOWARD.

H.R. 2372: Mr. WYDEN, Mr. DASCHLE, Mr. MURPHY, Mr. DYSON, and Mr. MCCLOSKEY.

H.R. 2832: Mr. BEREUTER.

H.R. 3108: Mr. STANGELAND, Mr. LENT, Mr. ANTHONY, Mr. YATRON, Mr. COUGHLIN, Mr. HAGEDORN, Mr. HUCKABY, and Mr. EARLY.

H.R. 3191: Mr. GEPHARDT.

H.R. 3298: Mr. FITHIAN, Mr. JEFFORDS, Mr. SIMON, Mr. MCCOLLUM, and Mr. ASPIN.

H.R. 3314: Mr. DICKS.

H.R. 3416: Mr. NICHOLS, Mr. SPENCE, Mr. BEVILL, Mr. COLLINS of Texas, Mr. FORSYTHE, Mr. HANSEN of Idaho, Mr. LAGOMARSINO, Mr. HANSEN of Utah, Mr. ROBINSON, Mr. FISH, Mr. IRELAND, and Mrs. BOUQUARD.

H.R. 3485: Mr. HOWARD.

H.R. 3494: Mr. LAGOMARSINO, Mr. MURPHY, Mr. THOMAS, Mr. SYNAR, Mr. HOPKINS, Mr. HORTON, Mr. DE LA GARZA, Mr. REGULA, Mr. PETRI, Mr. ERDAHL, Mrs. HECKLER, Mr. EDGAR, Mr. KINDNESS, Mr. SKEEN, Mr. FAZIO, Ms. OAKAR, Mr. YATRON, Mr. ANDREWS, Mr. MITCHELL of Maryland, Mr. SILJANDER, Mr. WATKINS, Mr. COELHO, Mr. HATCHER, Mr. HARTNETT, Mr. BUTLER, Mr. MCGRATH, Mr. GARCIA, Mr. TRAXLER, Mr. ALBOSTA, Mr. HOYER, Mr. WIRTH, Mr. DICKS, Mr. WEBER of Minnesota, Mr. ROBINSON, Mr. HILER, Mr. BOWEN, Mr. ROEMER, Mr. CAMPBELL, Mr. DECKARD, Mr. MARRIOTT, and Mr. EDWARDS of Oklahoma.

H.R. 3524: Mr. FOGLIETTA.

H.R. 3670: Mr. BONOIR of Michigan, Mr. LEATH of Texas, Mr. SEIBERLING, and Mr. WILLIAMS of Montana.

H.R. 3841: Mr. CONYERS and Mr. RANGEL.

H.R. 3879: Mr. LOEFFLER.

H.R. 3883: Mr. BAILEY of Pennsylvania, Mr. COURTER, Mr. HUTTO, Mr. PEASE, Mr. YOUNG of Florida, Mr. DYSON, Mr. GRISHAM, Mr. HANSEN of Utah, Mr. WYLIE, Mr. BEREUTER, Mr. PATTERSON, Mr. MILLER of Ohio, and Mrs. BOUQUARD.

H.R. 4057: Mr. GINGRICH.

H.R. 4066: Mr. WON PAT, Mr. PEPPER, Mr. MCEWEN, Mr. NEAL, Mr. CORRADA, and Mr. SMITH of Pennsylvania.

H.R. 4134: Mr. PEPPER.

H.J. Res. 344: Mr. RATCHFORD, Mr. MCEWEN, Mr. MCGRATH, Mr. LAGOMARSINO, Mr. DENARDIS, Mr. ROTH, Mr. HOPKINS, Mr. MILLER of California, Mr. BROYHILL, Mr. EVANS of Iowa, Mr. PORTER, Mr. MURPHY, Mr. EDGAR, Mr. BAFALIS, Mr. COATS, Ms. FIEDLER, and Mr. GREGG.

H. Con. Res. 54: Mr. FITHIAN.

H. Con. Res. 192: Mr. MARKEY.

H. Con. Res. 195: Mr. DWYER, Mrs. BOUQUARD, Mr. CHAPPIE, Mr. HARKIN, Mr. BEDELL, Mr. ROTH, and Mr. VENTO.

H. Con. Res. 196: Mr. VENTO, Mr. NELLIGAN, and Mr. KILDEE.

H. Con. Res. 205: Mr. RINALDO, Mr. PORTER, Mr. DENARDIS, Mr. MOAKLEY, Mr. HYDE, Mr. BOLAND, Mr. WYDEN, Mr. ROE, Mr. CORCORAN, Mr. FORSYTHE, Mr. FITHIAN, Mr. RITTER, Mr. WOLPE, Mr. MCGRATH, Mr. BONKER, Mr. EDWARDS of Oklahoma, Mr. GUARINI, Mr. MURPHY, Mrs. HOLT, Mr. FISH, Mr. SCHEUER, Mr. FRENZEL, Mr. COURTER, Mr. BARNES, Mr. DERWINSKI, Mr. FROST, Mr. HOLLENBECK, Mr. LEBOUTILLIER, Mr. GRADISON, Mr. WAXMAN, Mr. WORTLEY, Mr. FAZIO, and Mr. HALL of Ohio.

H. Res. 211: Mr. CHAPPELL.

H. Res. 239: Mr. DYSON, Mr. ERDAHL, Mr. HOWARD, Mr. ALBOSTA, Mr. LONG of Louisiana, and Mr. MITCHELL of Maryland.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3364: Mr. AKAKA.

SENATE—*Wednesday, October 28, 1981*

(Legislative day of Wednesday, October 14, 1981)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

Rabbi Bernard S. Raskas, Temple of Aaron, St. Paul, Minn., offered the following prayer:

God of our fathers and mothers, God of us all, we ask Your inspiration and guidance as the Members of the U.S. Senate begin their deliberations upon the weighty matters of the day. Be with them as they deal with the torn and tangled issues before them. Give them the strength of conscience, the balance of judgment, and the wisdom to compromise. Let each be steadfast to his or her conviction and yet respectful and mindful of the convictions of others. May there always be harmony and helpfulness in this Chamber. May its decisions be for the good of our country and the peace of the world. Whatever it be, may we always be the United States. May God's blessings of peace be upon us here today and everywhere else on Earth. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, the Senate, under the previous order, will proceed to the resolution of disapproval of the arms sale package to Saudi Arabia at 9 a.m. The time for the two leaders has been reduced to not more than 5 minutes each under an order entered last evening, with a brief period for the transaction of routine morning business at the expiration of the time of the two leaders.

Mr. President, I have no need for my time this morning, and I am prepared to yield it to any Senator or to yield it to the control of the distinguished acting minority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. CHILES. Mr. President, the minority leader has no need for his time. He is prepared to yield it back.

Mr. BAKER. Mr. President, I yield back my time under the standing order.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

THE MENTAL HARM CLAUSE OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, today, I should like to examine the interpretation of the mental harm clause in article II of the Genocide Convention.

The Liberty Lobby's "white paper on the Genocide Convention" alleges that this clause will:

Inhibit law enforcement agencies from taking action against any identifiable group;

Subject this Nation to prosecution before the world court for our racial segregation policies prior to 1954; and

Curtail our freedom of speech by inhibiting authors who fear they may inflict mental harm on a group of readers.

Mr. President, these allegations are completely false and I intend to prove it point by point.

But, first, it is important to look at the exact wording dealing with mental harm in the Genocide Convention. Article II states:

> In the present Convention, genocide means any of the following acts committed with intent to destroy in whole or in part, a national, ethnical, racial or religious group.

Subsection (b) defines one of the prohibited acts as "causing serious bodily or mental harm to members of the group."

Mr. President, to the extent that there was ever any ambiguity regarding this phrase—and I do not believe it is vague at all—that question was resolved by the understanding recommended by the Senate Foreign Relations Committee defining serious mental harm as "permanent impairment of mental faculties."

According to former Ambassador Charles Yost:

> This standard is rigid enough to discourage frivolous allegations of genocide through mental harm.

But the Liberty Lobby thinks differently. So let us examine each of their arguments in turn.

Their first point—that law officers might be inhibited to take action against any identifiable group for fear of being charged with genocide—is absurd. Why? The Liberty Lobby is ignoring the basic definition of genocide contained in the treaty. What does it say? To be convicted of genocide, an individual must commit this act with the intent to destroy—let me repeat that: Intent to destroy, in whole or in part, a national, ethnical, racial, or religious group. Under our Constitution, laws could not be enacted with intent to destroy groups within our society.

Therefore, there is no chance—and I mean none—that routine law enforcement could ever meet this treaty's definition of genocide.

Their second argument—a fear that racial segregation policies prior to 1954 might be held as genocide by a world court—is impossible. This treaty is simply not retroactive. Not in any way.

Finally, the argument that freedom of speech might be curtailed as authors worried about inflicting mental harm on groups of their readers is also ridiculous. The understanding recommended by the Foreign Relations Committee classifies mental harm as having inflicted permanent impairment of mental faculties for a substantial portion of the group. In addition, as I have noted earlier, an individual's intent to commit genocide would have to be clearly established.

Mr. President, even the American Civil Liberties Union, which places utmost priority on preservation of constitutional guarantees, does not draw this spurious connection between the mental harm clause and loss of freedom of speech. They stand firmly behind this treaty, convinced that our constitutional freedoms remain intact.

In short, these allegations are unfounded on every count.

Mr. President, with each passing year, the support for the Genocide Convention continues to grow. As the American Bar Association recognized in 1976, the objections raised in opposition to this convention have simply not withstood the test of time.

Mr. President, the American Bar Association was courageous enough to admit their mistake in opposing the convention. I hope that, someday, Liberty Lobby will display that same courage.

Mr. President, I urge my colleagues to join with me in seeking ratification of the Genocide Convention.

A TRIBUTE TO DR. ROBERT LEBARON

Mr. THURMOND. Mr. President, today I am issuing a special tribute to Robert LeBaron, a great scientist and industrial consultant, on the occasion of his 90th birthday on October 31.

Dr. LeBaron, often aided by his lovely and charming wife Peggy, is a man who has pursued many interests. He has been termed by Newsweek magazine "the versatile man on the wave of the future." In fact, his Government career was carried on continuously under four successive Secretaries of Defense, and his work for national security was so vital and so highly classified that he was once known to the Washington press corps as "the mystery man of the Pentagon."

Born in Binghamton, N.Y., the young Bob LeBaron went on to graduate from Union College in 1913 with a bachelor of arts degree in chemistry and electrophysics. He received his master of science degree from Princeton University and later went, from 1919 to 1920, to study at the Ecole Nationale Supérieure des Mines at the Sorbonne in Paris, France. He has received two honorary doctorates from Union College and Thiel College.

His most vital work—work for which all Americans can be grateful—started in 1949 when he joined the Department of Defense as deputy to the Secretary of Defense on atomic energy matters. In October of that year, he was nominated and later confirmed by the Senate as the first Chairman of the Military Liaison Committee to the old Atomic Energy Commission.

In his dual role, he was charged with developing atomic policy on all matters relating to the Department of Defense, and for supervision of the separate atomic energy activities of the Army, Navy, and Air Force. As a direct result of his extensive work in this area, he was awarded the highest civilian award of the Department of Defense for outstanding services in the development of a coordinated atomic energy program for the national security.

In 1954, Dr. LeBaron returned to private life in Washington, D.C., as an independent consultant on financial and technological developments relating to peaceful nuclear energy use.

That same year, he began a parallel adventure as a kind of ambassador at large for the Nation he loves. He was designated by the Department of State as a U.S. special representative to the World's Fair exhibition commemorating the 400th anniversary of São Paulo, Brazil.

After this trip, he undertook numerous trips to foreign lands to support and promote responsible nuclear power. These good-will visits were experiences which gave him an intensive knowledge of the desire of Western and other nations to participate in the peaceful development of atomic energy.

Since 1955, Robert LeBaron has served as an adviser to various financial groups and corporations in connection with private industry's evaluation of the uses of nuclear power. Among his clients have been business interests of Laurance Rockefeller, Vincent Astor, and Harvey Firestone. He also has been a longtime member of the U.S. Chamber of Commerce Committee on Commercial Uses of Energy.

Dr. LeBaron is also well known for his yeoman work on behalf of LeBaron Associates, a Washington, D.C., firm which was organized, in his words, "to analyze and evaluate equity possibilities of new scientific and technological developments."

I believe—and my colleagues who also know Dr. LeBaron will agree—that his immense contribution to industrial development in this Nation has been his ability to combine scientific knowledge with management skills and a long-range philosophy regarding the economic potential of nuclear power.

He is truly an elder statesman of the atom, and I salute him on his 90th birthday. Robert LeBaron continues to serve as an excellent example for young scientists to emulate, especially since it was his combination of experience and understanding that helped him make America a better nation.

We wish Dr. LeBaron and his gracious and beautiful wife Peggy good health and happiness in the years ahead. May they continue to build international good will and peace through their bonds of friendship throughout the world.

On October 27, Joint Chiefs of Staff Chairman David C. Jones gave a dinner at the Pentagon in honor of Dr. LeBaron. Mr. President, I ask unanimous consent that the brochure printed for this occasion be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A TRIBUTE TO DR. AND MRS. ROBERT LEBARON

In 1898, seven-year-old Bob LeBaron marched in the parade in honor of Teddy Roosevelt, the hero of San Juan Hill, and his Rough Riders, as most of the 20,000 citizens turned out in Binghamton, N.Y. to support Teddy's run for the governorship. His dad and three uncles (the popular LeBaron quartet) were barbershopping "A Hot Time in the Old Town Tonight."

He followed the campaign train all summer long. He learned to be quiet and unobtrusive and to remain as invisible as possible—qualities which served him egregiously later in life. Robert LeBaron never abandoned the habit of looking, listening, learning and remaining as invisible as possible. Through all the positions of power that he held, few people knew the weight of his influence or the extent of his authority.

Bob went to Union College where he studied under Charles Proteus Steinmetz who was teaching electro-physics. He worked scrupulously. Symbols and theory became clear. His work laid the solid foundation which enabled him to stay in the forefront of science all his life.

Music already had a strong appeal for him.

He became a star member of the cross country team. In 1911 and 1912 he held the New York State record for the half mile. In 1912 he made the olympic track team to Stockholm, Sweden and subsequently held the world's 1,000 yard record (2 minutes and 12 seconds). His entire life he continued to insist and persist in keeping his body exercised and in good health.

He won a scholarship to attend Princeton University. His classmates were the likes of Karl and Arthur Comptons, Harlow Shapely, Alan Dulles and Lowell Thomas. At Princeton Bob spent two years in chemistry. In 1916 he changed to physics. As a student there he and his friends frequented New York City to attend the Metropolitan Opera house performances and the theater.

In 1917 they all "went off to war". LeBaron became a lieutenant in the Third Field Artillery. At that time the Army did not have enough men to go around, so Bob did double duty. In addition to his lieutenant duties he served as ceremonial officer of the artillery group—a very important role in the Army then. That put Bob as number 186 on the officers list—a senior officer. Had anyone told him that 30 years later he'd have over 100,000 officers under him at the Pentagon he would have laughed at them.

In 1917 he attended a big dinner in Coronado to celebrate a proud achievement—four airplanes had been able to stay aloft for 15 consecutive minutes.

In 1917 he became the Military Staff Aide to President Wilson. Throughout the spring and summer he shuttled back and forth from Ft. Myer to the White House on a sort of semi-detached duty. President Wilson, ex-president of Princeton, took a liking to this young Princeton instructor. Wilson, 50, who disliked talking to men of his age and older, found himself completely at ease with the unassuming, perceptive, intelligent and ever-alert military aide.

During the fall of 1917 the Third Field Artillery was sent to Alabama to set up Camp McClellan. Then Bob and his company went to Camp Sill, Oklahoma, for artillery training before embarking for France. In July 1918, together with 5,000 members of the AEF, they piled on the CORONIA (built for 800) and set off for Europe. It was a harrowing trip. The old hulk survived two submarine attacks and zig-zagged so far North trying to outwit others that it took 16 days to reach Liverpool.

Later, in one of the bivouac areas in South England, Bob ran into Rudyard Kipling who was collecting garbage as his wartime duty. That was the Queen's punishment for Kipling's prediction of the end of the British Empire.

Bob and company embarked for France. From LeHavre they were taken to Val De Mont to learn the French school of fire (75mm vs US's 3-inch pieces). The next move was to Sedan, right in the middle of the biggest World War I action, where they saw six weeks of fighting. Problem was not to fight the Germans, said Bob, "it was to keep the damn equipment on the road—to get it up where we could shoot it." Troops blocked the narrow roads. Wherever French soldiers ran into an American road-block, they would throw the Americans guns into the ditch. The Americans would retaliate. Feelings ran hot. Everyone learned the other's best curses. There was no one to administrate the right of way.

After Armistice Day on New Year's Day 1919, Bob was ordered to Paris and informed that he could finish his studies. He enrolled in the Sorbonne to work under Mme. Marie Curie to research radiation. That spring he received his doctorate. What next?

President Wilson came to Paris in June for the Versailles Conference and immediately requisitioned Bob as a staff member of the US delegation. Bob attended to the President's basic needs: locating bathrooms, keeping a chair always nearby for the President, carrying messages back and forth. As a member of the US delegation he was persona grata everywhere.

In October 1919 he arrived to an entirely different US and was faced with the immediate imperative of having to earn a living. Finally he found a job with Arthur D. Little in Cambridge, Mass. The firm's masthead, interestingly enough, bore the slogan: "You Can't Make a Silk Purse Out of a Sow's Ear. But Arthur D. Little Can." And he did. Little thought big.

Bob was on Little's wavelength. Thinking 10–15 years ahead came naturally to him. Still, he was deeply influenced by his employer's habit of long range planning. Chemistry was just learning about polymers. Today polymer chemistry is the basis of a mammoth chemical industry. They also fixed their sights on other complicated fractions (from oil and gas): propylene, butylene, and beyond.

Bob was chosen to make convincing, on-scene presentations to firms around the country to sell the idea of research and development and how his firm could help others. The concept was too far advanced for its time. He claims today that he was thrown out of more offices than any man of the era. Still he piled responsibility upon responsibility. It seems that there was never a hat that wasn't made to his measure.

In 1926 Little joined in a group venture to develop petro-chemicals; they were the pioneers of today's vast petro-chemical industry. They set up Bob as Technical Vice President and moved him to an opulent headquarters on Wall Street. The scientist became an industrialist. He commuted between Oklahoma and New York City. The company merged with Standard Oil of New Jersey.

Bob found many things to be grateful for in New York, premiere among these was his acquaintance of a vivacious blonde dancer by the name of Peggy Bancroft—"as bright as she was beautiful". Their shared love of music and theater drew them together. But soon Peggy also became conversant with all of Bob's interests—a situation and attitude which she made sure continued throughout their lives. By October 14, 1926, they were married.

Peggy's history is as interesting as Bob's. She still speaks excitedly of the time she left home at the age of 18 with only $100.00 in her possession—money she was able to borrow from a friend's parents. She held "a good many jobs" including, she does not mind letting anyone know, a job as a peddler on Wall Street. Finally, she began to work with Rogers and Hart (later Hammerstein took his place), danced with the Ziegfeld Girls and played opposite Eddie Cantor.

She did many New York City shows. She was the featured singer-dancer in "Dearest Emmy" (1925) and "Sunny" (1926). And she performed in "Rosalie" (1928) and "Whoopee" (1929). She played in many great shows of her time: "Ripples" (1931), "Here Goes the Bride" (1931), the memorable and extended hit "Of Thee I Sing" (1932), "Pardon My English" (1933), "Let 'Em Eat Cake" (1934), "Merrily We Roll Along" (1936) were all performed in New York City. Peggy never went "on the road" because she did not want to leave Bob.

Bob's feeling for music, deepening with the years and stimulated by Peggy's efforts, led to more time spent on playing the piano, experimenting with song writing. He also worked on his compositions in the office in between appointments. Songs written by Bob were often part of Peggy's singing program.

On Wall Street the prospects of Petroleum Chemical Corporation began to steadily dim. Depression loomed in the future. Many firms were closing their doors by 1930. What should they do next? Bob knew he wanted to concentrate on music and learn all there was. Peggy, who are never without a job, agreed.

The LeBarons decided to put their $17,000 in assets into the National City Bank and take a chance on music. For the next five years Bob struggled under Dr. Frederick Schlieder, studying Bach, Brahms, Beethoven, others, identifying always with the rhythms, tone quality harmonic structure of the melody. He developed a greater harmony within himself. The tension between art and science released itself.

He started to work for NBC radio where he did scoring. He worked with a few groups moving in the direction of classical music, a forerunner of a trend that culminated with Toscanini and the great Sarnoff concerts.

In 1936 business recovered its health.

Bob had accomplished everything he had set out to accomplish in his musical training. At 45 he didn't feel music was his destiny and he had a great urge to go back to chemistry. Through friends he met and subsequently went to work for Augustus Eustis of Virginia Smelting, which specialized in two refrigerants (pressurized gases): sulfur dioxide and methyl chloride. Bob quickly found the main weakness of the industry: there was no orderly chain of supply, no concerted effort to service and expand the market. There was also the nagging question of Freeon—a Dupont monopoly. Then it struck him, why not set up an agency equipped to provide help of all kinds at all times to the dealers. This would allow manufacturers to concentrate on Research & Development. Dupont was quite willing to let Bob handle the headaches of distribution.

He was also a key person in setting up fellowships for universities to support students who would then support advanced research and development.

In December 1941 he came to Washington DC for a "short" conference. Three days later, Pearl Harbor. The transient room was their home until after the war. Today it forms part of their suite. President Roosevelt appointed Bob as one of the first dollar-a-day man. He was assigned to the War Preparedness Board to build the chemical supplies stocks.

Bob's rare combination of imagination, experience and contacts catapulted him to the top levels of government immediately. Robert Patterson, Secretary of War, had been his classmate at Union College; James B. Forestal, Secretary of the Navy, had been his pupil at Princeton. No need to go through channels—the doors of Army and Navy were always open to him. He soon found himself on the Requirements Committee of the WPB allocating products for both military and civilian use.

Peggy continued her activist role throughout this period. She sang with the Navy Band at the Stagedoor Canteen. But, most importantly, she ran an Army radio program at Walter Reed called "Peggy and the Soldiers". Of special concern to her were the too many amputees. These men were in the midst of a physical and psychological Waterloo. They felt bitter about their condition, and though, "The Government got me into this. The Government can take care of me for the rest of my life." Hence they refused to use their artificial limbs. Peggy put them on her radio program to help her as well as to allow them to use their talents. The resultant fan mail (aided by the not insubstantial charms of a number of attractive Red Cross girls) changed their attitudes and helped them move towards recovery.

After the war Bob continued as a full-fledged partner of Eustis at Virginia Smelting but also became the first Executive Consultant in the U.S. by signing a very lucrative contract with Standard Oil of California as Technical Advisor to the President on Petro-Chemical matters. The chemical field was wide open. Bob helped to develop compounds which were both strong cleaning fluids yet would dissolve in water. Then he helped to market gasoline and luboils. His confidence in chemical products was brilliantly substantiated. The products turned out to be about four times as effective as animal fats. Furthermore, it was reliable in performance, could be counted on for the same effectiveness every time, and had reliable prices, whereas animal fats went up and down in both of these important sectors. With skill and ingenuity he ended up with contracts with the three giants of the U.S.: Proctor & Gamble, Lever Brothers, and Colgate.

Successively all the petroleum fractions and all the waste gases were transformed by the magic of chemistry into profitable derivatives. Twenty years had elapsed since young LeBaron's first forays as an itinerant preacher for petro-chemicals. But never once during the years of discouragement had LeBaron's faith waivered. This was an outstanding characteristic of his entire professional life—to stay with his vision no matter where it led. It never failed and eventually led to a successful conclusion.

The LeBarons kept to their health schedule of tennis, badminton and long walks; daily exercise of some sort throughout the years, determined to make the number one priority keeping fit. Their attitude has always been, if God gave you your life and your body, the least you can do is to keep it in good shape.

In 1949 William Webster, Chairman of the Military Liaison Committee between the Defense Department and the ABC, came to offer Bob his job. Trying to reconcile the conflicting demands of Army, Navy, Air Force, State Department, Congressional Joint Committee on Atomic Energy and the Atomic Energy Commission—each jealous of its own prerogatives and suspicious of enroachment—would be a job of responsibility, work and worry: the kind of challenge that excited him.

Bob was scarcely in his new office before a WB–29 weather reconnaissance plane on a routine patrol from Japan to Alaska picked up measureable radioactivity over the Kamchatka Peninsula. Further sampling and analysis yielded shattering news. The Russians had exploded a nuclear device. Gone was the 10-year margin of safety and the nuclear monopoly of the U.S.

General Omar Bradley, Chairman, Joint Chiefs of Staff, introduced Bob to the JCS and their staffs. Bob set to work immediately on a study of the Defense Department war plans as they related to atomic weapons. The Soviet accomplishment demanded an immediate speed-up in our nuclear stockpiles.

The Soviet explosion, in cancelling our nuclear lead, highlighted a scientific hypothesis which took a quantum jump beyond fission—to the fusion of light nuclei. If a fission chain reaction could be made to reproduce the heat of the sun in the laboratory, would a chain reaction ensue? Seminars were held on fusion. Once into the complicated, frustrating business of discipling the chain reaction into a bomb, however, problems of geometry, metals, cladding and coolant, made it clear that all our skill and effort would be needed to make a fission bomb. General Bradley took the position that if there was any possibility that a more powerful weapon could be developed, the U.S. should be the first to do it.

Conflicts over the advisability of staging a crash program for the "super" heightened. Chairman LeBaron realized the "the technical situation in fusion was exploratory, experimental, and doubtful of outcome." It was imperative to push the program of Atomic Bomb production; to pursue the complicated experiments and tests for variations in size, geometry, and power of the fission bomb. The grave question was whether our nation's resources were equal to the tremendous burden—greater than those involved in the original development of the Manhattan Project. Yet all of his experiences oriented him toward a crash program no matter what the uncertainties.

All the pros and cons of pushing through a crash program on the "super" would be thrashed out in meetings of the Combined Policy Committee. The results of these discussions would be submitted to the President. He would make the final decision.

When Congress convened, January 1950, the Joint Committee went to the then Chair-

man McMahon who read a 5,000 word letter he had sent to the President urging a swift decision to proceed with the "super". The Joint Committee approved the letter and concluded that a recommendation be sent to the President after a hearing with Defense representatives, the AEC, and the members of the GAC.

The "super" broke on the air waves via Drew Pearson on January 15 and into page one headlines by James Reston in The New York Times two days later. It was imperative to move fast with the Presidential announcement.

On January 20, LeBaron and Gen. Bradley discussed the policy issues with the full Congressional committee. The directness and clarity of Bob's exposition quickly convinced the Joint Committee that money should be allotted to build the additional production plants needed for the "super" even while tests were underway. With Defense and the Joint Committee on the side of the "super", Secretary of State Acheson felt that the push for a decision had become too strong. Further delays would only sharpen the controversy. State recommended no crash program but a deliberate attack to determine the feasibility of the weapon within three years. It remained only for the President to make his decision and put an end to rumor.

LeBaron was asked to write a draft statement that President Truman could issue on 30 January 1950. The statement went to the White House at 10 o'clock. At noon it was on the teletype. The words were clear, simple and direct:

"It is part of my responsibility as Commander in Chief of the Armed Forces to see to it that our country is able to defend itself against any possible aggressor.

"Accordingly, I have directed the Atomic Energy Commission to continue its work on all forms of atomic weapons, including the so-called hydrogen or super bomb.

"Like all other work in the field of atomic weapons, it is being and will be carried forward on a basis consistent with the over-all objectives of our program for peace and security."

"This we shall continue to do until a satisfactory plan and international control of atomic energy is achieved. We shall also continue to examine all those factors that affect our program for peace and this country's security."

LeBaron stressing the need for urgency demanded that enough H-bomb fuel be produced at the outset to provide not only for test requirements but for the fabrication of small scale weapons if the test proved an H-bomb possible. At the same time he pushed for increased production of fissionable materials for atomic bombs by expanding existing reactors and getting appropriations for new ones. He was convinced that the problems of size and weight that restricted nuclear weapons to Air Force delivery would yield to stepped-up research and more abundant experimental material. He clearly foresaw tactical atomic weapons small enough for guns and ships.

On September 21, 1950, General George C. Marshall succeeded Louis Johnson as the nation's third Secretary of Defense. General Marshall and Bob LeBaron got along famously. Part of the initial exchange bears repeating:

"I'd like to begin by exchanging idosyncrasies," said the Secretary. "Helps us understand each other. What are yours?"

"Well," replied Bob, "I would like to get out of here by 5:30 in the afternoon."

"That won't be any problem, Mrs. Marshall picks me up at 4:30 every day." The Secretary leaned forward. "I'll tell you something. No decision around here is any good if it's made after four o'clock in the afternoon because we'd only have to do it all over again next day."

In dealings with others, Bob's stock cut-off to any seemingly unsolvable dispute was, "Well, let's go and see the President." Naturally the suggestion was never followed but everyone knew it was no idle boast: LeBaron could walk in to see the President any time without intermediaries.

The press was perplexed by Bob's prestige. In Washington, where every government committee was constantly scrutinized for newsworthy stories, the Military Liaison Committee was rarely heard of, yet there was a sneaking suspicion that its Chairman was behind many a Pentagon decision. LeBaron did his utmost to keep his committee inconspicuous. He kept the tempo fast and the activities secret. There were no leaks or inspired back-biting in the press. And he downplayed his role in order to remain anonymous. Riding to see the President he would crouch down on the floor of the car for invisibility and slip in the back way to avoid reporters. The press dubbed him the "Mystery Man of the Pentagon."

Bob gives great credit for his accomplishments to the "enormous advantage, after Marshall came, of having a very wise team with Marshall, Bradley and Acheson and Lovett to deal with . . . and a President who would back you up. It was a team where you didn't have to worry where you stood. We didn't have to deal with anybody and there were no press involved."

On June 25, 1950, communists attacked South Korea. President Truman acted swiftly. By July US troops were again fighting on foreign soil. Shortages of material and manpower soon began to manifest themselves. This increased the pressure on LeBaron, who felt that nothing could be allowed to interfere with the nuclear effort. He stepped up his drive to expand production. He pressed even more insistently for increased numbers and types of nuclear weapons. Nor could he permit the thermonuclear project to lag behind. As 1950 drew to a close, demands converged on LeBaron from all sides. The Air Force clamored for a nuclear powered airplane. The Navy called for a nuclear powered aircraft carrier.

The overall priorities in LeBaron's area of responsibility were firmly set in his own mind: (1) to increase the amount of fissionable material; (2) to keep conflicting demands for this strategic material in realistic balance for weapons, for submarine reactors, aircraft reactors, carrier reactors; (3) to move gradually in the direction of industrial reactors to compensate for the coming shortage of electric power that he clearly foresaw. To achieve his many ends LeBaron had to massage the egos of some of the primadonnas of physics, including Edward Teller. He succeeded in this area as well.

In mid-October 1952 LeBaron flew to Honolulu on the way to Eniwetok, Marshall Islands, where the first H-bomb test was to take place on 1 November.

It was just before dawn, on November 1, 1952. LeBaron was flying in an old World War II plane, the type where the guns came out over the top which could be used as a look-out. The plane was positioned about 11 miles from the shot at an altitude of about twelve thousand feet. Suddenly the heavy grey silence was shattered by a deafening blast, the sky exploded with color—a brilliance that held for maybe five minutes or more, LeBaron remembers. He knew a tremendous power had been released, and he braced himself for the following shock waves. Nothing happened. The plane remained as steady after the shot as before. He looked at the radiation instruments. Nothing had registered. No radiation had touched the plane. When the plane landed at Kwajalein for refueling on the way back to Washington, some 200 miles down the line, the Admiral who met them at the strip said, "What in the name of Hell is going on down there?" The roofs were blown off the buildings. Trees were down. The place was a shambles.

But that's not the end of this story.

The unpredictability of shot effects was further corroborated in 1970, when the LeBarons were at a dinner party with General McConnell, who had been CSAF Feb 65-July 69. They were discussing the MIKE shot, and McConnell said, "Yes, I was there. I was one thousand feet below you, and we had the most unbelievable time keeping our airplane aloft. I could hardly fly the damn thing. It dropped so fast—I just got it out of a dive and a spin and everything else about 1,000 feet above the ocean."

Apparently the shock wave had missed LeBaron's plane completely, but had hit everything else in sight. By the time Bob arrived at the Pentagon, the news had preceded him. There he learned the size of the shot, and the fact that it had taken out the whole island, leaving only an enormous water-filled hole in its place.

General Marshall's reaction was encapsulated in the following musing:

"We're seeing the end of war. We're right at the end of war as an instrument of national policy for security. Big wars. Nobody will ever fight big wars when things like this are available, because the whole concept of mass fighting, of infantry, of course goes out the window. The whole thing has to change. You have to fight as the Indians did."

In addition to his other obligations, Bob had been working during 1952 on a program for civilian uses of atomic energy. He had long had the idea that a study should be made of peaceful uses to counterbalance the horror of military applications. On May 20, 1954, came his opportunity to communicate his ideas to the nation, in an address at the dedication ceremonies of a new Industrial Research and Development laboratory. The speech made headlines across the country and an impact around the world. Sometime later he told Secretary of Defense Charles Wilson that he would leave his government post. The two then set a definite date for his departure: August 1, 1954.

When he left the Department of Defense in 1954, he was accorded the rare distinction of a special award, presented collectively by the civilian Secretaries of the DOD, the Joint Chiefs of Staff, the Commissioners of the Atomic Energy Commission, and the 18 members of the Joint Committee on Atomic Energy of the Congress. He added this unusual honor to the one received earlier in January 1953, which was the highest civilian award given by the Department of Defense for distinguished public service.

In 1954 he turned his energies toward a study of the relationships between the technological "breakthroughs" emanating from the accelerated defense weapons' programs, and their potential in equity profit. He organized a study group to evaluate the investment possibilities inherent in peacetime uses of atomic energy. It was his great desire to turn the force of atomic energy into peaceful uses. Many industrialists shared this vision. He and his group of specialists were hired by a sort of "consortium" of industrialists like Vincent Astor, Henry Ford, the Mellons, and Harvey Firestone. They were going to research what could be done in this area.

He "always wanted to be a consultant," says his wife Peggy, and that's really what he did from 1956 to the present. He advised industries, but he also founded and became the Managing Director for LeBaron Associates, Washington, D.C., a partnership organized to analyze and evaluate equity possibilities of new scientific and technological developments.

In addition, in 1961 he established and became Managing Partner of the Norabel

Fund, Washington, D.C., an investment partnership which supports technological "breakthroughs" in its continuing study of accelerated programs and their potential for investments.

The LeBarons unique philosophy of life and abiding interest in peoples of other countries, their cultures and their problems, coupled to their uncanny vision, breadth of understanding and unlimited energies have come into a lifetime focus in a number of related activities.

ENVOI

An exhilarating and fruitful life, then, lived to its fullest by both Bob and Peggy LeBaron. Neither leaving the other's side, and both still living in that Washington-Sheraton suite they walked into for their original three-day sojourn in 1941. Inside, they have walls and shelves filled with mementos, memories, thank-yous and faces of the very great in our Nation's history. Outside, they enjoy their philanthropic activities and the warmth and admiration of their friends and of all who come into contact with them.

Surely both must have read Horatio's exhortation: "Carpe Diem. Ne credula posteri"—colloquially, "Live today. Don't wait 'til tomorrow." If they didn't read it, well, then they invented a classic American version of it.

THE SECRETARY OF DEFENSE,
Washington, D.C.

Hon. ROBERT LEBARON,
Washington Sheraton Hotel,
Washington, D.C.

DEAR BOB: Best wishes on your 90th birthday! You have much to be proud about today—not the least of which is a fine record in serving four Presidents and their Secretaries of Defense through a host of key issues.

Though I am very sorry I cannot attend the luncheon given in your honor by General Jones, I would like to wish you the very best on this important occasion.

Sincerely,

CASPAR WEINBERGER.

THE WHITE HOUSE,
Washington, October 26, 1981.

Hon. ROBERT LEBARON,
Washington Sheraton Hotel,
Washington, D.C.

DEAR DR. LEBARON: Nancy and I send our warmest congratulations as you celebrate your 90th birthday.

You have much to be proud of and to fondly recall in the midst of your friends at this special tribute. Your outstanding service to four Presidents—Wilson, Roosevelt, Truman and Eisenhower—is well known and has earned the respect and gratitude of all who know you.

Athough I am unable to attend your birthday luncheon, I'm with you in spirit for the happiest and most memorable celebration ever. My very best to you and Mrs. LeBaron in the years to come.

Happy Birthday!

Sincerely,

RONALD REAGAN.

THE VICE PRESIDENT,
Washington, October 28, 1981.

Dr. ROBERT LEBARON,
The Sheraton-Washington Hotel,
Washington, D.C.

DEAR BOB: Congratulations to you on the occasion of your 90th birthday. What an outstanding career you have had. Your accomplishments and contributions to this nation are rivaled by few.

Both Barbara and I send our very best wishes for a happy birthday and many happy returns of the day.

Sincerely,

GEORGE BUSH.

Mr. THURMOND. Mr. President, I yield to the able Senator from Nebraska. Senator ZORINSKY.

Mr. ZORINSKY. Mr. President, I wish to thank my colleague from South Carolina.

IN TRIBUTE TO DR. ROBERT LEBARON

Mr. ZORINSKY. Mr. President, in our line of work, it is refreshing occasionally to come in contact with someone who thinks, not of the next election, but of what is best for the next generation. The man we are pausing to honor at this time is just such an individual—and a good friend as well.

Dr. Robert LeBaron, who celebrates his 90th birthday on Saturday, has been called a man "on the wave of the future." No description could be more fitting. Since the opening of the atomic age, Dr. LeBaron has been in the forefront of efforts to harness nuclear power and put it to constructive use for the betterment of our Nation and of all mankind.

Starting in 1949, this professional chemist served as Deputy to the Defense Secretary for Atomic Energy Matters and as the first chairman of the Military Liaison Committee to the Atomic Energy Commission. Later, he served as a consultant on financial and technical developments relating to peaceful nuclear energy use.

An unofficial "ambassador at large," Dr. LeBaron undertook numerous goodwill trips for the Nation in support of responsible nuclear power. And he has served as a nuclear power advisor to private industry as well.

And, Mr. President, Dr. LeBaron's interests and abilities do not just begin and end with nuclear power. A talented athlete at Union College in Schenectady, N.Y., he served on the U.S. Olympic Track Team in 1912 and has also been a pianist and composer.

For 2 years in the 1930's, he arranged and conducted music for radio and for several more years he was a member of the visiting committee of New York University's Fine Arts Department.

And, today, as a resident of Northwest Washington, Dr. LeBaron maintains an active interest in music, swimming, and tennis as well as nuclear power.

Mr. President, I know my colleagues on both sides of the aisle will want to join Senator THURMOND, Senator HATFIELD, and me in wishing this most versatile individual a happy 90th birthday this coming Saturday. And I know they will want to join me in wishing Dr. LeBaron many more enjoyable birthdays in the future.

But most of all, Mr. President, I know my colleagues will want to join me in paying tribute to one who has done so much to aid in the development of responsible nuclear power in this country and around the globe. Dr. Robert LeBaron and his wife, Peggy, are truly people who have "ridden the wave of the future" and kept their eyes focused on what is best for future generations of Americans. And for this, we all owe them a deep debt of gratitude.

Thank you, Mr. Chairman. I yield the floor to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I believe I have about 4 minutes left. I have reserved that time for Senator HATFIELD, who desires to present some remarks.

TRIBUTE TO DR. ROBERT LEBARON

Mr. HATFIELD. Mr. President, we have the privilege today of recognizing the achievements of Dr. Robert LeBaron as we join him in celebrating his 90th birthday.

Dr. LeBaron has combined a devotion to his work on the cutting edge of atomic science with a concern for the human effects of technology. This highly esteemed scientist has also demonstrated a commitment to the arts, an indication that he is a truly versatile asset to his country.

Born in the central New York town of Binghamton, Robert LeBaron studied chemistry and physics at Union College. He received his masters in physics from Princeton University in 1917 and went overseas to study radiochemistry at the Ecole Nationale Superiere des Mines at the Sarbonne in Paris.

Following several years of work in industry, his technical expertise and military experience were employed during World War II as a member of the War Production Board. After the war, he continued to serve America in the rapidly expanding field of atomic energy. He played a key role in setting atomic policy for the Department of Defense and for each of the services. He was instrumental in the development of a coordinated atomic energy program for national security.

He has also served, at various times, as a representative for the National Security Council and the State Department. The United States is particularly indebted to him for the many occasions on which he represented the Nation abroad as an advocate for the peaceful use of atomic power.

Upon the completion of his many years of distinguished work in the Government, Robert LeBaron shifted his many talents to the private sector. He is a managing director of LeBaron Associates and a managing partner of the Norabel Fund. These organizations have analyzed and encouraged scientific and technological breakthroughs for the past 20 years.

In addition to his efforts as a nuclear scientist, our guest is the president of the LeBaron Foundation. The foundation, established in 1961, is dedicated to constructive works in the arts, sciences, and humanities.

These many accomplishments have not gone unnoticed. Union College and Thiel College have both presented Dr. LeBaron with honorary degrees, and the Department of Defense has given him its highest civilian award for his work there.

I am grateful to Dr. LeBaron for the role he has played as a pioneer in the nuclear field who has labored long and hard for the advancement and wise use of technology. On this, his 90th birthday, all Americans join in thanking Robert

LeBaron for his steadfast service to our country.

MARIACHI COBRE

Mr. DECONCINI. Mr. President, I rise for the purpose of calling attention to the Mariachi Cobre, a group of young men from Arizona, who have recently been selected as the most outstanding Mariachi group in the country. They have spread good will throughout the country and have heightened a cultural awareness of a very important part of our society.

The members of the Mariachi Cobre are: Randy Carrillo, Steve Carrillo, Mack Ruiz, Jim Acuna, Frank Grajalva, Roberto Martinez, Pat Carreon, Fernando Blast Sanchez, and Fred Tarazon.

The week of October 19, 1981, was designated as Mariachi Cobre week in Tucson, Ariz. I heartily recommend that if my fellow Members of the Senate should ever have the opportunity to see them perform, you should certainly take advantage of that opportunity. It will be a thoroughly enjoyable experience.

WHIP INFLATION NOW

Mr. ROBERT C. BYRD. Mr. President, according to press reports, the administration has hit upon a sure-fire way to reduce inflation painlessly: They plan to change the way it is measured. Evidently, the last 3 months of double-digit inflation convinced the administration that its bankrupt policies of high interest rates, high unemployment, and tight money would not bring inflation down. Promises of lowered inflationary expectations if Congress enacted David Stockman's economic program have fallen with the autumn leaves, so the decision was made to grab the bull by the horns and make a statistical adjustment in the Consumer Price Index.

Economists and statisticians have long argued about the pros and cons of the Consumer Price Index, but none of them has told us how changing the way inflation is measured will make it easier to buy a new home or to make payments on a new car. Perhaps the CPI has overstated inflation because of its heavy use of interest rates, but has the CPI overstated the damage these interest rates have done to our housing and automobile industries? Has the CPI overstated the disappointment that young couples feel when the promise of owning a home turns into nothing more than a lost dream?

The CPI may be adjusted, and it may show slower inflation, but the changes cannot make the economy work better, or lower the impact which inflation has on our citizens. Perhaps the administration should begin to pay closer attention to the contradictions and bad numbers in its own economic statistics rather than worrying about ways to make it look like their programs are succeeding in whipping inflation now.

Mr. President, I ask unanimous consent to have printed in the RECORD an article published in the Baltimore Sun of October 27, 1981.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. TO CHANGE HOUSING SECTION OF PRICE INDEX

WASHINGTON (NYT).—The government plans to announce today that it will rewrite the much-criticized housing component of the Consumer Price Index, a move that would eventually affect cost-of-living increases for millions of Americans.

The change, Labor Department officials said yesterday, is aimed at eliminating from the index the distorting impact of mortgage interest rates and overemphasis on housing. These have resulted in the overstatement of the overall inflation rate in times of high interest, and ultimately higher government spending.

Over time, the officials said, the revision in the housing component should mean smaller increases in the CPI and, in turn, smaller cost-of-living increases for Social Security recipients and those on federal pensions and for workers whose wages are tied to the CPI. This could lead to smaller increases in government spending.

The main change will be to move from the present housing component, which includes house prices and mortgage interest rates directly, to one that measures the cost of shelter with some sort of rental equivalent.

Administration officials said the new measure would not be effective until sometime in 1983 because of the need for the Bureau of Labor Statistics, which compiles the CPI, to give adequate notice.

Dr. Janet L. Norwood, commissioner of the Bureau of Labor Statistics, will announce the change at a press conference. Neither Mrs. Norwood nor members of her staff would comment on the details of the announcement. But Labor Department officials and members of the Reagan administration supplied some of the details.

The administration, according to one official supports the change but left the decision up to Mrs. Norwood, who has the legal authority to change the index. Mrs. Norwood yesterday briefed top administration officials, including Treasury Secretary Donald T. Regan and Murray L. Weidenbaum, chairman of the Council of Economic Advisers.

The exact impact of the change is hard to assess. But officials acknowledged yesterday that the new measure, because it eliminates the distorting effects of interest rates and housing prices, would over time lead to smaller increases in the index than would otherwise have occurred.

The Bureau of Labor Statistics now publishes an experimental housing cost component, which is similar to the new housing cost measure to be announced today. Based on this experimental index the cost-of-living increases for Social Security recipients on July 1 would have been 10.3 percent, compared with the 11.2 percent increase based on the current index.

For an average Social Security recipient living alone, the average monthly benefit would have risen to $370.29 with the 10.3 percent rise, instead of $373.31, according to Social Security Administration figures. The saving for the government would have been over $1 billion.

The millions of American workers whose wage increases are tied to movements of the CPI would also have had lower increases. While no numbers are available, the greatest impact of the new measure would be felt at times when there was a quick rise in mortgage interest rates and housing prices continued to rise. This is when the CPI has most overstated the rate of inflation and when, officials said, the new index would be significantly lower.

On the other hand, when mortgage interest rates are on the decline, the present CPI tends to understate the rate of inflation, which means, under the new system, cost-of-living increases would actually be higher than they would otherwise.

One of the other key impacts of the change will be on indexing of individual income tax brackets, starting in 1985. With lower rises in the CPI, the indexing of tax brackets would leave the government with slightly more revenue.

The basic change, for which the final details will be worked out over the next year, is that housing costs will be measured as if the owner were paying a rent. The rent would be based on the cost of operating a home, including property taxes, repairs, insurance, regular maintenance and other costs.

Critics of the current index, including the staff of the Bureau of Labor Statistics, have contended that including house prices and mortgage interest rates directly distorts the index because people do not buy houses every month. Critics have also argued housing price increases and the mortgage interest rates related to buying a house should be counted as an investment in an asset, not as a change—up or down—in the cost of shelter.

It is not clear how the bureau will calculate this rental equivalent, but their experimental measure is one step in that direction. The Bureau has funds in its 1982 budget for the design of a "rental-equivalence" component.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

ANNUAL REPORTS ON OCCUPATIONAL SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT—PM 87

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying reports; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 26 of the Occupational Safety and Health Act of 1970, I transmit herewith the 1980 annual report submitted by the Secretary of Health and Human Services, and the 1977, 1978, 1979, and 1980 annual reports submitted by the Secretary of Labor on occupational safety and health activities during the previous Administration.

RONALD REAGAN.

THE WHITE HOUSE, *October 28, 1981.*

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment and an amendment to the title:

S. 1322. A bill to designate the United States Department of Agriculture Boll Weevil

Research Laboratory building, located on the campus of Mississippi State University, Starkville, Mississippi, as the "Robey Wentworth Harned Laboratory" (Rept. No. 97-255).

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-256).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CHILES:

S. 1781. A bill for the relief of Ezekiel Trail Clemons; to the Committee on the Judiciary.

By Mr. WEICKER:

S. 1782. A bill to amend section 305 of the Federal Property and Administrative Services Act of 1949 pertaining to contract progress payments made by agencies of the Federal Government, providing for the elimination of retainage in certain instances, and for other purposes; to the Committee on Governmental Affairs.

By Mr. STENNIS:

S. 1783. A bill for the relief of Ashraf Mohammad and Shilu Mohammad; to the Committee on the Judiciary.

S. 1784. A bill for the relief of John Calvin Smith; to the Committee on the Judiciary.

By Mr. NUNN (for himself, Mr. CHILES, Mr. ROTH, Mr. RUDMAN, Mr. NICKLES, Mr. DECONCINI, Mr. STENNIS, Mr. JOHNSTON, Mr. PRYOR, Mr. HOLLINGS, and Mr. HATCH):

S. 1785. A bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor; to the Committee on Labor and Human Resources.

By Mr. TSONGAS:

S. 1786. A bill for the relief of Makoto Yabe and Yasuko Yabe; to the Committee on the Judiciary.

By Mr. ROBERT C. BYRD:

S. 1787. A bill to assure the American people that the administration's budget goals will be met, that the deficit for fiscal year 1982 will not exceed $43,100,000,000, that the deficit will not exceed $22,900,000,000 for fiscal year 1983, and that the budget will be balanced in fiscal year 1984, and to assure the representation of small business interests on the Board of Governors of the Federal Reserve System; to the Committee on Governmental Affairs.

By Mr. DECONCINI:

S. 1788. A bill to amend title 28, United States Code, to provide improved retirement benefits for bankruptcy judges, and for other purposes; to the Committee on the Judiciary.

By Mr. BOREN:

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WEICKER:

S. 1782. A bill to amend section 305 of the Federal Property and Administrative Services Act of 1949 pertaining to contract progress made by agencies of the Federal Government, providing for the elimination of retainage in certain instances, and for other purposes; to the Committee on Governmental Affairs.

SMALL BUSINESS CONTRACT PAYMENT PROCEDURES ACT

● Mr. WEICKER. Mr. President, today I am introducing the Small Business Contract Payment Procedures Act of 1981, a bill to eliminate retainage for small business construction contractors under certain circumstances.

This bill, which is designed to benefit more than 100,000 small business contractors, would free up more than $4 billion now sitting idle in Federal ledgers and make it available for investment in business growth and job creation.

Mr. President, this bill would not require the appropriation of a single penny from the U.S. Treasury. It would simply authorize the removal of redundant, duplicative and currently counterproductive restrictions on small construction firms in some situations.

Retainage is the practice of withholding a percentage of a construction contractor's progress payments pending satisfactory completion of all required contractual work. Generally, according to Federal procurement regulations the Government retains 10 percent of each progress payment on a construction job, although currently each contracting officer can eliminate or reduce the amount of retainage if the work is being completed in a satisfactory manner.

However, this is seldom the case, especially when a small firm is involved. My legislation would give statutory authority to a contracting officer to waive retainage if he determines the work is being performed satisfactorily and on schedule. The act would likewise eliminate the withholding of retainages from small business concerns, provided the firm first posts an adequate performance bond.

Mr. President, the impact of retainage on small business construction firms is staggering. According to a recent study of construction firms, conducted by the American Subcontractors Association, small contractors must cover an average of $200,000 annually in outstanding retainages. Like the government late pay problems, the retainage situation causes severe cash flow problems for small firms. Specifically, by slowing the flow of money to those performing the work, retainage often delays construction and thus drives up costs due to inflation.

Contractors and subcontractors must borrow money—at today's high interest rates—to cover outstanding retainages and maintain an adequate cash flow. The cost is then factored into their bids and passed along to the end user. I need not point out that on government jobs, the end user is the American taxpayer.

In fact, it is a curious paradox that retainage today achieves exactly the opposite effect that it was initially designed to attain. Begun as a method to get contractors to finish the job quickly, today retainage actually encourages delay.

With construction being performed by so many different subcontractors, the ones who complete the bulk of their work before the project is done have no incentive to finish the final details quickly because retainages are not released until the owner accepts the building. These subcontractors will instead commit their resources to concurrent projects where payment can be expected.

However, in my opinion, one of the most unfortunate aspects of retaining a portion of a contractor's payments to insure adequate performance is that it is duplicative of other standard contracting procedures. For many years now, contractors and subcontractors have been required to take out performance bonds to guarantee completion of their work.

Retainage then, is an unneeded double protection which hurts contractors and subcontractors, yet which affords no extra assurance to the Government's interests.

Mr. President, this legislation will benefit small business contractors and subcontractors, who have a real need for more capital to finance improved productivity and increased growth. Therefore, I urge expeditious consideration of the Small Business Contract Payment Procedures Act of 1981.●

By Mr. NUNN (for himself, Mr. CHILES, Mr. ROTH, Mr. RUDMAN, Mr. NICKLES, Mr. DECONCINI, Mr. STENNIS, Mr. JOHNSTON, Mr. PRYOR, Mr. HOLLINGS, and Mr. HATCH):

S. 1785. A bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor; to the Committee on Labor and Human Resources.

LABOR MANAGEMENT RACKETEERING ACT OF 1981

● Mr. NUNN. Mr. President, on behalf of myself and Senators CHILES, ROTH, RUDMAN, NICKLES, DECONCINI, STENNIS, JOHNSTON, PRYOR, HOLLINGS, and HATCH, I am today reintroducing the provisions of S. 1163, the Labor Racketeering Act of 1981. S. 1163 was originally introduced by me on May 12, 1981, and was designed to help ease the problems of corruption on the Nation's waterfront. Since introducing S. 1163 in May, we have consulted with many groups both inside and outside of Government. We have received many recommendations and suggestions to clarify and tighten S. 1163. The bill which I am introducing today contains all of the essential provisions of S. 1163, but with what we believe to be substantial improvements which represent the views and input of all parties.

The technical changes we are making have no substantive effect on the provisions of S. 1163. The main provisions of that bill remain intact in this bill. Those main provisions are:

First, making the Taft-Hartley Act a felony for all violations involving $1,000 or more;

Second, requiring immediate removal upon conviction of an individual convicted of enumerated crimes and crimes relating to his official position;

Third, broadening the definition of the types of positions an individual is barred from upon conviction of enumerated crimes;

Fourth, increasing the time of disbarment from 5 to 10 years;

Fifth, escrowing a convicted official's salary for the duration of his appeal, in case the conviction is reversed; and

Sixth, clarifying the jurisdiction of the Department of Labor with respect to its responsibility for detecting and investigating criminal violations relating to ERISA.

The changes made in S. 1163 which are incorporated into this new bill are, as I said, largely technical. Section 3 of S. 1163 is changed in the following way. That bill calls for the immediate removal of any person who has been convicted of any felony or any other crime, including misdemeanors, which involve the use or misuse of that person's labor union or employee benefit plan affiliation.

We have altered that language by enumerating the particular officeholders subject to this provision, and by leaving the lists of disqualifying crimes now in 29 U.S.C. 504 and 29 U.S.C. 1111 as they are presently written. We have added to the end of the list of crimes a catch-all phrase requiring removal if the individual is convicted of any Federal or State felony involving abuse or misuse of his official position.

In S. 1163, in sections 3 and 7, are lists of nine positions which an individual is prohibited from holding if he has been convicted of an enumerated crime. We believe that several of these positions were overly broad and as such might have caused problems such as inhibiting the payment of union pensions or even prohibiting union membership. This new bill contains a subsection replacing the original list with what we feel is a description more accurately reflecting the type of positions we intend an individual to be barred from.

The main change was in the last sentence which stated:

No person shall knowingly permit any other person to serve in any capacity in violation of this section.

It has been brought to our attention that the word "permit" may inadvertently be construed by a court to mean that union officials who deal with a disbarred individual hired by a private entity may have some responsibility or criminal liability and alternatively employers who deal with disbarred union officials may have some criminal liability for their dealings.

We therefore reworded the last sentence to read:

No person shall knowingly hire, retain, employ, or otherwise place any other person to serve in any capacity in violation of this section.

This more accurately places the burden on the entity or individuals who actually employ persons who have been disqualified by virtue of a conviction.

This bill also contains some minor corrections of typographical errors we found in S. 1163 and which I will not enumerate here.

On October 28 and 29 the Senate Permanent Subcommittee on Investigations will conduct hearings during which we hope to hear the views of the Labor Department and the AFL–CIO on this bill. We are hopeful that we may gain their support for its swift passage by this Congress. It is imperative that Congress itself act swiftly to halt the growing corruption on our waterfronts. This bill is a significant step in that direction. It should serve as a signal to organized crime and corrupt union leaders that the American public will no longer tolerate their manipulation of our waterfront economy for criminal ends.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1785

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "Labor Management Racketeering Act of 1981".

SEC. 2. Subsection (d) of section 186 of title 29, United States Code, as amended, is amended to read as follows:

"(d)(1) Any person who willfully violates any of the provisions of subsection (a) or (b) of this section shall, upon conviction thereof, be guilty of a felony and be subject to a fine of not more than $15,000, or imprisoned for not more than five years, or both; but if the value of the amount of money or thing of value involved in violation(s) of the provisions of this section does not exceed $1,000, he shall be guilty of a misdemeanor and be subject to fine of not more than $10,000, or imprisoned for not more than one year, or both.".

SEC. 3. Subsection (a) of section 1111 of Title 29, United States Code, as amended, is amended by adding the following after "No person" and before "who has been convicted":

"who is an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee or representative in any capacity of any employee benefit plan or who provides goods or services or who is a consultant or advisor to any employee benefit plan."

SEC. 4. Subection (a) of section 1111 of Title 29, United States Code, as amended, is amended by adding the following after "the Labor-Management Reporting and Disclosure Act of 1959":

"or any other felony involving abuse or misuse of such person's labor organization or employee benefit plan position or employment; or conspiracy to commit any such crimes; or attempt to commit any such crimes, or a crime in which any of the foregoing crimes is an element, shall serve or be permitted to serve:

"(1) as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee, or representative in any capacity of any employee benefit plan,

"(2) as a consultant or adviser to any labor organization or employee benefit plan,

"(3) as an officer, director, trustee, member of any executive board or similar governing body, business agent, manager, organizer, employee, or representative in any capacity of any labor organization,

"(4) as a labor relations consultant or adviser to a person engaged in an industry or activity affecting commerce, or as an officer, director, agent, or employee of any group or association of employers dealing with any labor organization,

"(5) in a position which entitles its occupant to a share of the proceeds of, or as an officer or executive or administrative employee of, any entity whose activities are in whole or substantial part devoted to providing goods or services to any labor organization or employee benefit plan, or

"(6) in any capacity that involves decision-making authority or custody or control of the moneys, funds, assets or property of any labor organization or employee benefit plan during or for ten years after such conviction or after the end of imprisonment on such conviction, whichever is the later, unless prior to the end of such ten-year period, in the case of a person so convicted or imprisoned, (A) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (B) the United States Parole Commission determines that such person's service in any capacity referred to in paragraph (1) through (6) would not be contrary to the purposes of this subchapter. Prior to making any such determination the Commission shall hold an administrative hearing and shall give notice to such proceedings by certified mail to the Secretary of Labor and to State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The Commission's determination in any such proceeding shall be final. No person shall knowingly hire, retain, employ or otherwise place any other person to serve in any capacity in violation of this section.".

SEC. 5. Subsection (b) of section 1111 of title 29, United States Code, as amended, is amended as follows:

"(b) Any person who intentionally violates this section shall be fined not more than $10,000 or imprisoned not more than 5 years, or both.".

SEC. 6. Subsection (c) of section 1111 of title 29, United States Code, as amended, is amended to read as follows:

"(c) For the purpose of this section:

"(1) A person shall be deemed to have been 'convicted' and under the disability of 'conviction' from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

"(2) The term 'consultant' means any person who, for compensation, advises, or represents a labor organization or an employee benefit plan or who provides other assistance to such organization or plan, concerning the establishment or operation of such organization or plan.

"(3) A period of parole shall not be considered as part of a period of imprisonment.".

SEC. 7. Section 1111 of title 29, United States Code, as amended, is amended by adding at the end thereof the following:

"(d) Where any person, by operation of this section, has been barred from office or other position in a labor organization or employee benefit plan as a result of a conviction, upon the filing of an appeal of that conviction, any salary which would be otherwise due him by virtue of said office or position, shall be placed in escrow by the individual

or organization responsible for payment of said salary. Payment of said salary into escrow shall continue for the duration of the appeal or for the period of time during which said salary would be otherwise due, whichever period is shorter. Upon the final reversal of said person's conviction on appeal, the amounts in escrow shall be paid to him. Upon the final sustaining of that person's conviction on appeal, the amounts in escrow shall be returned to the individual or organization who was responsible for payments of those amounts. Upon final reversal of said person's conviction, said person shall no longer be barred by this statute from assuming any position said person was previously barred from.".

SEC. 8. Subsection (a) of section 504 of Title 29, United States Code, as amended, is amended by adding the following after "or a violation of subchapter III or IV of this chapter:"

"or any other felony involving abuse or misuse of such person's labor organization or employee benefit plan position or employment; or conspiracy to commit any such crimes, shall serve or be permitted to serve:

"(1) as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee or representative in any capacity of any employee benefit plan,

"(2) as a consultant or adviser to any labor organization or employee benefit plan,

"(3) as an officer, director, trustee, member of any executive board or similar governing body, business agent, manager, organizer, employee, or representative in any capacity of any labor organization,

"(4) as a labor relations consultant or adviser to a person engaged in an industry or activity affecting commerce, or as an officer, director, agent, or employee of any group or association of employers dealing with any labor organization,

"(5) in a position which entitles its occupant to a share of the proceeds of, or as an officer or executive or administrative employee of, any entity whose activities are in whole or substantial part devoted to providing goods or services to any labor organization or employee benefit plan, or

"(6) in any capacity that involves decision-making authority or custody or control of the moneys, funds, assets or property of any labor organization or employee benefit plan during or for ten years after such conviction or after the end of such imprisonment, whichever is later, unless prior to the end of such ten-year period, in the case of a person so convicted or imprisoned, (A) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (B) the United States Parole Commission determines that such person's service in any capacity referred to in clause (1) through (6) would not be contrary to the purposes of this chapter. Prior to making any such determination the Commission shall hold an administrative hearing and shall give notice of such proceeding by certified mail to the Secretary of Labor and to State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The Commission's determination in any such proceeding shall be final. No person shall knowingly hire, retain, employ, or otherwise place any other person to serve in any capacity in violation of this section.".

SEC. 9. Subsection (b) of section 504 of title 29, United States Code, as amended, is amended to read as follows:

"(b) Any person who willfully violates this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both.".

SEC. 10. Subsection (c) of section 504 of title 29, United States Code, as amended, is amended to read as follows:

"(c) For the purpose of this section:

"(1) A person shall be deemed to have been 'convicted' and under the disability of 'conviction' from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

"(2) The term 'consultant' means any person who, for compensation, advises, or represents a labor organization or an employee benefit plan or who provides other assistance to such organization or plan, concerning the establishment or operation of such organization or plan.

"(3) A period of parole shall not be considered as part of a period of imprisonment.".

SEC. 11. Section 504 of title 29, United States Code, as amended, is amended by adding at the end thereof the following:

"(d) Where any person, by operation of this section, has been barred from office or other position in a labor organization or employee benefit plan as a result of a conviction, upon the filing of an appeal of that conviction, any salary which would be otherwise due him by virtue of said office or position, shall be placed in escrow by the individual employer or organization responsible for payment of said salary. Payment of said salary into escrow shall continue for the duration of the appeal or for the period of time during which said salary would be otherwise due, whichever period is shorter. Upon the final reversal of said person's conviction on appeal, the amounts in escrow shall be paid to him. Upon the final sustaining of that person's conviction on appeal, the amounts in escrow shall be returned to the individual employer or organization who was responsible for payments of those amounts. Upon final reversal of said person's conviction, said person shall no longer be barred by this statute from assuming any position said person was previously barred from.".

SEC. 12. The title of section 1136 of title 29, United States Code, is amended to read as follows:

"§ 1136. Coordination and responsibility of agencies enforcing ERISA and related Federal laws".

SEC. 13. The first full paragraph of section 1136 of title 29, United States Code, is amended by adding the following at the beginning of said paragraph:

"(a) COORDINATION WITH OTHER AGENCIES AND DEPARTMENTS.—".

SEC. 13. Section 1136 of title 29, United States Code, is amended by adding the following subsection after subsection (a):

"(b) RESPONSIBILITY FOR DETECTING AND INVESTIGATING CIVIL AND CRIMINAL VIOLATIONS OF ERISA AND RELATED FEDERAL LAWS.—The Secretary shall have the responsibility and authority to detect and investigate civil and criminal violations related to the provisions of this subchapter and other related Federal laws, including but not limited to the detection, investigation, and appropriate referrals of related violations of title 18 of the United States Code. Nothing in this subsection shall be construed to preclude other appropriate Federal agencies from detecting and investigating civil and criminal violations of this subchapter and other related Federal laws.".●

By Mr. ROBERT C. BYRD:

S. 1787. A bill to assure the American people that the administration's budget goals will be met, that the deficit for fiscal year 1982 will not exceed $43,100,000,000, that the deficit will not exceed $22,900,000,000 for fiscal year 1983, and that the budget will be balanced in fiscal year 1984, and to assure the representation of small business interests on the Board of Governors of the Federal Reserve System, to the Committee on Governmental Affairs.

FISCAL PRUDENCE AND SMALL BUSINESS REPRESENTATION ACT OF 1981

Mr. ROBERT C. BYRD. Mr. President, last week, this Nation passed an historic milestone when the national debt crossed the $1 trillion mark. This is not a milestone of pride, and it is certainly an event which must be met with action by the Congress. For that reason, I am introducing a bill to assure the people of this Nation that the Federal Government will act in a fiscally prudent manner, and that the Federal Reserve Board will adequately represent the small businessmen, farmers, and homebuyers who are the bulwark of our economy.

The bill directs the Office of Management and Budget to spell out the budget cuts and tax increases it believes are necessary to keep the fiscal year 1982 deficit at or below its target of $43.1 billion, the fiscal year 1983 deficit at or below its target of $22.9 billion, and to balance the budget by fiscal year 1984.

The financial markets and the citizens of this country have been needlessly confused and worried by the "unidentified savings" and other accounting devices used to keep budget projections on target. The Government must level with the people if it expects them to invest their savings. The Government must tell the American people exactly how it intends to meet the budget goals announced.

The other part of this bill directs the President to appoint a small business representative to fill the first vacancy on the Federal Reserve Board. Press accounts say that the administration has not decided whether to appoint a theoretical economist or a banker to the Board next January. I believe there is already enough representation of those professions on the Board. Certainly, we need a person who thoroughly understands the financial markets, but it is time we look to the small business or farming communities for a knowledgeable representative on the Federal Reserve Board of Governors.

Recently, during discussion of my amendment to the social security minimum benefits bill, my good friend, the Senator from Kansas (Mr. DOLE) asked why we should expect the administration to lock itself into budget cuts 3 years in advance. I sympathize with my friend's concern that behind all that blue smoke of "unidentified savings" lies the painful reality of sharp budget cuts and tax increases. My bill seeks to sweep away the blue smoke, no matter how harsh the clear light of day may seem.

I know, from watching the market's reaction this year, that investors, savers, and workers are not deluded by equivocation, they are only confused. Business

inventories go up a little one month, and drop a little the next month; investment plans drop a little one quarter, rise a little the next quarter, and remain flat the following quarter. There is confusion about what we plan to do over the next few years. The investor sees a profusion of paper cuts, of "undistributed savings," "unidentified savings," "across-the-board cuts," and so forth. David Stockman asked this Congress to pass the largest multiyear tax cut bill in history, and Congress responded by giving him detailed, firm cuts. Now, we only ask, for the good of the American people, that he respond in kind, by giving us detailed spending cuts and tax increase proposals. He set the $43.1 billion 1982 deficit figure, although the original projected deficit has grown several times to get there. He set the $22.9 billion 1983 figure. He set the balanced budget goal in 1984.

Public confusion about administration budget goals was made even greater recently when administration economists testified before the Senate Budget Committee that, "the tax cut could be too large" and they were "all coming to the recognition that the deficit isn't going to evaporate rapidly." It is time to move out of the smoke and clouds and into the light of day. We only ask that he tell us how these goals will be reached. Is that too much?

Recently, the automobile dealers, homebuilders, and realtors of our Nation began a campaign to make Congress aware that small businessmen, farmers, and consumers need help soon. Policies of blind monetary restraint and ballooning Federal deficits combine to squeeze off the investment, spending, and initiative that we need to get America back on the road to economic recovery.

Yale professor James Tobin, who was recently awarded the Nobel Prize for Economics, said that relying solely on monetary policy to stem inflation indicates a willingness to—

> Accept whatever kind of damage this does to the real economy in terms of unemployment, low production, recession, low investment and so on in the hope that in time . . . enough businessmen will be like Chrysler—desperate for selling something, that they will begin to slow down . . . price increases."

A recent advertisement paid for by the automobile dealers, homebuilders, and realtors associations agreed with Professor Tobin's analysis, saying that—

> The Administration, the Congress, the Federal Reserve Board can no longer ask the public to accept the economic hardships resulting from the devastating cost of money.

I am introducing this bill because I believe it is time for Congress to line up with the small businessmen, consumers, and farmers of this Nation, and vote to bring fiscal prudence to Government. and adequate representation of small businesses to the Federal Reserve Board, before it is too late. I urge my colleagues to join me in this effort.

I ask unanimous consent that a letter from the National Association of Home Builders endorsing the bill, a special report prepared by the Democratic Policy Committee staff on the administration's "Unidentified" cuts, and a copy of the bill be printed in full in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1787

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fiscal Prudence and Small Business Representation Act of 1981".

SEC. 2. (a) The purpose of this section is to assure the American people that the deficit for fiscal year 1982 will not exceed $43,100,000,000, that the deficit for fiscal year 1983 will not exceed $22,900,000,000, and that outlays will not exceed revenues by the first day of fiscal year 1984.

(b) Not later than November 15, 1981, tne Director of the Office of Management and Budget shall prepare and transmit to the Congress a full and complete list of all reductions in budget authority and outlays and increases in revenues for fiscal years 1982, 1983, and 1984 which he determines would be necessary to meet the President's objective that the deficit for fiscal year 1982 not exceed $43,100,000,000, that the deficit for fiscal year 1983 not exceed $22,900,000,000, and that outlays not exceed revenues by the first day of fiscal year 1984. In preparing the list required by the preceding sentence, the Director shall only utilize categories of reductions in budget authority and outlays which explicitly specify the programs and appropriation accounts in which such reductions are to be made, the exact amount of such reductions, and the provisions of law with respect to the entitlement programs which must be changed in order to carry out such reductions.

SEC. 3. The President shall nominate an individual whose background is nonbanking, but who is representative of small business to fill the first vacancy occurring on the Board of Governors of the Federal Reserve System after the date of enactment of this Act.

NATIONAL ASSOCIATION OF HOME BUILDERS,
Washington, D.C., October 26, 1981.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: On behalf of the more than 123,000 members of the National Association of Home Builders (NAHB), I am writing to offer our strong support for the bill you will introduce concerning the Federal deficit and small business representation on the Federal Reserve Board. We believe that passage of this bill is vital to address the problem of high interest rates and their devastating impact on housing.

The housing industry is in the 34th month of a depression. Housing starts for 1981 are now forecast to be only 1.06 million—a 19.2 percent drop from 1980. By the end of the year, we anticipate that there will be one million construction workers unemployed. And failure rates among contractors are up dramatically over last year. Clearly Congress should take positive action before there is irreparable damage to the housing industry and the homeownership opportunities of America's potential homebuyers.

The provision in your bill which would require OMB to prepare a full list of proposed reductions in budget outlays and increases in revenues for fiscal years 1982, 1983 and 1984, would be of critical assistance to Congress in their effort to cut Federal spending such that the deficit for 1982 will not exceed $43 billion. A larger deficit will only mean increased Government borrowing and, most likely, even higher interest rates. Small business representation on the Federal Reserve Board, as provided in your bill, would offer an alternative view to the present tight money policy of the Fed. For most of this year, the Fed's actions have restrained the growth of the money supply to levels even lower than their own targets.

We would urge expeditious action by the Senate on this bill.

Sincerely,

HERMAN J. SMITH,
President.

THE ADMINISTRATION'S "UNIDENTIFIED" CUTS—HISTORY OF "UNIDENTIFIED" CUTS

MARCH BUDGET

On March 10, 1981, President Reagan submitted the Fiscal Year 1982 Budget Revisions to Congress. This was the President's initial budget, which set out the cuts from the Carter budget and was to serve as the spending side of the "Economic Recovery Plan."

Table 20 on page 127 of the first Reagan budget submission sets out on a line labeled "Additional savings to be proposed" a cut of $-29.8 billion in FY 1983 and $-44.2 billion in FY 1984.

JULY BUDGET

On July 15, 1981, the Executive Office of the President, Office of Management and Budget released the Mid-Session Review of the 1982 Budget. This is a mid-year review of the budget required by Section 602 of the Congressional Budget and Impoundment Control Act of 1974.

Table 23 on page 77 of the Mid-Session Review has a line entitled "Contingencies and additional savings to be proposed (net)" which sets out a cut of $-29.8 billion in FY 1983 and $-44.2 billion in FY 1984. These "unidentified" cuts are the same amounts as those identified in the initial March Reagan budget.

In the same July document, the Administration identified assumptions of savings of $-19.6 billion over the FY 1982-84 period from reforms in Social Security. On the first page, in the section dealing with Social Security (fifth paragraph), it is stated, "Further cuts will be identified in future budgets."

SEPTEMBER BUDGET

On September 24, 1981, the White House, Office of the Press Secretary, released a Fact Sheet, Fall Budget Program. This is the factual budget document that accompanied the President's September speech on further budget cuts.

On page 6 of that document, there is the following:

B. Expected Effect of New Actions.

The specific new budget savings measures—reducing 1982 Appropriations requests, reforming entitlements, and revising the tax codes—would reduce expected deficits by $16.0 billion in FY 1982, $28.3 billion in FY 1983, and $35.3 billion in FY 1984. The remaining savings needed to achieve the President's overall targets—$11.7 billion in FY 1983 and $23.0 billion in FY 1984—will be specified in upcoming budgets: The FY 1983 budget is now being developed and will be presented to the Congress in January.

More "unidentified" cuts are set out for FY 1983, —$11.7 billion and for FY 1984, —$23 billion. The language makes it clear that these additional "unidentified" cuts must be made in order to balance the budget in FY 1984.

The first paragraph on page 6 claims that the $74 billion (—$30 billion in FY 1983 and —$44 billion in FY 1984) set out as "unidentified" cuts in March and July has been allocated to Departments and agencies.

However, the allocated reduction is not specified. It is to be submitted to Congress in the FY 1983 budget in January:

Allocating to departments and agencies the full $74 billion in previously unspecified budget savings for FY 1983 and FY 1984. These tight new outlay ceilings will be used by agencies in preparing their proposals for the FY 1983 budget to be submitted to the Congress in January.

On page 5 of the September Fact Sheet, savings of −$2.6 billion in FY 1982, −$10 billion in FY 1983, and −$15 billion in FY 1984 are claimed from an entitlement reform package. However, while the package is supposed to be presented to Congress in the near future, we have not yet received any of the details and, therefore, the amounts remain "unidentified" cuts.

Section A on page 3 of the September Fact Sheet, when referring to the July estimates, uses the heading "Unspecified savings needed to achieve above outlay targets." These are the same cuts used for FY 1983 and FY 1984 in the July and March submissions:

A. MID-SESSION ESTIMATES—JULY 1981

[In billions of dollars]

	Fiscal year—		
	1982	1983	1984
Receipts	662.4	705.8	795.0
Outlays	704.8	728.7	758.5
Surplus or deficit	−42.5	−22.9	+.5
Unspecified savings needed to achieve above outlay targets	0	29.8	44.2

Source: September "Fact Sheet."

Section C which appears on page 4 of the September Fact Sheet sets out "Future savings to be identified." The amounts shown are $−11.7 million for 1983 and $−23 billion for FY 1984.

These "unidentified" cuts are in addition to new September cuts of $16.0 billion in FY 1982, $28.3 billion in FY 1983, and $35.8 billion in FY 1984:

C. The Latest Estimates—September 1981.

As a result of these recent developments, we face large potential budget gaps unless strong new measures are taken. Those gaps and the outlook if action is taken are as follows:

[In billions of dollars]

	Fiscal year—		
	1982	1983	1984
Potential budget gap	−59.1	−62.9	−58.8
New savings proposals	16.0	28.3	35.8
Future savings to be identified	0	11.7	23.0
Target deficits	43.1	22.9	0

Source: September "Fact Sheet."

SUMMARY OF UNIDENTIFIED CUTS

[In billions of dollars]

	Fiscal year—	
	1983	1984
Mar. 10, 1981: (1) Included unidentified cuts	−29.8	−44.2
July 15, 1981:		
(1) Restated unidentified cuts	(−29.8)	(−44.2)
(2) Assumed social security cuts	(−5.8)	(−10.0)
Sept. 24, 1981:		
(1) Social security cuts disappeared	(+5.8)	(+10.0)
(2) Claimed to allocate previously unidentified cuts but no detail shown	(29.8)	(44.2)
(3) More unidentified cuts	−11.7	−23.0
(4) Future entitlement reform	−10.0	−15.0
Total unidentified cuts	−51.5	−82.2

By Mr. DECONCINI:

S. 1788. A bill to amend title 28, United States Code, to provide improved retirement benefits for bankruptcy judges, and for other purposes; to the Committee on the Judiciary.

BANKRUPTCY JUDGES' RETIREMENT ACT OF 1981

o Mr. DECONCINI. Mr. President, I am introducing a bill to amend the retirement system for U.S. bankruptcy judges that will reflect the importance and status of these judges in our Federal judicial system.

In 1978, the structure and jurisdiction of our bankruptcy courts was vastly upgraded. At that time, several retirement system alternatives were discussed before the present system was finally adopted. The present system represents a modest increase over the pre-1978 system, but still is not reflective of the responsibility and workload of the Nation's corps of bankruptcy judges.

An upgraded retirement system for bankruptcy judges is not only just and proper, but it will inevitably make the position of bankruptcy judges attractive to men and women of high quality. Bankruptcy courts, like it or not, are a significant aspect of our Federal judicial system, and require persons of the highest quality to adequately serve the litigants before it. During the past fiscal year, there were approximately 500,000 bankruptcy filings, which means that several million additional people felt the impact of decisions of the bankruptcy court.

The bill creates the following eligibility formula for bankruptcy judges' retirement: The judge may retire at age 70 after 10 years of service, at age 65 after 15 years, if not reappointed after a term expires and 14 years service, and at any time if permanently disabled.

The amount of retirement compensation reflects a different evaluation of years' service before the enactment of the Code, and years' service thereafter. The basic retirement system under S. 1788 will give a bankruptcy judge one-fourteenth of the salary of the office for each year that he has served as a bankruptcy judge after September 30, 1979—which date corresponds with the effective date of the expanded judicial functions set forth in the new Bankruptcy Code—and one twenty-eighth of the salary of the office for each year served before October 1, 1979. This system compares with the U.S. Tax Court retirement system, under which judges receive retirement pay at a ratio of 1 to 10, rather than 1 to 14, for years of service.

In dollar terms, assuming a bankruptcy judge's salary remains at $53,500, a judge with no other creditable service in the military or civil service, with 15 years of pre-Code bankruptcy judge service and 5 years post-Code service, would be eligible to retire in 1984—(assuming such judges meet applicable age or nonreappointment provisions of the bill—at 25/28—approximately 90 percent of $53,500 which is just over $47,000 per annum. This compares to the approximately $19,400 which they would have have received had the pre-Code retirement formula been retained, or approximately $23,400 they would receive under the existing retirement formula.

Beginning April 1, 1984, bankruptcy judges will be appointed by the President, with the advice and consent of the Senate, for a 14-year term. Like all Federal judges, judges appointed to the U.S. Bankruptcy Court should be persons of maturity, experience and ability. The inadequacy and inequity of the present retirement system—and the absence of a retirement system in 1984—will severely limit the availability of qualified persons to serve on the bankruptcy court. This will be particularly true in attempting to attract appointees from the private sector, where midcareer attorneys would be required to accept a large reduction in compensation upon appointment. An adequate retirement plan is equally important in retaining high-caliber individuals on the bench.

A similar problem concerning adequate retirement system exists for other nonarticle III Federal courts, namely, magistrates, Commissioners of the Court of Claims, and judges of the Court of Military Appeals. I hope the bill I am introducing today on behalf of the bankruptcy judges, will also serve as a catalyst for discussion and action on the retirement needs of our other Federal judicial officials who are equally worthy.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1788

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bankruptcy Judges' Retirement Act of 1981".

SEC. 2. (a) Section 376(a)(1) of title 28, United States Code, is amended—

(1) by redesignating subparagraphs (C), (D), and (E) as subparagraphs (D), (E), and (F), respectively.

(2) by inserting after subparagraph (B) the following new subparagraph:

"(C) a bankruptcy judge continued in office by section 404(b) of the Act of November 6, 1978 (Public Law 95–598; 92 Stat. 2683);",

"(3) by striking out "or" before "(iii)", and

(4) by inserting before the semicolon at the end thereof ", or (iv) in the case of a bankruptcy judge continued in office by section 404(b) of the Act of November 6, 1978 (Public Law 95–598; 92 Stat. 2683), the date of the enactment of the Bankruptcy Judges' Retirement Act of 1981".

(b) Section 376(a)(2) of title 28, United State Code, is amended—

(1) by redesignating subparagraphs (C), (D), and (E) as subparagraphs (D), (E), and (F), respectively, and

(2) by inserting after subparagraph (B) the following new subparagraph:

"(C) in the case of a bankruptcy judge, salary paid after retirement from office under section 377(a) of this title;".

(c) The Act of November 6, 1978 (Public Law 95–598; 92 Stat. 2549), is amended by striking out section 211.

SEC. 3. (a) Chapter 17 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 377. Bankruptcy judges

"(a)(1) Any bankruptcy judge may retire after attaining the age of seventy years and after serving as a bankruptcy judge for at least ten years.

"(2) Any bankruptcy judge may retire after attaining the age of sixty-five years and after serving as a bankruptcy judge for at least fifteen years.

"(3) Any bankruptcy judge who is not reappointed following the expiration of the term of office of such judge may retire upon completion of such term, if—

"(A) such judge serves as a bankruptcy judge for at least fourteen years, and

"(B) such judge advises the President in writing that such judge is willing to accept reappointment to the bankruptcy court, not earlier than nine months preceding the date of the expiration of the term of office of such judge and not later than six months preceding such date.

"(4) Any bankruptcy judge who becomes permanently disabled from performing the duties of the office shall retire.

"(b) Notwithstanding subsection (a)(3)(A) of this section, a bankruptcy judge continued in office by section 404(b) of the Act of November 8, 1978 (Public Law 95-598; 92 Stat. 2683), who is not reappointed after March 31, 1984, shall be eligible to retire under subsection (a)(3) of this section and to receive retirement pay under subsection (c) of this section if such judge—

"(1) continues in service until March 31, 1984, or after such date and until such judge's successor takes office,

"(2) satisfies the requirements of subsection (a)(3) of this section, other than subparagraph (A), and

"(3)(A) attains the age of sixty years,

"(B) attains the age of fifty-five years and services at least ten years in the aggregate as a bankruptcy judge, or

"(c)(1) A bankruptcy judge who elects under subsection (d) of this section to receive retirement pay under this subsection and who retires under paragraph (1), (2), or (3) of subsection (a) of this section shall receive retirement pay for any period at a rate equal to the product of—

"(A) the salary payable to a bankruptcy judge for such period, and

"(B) the sum of—

"(i) the number of years the bankruptcy judge who so elects serves as a bankruptcy judge before October 1, 1979, divided by twenty-eight, and

"(ii) the number of years the bankruptcy judge who so elects serves as a bankruptcy judge after September 30, 1979, divided by fourteen,

except that the rate of such retirement pay shall not exceed the salary payable to a bankruptcy judge for such period.

"(2) A bankruptcy judge who elects under subsection (d) of this section to receive retirement pay under this subsection and retires under subsection (a)(4) of this section shall receive retirement pay for any period at a rate—

(A) equal to the rate of the salary payable to a bankruptcy judge for such period if before such retirement the bankruptcy judge who so elects serves as a bankruptcy judge not less than ten years, or

"(B) equal to 50 per centum of the rate of the salary payable to a bankruptcy judge for such period if before such retirement the bankruptcy judge who so elects serves as a bankruptcy judge less than ten years.

"(3)(A) Such retirement pay shall begin to accrue on the day following the day on which such judge's salary as a bankruptcy judge ceases to accrue, and shall continue to accrue during the remainder of the life of such judge.

"(B) Retirement pay under this section shall be paid in the same manner as the salary of a bankruptcy judge.

"(4) In computing the rate of retirement pay under this subsection, that portion of the aggregate number of years of service which is a fractional part of one year shall be eliminated if it is less than six months, or shall be counted as a full year if such part equals or exceeds six months.

"(d)(1) A bankruptcy judge may elect to receive retirement pay under subsection (c) of this section by filing notice of such election in writing with the Director of the Administrative Office of the United States Courts. The Director shall transmit to the Office of Personnel Management a copy of each notice filed under this paragraph.

"(2) Such election may be made by a bankruptcy judge only during such judge's term of office or on the day on which such judge's successor takes office.

"(e) In the case of any bankruptcy judge who files an election pursuant to subsection (d) of this section to receive retirement pay under subsection (c) of this section—

"(1) no annuity or other payment, except as provided in paragraph (3) of this subsection, shall be payable to such judge under the civil service retirement laws with respect to any service performed by such judge (whether performed before or after such election is filed and whether performed as a bankruptcy judge or otherwise),

"(2) no deduction for purposes of the Civil Service Retirement and Disability Fund shall be made from retirement pay payable to such judge under subsection (c) of this section or from any other salary, pay, or compensation payable to such judge, for any period during which such election is in effect, and

"(3) such judge shall be paid the lump-sum credit computed under section 8331(8) of title 5 of the United States Code upon making application therefore with the Office of Personnel Management.

"(f)(1) A bankruptcy judge who desires to retire under subsection (a)(4) of this section before April 1, 1984, shall furnish to the Director of the Administrative Office of the United States Courts a certificate of disability signed by the chief judge of the circuit in which such bankruptcy judge is serving.

"(2) A bankruptcy judge who desires to retire under subsection (a)(4) of this section after March 31, 1984, shall furnish to the President a certificate of disability signed by such chief judge.

"(g)(1) A bankruptcy judge who files an election under subsection (d) of this section to receive retired pay under subsection (c) of this section may revoke such election at any time before the first day on which retirement pay would begin to accrue with respect to such judge but for such revocation.

"(2) Any revocation under this subsection of an election shall be made by filing notice of such revocation with the Office of Personnel Management. The Office of Personnel Management shall transmit to the Director of the Administrative Office of the United States Courts a copy of each notice filed under this paragraph.

"(3) In the case of a bankruptcy judge who revokes under this subsection an election made under subsection (d) of this section—

"(A) for purposes of this section, such judge shall be treated as not having filed such election, and

"(B) for purposes of section 376 of this title—

"(i) such judge shall be treated as not having filed an election under subsection (a)(1) of such section,

"(ii) subsection (g) of such section shall not apply with respect to such judge, and the amount credited to such judge's account under subsection (e) of such section, together with interest at 4 per centum per annum to December 31, 1947, and 3 per centum per annum thereafter, compounded on December 31, of each year to the date on which the revocation is filed, shall be returned to such judge, and

"(C)(i) for purposes of the civil service retirement laws, no credit shall be allowed for service as a bankruptcy judge unless with respect to such service such judge deposits in the Civil Service Retirement and Disability Fund the amount required by the civil service retirement laws, and

"(ii) if such judge deposits the amount so required, then the Administrative Office of the United States Courts shall deposit in the Civil Service Retirement and Disability Fund an amount equal to the amount it would have contributed to such Fund but for the effectiveness of the election made by such judge under subsection (d) of this section to receive retirement pay under subsection (c) of this section. Upon such deposit, service as a bankruptcy judge shall be treated as service with respect to which deductions and contributions had been made during the period of such service.

"(h)(1) A bankruptcy judge who elects under subsection (d) of this section to receive retirement pay under subsection (c) of this section, with respect to whom such election is in effect, and who after such election—

"(A) accepts civil office or employment by the United States, other than the performance of judicial duties pursuant to section 294 of this title, or

"(B) performs, supervises, or directs the performance of, legal or other professional services in connection with a case under title 11, United States Code,

shall forfeit all rights to retirement pay under this section for all periods beginning on or after the first day on which such judge accepts such office or employment, or engages in any activity described in subparagraph (B).

"(2) Paragraph (1) of this subsection shall not apply to a bankruptcy judge continued in office by section 404(b) of the Act of November 6, 1978 (Public Law 95-958; 92 Stat. 2683), who is not reappointed upon the expiration of such judge's term of office on March 31, 1984, or before the appointment of such judge's successor.

"(i) Except as otherwise provided in this subsection, the provisions of the civil service retirement laws, including the provisions relating to the deduction and withholding of amounts from basic pay, salary, and compensation, shall apply with respect to service as a bankruptcy judge, together with other service as an officer or employee to whom such civil service retirement laws apply, as if this section had not been enacted.

"(j) Subparagraphs (i) and (ii) of section 8331(1) of title 5, United States Code, shall not apply with respect to a bankruptcy judge continued in office by section 404(b) of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2683), for any period during which there is in effect an election made by such judge under subsection (d) of this section to receive retirement pay under subsection (c) of this section.

"(k) For purposes of this section, and section 377 of this title, the term 'bankruptcy judge' means, unless specified otherwise, a referee in bankruptcy continued in office by section 404(b) of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2683), or a United States bankruptcy judge.".

(b) The table of sections for chapter 17 of title 28, United States Code, is amended by

adding at the end thereof the following new item:

"377. Bankruptcy judges.".●

By Mr. BOREN:

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week"; to the Committee on the Judiciary.

NATIONAL JAYCEE WEEK

● Mr. BOREN. Mr. President, I am introducing today a Senate joint resolution that will, if passed, authorize the President to designate January 17, 1982, through January 23, 1982, as "National Jaycee Week."

The U.S. Jaycees, headquartered in Tulsa, Okla., will be celebrating 62 years of service to communities across America in January.

The Jaycee movement began in St. Louis, Mo., on October 13, 1915, and quickly spread to a national organization, formally created by 29 chapters at the first convention in St. Louis on January 21, 1920.

Through the years, the Jaycees have been involved in a variety of projects. In the early days, Jaycees were at the forefront in such diverse areas as aviation—Charles Lindbergh was the most prominent Jaycee in that field—development of U.S. air mail service, and creation of the National Wildlife Federation. Just prior to U.S. involvement in World War II, the organization voted at its national convention to support formation of the Selective Service System. Congressional debate had been stalemated on the issue until the Jaycees—all between the ages of 21 and 36 and very draft prone—voted their support for the draft. Some 85 percent of the membership served in the war.

The organization has been involved—always on a nonpartisan basis—with other Government issues and programs over the years. The Jaycees campaigned in support of political freedom for civil servants, were instrumental in formation of the ACTION Agency and lobbied in favor of statehood for Alaska. More recently, the Jaycees have concentrated their Government efforts on matters of the economy, having called repeatedly for a balanced Federal budget. In 1981, the Jaycees enacted their "Enough Is Enough" campaign in support of the administration's recommended cuts in Federal spending—again on a nonpartisan basis.

Some of the Jaycees' major projects in recent years have included public education on alcohol and other drugs, energy awareness, CPR training, shooting safety and muscular dystrophy fundraising.

The Jaycees have been active in the corrections field by maintaining over 400 prison chapters with a membership of nearly 17,000. The program is now in its 19th year, and cooperates with a job placement service for newly released inmates.

Jaycees now number some 300,000 members in approximately 7,500 local chapters in communities across America. As a service organization, the Jaycees have done much to enhance the communities in which they serve, by following closely the creed that "Service to Humanity is the Best Work of Life."

By supporting this joint resolution, we will be honoring an organization that has given much toward the health and vitality of our communities. This will be a small expression of America's gratitude for the many significant contributions of the U.S. Jaycees.

I urge my colleagues to join me in cosponsoring this joint resolution.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution ordered to be printed in the RECORD, as follows:

S.J. RES. 117

Whereas the Jaycee Idea began with a handful of young men in St. Louis, Missouri, 62 years ago;

Whereas the Jaycee Idea embraces today approximately 300,000 members in 7,500 American communities that have chapters in the United States Jaycees;

Whereas the Jaycee Idea enriches the lives of communities around the world through affiliation in Jaycees International;

Whereas the Jaycees Organization retains a youthful outlook, even in its maturity, and continues to build on the individual member, even with its global scope—first, helping him be the best man he can be, then helping him help his fellow man in need, one to one;

Whereas a Jaycee cares about people, and he shows it;

Whereas a Jaycee cares about progress, and he does something about it;

Whereas a Jaycee lives by the creed that "service to humanity is the best work of life", and throws himself into that work both in his vocation and avocation;

Whereas a Jaycee is the kind of young man this country will need in great numbers to help meet the challenges of our times and the coming century; and

Whereas it is fitting that we should give special recognition and encouragement to the Jaycee and his organization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week", and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.●

ADDITIONAL COSPONSORS

S. 312

At the request of Mr. LEVIN, the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 312, a bill for the relief of Maria and Timofei Chmykhalov, and for Lilia, Peter, Liubov, Lidia and Augustina Vashchenko.

S. 391

At the request of Mr. CHAFEE, the Senator from Georgia (Mr. MATTINGLY), and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 391, a bill to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying agents, informants, and sources and to direct the President to establish procedures to protect the secrecy of these intelligence relationships.

S. 1018

At the request of Mr. CHAFEE, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 1024

At the request of Mr. SYMMS, the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 1024, a bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

S. 1131

At the request of Mr. DANFORTH, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1649

At the request of Mr. SASSER, the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 1649, a bill to improve the highway bridge replacement and rehabilitation program.

S. 1778

At the request of Mr. EAST, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 1778, a bill to repeal the Metric Conversion Act of 1975 (89 Stat. 1007; 15 U.S.C. 205a et seq.).

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of Senate Joint Resolution 29, joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as "National Garden Week."

SENATE JOINT RESOLUTION 34

At the request of Mr. GOLDWATER, the Senator from North Dakota (Mr. ANDREWS), the Senator from Colorado (Mr. ARMSTRONG), the Senator from Oklahoma (Mr. BOREN), the Senator from Arkansas (Mr. BUMPERS), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Mississippi (Mr. COCHRAN), the Senator from Kansas (Mr. DOLE), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Kentucky (Mr. FORD), the Senator from Utah (Mr. GARN), the Senator from Iowa (Mr. GRASSLEY), the Senator from Utah (Mr. HATCH), the Senator from South Carolina (Mr. HOLLINGS),

the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Iowa (Mr. JEPSEN), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Indiana (Mr. LUGAR), the Senator from New York (Mr. MOYNIHAN), the Senator from New Mexico (Mr. SCHMITT), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), the Senator from South Carolina (Mr. THURMOND), the Senator from Wyoming (Mr. WALLOP), the Senator from New New Jersey (Mr. WILLIAMS), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of Senate Joint Resolution 34, a joint resolution to provide for the designation annually of "National Patriotism Week."

SENATE RESOLUTION 232

At the request of Mr. CHAFEE, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of Senate Resolution 232, a resolution expressing the sense of the Senate with respect to the need to continue the tax incentives for energy conservation and renewable energy sources.

AMENDMENT NO. 110

At the request of Mr. CHILES, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of amendment No. 110 intended to be proposed to S. 951, a bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

AMENDMENT NO. 591

At the request of Mr. D'AMATO, the Senator from Montana (Mr. MELCHER), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of amendment No. 591 intended to be proposed to H.R. 4121, a bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies. for the fiscal year ending September 30, 1982, and for other purposes.

SENATE RESOLUTION 233—RESOLUTION RELATING TO SECURITY COOPERATION WITH ISRAEL

Mr. DOLE (for himself, Mr. MATTINGLY, and Mr. HUDDLESTON) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 233

Whereas it is in the national interest of the United States to encourage stability and peace in the Middle East by all feasible and appropriate means;

Whereas threats to security in that region are increasing, particularly because of the activities of the Soviet Union and its allies and proxies;

Whereas in that region Israel is a major and essential ally of the United States in the effort to achieve peace and security;

Whereas the strengthened defensive capability of Israel is therefore a chief goal of United States security policy, appropriately pursued through expanded security cooperation;

Whereas such enhanced cooperation also contributes directly to United States military capabilities in the region; and

Whereas such enhanced cooperation constitutes a critical element in overall United States security strategy for the region: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President should move with all appropriate speed and by all appropriate means to take concrete steps to strengthen United States security cooperation with Israel, and particularly to contribute to the development of Israel's military defensive capability, in order to preserve Israel's ability to defend against any combination of potentially hostile forces in the region. These steps should include planning for such measures as

(1) more frequent exchanges of views between United States and Israeli officials concerning threats to regional security and joint strategic planning for responding to those threats;

(2) cooperation in protecting the sea lanes in the eastern Mediterranean, especially through joint air defense;

(3) appropriate joint military exercises;

(4) pre-stocking of appropriate United States materiel, such as medical supplies and other items, in Israel;

(5) repair and maintenance of appropriate United States equipment such as aircraft and naval vessels in Israel; and

(6) other specific appropriate actions that would reinforce and enhance strategic cooperation between the two countries.

It is further the sense of the Senate that the President shall report quarterly to the Committee on Foreign Relations of the Senate on progress that has been achieved in expanding security cooperation between the United States and Israel.

● Mr. DOLE. Mr. President, my colleagues, Senator MATTINGLY and Senator HUDDLESTON, and I are submitting today a resolution that calls on the President to move forward quickly with expanded security cooperation with Israel in a number of particular areas.

We believe this action is critical because it has become clear that the Israeli Government has grave concerns about its security in the long term, as the other Middle East nations build up their military and technological capabilities.

Those concerns have been heightened by the prospect that the United States might sell AWACS aircraft and a package of enhancements for the F-15 to Saudi Arabia.

I have been undecided whether we should make that sale, partly because of my concern that Israel's sense of security might be weakened by it. I am satisfied that the risk of that arises for reasons that are not so much military or technical but rather political—or psychological if you will.

It is difficult for Israel to see us move toward a close relationship with Saudi Arabia on the military side. It is difficult for Israel to see how it can defend itself in the long run against growing Arab military power, which is inevitable whether we sell the Saudis equipment like this or whether others do.

This is why the Israeli Government itself has shown such an interest in the areas of military cooperation we might pursue more fully than we have so far done.

I believe that a firm and determined reconfirmation of our commitment to Israeli security for the long term, demonstrated by moving forward with far closer cooperation with Israel than the United States proposes to have with any Arab country—and by our call for the President to inform the Senate regularly about how that cooperation is progressing so that we can continuously monitor and encourage such cooperations—would help restore Israel's confidence that we intend to maintain and insure its ability to defend itself against any combination of potentially hostile forces in the region.

With this reassurance, I believe we can avoid dangerous consequences for Israel's security should we proceed with the sale of AWACS and other equipment to Saudi Arabia. And with this reassurance, together with the commitments we expect to receive (or have received) from the President in writing, I would be prepared to support the sale.●

AMENDMENTS SUBMITTED FOR PRINTING

ADMINISTRATIVE PROCEDURES ACT AMENDMENTS OF 1981

AMENDMENT NO. 619

(Ordered to be printed and to lie on the table.)

Mr. NUNN submitted an amendment intended to be proposed by him to the bill (S. 1080) to amend the Administrative Procedures Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs; to provide for periodic review of regulations, and for other purposes.

REGULATORY FLEXIBILITY

Mr. NUNN. Mr. President, last year, the Congress approved the Regulatory Flexibility Act. That law, hailed as landmark legislation by the small business community, requires all agencies, prior to promulgating regulations, to undertake any analysis of the impact of those regulations on small business. Whenever possible, agencies are to take action to minimize the burden of regulations on small businesses. To insure that the interests of small business are protected, the law provides a statutory responsibility for the SBA Chief Counsel for Advocacy's to review agencies' regulatory analysis, monitor agency compliance with the implementation of the act, and report annually to the Congress on the actions taken with respect to this law.

The Regulatory Flexibility Act took effect on January 1, 1981. Agencies have been complying with its provisions. Since the Chief Council for Advocacy was not confirmed until July 31, SBA's internal efforts have been slowed. Their commitment to the full implementation of the act, and their role in its success, has been strong throughout, however.

During the Senate Judiciary Committee's consideration of S. 1080, the regulatory reform legislation, that committee added additional provisions to the Administrative Procedures Act. In addition,

the committee redesignated the "old" Regulatory Fexibility Act provisions (previously chapter 6 of title 5, United States Code) as a subchapter of chapter 6. The committee bill then provides that:

The President shall have the authority to establish procedures for agency compliance with chapter 6 of this title. (S. 1080, page 46, lines 2 and 3.)

And

The President may delegate this authority, in whole or in part, to the Vice President or to an officer within the Executive Office of the President whose appointment has been subject to the advise and consent of the Senate. (S. 1080, page 46, lines 12–14.)

Identical provisions exist in the Government Affairs Committee amendment to the Judiciary Committee amendment to the bill. (See page 78, lines 2 and 3, and page 80, lines 6–10.)

The net effect of these provisions is to seriously impair, if not eliminate, the role and responsibilities for the implementation of the Regulatory Fexibility Act which Congress imposed on the Chief Counsel for Advocacy only 1 year ago.

As the ranking minority member of the Senate Small Business Committee, and as a member of the Governmental Affairs Committee, I do not believe that the Chief Counsel for Advocacy should be undercut in his statutory role in implementing the Regulatory Flexibility Act. Nor do I believe that the Judiciary Committee or the Governmental Affairs Committee intend this result. The small business community needs to have a responsible, and responsive, advocate for their views within the executive branch in the development of regulatory policies.

Therefore, I am proposing two amendments. The amendments would retain existing law for the implementation of the Regulatory Flexibility Act. The parliamentary situation requires that both the Governmental Affairs amendment in the nature of a substitute, and the Judiciary Committee amendment in the nature of a substitute, be amended.

Mr. President, I believe these amendments to be noncontroversial. I am confident that they can be adopted quickly when the Senate begins its consideration of this important regulatory reform legislation.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the Committee on Rules and Administration will hold a meeting on Friday, November 6, 1981, at 9:30 a.m. in room 301 Russell Senate Office Building. The purpose of the meeting is to markup S. 807, the Federal Assistance Improvement Act of 1981. On October 20, 1981, S. 807 was referred to the Rules Committee for 20 calendar days for consideration of title I, section 1005, subsections (c) through (f) of the bill.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public that the oversight hearings on the implementation of title I of the Natural Gas Policy Act scheduled for Thursday, November 5 and Friday, November 6 will begin at 9 a.m. instead of 10 a.m. in room 3110 of the Dirksen Senate Office Building.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public that the subcommittee hearing on S. 625, to revise the boundary of Voyageurs National Park, scheduled for Thursday, October 29 will begin at 9:30 a.m. instead of 10 a.m. in room 3110 of the Dirksen Senate Office Building.

ADDITIONAL STATEMENTS

SENATOR GARN OUTLINES WORK TO PROMOTE U.S. EXPORTS

● Mr. HEINZ. Mr. President, during the first 10 months of this year the Senate Banking Committee has established a fine record of accomplishment in the area of export promotion. It has reported out legislation providing for the establishment of Export Trading Companies, a measure that will greatly facilitate the entry of small- and medium-sized businesses into international trade. Other legislation acted upon by the committee includes the Competitive Export Financing Act of 1981, which would increase the ability of the U.S. Export-Import Bank to defend American businesses against predatory credit financing of foreign governments and the Business Accounting and Foreign Trade Simplification Act, which would make certain needed and urgent revisions to the Foreign Corrupt Practices Act.

The Senate gave its overwhelming approval to the Export Trading Company Act, on April 8, 1981, by a vote of 93 to 0. The other measures are now awaiting floor action. I am hopeful that they will receive the timely consideration that they deserve. I am confident that my colleagues will recognize the excellent work which the members of the Banking Committee have done on these measures.

In this work, Mr. President, as chairman of the Subcommittee on International Finance and Monetary Policy, I have had the benefit of the joint effort and support of the distinguished chairman of the Banking Committee, the senior Senator from Utah (Mr. GARN). This past week, Senator GARN had the opportunity of addressing a meeting of the International Management Development Institute, where he outlined the successes of the Banking Committee in the area of promoting U.S. exports while also describing some of the challenges that still confronts us. I trust that 10 months hence we will be able to report a similar level of achievement for the committee, indeed for the entire Congress.

I ask that the remarks of Senator GARN be printed in the RECORD.

The remarks follow:

THE BANKING COMMITTEE'S RECORD ON EXPORT EXPANSION

I have been asked to discuss U.S. competitiveness in the international marketplace. I would like to share with you the logic behind what the Senate Banking Committee, which I chair, has been doing to remove the government-imposed impediments which exist for the U.S. exporter and which have made him less able to compete with his foreign counterparts.

To begin, I think that it would be useful to explain how I see the Eximbank fitting into the overall export policy of our nation. As many of you know, there has been an export credit war going on for the past few years. Our foreign competitors—particularly the French—have used subsidized export credits as a means of garnering lucrative contracts for their nation's exporters. The fact is that, by OECD estimates, it has been costing the French taxpayer as much as $3 billion per year in subsidy costs. Other countries have been experiencing similar costs.

I have taken the position, and my colleague Senator Heinz, the Chairman of the Subcommittee on International Finance and Monetary Policy, has agreed, that the best way to end this foolish and destructive competition in export credit subsidies is for the United States Government to make a solution to the problem a high priority and for the Eximbank to be sufficiently supported in Congress to be able to compete with its counterpart export credit agencies in other countries. In that context, unilateral disarmament would be a bad strategy, since it would remove the incentive to negotiate on the part of U.S. competitors.

Hence, for the past two years and through two administrations I have been leading the fight to keep Eximbank funding at levels high enough to provide an incentive to the Europeans and the Japanese to negotiate and to support U.S. companies bidding for contracts which need long-term fixed-rate financing.

I am happy to report that those efforts seem to have borne fruit. Last week there was a tentative agreement among the major exporting nations to raise official export credit minimum rates by 225 basis points, which would eliminate a substantial portion of the subsidy element by setting a minimum rate of ten percent to the less developed country markets. Much remains to be done, but this is substantial progress, and it should allow the U.S. Eximbank to raise its direct credit rates significantly without putting U.S. exporters at too much of a disadvantage vis-a-vis the French or Japanese.

So for this and other reasons which I shall mention I feel that we can say that the Banking Committee is making a good deal of progress in eliminating disincentives to U.S. exports. I think that for too long we have looked at exports as a privilege which the government grants. To my way of thinking, U.S. citizens have a right to export, within of course the overall context of general U.S. national security and foreign relations.

For example, I am against selling all our latest technology to the Soviets and helping them to overcome the great inefficiencies that there are in their economic system. There are some legitimate and necessary controls that must be placed upon our exports. Too often, though, controls have been excessive, misplaced, arbitrary, or mismanaged; they have forbidden or caused to be lost legitimate export sales, while allowing, incredibly so, major technologies and products to slip through into the hands of our adversaries. What I am saying is that we need to be tighter and more exact on some of our national security controls, while more open and less restrictive on all but those few exports that must be controlled.

This is just one further area, Export Administration, where the Banking Committee has made some significant contributions. There is still much to be done. The export licensing process still is too slow and inefficient. We still lose export sales, that Congress had no intention of stopping, just because it takes too long to get an export license. My feeling, though, is that this will

improve in the coming months once the new Administration has had time to organize and set priorities.

There has already been some improvement. There have been some organizational improvement at the Commerce Department, and their greater use of computer technology should speed up the processing of applications considerably. There may be some need for further changes in the Export Administration Act. If that should be the case, then the Banking Committee will make those changes. We will have to see if those organizational changes to which I referred will get us more within the statutory requirements for timely licensing. I am hopeful that they will.

A possible option, one which I proposed during the last session of Congress, would be the establishment of an Office of Strategic Trade. This would transfer responsibility for export administration from the Commerce Department to an independent agency. That may be the most appropriate thing to do. As I have mentioned on other occasion, the new Administration deserves the opportunity to show what it can do on the export control issue. Perhaps it will be able to make the current Export Administration Act work, doing what it was intended to do, namely preventing exports that would prove harmful to U.S. interests without hindering exports that would not be. That is something that we will have to examine in the next calendar year, after, as I said, the new Administration has had time to make the system work as well as it possibly can.

Let me mention another of the self-imposed handicaps with which the American exporting community must face. As Senator Heinz has said, not only do we seem to have the habit of shooting ourselves in the foot when it comes to exports, but we are quick to reload and fire again. Another area where we have imposed on ourselves export disincentives, and an area in which the Banking Committee has done some excellent work in correcting, is the Foreign Corrupt Practices Act. That Act purportedly outlawed the bribery of foreign officials. Well, in doing so, it almost succeeded in outlawing U.S. exports.

The U.S. Trade Representative, William Brock, called revision of the FCPA one of the most important trade issues facing the Congress. I am proud to report that the Banking Committee, in a very timely fashion, has dealt with that issue and on September 16 reported out a bill that makes significant improvements in the FCPA while preserving, and in fact enhancing, its anti-bribery provisions.

Here you had a piece of legislation that is a wonderful example of what we do so much of on Capitol Hill. We had a bill that was loaded with good intentions, that was rushed through the Congress on the excitement of the wave of revelations about bribery of foreign government officials, with all sorts of unforeseen consequences. What is incredible to me is the difficulty involved when once such problems are grossly obvious, when you have every group affected by the Act coming in and saying that it needs to be modified, that such and such negative consequences have resulted, when the unnecessary chilling effect to U.S. exports is apparent to all. It is incredible to me that you still have to fight tooth and nail to amend it. I guess that I would add to Senator Heinz's remark I mentioned earlier that not only is it amazing how quick we are to reload and shoot ourselves in the foot repeatedly, but it is amazing the lengths we'll go afterwards to avoid seeing the doctor.

Unfortunately, the relevant Committee of jurisdiction in the House, the Energy and Commerce Committee, seems reluctant to report a similar revisions of the Foreign Corrupt Practices Act. Similarly, the Export Trading Company Act of 1981, which as I said the Senate passed 93–0 on April 8, 1981, seems destined to languish in the House Banking and Judiciary Committees, which have joint jurisdiction. This badly needed improvement in the way small businesses can market their goods abroad has run up against objections of certain of my House colleagues who seem to feel that there is nothing wrong with the present structure of banking and antitrust laws as they apply to international trade, even if all the major U.S. competitors conduct their foreign trade in an atmosphere of greater certainty and greater access to finance and marketing opportunities.

The Commerce Department estimates that there are 20,000 U.S. businesses, with full competitive products, which could successfully export but do not for one reason or another. The Export Trading Company Act is aimed at that group of small- and medium-sized businesses who find the international marketplace a forbidding place and who wonder whether their own government will look favorably on their attempts to combine their marketing and promotional activities in order to compete more effectively.

What the Banking Committee has been trying to do with bills such as the Trading Company Act, the Foreign Corrupt Practices Act revisions, and even with the Export Administration Act amendments, is to provide the kind of certainty and predictability which U.S. exporters need—and deserve—when they compete in the international marketplace. The Japanese and the Germans are formidable competitors. U.S. exporters need cooperation and guidance from their own government, not further impediments.●

THE DETERIORATION OF THE SITUATION IN NICARAGUA

o Mr. HELMS. Mr. President, at the very moment that its officials insist that it is "intent on improving its relations with the United States on the basis of a respectful dialogue," the Sandinista government of Nicaragua has continued to intensify its attack on the private sector this past week. One week ago, five of the most prominent officers of private sector organizations were arrested in a flagrant violation of their rights to try to keep the Nicaraguan private sector alive. That action came within 12 hours of action in this Chamber which earmarked $30 million in U.S. aid to the private sector in Nicaragua, even though $20 million of our aid intended for the private sector there last year cannot be accounted for to the satisfaction of our own AID officials.

Mr. President, the arrest of these men is not an isolated incident in an otherwise improving relationship between Marxist Nicaragua and free people, whether within that country or abroad. This past Sunday morning, the home of a prominent political leader from the private sector, Mr. Alfonso Robelo, was attacked by a Sandinista mob while government policemen stood by and did nothing. Mr. Robelo's automobiles were destroyed and his house was severely damaged. This man, who supported the overthrow of the Somoza regime as fervently as any Sandinistan, is now the victim of the whirlwind which the Sandinista victory spawned. But he is not the only victim. The Catholic and Moravian churches have been the constant targets of Sandinista oppression in past months, and the people of Nicaragua have frequently been denied access to the only nongovernment newspaper, La Prensa, even though it is strictly limited by government censors as to what truths it can report about the chaos which the Sandinistas have brought to Nicaragua.

Recently, Mr. President, this respected newspaper printed a history of the incidents of repression which it had suffered at the hands of the government since 1932. In the 45 years which preceded Sandinista rule, these incidents averaged one every 5 years; since the Sandinista victory in July of 1979, they have averaged one every 4 months, and this year alone the newspaper has been closed down by the government five times. I am sorry to note that many seem to consider this trend to be salutary. For instance, during the 19 years between 1960 and the Sandinista takeover in 1979, the Inter-American Development Bank had disbursed a total of $134 million to Nicaragua. In the first 18 months after the Sandinista takeover, the IDB committed a total of $262 million to the Sandinistas.

Even now a Sandinista application for $30 million more is pending before the IDB. It seems that this renegade country, which terrorizes its citizens at home and exports revolution abroad, has earned the distinction to receive twice as much from this particular multilateral lending institution in 18 months than it had the previous 19 years.

Mr. President, the Sandinistas have made no secret about their intention to consolidate their power in Nicaragua and build an army large enough to foment struggles in every Central American country at once. Colonel Qadhafi of Libya has already sent $100 million, much of which has found its way into the revolutionary pipeline of terror and violence aimed at other Central American countries. Defense Minister Humberto Ortega has stressed that the Sandinistas are intent on creating a Marxist-Leninist state in Nicaragua. The Sandinistas are out to destroy the church, the family, the private sector and all the traditional values of the Nicaraguan people. If they succeed, only the shattered dreams of those who love freedom will remain; as for the rest, the words of Alexandr Solzhenitsyn ring all too true: if the falsehood of ideology reigns, it will bring violence in its wake.

Mr. President, it is essential that we consider the statement issued by the private sector organizations which led to the arrest of its leaders. In fairness, I would consider it equally enlightening to compare that statement with the statement issued by the Sandinista party's official radio station, their own version of "Radio Moscow" and "Radio Havana." I therefore ask that these two documents appear at this point in the RECORD.

The documents follow:

DOCUMENTS

[Dreyfus] Managua, 19 October 1981. Commander Daniel Ortega Saavedra, coordinator of the governing junta of national reconstruction:

The boards of directors of the organizations of the private sector, members of COSEP, having met at a special session on this date, have decided to submit to the governing junta the following considerations:

Over 2 years have passed since the victory of the Nicaraguan people over the Somoza regime. During this period, we have seen the advance of a government project quite different from that drafted in the program of the National Reconstruction Government. We have analyzed the process of changes; we have pointed to the dangers of the course through which you want to lead the revolution. We have felt the indifference of the government to our recommendations and we have witnessed a long parade of foreigners, many of whom carry messages alien to our nationality.

The national economy is crumbling, production shows no signs of recovery, social peace is not yet a reality, the country falls deeper in debt in an endless spiral and the mixed economy announced by the government retreats before the advance of property nationalization, uncovering a project designed behind the people's back.

Considering the government's domestic and foreign policies enforced by the rulers of the country, we find an unmistakable Marxist-Leninist ideological line, confirmed by the speeches of members of the national leadership. The actions of the members of this government and their speeches here and abroad reveal the purpose of engaging in an international ideology campaign which has submerged us in almost total isolation from those sister nations who in the beginning supported the true Nicaraguan revolution. Apparently, the government no longer cares about the support of nations like Costa Rica or Venezuela; instead, it prefers the support of countries like Libya and Cuba, which places us within a clearly defined alignment and exposes us to suffer the consequences of such an alignment.

The statements of members of the government before international forums appear to conform more to international Marxist-Leninist movements than to the principles which inspired and which should be the guidelines of this revolution. Recently the defense minister and member of the FSLN national leadership, Commander Humberto Ortega, said that it was necessary for the people to prepare a list of persons, potential counterrevolutionaries; that those who consciously or unconsciously—namely noncommunist Nicaraguans—support the imperialist plans, and who fail to join the defense whenever the attack takes place, will be the first to appear hanging along the roads and highways of the country.

The defense minister's statements, later confirmed by Dr. Sergio Ramirez Mercado, of the governing junta of national reconstruction, indicates the start of a project whose consequences cannot be predicted. Worse yet is the fact that such statements can only be interpreted as the preparation of a new genocide in Nicaragua for exercising the right to dissent.

We are at the threshold of the destruction of Nicaragua; we are reaching a point of no return from which this government will hardly be able to claim its legitimacy before the people. The nationalism of an entire nation is being threatened by the internationalism of a radical and fanatical minority.

Portions of the pronouncement of the FSLN national leadership on 16 October of this year could be considered most positive if the concepts of such a pronouncement should influence the words and attitudes of the members of that national leadership. This pronouncement, however, accentuates the marked ambiguity that characterizes this government.

What is the use of appealing to all sectors if whenever you deem it necessary, you brand these same sectors as traitors. What is the use of proclaiming a mixed economy if companies continue to be illegally confiscated. What is the use of proclaiming guarantees to freedom of the press if the communications media continue to be shut down.

What is the use of proclaiming political pluralism if the political parties are banned from holding peaceful meetings through the use of the divine hordes—to use your own words—taking over the country in a display of chaos and violence. What is the use of claiming to guarantee ideologic pluralism if the actions of the independent unions are obstructed and their leaders arrested. What is the use of claiming to guarantee the physical integrity of persons if the minister of defense threatens to hang people. What is the use of affirming support for the economic efforts of the Central American governments if the rulers of these same countries are antagonized and called gorillas by leadership members. What is the use of proclaiming respect of human rights if laws are enacted restricting these rights.

It is necessary to understand that those you call domestic or foreign reactionaries are not against the Nicaraguan people but against the Marxist-Leninist project you are imposing behind the people's back. That is the reason we are being isolated by other countries, and that is the reason we are opposed to the project.

Let it be very clearly established before you and before history that the Nicaraguan private sector supported and shall continue to support the legitimate Nicaraguan revolution as it is contemplated in the program of the National Reconstruction Government. In no way, however, does it support the plans to change this revolution into a Marxist-Leninist adventure which will only bring more bloodshed and suffering to our people.

Such is the truth, regardless of insults or threats, as seen by many nations of the world who supported us wholeheartedly at the beginning but who now observe us with distrust and are alarmed by the behavior of this government and its ideologic tint.

We hope and pray to God that there is still time to amend the errors and that you may so understand.

Attentively, [signed] COSEP; Nicaraguan Development Institute, INDE; Confederation of Nicaraguan Chambers of Commerce; Nicaraguan Chamber of Industries; Nicaraguan Chamber of Construction; Confederation of Professional Associations of Nicaragua, CONAPRO; and the Union of Nicaraguan Agricultural-Livestock Producers, UPANIC.

RADIO SANDINO'S REACTION

PA202351 Managua Radio Sandino in Spanish 1800 GMT 20 Oct. 81.

(Station commentary: "COSEP's Irresponsible Provocation: A Thoughtless Appeal to Reflection."]

[Text] Those who for over 2 years of the Sandinist people's revolution have been deaf to the calm and patriotic appeals from our vanguard's National Directorate and the revolutionary government to become a part of the national reconstruction process; those who for over 2 years of the Sandinist people's revolution have closed their eyes to the Nicaraguan people's sacrifices and efforts to heal the wounds resulting from the war of liberation and to alleviate the economic crisis provoked by dependence on Yankee imperialism and aggravated by the Somozist plundering, in which they participated to a large extent; those who for over 2 years of the Sandinist people's revolution—and not just now, when they shamelessly admit it—have shared the cause of the Nicaraguan people's foreign enemies, slandering and maligning the process abroad, engaging in capital depletion, sabotaging the national effort to recover production and abusing the social, economic and political freedoms guaranteed by the revolutionary government; they, the group of politicized businessmen who claim to represent the country's private sector when in fact they represent only its recalcitrant and obdurate portion—which has isolated itself through its refusal to join the process and through its efforts to destabilize the Nicaraguan revolution, with the intention of reversing it and of recovering its selfish lost privileges—are now demanding reflection from those who have been prodigal in their generosity and tolerance toward the Nicaraguan people's domestic enemies.

With the arrogance that is characteristic of those who have always regarded the Nicaraguan people as only another target for exploitation and a means of growing rich, the Higher Council of Private Enterprise, COSEP, leaders have addressed the government junta, not to announce their decision to join in peaceful and patriotic production, but with the strident provocation and recklessness characterizing daddy's little boy who, obeying his foreign parent's plans, irresponsibly seeks to challenge the patience of both the people and the leaders of their revolution.

It is indeed playing with fire to seek to ignore reality and to try to curb this process after more than 2 years of the Sandinist people's revolution has confirmed that the working majorities of our people are determined to confront anything in defending our new fatherland and its revolutionary conquests. This is indeed a dangerous adventure, concealing omens of an infamous past and generated by anti-Nicaraguans for which there is no longer any room in our history, in the history that the people of Sandino and Dario are currently writing.

In this new fatherland, integrated within the Sandinist revolutionary process and working with civic and patriotic honesty, there are thousands of private producers and honest businessmen who endorse and confirm the existence of the mixed economy proclaimed by the Nicaraguan revolution and guaranteed by the National Directorate of our historic vanguard and its revolutionary government. Hysterical boasts cannot deny this reality. Demagogic stridency cannot conceal the improper use made by dishonest and politicized businessmen of the financial support lavished on the private sector by the revolutionary government. This is not how this reality can be denied. Even in the world's most democratic country—today's Nicaragua—political and ideological pluralism is limited by the interests and will of the popular majority, which paid with the blood and life of thousands of their best children for the right to control their own destiny and to write their own history.

Those who admit to identifying with our foreign enemies, who in their desire for hegemonic domination arrogate to themselves the right to decide what we, the children of Sandino, want or do not want, cannot speak on behalf of the people's will and interests. What a crafty pretension on the part of those who have always believed in submission.

It would be better if the politicized directors of COSEP realized once and for all that their particular interests are guaranteed in the process of national reconstruction, within the framework of the general interests of the Nicaraguan people. They should realize that through their provocative and destabilizing activities, they are denying themselves their rights as Nicaraguans. They should also bear in mind that the Sandinist people's revolution is here to stay; that it is irreversible, for the people of Sandino and Dario are determined—and they have already proven this repeatedly—to pay the necessary price in blood and suffering, sacrifices and limitations, to defend the new fatherland and the revolution. This is the greatest legacy of their heroes and martyrs.

OPPOSITION COMMENTS ON 16 OCTOBER FSLN COMMUNIQUE

PA201518 Panama City ACAN in Spanish 1912 GMT 19 Oct. 81.

[Text] Managua, 19 Oct. (ACAN-EFE)—Leaders of the Nicaraguan opposition parties today insisted that the "FSLN must consult with the country's independent political and

production sectors, in order to give the revolution a 'realistic and effective direction'."

Commenting on the FSLN's eight-point official communique issued on Friday, Emilio Alvarez Montalvan, Democratic Conservative, said in a series of interviews published by Managua's LA PRENSA that, even though he believes the FSLN positions are "positive and stimulating," the problem continues to be one of "converting rhetoric into action."

In its 16 October communique the Sandinist leadership reaffirmed, among other things, its belief in "dialogue as a vehicle which will help the search for solutions to the problems affecting our Central American region."

Mr. HELMS. Mr. President, the past 2 weeks have been devastating for the cause of freedom in Central America. The arrest of these private sector leaders in Nicaragua marks the boldest, most flagrant violation of fairness and decency in the brief but dark history of the Sandinista Marxists. Already they killed Jorge Salazar, the former colleague of these men, by gunning him down in cold blood in November 1980. Now they have moved to annihilate any private sector leadership, to intimidate and terrorize those who refuse to cooperate in their plan to bring a Marxist-Leninist state in Nicaragua. Who knows whom they will move against next—will the church be their next target?

The Marxists hate it with a passion, and the good Archbishop of Managua, Monsenor Obando y Bravo, is the most respected leader in the country, whose authority goes much deeper than mere politics. He has been harassed continually by the Sandinistas, who consider the deep faith of Nicaraguans of all denominations to be nothing more than the "opiate of the masses."

Mr. President, I do not know who the next target will be. But it is clear who the ultimate target is: The free people of the Western Hemisphere are threatened by a resolute and coordinated band of power-hungry mobsters who fan out from Moscow, Libya, Havana, and other capitals to sow terrorism, instability, murder, and ultimately totalitarian power. The Sandinistas have had many opportunities to show their dedication to democratic and free principles; unfortunately, they use such terms only in their rhetoric, hopeful that it will win them a few precious allies, allay a few fears, and gain them the all-important time they need to consolidate their tyrannical hold on an innocent and peace-loving, freedom-loving people.

Mr. President, this is not the only blow against the hopes for freedom in Central America in the past fortnight. Not only has Nicaragua consolidated its tyrannical hold on its own people, but it has lent an indispensable hand to the leftist terrorists in El Salvador. Most recently, the most important bridge in that country, the Puente de Oro over the Rio Lempa, was destroyed by an operation smoothly devised and directed by several hundred Cuban troops. Moreover, Vice President BUSH has pointed to the presence of 5,000 Cuban troops in Nicaragua, many of whom, I have no doubt, are aiding and abetting the revolutionaries in El Salvador. Mr. President, it is of utmost importance that the importance of that bridge be appreciated: It cost $100 million to build years ago, and was the pearl of the Salvadoran economy's infrastructure. The economy will not be able to last for long without it: And there remains only one more bridge over that huge and powerful Lempa River which, we must assume, is now the prime target of the guerrillas. Once it is gone, the lower third of the country would be cut off from the rest, and ripe for an invasion and declaration of a "liberated zone" in El Salvador.

The Soviet Union has not ignored this opportunity to spread the chains of Marxism-Leninism to one more country in the Caribbean, Mr. President; Dr. Genevieve de Chellis, the Soviet affairs analyst of the Senate Steering Committee, has recently conducted a study of an organization of the Soviet Union's network for the expansion of international tyranny called the Institute of Latin America of the U.S.S.R. Academy of Sciences. It constitutes a highly sophisticated, zealously dedicated attempt to inform and articulate the Soviet thrust into Latin America, and I ask that it be printed at this point in the RECORD.

The study follows:

THE INSTITUTE OF LATIN AMERICA OF THE U.S.S.R. ACADEMY OF SCIENCES

The Institute of Latin America (ILA) was founded in 1961 in Moscow as an all-Union Center [1] for the coordination of Soviet research on Latin America.[2] It belongs to the Department of Economics of the USSR Academy of Sciences.[3]

From 1965 on the Institute has been headed by the much traveled and decorated Professor V. V. Vol'skiy, Doctor of Economic Sciences, author of numerous works on topics ranging from forestry conservation in Peru [4] to petroleum resources and the political and economic problems in Latin America in general and Brazil and Venezuela in particular.[5]

DUAL MISSION OF THE INSTITUTE

The official mission of the ILA is to conduct "scientific research on the economic, agrarian, political, ideological and cultural problems of Latin American countries, their foreign policy, international and inter-continental relations, the construction of socialism in Cuba" and specifically "the relations of Latin American countries with the USSR".[6] All this "in the context of present global problems".[7]

The ILA has another mission. It is an extremely effective and far reaching intelligence collecting, disseminating and policy-making institution, an instrument of Soviet propaganda and of Marxist-Leninist indoctrination in Latin America.

The political and also policy-making dimensions of the ILA emerge in the following instance, one among many. Immediately following the 26th CPSU Congress (Feb. 23–March 3, 1981), an all-Union Scientific Conference on "The Present Stage of the Liberation Movement in Latin America and the Tasks of Soviet Specialists in Latin American Affairs" was held in Moscow under the joint sponsorship of the ILA and the Association of Friendship and Cultural Cooperation with Latin American Countries (the latter also headed by Dr. V. V. Vol'skiy). Some 200 specialists from leading institutes of the USSR participated in the work of the Conference. Its 13 lectures were attended by 15 of the 29 Latin American Communist and Leftist delegations to the 26th CPSU Congress. In its account of the work of the Conference, the Latin America monthly, official organ of the ILA, noted with satisfaction that such conferences held immediately after a CPSU Congress had become an ILA "tradition".[8]

The members of the ILA are quite frank about the objectives of the Institute. Professor A. F. Shul'govskiy, Director of the Department of Social and Political Problems of the ILA stated that the main task of the Sector of Communist and Workers Movements of his Department is to study the activity of communists in the context of the "liberation, revolutionary processes on the continent" . . . taking into account "new problems that arise" . . . in the struggle to win over the masses".[9]

V. A. Kuz'michev, Director of the Sector of Culture, Science and Education of the same Department stressed the "great importance" of cultural and historical studies, because "cultural problems play an always greater, and sometimes even a decisive role" in the solution of practical problems encountered by the ideological and political struggle.[10]

In view of the above, there is little doubt that in the words of Cuban communist K. Aldano, the media of socialist countries, especially of the Soviet Union, have "taken the offensive" in recent years in Latin America.[11]

SOME ACTIVITIES OF THE ILA

The importance of the ILA has grown with developing USSR-Latin American contacts. In 1970, the USSR had diplomatic relations with only nine Latin American countries, in 1980 with 19.[12] By the mid-seventies, some 3,000 youths from Latin America were studying in the USSR [13] and 2,000 out of the 20,000 Soviet citizens involved in the arts and sent abroad were sent to Latin America.[14] The USSR had become a leading world center for the training of specialists in Latin American affairs.[15] Members of the ILA delivered some 5,000 lectures in 20 years in the USSR alone.[16]

The ILA operates through its numerous publications the complete list of which is published by the Institute of Latin America (ILA) and the Institute of Scientific Information on Social Sciences of the USSR Academy of Sciences.[17] It also operates through regular discussions, "round tables", readers' conferences and symposia usually dedicated to some specific topic or area and attended by Soviet and Latin American specialists. There are also frequent exchanges of visits between the latter.

The Latin America illustrated monthly, which first appeared in 1969 [18] and is published in Russian and in Spanish, is the official organ of the ILA and presents full or partial accounts of the above meetings and visits. Its chief editor is S. A. Mikoyan. Doctor of Historical Sciences and specialist in Peruvian affairs. (He is the son of Anastas Mikoyan, deceased former member of the Politburo of the CC of the CPSU.) He was recently decorated by the Peruvian government. On that occasion the Peruvian ambassador to the USSR Hubert Alsamora remarked that the Latin America magazine was "a tribune from which Soviet and Latin American specialists expressed their opinions on the most varied topics."[19]

LEADING LATIN AMERICAN COMMUNISTS VOICE THEIR OPINION OF THE ILA

In its April 1981, 20th anniversary issue, Latin America published with pride some comments of several General Secretaries of Latin American Communist Parties concerning the work of the ILA.

It is of some interest that Gilberto Vijeira of Colombia stressed the importance of research conducted by the ILA on the role of the armed forces in Latin America.[20]

Jorge del Prado of Peru remarked that the works of Soviet authors (published in the Latin America monthly) were "a very important" help in the struggle of the people for national and social liberation ". . . valuable tools . . . in the hands of revolutionaries fighting for democracy and progress on the continent".[21]

Footnotes at end of article.

According to Ruben Dario Souza of Panama, the publications of the ILA were of "invaluable assistance to Latin American revolutionaries" . . . they served to "improve old tactics, to determine strategic tasks . . . to determine the road that revolution must take . . .".[22]

Athose Fava of Argentina declared that the activity of Soviet specialists in Latin American affairs and of the ILA in particular, played "an important part" in the struggle of the people of Latin America against imperialist oppressors and local reaction.[23]

Jeronimo Carrera, member of the Central Committee of the Communist Party of Venezuela was of the opinion that the studies of the ILA, based as they are on "solid Marxist-Leninist foundations," are extremely valuable for Soviet researchers in their study and "creative interpretation" of Latin American reality and an "invaluable help to progressive forces on the continent".[24]

STRUCTURE OF THE ILA

Over the years, the structure of the Institute of Latin America has undergone some modifications due to changing needs. According to information given on the occasion of its 20th anniversary (Latin America, No. 4. April 1981), the ILA comprises at present four departments, each of which include several Sectors.

1. Department of Economics:

Sectors: Soviet-Latin-American Economic Relations, General Economic Problems, and Territorial and Regional Problems.

Group of Statistical and Economic Forecasting.

2. Department of Social and Political Problems:

Sectors: Ideology and Political Thought, General Socio-Political Problems, Communist and Workers Movements, and Culture, Science and Education.

3. Department of Area Studies and International Relations:

Sectors: General Foreign Policy Affairs, La Plata countries and Brazil, Andean countries, "Meso-America" (Mexico and Carribean area), and Cuba.

Group for the Study of Relations of Socialist Countries with Latin American Countries.

4. Department of Scientific Information:

Groups: Reference and Review Service, Scientific Information Bulletin, Scientific Documentation Bulletin, and Scientific Documentation.

The Administration of the ILA also includes the following divisions:

A Group of International Relations (especially books exchange);

A Department of Graduate Fellows preparing for advanced degrees. (Over 100 have graduated in the past 20 years);

An Editorial and Publishing Group;

A Library of some 57,000 volumes and periodicals, mainly covering the social sciences;

A Printing and Duplication Laboratory; and

A Learned Council of the Institute presides over the defense of dissertations on Latin America. It may be added that the ILA has at present ten members holding doctorates and 86 with Candidates degrees.

Mr. HELMS. Mr. President, I understand that the trial of these private sector leaders in Nicaragua will take place tomorrow. The Sandinistas have chosen a cause celebre for the enunciation of the new stage in their glorious revolution. The free people of the world will be watching these proceedings with great interest, Mr. President, as I know the Members of this body shall.●

UNITED ORDER OF TRUE SISTERS

● Mr. LEVIN. Mr. President, the oldest national women's fraternal and philanthropic organization in the United States, the United Order of True Sisters, will be celebrating its 135th anniversary on November 1, 1981.

Since 1947, the United Order of True Sisters, Inc. (UOTS), has focused its attention on cancer services. Thirty-eight UOTS lodges around the country have made important donations in the form of equipment and money to various hospitals serving cancer patients. Furthermore, the UOTS is the only such organization which allocates funds for home health care of indigent cancer patients.

On June 2, 1981, the UOTS presented a check for $40,000 to Dr. Barbara Johnston, an oncologist at St. Vincent's Hospital in New York. Dr. Johnstson has been conducting research on a new blood test for use in early cancer detection. Studies which have been conducted on the blood tests indicate that it is highly accurate in determining the presence of a malignancy in the body.

Mr. President, contributions such as this make the United Order of True Sisters, Inc., a very unique and worthwhile philanthropic organization. I commend Ms. Marilyn Koploy, of the Detroit area lodge, Ms. Nana Klein, national president of UOTS, and all the other dedicated women who are members of the United Order of True Sisters.●

LAND REFORM IN EL SALVADOR

● Mr. HELMS. Mr. President, on the 22d of October, during debate on U.S. aid to the expropriated sector of El Salvador's agricultural community, I mentioned statistics on landownership in the United States for comparison with those in El Salvador. Senators may recall that the ownership of land in many of these United States is more concentrated than landownership in El Salvador before the land reform was instituted. Nonetheless, those expropriations were meant to rectify what many apologists consider to be a situation so unjust that only radical reforms could have avoided a revolution.

In the RECORD of that debate of October 22, I asked that the table of distribution of farm and ranch land for each State in the Union be reproduced; in addition, I also referred to the percentages of all land owned by the top 5 percent of American landowners. That second table was apparently omitted in the RECORD debate of October 22, and I ask that the table from which those figures were taken be printed in the RECORD at this point.

The table follows:

EXHIBIT A

TABLE 1.—*Concentration of land ownership in the United States of all land by region and State*

Proportion of acreages held by largest 5 percent (1st col.) of landowners and largest 1 percent (2d col.) of landowners:

Northeast:

Mr. HELMS. Mr. President, the concerns which I have expressed about the accountability and effectiveness of U.S.

aid to the land reform program are shared by many others who are charged by the American taxpayer with the responsibility for the disposition of U.S. aid funds. Already this year, the chairman of the House Subcommittee on Foreign Operations and a bipartisan group of some 40 Congressmen have expressed their serious reservations about the uses to which U.S. aid is put in El Salvador. Mr. President, I ask that their letters be printed at this point in the RECORD.

The letters follow:

EXHIBIT B

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 5, 1981.

Hon. ALEXANDER M. HAIG, Jr.,
Secretary of State, U.S. Department of State, Washington, D.C.

DEAR MR. SECRETARY: We wish to express to you our deep concern about the rapidly deteriorating economic situation in El Salvador. The economy is in serious trouble and is getting worse each day. Private capital and technical managerial talent are leaving the country at an alarming rate. If this situation is allowed to continue, the very existence of a moderate democratic alternative will come into question.

It is well known that the Marxist opposition has sought to weaken the government and increase their support by seeking to destroy the economy of the country. Massive unemployment and economic despair have always been the traditional breeding grounds for revolution. A related aspect of this problem, however, is the failure of the Salvadoran government to utilize the talents and resources of the private sector.

Within El Salvador there exists a strong private sector—one that has committed itself to supporting needed reforms and working with the government to provide the necessary economic base for the survival of a truly pluralist democracy. As individuals or groups, such as the umbrella organization—the Productive Alliance—thousands of business and professional people remain in El Salvador trying to keep their business, shops and factories going.

It should not be forgotten that the government received the critical support of the private sector when a national strike was called. They kept their enterprises going and their workers off the streets to keep the economy running. As we have seen in Nicaragua it is the private sector that can provide the last straw to break a government as that under Somoza or it can provide the last ray of democratic hope as that under the Sandinistas.

We urge you to make it clear to the Salvadoran government, which is receiving so much assistance from the United States, that we in the Congress expect them to open the government to the participation of the business sector and that they will do everything they can to support a free market economy and a viable private enterprise. Besieged as they are from extremists of the far right and left, they need to broaden their base to include many of the business and professional class to gain wider political support as well as to utilize the managerial talents and skills that this group possesses.

We also hope that you will tailor our aid programs to reflect this concern and urge the Junta to implement much needed economic and social reforms with the participation and involvement of the private sector. We believe that economic aid is needed and justified for the region, but we also feel that American interests are better served if this aid supports the private economy, which can best create the jobs and utilize the skills and talents of the country.

We recognize and appreciate your concern for Central America, and we ask you to please keep us informed as to the steps that the government of El Salvador is taking to enlist the cooperation of the private sector.

Sincerely,

Kent Hance, Sam B. Hall, Jr., Robert Lagomarsino, Bill Archer, Guy Vander Jagt, William Broomfield, Robert Dornan, Jim Courter, John LeBoutillier, Arlen Erdahl, Benjamin Gilman, Manuel Lujan, Ed Derwinski, Ken Kramer, Clair Burgener, Tom Evans, Wayne Grisham, Marjorie Holt, Jack Kemp, Bob Livingston, John Rousselot, Paul Findley, Edwin Forsythe, Jerry Lewis, Eldon Rudd, Olympia Snowe, John Erlenborn, Arlan Stangeland, Joel Pritchard, Ed Weber, Bob Michel, Bill Lowery, Bill Goodling, Larry Winn, Jr., Trent Lott, Albert Lee Smith, Jr., Henry Hyde, Norman Shumway, Don Clausen, John Myers, John Ashbrook.

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 14, 1981.

Hon. ALEXANDER HAIG,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: On behalf of the Committee I am approving the reprogramming requests for El Salvador numbered 197, 198, 199 and 200, subject to the Committee's insistance that before any of these funds are utilized, the Agency for International Development would review the existing programs for which the reprogrammings have been requested and certify to the Committee that procedures will be adopted to ensure that funds for these programs have and will be used effectively and with strict controls against diversion and fraud. Strict audit procedures, on-the-spot investigations and a whole series of tight fiscal controls are necessary to protect the money of the American taxpayer. The Committee expects full details about the procedures and safeguards to which the new funds will be subjected.

For example, as designed, AID's Private Sector Support project may be open to possible misuse of funds. According to the project document, the only requirement for the Central Bank of El Salvador which administers the special foreign currency funds, is a quarterly report which indicates the amount of imports attributed to the private sector, the name of the importer, person, business or institution and the type of goods and services purchased. Is this procedure adequate? Why are only minimal reporting requirements built into the project? Have any spot inspections been made to determine whether the imported materials or equipment are actually being used or have not been sold and the proceeds pocketed.

In regard to the land reform program, the Committee supports the efforts of the government of El Salvador to address the needs of its landless poor. However, we are concerned about the slow pace in compensating the previous owners of land included within this program as well as the slow pace in providing titles to the landholders created under the Land to the Tiller program (Decree 207). We believe that AID resources should be allocated to the Salvadorian economy in a manner designed to promote most efficient use of those limited resources. To the extent that those AID resources are used to support the land reform program, the Committee believes that AID should not artificially favor the larger cooperatives established under Phase I of the land reform program at the expense of Decree 207 landholders in the provision of credit and related supports.

The Committee is similarly concerned about the slow pace in providing titles to the cooperatives established under Phase I of the land reform program. We believe that those cooperatives should have the right to convert from cooperative to individual ownership if they so desire.

In view of these concerns the Committee directs the Agency for International Development to provide it on a monthly basis with a report that provides a monthly and cumulative running total of (1) previous owners who have been compensated under the land reform program; (2) applications for title filed under Decree 207, provisional titles granted to cooperatives established under Phase I of the land reform program.

The Committee also directs the Agency to provide it with a report within 90 days evaluating the feasibility of individual as opposed to cooperative ownership of Phase I lands. This report should also include an analysis of AID's past level of support in terms of providing credit and related supports to Decree 207 beneficiaries as well as to the cooperatives established under Phase I of the land reform, and a plan for rectifying any previous bias toward supporting the larger cooperatives.

The Committee is also of the view that the maintenance of a free market price system for agriculture and other products is indispensable for the success of the land reform program and in the absence of such a system El Salvador may become a bottomless pit for American economic aid.

Sincerely,

CLARENCE D. LONG,
Chairman, Subcommittee on Foreign Operations.

Mr. HELMS. Mr. President, one disadvantage which must be borne in mind when considering the land reform program in El Salvador is the lack of information about the expropriated properties before their seizure; in order to justify the expropriation of the finest pieces of property in the country, those who support the reforms are tempted to distort any information about earlier production figures or to destroy it altogether. Nonetheless, it is important for Americans to understand what kind of system was destroyed by the reforms which are now being supported by our tax dollars.

I am glad in this regard that Dr. Christopher Manion, of the Foreign Relations Committee staff, recently visited a farm in Guatemala, which is just large enough to qualify under the first phase of El Salvador's reform program. That farm is operated by Mr. Adolfo Cordon, a graduate of the University of Notre Dame and a dedicated and tireless worker who has spent his life trying to improve the lot of the people in his country. Since it is nearly impossible in El Salvador to conduct an on-the-spot comparison of pre- and post-reform farms, I have asked the Department of Agriculture to prepare a brief reform of all the advances achieved by Mr. Cordon on his Guatemala farm, which presently enjoys the help of only 12 full-time workers. This is the kind of operation that was destroyed in El Salvador's land reform program, and there is no doubt that, should land reform come to Guatemala, Mr. Cordon's work will be plowed under as subsistence crops are planted and all the progress and work of the past 40 years will disappear.

The material follows:

FOREIGN AGRICULTURAL SERVICE,
Guatemala, Guatemala, October 7, 1981.
DR. CHRISTOPHER MANION
Foreign Relations Committee
U.S. Senate, Washington, D.C.

DEAR CHRIS: I am sending you some information concerning the Hacienda Santa Cristina that Adolfo Cordón and I put together for you. I hope that contained in the four documents enclosed with this letter you will find all the information you may need in your work.

Sincerely,

LARRY M. SENGER,
Assistant Agricultural Attaché.

PENDING IMPROVEMENTS OF THE HACIENDA SANTA CRISTINA, OCTOBER 1981

CITRUS OPERATION

At present there are 75,000 lime trees of the Key and Persian varieties in production on the farm. In 1981 an additional 25,000 plantings were made. These new plantings will begin to produce within four years.

When the necessary financing is secured the appropriate investments will be made to provide the Hacienda Santa Cristina with the following citrus processing capabilities: 1) the extraction of lime oil from the lime peel, 2) the production of lime juice for export to the U.S. and the U.K. (principally the U.K.), and for the domestic production of lemonade to be sold cheaply as a substitute for relatively expensive soft drinks, 3) the production of citrus pulp to be used in animal feed, 4) the production of pectin, 5) the production of Roses Lime Extract for export to the U.K.

At present there are 500 grapefruit trees of the Ruby Red variety growing on the Hacienda Santa Cristina. Fresh grapefruit from these trees will be exported to U.S. markets during the off season. Fresh grapefruit juice will be supplied to the local market. (Presently there are no varieties of grapefruit of this quality grown elsewhere in Guatemala).

Income from the citrus oil and juice operations is about $1.25 million per year.

FEEDLOT OPERATION

Adolfo Cordon's father, along with the USDA and Tom and Dorsey Buttram of the Clear Creek Ranch of Welch, Oklahoma, was one of the three original breeders of the Brangus breed of cattle. The purity of the breed on his farm is presently maintained through the use of semen purchased from three suppliers in the United States: 1) Wye Plantation, Greenstone, Md., 2) Jesse L. Dowdy, Rayville, Mo., 3) George Shacklefore, Atkins, Arkansas. Mr. James B. Lingle, the Manager of the Wye Plantation had advised Adolfo Cordon in his cattle improvement program on yearly visits to Santa Cristina since 1958.

Currently there are 400 registered Brangus cattle on the Hacienta Santa Cristina. Plans have been made to expand the registered herd to 800 head. The registered herd will be used as breeder stock which will be crossed with local breeds to produce cattle for a feedlot operation. The feedlot operation should one day grow to from 5,000 to 10,000 head. The meat produced will be used to provide the local market with a premium quality meat. At present Guatemala has only about 5 or 6 feedlot operations of this size.

The cattle in the feedlot will be fed on a mixture of sorghum, citrus pulp, molasses, urea, lemon grass bagasse and cottonseed meal. All of the feed ingredients are grown on the farm except the cottonseed meal, which is readily and cheaply available.

The expansion of the cattle operation is on hold until investment funds become available.

LEMON GRASS OPERATION

Plans have been made to convert the boilers, which are used to distill the essential oils from the lemon grass produced on the farm, from the consumption of oil to bagasse. The project would cost only $28,000 to complete. Presently about $48,000 worth of Bunker C fuel is used in the lemon grass distillation process every year. Thus, in less than a year Mr. Cordon would recoup his investment.

In addition to burning lemon grass bagasse, the converted boilers would be capable of burning sugar cane bagasse and coffee bean hulks. Both of these by-products are available from nearby suppliers at low costs.

Lemon grass bagasse left over after the farm's demand for fuel is met (about 50% of the bagasse), would be used, along with manure and urea from the livestock operation, in the production of a high quality fertilizer for use on the farm. This would save $80,000 in fertilizer purchases every year and about 25% of the lemon grass bagasse produced on the farm would be used in this way. A by-product of the fertilizer production will be methane which can be used to run the farm's ten tractors.

The final 25% of the bagasse would be used as cattle feed on the feedlot. In addition, the converted boiler would be used to dry hybrid corn sold for seed and produced on the farm in the amount of 8,000 bushels per year. This use of the bagasse would result in savings of $12,000 in electricity bills, after installing a turbo generator.

OTHER PROJECTS: COCOA, HARDWOODS, SPEARMINT, ETC.

Equipment will be purchased to process cacao to produce chocolate and coco butter. Production of cacao will take place on 600 acres of forest located on the farm.

The forest is also being used to produce mahogany, cedar and local varieties of hardwoods, for later commercialization. An average of 10,000 hardwood trees are planted on the property per year. The net value of the hardwood is estimated at $25 per tree per year of age. Other forest crops grown on this land are Christmas trees and houseplants for sale locally.

The forest is located on the banks of a small river that flows through the farm. Keeping this land forested is important for the prevention of erosion.

Plantings of peppermint, spearmint, and citronella are currently being conducted on an experimental basis. If the production of these items proves feasible, they will be processed using the same equipment now used to distill lemon grass oil.

Other crops being cultivated on a smaller scale which may be increased if proven profitable, are All Spice trees, Cranshaw melons, Tamdew melons, Sugarbaby watermelons and peppers to be exported to the United States during the U.S.'s off season.

WHAT MR. CORDON BELIEVES WOULD MOST LIKELY OCCUR UNDER LAND REFORM

The Lemon Grass and Citrus operations would be plowed under to make way for the production of corn. The production of commercial or cash crops is not often continued by new owners after land reform measures are introduced.

The distillation machinery would go unused and be allowed to deteriorate.

The trees in the forest would be cut down to provide wood for fuel. The new owners would most likely not appreciate the long-term profitability of the hardwood trees, nor the importance of keeping trees along the creek for prevention of erosion.

The cattle would be slaughtered in short order. The breeding of registered Brangus cattle would be suspended. Such an operation would be considered unnecessary since local, unimproved breeds would be considered adequate for domestic consumption. Cattle would only be produced in such numbers as could be supported by scrounging and granging on the farm. The feedlot operation would be discontinued.

Credit, which is difficult to obtain in the best of times, would become even harder to secure. As a consequence the farm would go unimproved and the inherent productivity of the land would decline due to lack of funds for proper maintenance.

The new owners under land reform would most likely not be experienced managers. The efficiency of the present operation would not be matched, and the productivity of the farm would suffer.

Mr. HELMS. Mr. President, in light of the concerns expressed last week by many of the participants in the Cancun conference on the relationships between developed and developing countries, I am renewed in my conviction that President Reagan is correct: development must come from within. It is Guatemalans like Mr. Cordon who will make Guatemala a developed country. Unfortunately, the best efforts of those who were making the most progress toward the development of El Salvador have been destroyed by the land reform there. Two articles by Robert Bleiberg and Melvyn Krauss detail the fallacies in the type of thinking that has led to land reform in Latin America, and I ask that they be printed at this point in the RECORD.

The articles follow:

[From Barron's, Jan. 12, 1981]

WORKERS AND PEASANTS—IN EL SALVADOR, LAND REFORM COVERS A MULTITUDE OF SINS

When we make a mistake, it's a beaut. A few months ago, in an editorial commentary on Poland, we remarked that foreign policy is too important to be left to diplomats, especially those who push cookies at the U.S. Department of State. We went on to say: "Over the years, contrariwise, we have come to cherish the no-nonsense, school of hard knocks brand of diplomacy practiced by the American Federation of Labor-Congress of Industrial Organizations. . . ." What we had in mind, of course, was the AFL–CIO's sponsorship of the stirring tour of the United States by Alexander Solzhenitsyn, Soviet exile, Nobel Prize-winner and champion of freedom, as well as its long, lonely and ultimately successful fight to preserve the usefulness of the International Labor Organization by righting its anti-American, pro-Communist tilt.

Last week, however, other less admirable foreign policy initiatives, promoted and financed by the AFL–CIO—or, more precisely, by an offshoot known as the American Institute for Free Labor Development (AIFLD)—came to light when two of its representatives, together with the head of the local Institute for Agrarian Transformation, were shot and killed in El Salvador by parties unknown. With the help of a million-dollar grant from the Agency for International Development, the unionists were working to help carry out the Salvadoran government's so-called program of land reform.

Men of goodwill were horrified, but few matched the eloquence of AFL–CIO President Lane Kirkland: "The AFL–CIO is outraged and saddened by the cold-blooded murders of American Institute for Free Labor Development representatives Michael Hammer and Mark Pearlman by extremist forces in El Salvador. These good men were in El Salvador to assist that nation's peasant unions to participate in a land reform program designed to improve the lives of hundreds of thousands of small farmers and to lay the foundation for a stable democratic society. We are equally grieved by the assassination of our brother and friend Rodolfo Viera, president of the Union Communal Salvadorena, the largest democratic peasant organization in the country. . . . The AFL–CIO

will continue its support to the rural and urban trade unions of El Salvador so long as they need and desire our help. We call upon the U.S. government to reiterate its support for the land reform program for which our brave friends gave their lives, and the success of which would be their best memorial."

Some memorial. Like so many other socialist buzzwords—"progressive" income tax, for example, or "liberal lawmaker—"land reform" covers a multitude of sins. To carry out its mandate, the powers-that-be ordered the military to seize farms at gunpoint in the dead of night and to drive out the owners. Compensation, based in theory on ludicrously low valuations set for tax purposes and, in a country where inflation is raging at double-digit rates, payable in low-yielding long-term bonds, has in fact not been paid. Nor, for that matter, has the best land been turned over to the peasants. On the contrary, the large estates that produce the country's chief cash crops, including cotton, coffee and sugar—known in the U.S. as agribusiness, and vilified elsewhere as absentee landlords or oligarchs—have been reorganized into what the AIFLD euphemistically calls cooperatives but are in fact collective farms, owned and operated by the state.

To make matters worse, land reform has been part and parcel of a far more grandiose scheme to gain control of El Salvador's economic life, one that has also triggered nationalization of the export trade and of the once-flourishing and well-run commercial banks. The results have been predictably grim. Except perhaps for AIFLD and A.I.D. international credit has virtually dried up. Since the farms were collectivized, production and sale of the cash crops have fallen sharply, further depleting scanty reserves of foreign exchange. Output of goods and services last year plunged by an estimated 10%, while more than half of the labor force is unemployed. All grist for the mill of those, at home and abroad, who would rise to power by exploiting class warfare and chaos. The State Department and the AFL–CIO have somehow struck an alliance that has led not to progress but to relentless decline. With friends like these, the beleaguered people of El Salvador need no enemies.

Foggy Bottom's overt mechinations have long been a matter of mounting concern. According to knowledgeable observers, it has intervened repeatedly in the country's political affairs, helping to topple governments right and (rarely) left, and generally throwing its weight behind policies that can only be called socialistic. Robert E. White, current U.S. Ambassador to San Salvador, has enthusiastically hewed to the same line. In language that would do credit to Fidel Castro's ministry of propaganda, Ambassador White has scathingly denounced local capitalism as "an alliance between large landholders, business interests and the army, designed to reap maximum profits, give minimum benefits and minimum salaries, prevent any kind of organization of the peasantry or workers, pay as little as possible in taxes and permit corruption that was rampant in the government. . . ." After the killing of a politicized priest last spring, the diplomat shocked the Chamber of Commerce by accusing the business community of financing "hit squads," and, without a shred of evidence, offering the "working hypothesis" that it was responsible for the Archbishop's death (an indiscretion that led to his being called back briefly to Washington for "consultation"). Last month he blamed the Reagan transition team for allegedly inciting the "right" to murderous excess.

Ambassador White will be in no position to abuse his authority much longer, his next posting, we submit, should be to Kabul, where he'd have a chance to learn what repression really means. But that still leaves the AIFLD and its wrongheaded zeal. According to a spokesman, this organization was launched in 1962 when President Kennedy suggested to George Meany that the AFL–CIO could be a force for good in the so-called Alliance for Progress. Though that dubious contribution to foreign policy-making long ago vanished into the dustbin of history, AIFLD, with the support of some blue-chip corporate names, has been quietly promoting low-cost housing, trade unions and similar works ever since. And it has thrown itself into the cause of land reform in El Salvador. According to the AFL–CIO *Free Trade Union News:* "On March 6, 1980, the ruling Junta of El Salvador decreed a land distribution program which, when fully implemented, will become the most sweeping agrarian reform in the history of Latin America. . . . At the forefront of this breakthrough is the Union Communal Salvadorena, a peasant farmer pressure group first organized in 1966 with assistance from the American Institute for Free Labor Development . . ."

Breakthrough for whom? Breakthrough for what? Surely not for either free enterprise or freedom. In advance of the move, the junta took control of all communication throughout the country and temporarily suspended civil liberties. Those forced off their land by the army, which handled the seizure like a military operation, were stripped of their possessions without so much as an official receipt. As for compensation, it is based on valuations submitted by the owners in 1977 for tax purposes, a method which even in countries with greater respect for tax gatherers would be tantamount to confiscation. Although inflation is running at an annual rate of 30%, payment—not one colon has yet been forthcoming—was fixed in government bonds bearing an interest rate of 5% and maturing in 30 years. As for the peasants in whose name all this has been done, to date they have gained neither title to the land, nor the right to buy and sell it. The president of the country is on record, moreover, as stating that the new "owners" won't even have the option of deciding what crops to plant: "A designated Directorate makes those decisions."

As all recorded history attests, such decision-making is an invitation to disaster. After resigning in disgust and fleeing the country, one agricultural scientist and former top official wrote to his U.S. sponsor: "The plan that is being carved out is a foreign plan, perhaps prepared by specialists from international organizations who couldn't care less if it fails. . . . Please tell the State Department that . . . the 16 specialists in Agrarian Reform who have been offered to our Secretary of Agriculture would, undoubtedly, be people with expertise in the failures of Chile and Peru." Small wonder that the output of the leading cash crops has plummeted: sugar from 6 million hundredweight in 1978–79 to 4.4 million; coffee from 3.9 million hundredweight to an estimated 2.2 million in the current crop year. In El Salvador as elsewhere, a camel is a horse designed by a Directorate.

The last word belongs to David Garst, partner of Garst & Thomas Corn Co., whose father's bountiful harvest once inspired the administration of then-Soviet Premier Khrushchev, and who recently served on the Presidential Mission on Agricultural Development in Central America and the Caribbean. In an unusually blunt letter to the White House, farmer Garst wrote as follows: "El Salvador's agrarian reform consisted of confiscating all land over 100 hectares owned by any one person. The Junta also nationalized banking to make credit available to finance the State and/or collective farms made from this confiscated land . . . and set up a State monopoly to control exports of all traditional agricultural crops. This has destroyed the private sector of the economy. . . . There is no democratic political system . . . and there is no chance for economic progress. What we are supporting is a Marxist revolution.

ROBERT M. BLEIBERG.

[From the Wall Street Journal, Feb. 4, 1981]

LATIN AMERICA: INFLATION SHAKES WELFARE STATES

(By Melvyn B. Krauss)

The Carter administration believed that political violence and military dictatorships in the Third World are caused by extremes of wealth and poverty. Reducing inequalities of income and wealth distribution, therefore, became the cornerstone of U.S. policies toward the Third World in recent years. El Salvador is a case in point. The Carter response to a Cuban-based takeover threat there has been to sponsor a regime that nationalized the banks and promised agrarian reform, a strategy that seems to have enraged both the extreme left and the extreme right.

Difficult as it is to comment from afar on the course of events in Latin America, one may nonetheless assert that the real weakness of Carter's failed policy toward El Salvador and other Third World countries may not be that it pleases only U.S. liberals. Rather there is growing evidence that Carter's policy would not work even where both left and right in the affected country agree that a move toward greater economic equality is warranted. Several Third World countries have embraced the welfare state to combat extremes of wealth and poverty. But instead of promoting prosperity and social stability as predicted, the welfare state resulted in economic chaos, political violence and military dictatorships.

Costa Rica is a recent example. The New York Times reported in December that ". . . Costa Rica's problems are the result of a welfare state that has brought considerable social justice and economic equality yet for years has spent more than it has earned, consumed more than it produced and, finally, borrowed more than it could afford . . . Perhaps the greatest symptom of the crisis is that, in a country that has known eight successive peaceful transfers of power and has long boasted of its democratic tradition, there is suddenly open discussion of the possibility of a coup to install a government capable of dealing with the threat posed by the economy."

Costa Rica's real income has been substantially lowered because of the adverse movement in its terms of trade. If most economic decisions in Costa Rica's economy were private, the decline of real income would be "adjusted" by a decline in real expenditure. Costa Rica would be poorer; but there would be no need for a political crisis since the source of Costa Rica's problems—changes of commodity prices on world markets—are outside of Costa Rican control. Besides, things could soon get better. Sharp cyclical variations in the terms of trade are part of the normal economic environment for small one-crop economies.

But Costa Rica's welfare state made it impossible for Costa Rica to adjust to its reduced real income. The problem is that the decision to reduce welfare expenditure is a political one, which by its nature involves broken promises by the government to its citizens. When private individuals cut back because of reduced real incomes there is only private regret to contend with. But when the government has to suspend free medical services, reduce or eliminate pensions and so forth, citizens feel betrayed by their government.

Faced with the choice of cutting back on welfare expenditure or trying to maintain it in the face of declining real income by printing money, a government may well choose what appears to be the easy way out. The result: rapid inflation, devaluation of

the currency and loss of access to foreign capital markets. This is the present situation in Costa Rica. People there are talking of a coup d'etat simply because the directive power of an authoritarian regime eventually comes to be seen as the only way the economy can be made to adjust to changed circumstances.

Similar to the situation in Costa Rica, the inability of Uruguay's government to reduce welfare expenditure during times of depressed world prices for its leading export—meat—led to hyperinflation. The terms of trade turned against Uruguay during the 1960s. The fall of its currency ratio from 11 pesos-to-1 dollar in 1960 to 100-to-1 in 1967 and 250-to-1 in 1963 reflected an inflation that resulted from government financing of inordinately high levels of welfare expenditure through money creation. Uruguay had little incentive to invest in equipment or chemicals for farm production because the government had been using export profits to prop up its state-owned industries and its own huge bureaucracy.

Unlike the Carter administration, El Salvador's President, Jose Napoleon Duarte, appears to have learned the lessons of Costa Rica and Uruguay. He argues, "There is too little land and too many people. . . . We need to become more like Taiwan, importing labor-intensive industries." This means that El Salvador should avoid the agrarian-reform, wealth-redistribution muddle favored by the Carter administration and instead use the free market to spur economic growth. The Reagan administration's policy should be to help El Salvador become the Taiwan of Central America.

Mr. HELMS. Mr. President, it is clear from these documents that our support of the land reform in El Salvador is a costly and unnecessary mistake. Nonetheless, we can only hope that the most stringent accounting procedures and an attitude of honesty and candor on the part of those American officials responsible for the administration of our aid programs will minimize the losses that this program will entail and that our American aid dollars will, in fact, help rehabilitate the private sector in El Salvador and strengthen that country in its battle against the leftist guerrillas which threaten its very existence.●

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS BILL

● Mr. NICKLES. Mr. President, last evening I voted against H.R. 4035, the Department of the Interior and related agencies appropriations bill. In my statement that accompanied that vote, I stated my intention to provide, in the CONGRESSIONAL RECORD, a breakdown of those places where H.R. 4035, as passed last night, is over the administration's September 24 budget requests.

To follow through with that pledge, I ask that the following table be printed in the RECORD.

It should be noted that H.R. 4035 is almost a billion dollars over the figure requested to balance the budget by 1984.

The table follows:

Comparison of the Department of the Interior and Related Agencies Appropriations Bill (H.R. 4035) as passed Oct. 28, 1981, with the Administration's Sept. 24, 1981, Recommendations

	Sept. 24 request	H.R. 4035, as passed
Department of the Interior, title I:		
Bureau of Land Management	$456,138,000	$565,889,000
Office of Water Research and Technology	0	0
Office of Water Policy	0	6,873,000
Fish and Wildlife Service	201,379,000	242,189,000
National Park Service	632,114,000	839,314,000
Geological Survey	473,582,000	505,991,000
Bureau of Mines	124,881,000	147,959,000
Office of Surface Mining Reclamation and Enforcement	158,220,000	169,753,000
Bureau of Indian Affairs	889,899,000	971,276,391
Territorial Affairs	134,952,000	167,430,000
Office of the Solicitor	17,307,000	18,870,000
Office of the Secretary	51,652,000	56,401,000
Related agencies, title II:		
Forest Service	1,446,506,000	1,623,247,000
Department of Energy	992,908,000	1,061,652,000
Indian Health	558,729,000	653,522,000
Indian Education	$71,364,000	$81,096,000
Institute of Museum Services	194,000	8,400,000
Navajo and Hopi Indian Relocation Commission	3,254,000	4,981,000
Smithsonian Institution, National Gallery of Art, and Woodrow Wilson International Center for Scholars	168,319,000	178,636,000
National Endowment for the Arts	77,440,000	119,300,000
National Endowment for the Humanities	74,800,000	113,700,000
Commission of Fine Arts	152,000	303,0000
Advisory Council on Historic Preservation	1,641,000	1,632,000
National Capital Planning Commission	2,095,000	2,2361,000
Franklin Delano Roosevelt Memorial Commission	35,000	280,000
Pennsylvania Avenue Development Corporation	16,755,000	19,0400,000
Federal Inspector for the Alaska Pipeline	32,180,000	28,568,,000
Holocaust Memorial Council	704,000	770,0000
Grand total	6,597,200,000	7,589,433,391

Note: Suuject to verification of the Appropriations Subcommittee.●

HAITIAN REFUGEE TRAGEDY IN FLORIDA

● Mr. KENNEDY. Mr. President, the news this week of the tragic drowning of 33 Haitian refugees near Miami has shocked the conscience of millions of Americans, and underscored once again the difficult legal, moral, and diplomatic problems our country faces in dealing with refugee and migration flows from Haiti and the Caribbean.

But what troubles me most are reports that our Government is not seriously looking for the smugglers and the vessel responsible for dropping these victims and their frail craft into the coastal waters of Florida before dawn on Monday.

I believe this tragedy should call forth a prompt and full-scale investigation by our Government to apprehend and bring to justice all those responsible for these deaths. As I note in a letter I have written today to the Attorney General, it is intolerable that our Nation's laws against smuggling can be violated with impunity by unscrupulous criminals who remain free to ply their vicious trade in human lives.

Mr. President, I ask that my letter to the Attorney General be printed at this point in the RECORD.

The letter follows:

COMMITTEE ON THE JUDICIARY,
Washington, D.C., October 28, 1981.

Hon. WILLIAM FRENCH SMITH,
Attorney General, Department of Justice, Washington, D.C.

DEAR ATTORNEY GENERAL SMITH: I am writing to urge you to use the full resources of the Federal Government to apprehend and bring to justice all those responsible for the tragedy that caused the death of 33 Haitians off the coastal waters of Florida last Monday.

A number of federal agencies have possible jurisdiction in this matter. I believe it would be appropriate for the Department of Justice to take the lead in establishing an inter-agency task force, composed of the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Coast Guard, the Customs Service and other appropriate agencies to conduct a prompt and full-scale investigation of these deaths and to prosecute those responsible to the full extent of the law.

I am particularly concerned by reports that the United States is not even looking for the vessel that apparently sailed from Bermuda, and later dropped these victims and their frail craft into the coastal waters of Florida before dawn on Monday.

This tragedy has shocked the conscience of millions of Americans. It is intolerable that our nation's laws can be violated with impunity by unscrupulous criminals who remain free to ply their vicious trade in human lives. I urge you to do everything in your power to bring the guilty persons to justice at the earliest possible moment.

Sincerely,

EDWARD M. KENNEDY,
Ranking Minority Member.●

SOCIAL SECURITY EDITORIAL

● Mr. DOLE. Mr. President, an editorial in the Washington Post on October 26, "More Trouble for Social Security," argues the need for Congress to take steps now to insure the solvency of social security in the years ahead. While I am in complete agreement with this, the editorial mistakenly states that the Senate, in adopting the Finance Committee amendment to H.R. 4331 on October 15, "thought it had salved social security's wounds well enough for the system to limp through the next decade."

In reality, most Members of this body were aware that the action would only insure the solvency of the retirement fund, the largest of the three trust funds, for the next few years. This was of great importance. The retirement fund pays 70 percent of all social security benefits and was projected to be broke by the end of next year. With the exception of only a few Members, who for political or other reasons would have us do nothing, it was

recognized that the system would require more substantial legislation within the very near future.

This is clear from the floor debate and from the nature of the final Senate action. A Finance Committee amendment was adopted which had three major elements—a reallocation of payroll tax income between the three trust funds, the authority for borrowing between the two cash benefit funds, and a partial restoration of the minimum benefit, the cost of which was offset by two small program changes. There was virtually no effect on the net financial condition of the system. Instead, resources were temporarily redistributed from the relatively more prosperous health insurance and disability insurance funds toward the nearly broke retirement fund

When offering the committee amendment, I warned those who would later read or hear about the Senate action not to be under any illusion that we had taken care of either the short- or long-term social security problem. We were only delaying the day of reckoning by a year or two.

As much as $20 to $30 billion would still be needed between now and 1990 to provide the barest level of solvency for the system, and $60 to $70 billion would be needed to maintain current levels of reserves, already more seriously depleted than at any time in the history of the program. The recently announced deterioration in the medicare trust fund simply increases the financial requirements of the system, possibly by as much as 40 percent.

Prior to reporting the committee amendment, the Finance Committee heard testimony from Dr. Alice Rivlin, Director of the Congressional Budget Office, Mr. John Svahn, Commissioner of Social Security, and Mr. Robert Myers, Deputy Commissioner and past Chief Actuary of Social Security. Each stressed that the type of action we were considering was likely to insure the timely payment of benefits through the 1980's only under quite optimistic economic conditions. All agreed that the difficulty of projecting economic performance made more significant action necessary if solvency was to be guaranteed beyond 1984 or 1985.

The new information provided by the medicare actuaries just confirms two things we already knew. First, medicare is seriously underfinanced. Chronic and severe deficits are likely to become apparent near the end of this decade. Second, medicare and the rest of the social security system is highly sensitive to changes in economic conditions. This is why social security requires reserves in excess of expedited outgo—to insure benefits can be paid despite unanticipated changes in income or expenditures.

In light of all this, the important question seems to be why the Senate failed to take more extensive action to remedy social security's financing problems. The answer is simply politics. None of us will soon forget the firestorm of protest that greeted the President's May 12 social security proposals.

I might also remind my colleagues of the position of Speaker O'NEILL. In his view, social security can be made secure without increasing revenues or controlling expenditures, merely by making the modest adjustment of interfund borrowing. We were constantly reminded that a more extensive proposal would not be acted upon in the other body.

Obviously, the time was not right for bipartisan solutions. A few more responsible editorials like the one published in the Post yesterday may be helpful in convincing Members of Congress to act responsibly, both now as the other body works to modify our bill, and in the months ahead as we consider major changes in social security financing.

The viability of social security, which provides a basis of support for 36 million people, depends on the willingness of 115 million working Americans to continue financing benefits. Surely, curing the system's ills should be the highest priority of this Congress.●

JERRY NOYER, PLANTATION, FLA.

● Mr. CHILES. Mr. President, I wanted to take a moment to express my admiration for Jerry Noyer of Plantation, Fla. Mr. Noyer moved from New York to Florida to retire, but he is proof that retirement does not mean inactivity. He has spent most of his 6 years in the Sunshine State helping citizens protect themselves against crime.

An article in the October 14 issue of "Golden Age Living" quotes Mr. Noyer as saying the first battle he had to fight was the one against apathy. Apathy is certainly becoming less of a problem as six of Florida's areas, including Broward County, have become the Nation's leaders in violent crime.

Mr. Noyer's contributions have included becoming an active leader of the Broward County Crime Watch chapter, including serving as its president for the last 2 years. He travels throughout the county educating individuals and whole neighborhoods on how they can protect themselves by being alert to potential dangers and by notifying authorities of crimes and suspicious situations.

This kind of effort on the part of individuals and communities themselves is our frontline defense in the battle against crime. A recent hearing by the Special Committee on Aging, entitled "Older Americans: Fighting the Fear of Crime," highlighted the strength and potenial of positive, volunteer activities like these throughout the Nation.

We can thank senior citizens and retirees like Jerry Noyer for the success of such programs, which range from prevention to peer counseling and victim assistance.

The magnitude of the crime problem and its impact—physically, psychologically, and financially—on older Americans is such that we cannot rely on people protecting themselves and prevention alone. That is why I sponsored comprehensive legislation to strengthen our judicial system and coordinate the efforts of various law enforcement agencies with each other and the IRS. But citizen involvement agencies with each other and the IRS. But citizen involvement and self-protection is crucial, and I applaud Jerry Noyer's dedication to preventing crime and encouraging cooperation between citizens and their local law enforcement agencies.

Mr. President, I submit the article from "Golden Age Living" for the RECORD.

The article follows:

JERRY NOYER IS USING HIS FREE TIME TO HELP STOP CRIME

(By Nancy Hubbell)

Plantation.—From ladies' sportwear designer in New York to "Mr. Crime Watch" in Broward County. Jerry Noyer has enjoyed it all.

At age 60, Noyer decided to retire and move to the land of sunshine, where he didn't stay still for long.

"I said I'm 60, I've had it all . . . I left when my business was at its peak."

Noyer has lived in Plantation's Lakeshore Terrace Condominium for six years, but became involved in Crime Watch shortly after moving here, and has been its president for the last two years. He's been an active member for three years.

He became involved in Crime Watch after noting Broward's rising crime rate. At the same time a rapist was running loose at the exclusive Jacaranda area of West Broward, and that pushed Noyer into the program.

"I'm civic minded," said Noyer, who doesn't get paid for his work. "I'm a freebie," he laughs. "It sure beats sitting around the condo pool listening to my neighbors tell about how great they were in whatever part of the north they're from."

Noyer works with 21 out of the 29 Broward municipalities, and also with the Broward Sheriff's Office.

"I travel from the Galt Ocean Mile area, to Hallandale, to Jacaranda, Sunrise Lakes, and in between."

"I love it," said Noyer.

"We're trying to educate people, unfortunately, that we're fighting a life of crime around us . . . which occurs in every city," said Noyer.

"We're trying to eliminate fear by teaching people how to report crimes or incidents to police," said Noyer, who at first said he had to fight a battle of apathy.●

TESTIMONY OF DR. WILLIAM KOREY ON THE OCTOBER 6 HEARING ON ANTISEMITISM IN THE SOVIET UNION

● Mr. HEINZ. Mr. President, as I have previously stressed, I am continuing today to bring to my colleagues' attention the testimony of expert witnesses who addressed the problem of increased anti-Semitism in the Soviet Union. Today I am pleased to submit the statement of Dr. William Korey, director of International Policy Research for the B'nai B'rith International Council and Professor of Russian History. Dr. Korey has taught at Yeshiva University and New York University, and has been a frequent guest scholar on many college campuses.

Dr. Korey's past history of intensive research on the issue involved with Soviet anti-Semitism allowed all present at the hearing better insight into the problems that confront the Jews of the Soviet Union on a daily basis. In particular, he spoke of the tragic reduction that has occurred in Jewish emigration from the Soviet Union and the fact that Moscow, while claiming adherence to the Helsinki Final Act and the Universal Declaration of Human Rights, has

actually been arbitrary and capricious in providing freedom of emigration. He continued by providing a moving account of the current status of the refuseniks, pointing to the profound anguish that these patient individuals must endure.

The statement referred to follows:

TESTIMONY OF DR. WILLIAM KOREY

Mr. Chairman: This is a moment of grave urgency for an entire people, the world's third largest Jewish community. I am not a Cassandra. I am here only to echo the profound sense of perilous anxiety and agony felt by the Jews of the Soviet Union.

Permit me to quote from an extraordinary document submitted last February to the 26th Communist Party Congress in Moscow. "The Jews of the USSR are facing the threat of a national catastrophe," concluded a 5000-word analysis of the Soviet Jewish condition signed by nearly 130 prominent Jewish activists of Moscow and Leningrad. It constituted a desperate *cir de coeur*, a foreboding of possible doom.

What prompts the sense of imminent trauma are two interrelated developments: 1) a severe and arbitrary curtainment by the Kremlin of Jewish emigration to a point where "it is becoming practically impossible" to obtain an exit visa; and 2) a continuing virulent anti-Semitism and a pervasive pattern of anti-Jewish discrimination joined to a deliberate crippling of Jewish culture and consciousness.

The linking of the two phenomena ineluctably has aroused profound dismay and concern among Jews both within the Soviet Union and everywhere in the West. It behooves us to help stir mankind's conscience so that it may respond to the plea of Soviet Jews anticipating "catastrophe." Their final words were: "It is still possible to prevent it." On this occasion when we recall and commemorate the 40th anniversary of Babi Yar, the massacre of our kin in Kiev, those words take on a special urgency.

The enormous significance of emigration rights, especially for minority groups, has been documented in 1963 in a United Nations study prepared by Judge Jose Ingles, a Filipino statesman and jurist. Drawing upon numerous sources from Socrates to the Magna Carta and basic democratic constitutions, the Ingles study demonstrates that the emigration right is an "indispensable" condition for the full exercise of all other rights.

Deprivation of the right for racial, ethnic or religious minorities, the study emphasized, can have cataclysmic psychiatric consequences. The curtailment impact upon a minority already "singled out for unfair treatment" will result in a "spiralling psychological effect" leading to a "morbid fear of being hemmed in" and "a sort of collective claustrophobia." Prominent American psychologists, following visits to Soviet Jews who have sought repeatedly and unsuccessfully to emigrate, have observed a myriad of distress symptoms.

Tragically, the Soviet Union has reduced Jewish emigration to a trickle, the worst in over a decade. The month of August saw only 400 permitted to leave as compared with some 4500 two years ago—a drop of 90 per cent. The new September figure is as low—405.

Despite Moscow's claimed adherence to the Universal Declaration of Human Rights, its ratification of the Covenant on Civil and Political Rights and its formal acceptance of the Helsinki Final Act—all of which require eased emigration procedures—arbitrary and capricious restrictions have been imposed during the past two years to reduce to minuscule levels current exit visas for Jews. Stepped-up bureaucratic obstacles were added to a new and severely restrictive definition of "family" to effect such results.

How many are traumatized by the profound cut-back? Since 1968, over 630,000 Soviet Jews have formally requested and received invitations ("vizov") from relatives in Israel, which is the first stage in the emigration process. More than 251,000 were granted exit visas during this period. That means that 380,000 Jews in the USSR still hold invitation-affidavits, potential seekers of emigration. In fact, the potential is significantly greater. It is estimated that the emigrants left behind approximately 500,000 relatives including husbands, wives and children. Divided families were an inevitable source of the cry for "reunion of families."

Particularly heart-rending is the status of refuseniks, whose requests for exit visas have been repeatedly rejected. Many have waited over a decade to obtain a visa, meanwhile subjected to job loss, exclusion from laboratory and library, and social ostracism. New regulations make it difficult to re-apply even as they add totally new restrictions, resulting in the profoundest anguish. Approximately 2,000 persons had been in the category of refuseniks until 1980. Since then, recently-imposed obstacles have augmented the category by an additional 10,000—a conservative figure. The latter are by no means activists and are, therefore, psychologically unprepared for living in a veritable netherworld of ostracism which characterizes the status of refuseniks.

Despair, anxiety and frustration are the distinguishing features of the emigration pattern. The Ingles study had already highlighted the terribly traumatic consequences. The future is one of desperation and panic.

What compounds the desperation is the massive racist propaganda assault against Jewry initially launched in August 1967 in all the media. But thinly masked as an anti-Zionist campaign, in fact the drive has been directed against Judaism, Jewish tradition and Jewry itself. Stereotypic images of the Jew dominate the descriptions of Zionism, and the Judaic concept of the "Chosen People," totally distorted and falsified, is perceived as the source of the Zionist evil.

The Torah and the Talmud have been presented as works preaching racism, hatred and violence. Fundamental Jewish tenets, distorted and vulgarized, are seen as the embodiment of inhuman aspirations. Typical is the following comment on the Torah from the book *Invasion Without Arms* by Vladimir Begun, published in 1977 in an edition of 150,000 copies (and republished in 1980): "... it proves to be an unsurpassed textbook of bloodthirstiness, hypocrisy, treachery, perfidy and degradation—all the basest human qualities."

The propaganda campaign appears to draw its inspiration from the Tsarist forgery, "The Protocols of the Elders of Zion." That fabrication contained five principal themes and these themes dominate Soviet anti-Semitic writings: 1) international Jewry, through the "Chosen People" concept, aspires to world domination; 2) this aspiration is to be achieved through guile and conspiracy; 3) an especially powerful mechanism for achieving world domination is Jewish control over the international banking world; 4) equally crucial for Jews as a mechanism of control is the press, the manipulation of which will enable them to realize their aspirations; and 5) a final instrument for attaining world domination is Freemasonry which, through infiltration by Jews, will become the base for the drive by the "Chosen People."

Each of these themes has appeared repeatedly in the Soviet media. Central is the view that the "main strategic goal" of the Zionist movement, as the above-mentioned Begun book puts it, is "domination over the world." Even so-called respectable works, like *International Zionism: History and Politics*, published in 1977 by the prestigious Soviet Academy of Sciences, articulate the same view, although in a more subtle manner. The concentration on Zionism as the enemy of mankind is remarkable. Zionism is equated with every conceivable evil—racism, imperialism, capitalist exploitation, colonialism, militarism, crime, murder, espionage, subversion, terrorism, prostitution, even Hitlerism.

Especially provocative are repeated charges that Jews overwhelmingly dominate the military-industrial complex of the West, and, in the past, collaborated with Nazism, an allegation that verges on the absurd. Such accusations, given the experiences, fear, and anxieties of Soviet citizens, are manifestly incendiary. What compounds the provocatory character of the charges is that they are made in major military-ideological publications and are used in indoctrination programmes of the armed forces. The most prolific of the Soviet anti-Zionist writers, Lev Korneyev, more frequently than anyone else, gives expression to these arguments. His articles have appeared in virtually every Soviet press organ, and most notably, in military publications.

What is striking about the Soviet perception of Zionism, as reflected in the propaganda, is the power and evil with which it is endowed. As in the *Protocols*, the power is depicted as cosmic, even Satanic. Poised to resist Zionism's aspiration for world mastery is the great Soviet power. The world is perceived in Manichean terms: the forces of darkness, representing Zionism, are locked in final struggle with the forces of light, as represented by the Soviet State.

The massive character of the Soviet media campaign, obviously centrally coordinated and directed, cannot be emphasized too strongly. Since 1967, according to a close study of the central and provincial Soviet press, the number of articles and the amount of newspaper space dealing with Zionism increased as much as six times over. (Some years it reached even higher and on one occasion was twenty times greater than pre-1967). Zionism was the main subject of at least one-half (and, in some years, two-thirds) of the newspaper space devoted to Jewish subjects. In addition, the total number of anti-Semitic books and brochures escalated to stunning numbers. One research study shows 112 such works published in the 60s and 70s. Some of these books were printed in huge editions of 150,000 or 200,000 copies and were enthusiastically reviewed in the Soviet press.

In addition to press and books, the anti-Semitic propaganda is also conducted by way of lectures, an important vehicle of popular education and cultural activity in the USSR. According to a key journal, in a single year there were 20 million official public lectures, with audiences totalling one billion persons. A secret Communist Party directive in autumn 1974, sent to each Party District Committee, called for the important Znanie (Enlightenment) Society to select, train, and make available a group of lecturers "to give lectures on Zionist themes." Thus, the lecture hall became a principal channel of the anti-Zionist drive. One of the more prominent lecturers of the Znanie Society who has specialized on Zionist themes is Valery Yemelyanov. Examination of two of Ymelyanov's lectures as well as a memorandum he sent to the Party Central Committee reveals a maniacal hatred of Jews. Recently, Yemelyanov, after murdering his wife, was incarcerated in an institution for the criminally insane.

If the public atmosphere has become charged with anti-Semitic racism, it finds particular reflection in the admission policy of Soviet universities, which are the key to opportunity and advancement. The distinguished Soviet scientist, Andrei Sakharov, in June, 1968, called attention to a new "ap-

pointments policy" of the prestigious Soviet Academy of Sciences designed to exclude Jews. From the academic year 1968–69 onwards, admission of Jews to Soviet universities began plummeting. Enrollment of Jews a decade later, on both the undergraduate and graduate levels, was down by nearly 50 per cent and, at the principal flagship universities like Moscow State University, the number annually admitted was almost negligible.

Ineluctably, the percentage of Jews entering the technological, and scientific fields diminished. The contraction was helped along by secret or unpublished instructions. A confidential Party directive in 1970 discouraged the employment of Jews at "responsible levels" in various closed security institutions. Such institutions, Roy Medvedev disclosed, will even exclude those listed as Russians in their identity papers but whose mother or father is Jewish. The Nuremberg generational or "blood" factor had become critical.

Even as anti-Semitism is implemented as a form of state policy, Soviet Jews find themselves particularly vulnerable by virtue of the fact that their institutional life and structure has all but been pulverized by a state drive launched in 1948 and continued since then. Yiddish-language schools and classes were totally liquidated. A token restoration took place last year in several schools of the city of Birobidzhan. But the number of Jews in the entire Birobidzhan District is infinitesimal—only one-half of one percent of the Jewish population of the USSR.

The condition of the Hebrew language is even worse. On an official level, it has virtually no status whatsoever. The private (unofficial) teaching of Hebrew has deliberately not been made legal by the authorities and they often interfere with the practise subjecting both teachers and students to repression.

A sample study of Soviet Jews, including those who do not wish to emigrate, shows that most would like their children to learn Yiddish or Hebrew, to be able to buy books on Jewish history, and to have greater opportunities for Jewish culture. But this aspiration is almost completely denied. Aside from one journal, communal-cultural and publishing institutions have been obliterated. None of the more than 100 other nationalities in the USSR is confronted by such a total cultural desert as is the Jewish nationality.

Private efforts to maintain some semblance of Jewishness are being either seriously harassed and intimidated or crushed. Seminars have been threatened and international scientific conferences sponsored by Jewish activists in which colleagues from abroad participate have been halted. Self-organized universities have shut as have *samizdat* publications.

Especially threatening to the very movement for self-identity are the arrests and convictions of those who have provided a certain leadership in the cultural effort. The notorious case of Viktor Brailovsky, convicted this past summer on absurd charges of "defamation", is characteristic. Since then, one-half dozen further trials were held to silence selected activists and to frighten the others.

Not only are Jewish institutions to be atomized; so also is Jewish consciousness. All assemblages by Jews to commemorate the Holocaust have been dispersed and participants roughed up and, at times, arrested. Even the greatest symbol of the Nazi Holocaust on Soviet soil—Babi Yar—is designed by the authorities for history's "memory hole." Nothing on the monument, finally erected at the site of the historic tragedy, indicates the Jewish trauma. Jews seeking to go there last Tuesday for memorial services were either stopped or terrorized or arrested.

It is manifestly clear that the Kremlin intent is to deprive Jews of their past. At the same time, the officially sponsored racist propaganda drive and discriminatory pattern, has the effect of depriving Jews of their future. Emigration is their only salvation. With the doors all but closed, agony becomes desperation. For them, a "national catastrophe" looms as a real and palyable threat.●

TRIBUTE TO BOB UFER

● Mr. LEVIN. Mr. President, yesterday, football fans of the University of Michigan and all of college football lost a legend of football announcing. For 37 seasons, Bob Ufer was the voice that ballyhooed the exploits of the maize and blue in the hole the Yost dug, Crisler paid for, Canaham carpeted, and Bo Schembechler fills each and every Saturday with amazing consistency.

Each Saturday, the airwaves would fill with the tones of Bob Ufer, the loyalist supporter of the Michigan Wolverines, describing the game he called the "religion" on the day he dubbed the "holy day of obligation." To say that Ufer was anything but "true blue" could be likened to questioning the Catholicism of the Pope.

With stories of past Wolverine greats to draw upon, Ufer exhorted "McCarthy's Monsters" to hold the line just one more time. If that did not work, he would sob, "Meesheegun, oh, Meesheegun win this one for Fielding Yost, that man of so much vision, for Herbert Fritz Crisler, that giant among coaches and men, win it for Bo and Meesheegun, win it for Ufer."

With Edwards close and Butch "don't call me Harold" Woolfolk deep and Smith under center and Carter split wide, the ball is pitched to Woolfolk and it is five, four, three, two, one, touchdown Meesheegun. Ufer would then scream, "God Bless his cotton pickin' maize and blue heart, that halfback scooted into the end zone like a penguin with a hot herring in his cumberbund."

Bob Ufer led the mighty Wolverines into battle against Notre Dame, USC, Michigan State, and the rest of the Big Ten. But he will be best remembered for those games against the "scarlet and grey legions" led by the Wolverines oldest nemesis, Woody "Dr. Strange-Hayes" Hayes.

Boy Ufer's sincerity, dedication, and enthusiasm will never be matched in the "history of man's inhumanity to man" which is football to the rest of us. With victory well in hand, Ufer would proclaim, "Millie set out the cookies, Bo is coming home with a victory."

History will record that on Monday, October 26, 1981, in little Ann Arbor town, Bob Ufer, the truest of all Wolverine fans, took his place among the greats of Michigan football. He will be missed.

Wherever you are, Fielding Yost, I am sure you are smiling. God bless your cotton-pickin' maize and blue heart.●

TOBACCO RESEARCH

● Mr. EAST. Mr. President, much debate has occurred recently on the tobacco price support loan program. Some attack the acreage allotments and poundage quotas, while others speak of the so-called "tobacco subsidy." The smoking and health issue is also inappropriately linked with the tobacco program.

But no one has disputed tobacco's importance to our economy, especially in the areas of exports and taxes.

Research has played a vital role in making and keeping tobacco the economic factor it is. Many of the practices and much of the knowledge utilized today on a regular and routine basis came about because of tobacco research.

Dr. James F. Chaplin, director of the Tobacco Research Laboratory at Oxford, N.C., has written an excellent article on tobacco research and its accomplishments. I think this article effectively points out the need for continued research in tobacco.

I submit Dr. Chaplin's article to be printed in the RECORD.

The article follows:

A BRIEF HISTORY OF TOBACCO RESEARCH IN THE U.S. DEPARTMENT OF AGRICULTURE AND SOME SELECTED ACCOMPLISHMENTS—1960–1980

Tobacco has been an important economic factor during the first two centuries of the development of the United States. In 1980, the farm value of tobacco was about $3 billion, and it currently ranks fifth among farm crops in cash receipts in the United States. Approximately 500,000 farm families derive income from tobacco production. The United States is the world's leading tobacco exporter and the third largest importer. In 1978, exports of tobacco and tobacco products reached an all-time high of $2.12 billion. Imports totaled $428 million, leaving a record trade balance of $1.69 billion—about 10 percent of the U.S. net export trade balance. Tobacco products generate over $20 billion in sales and $6.4 billion in taxes at Federal, State, and local levels. In addition, tobacco manufacturing creates jobs for 76,400 workers and income for 2,900 wholesalers and 1.4 million retail outlets.

The Department's tobacco research is conducted in close cooperation with research programs carried out by the States, other Federal agencies, and industry in the tobacco-producing areas of the United States. The caliber of this research is well recognized by scientists in other tobacco-producing countries around the world.

While no cost benefit analysis for tobacco research is available, highly favorable results easily can be shown. For example, resistance to only one disease, black shank, necessary to produce flue-cured tobacco in the areas where this very valuable crop is grown, would much more than offset annual research expenditures.

The objective of the Department's tobacco research program prior to the mid-1960's was to aid the grower in economical tobacco culture by development of new or improved cultural practices and varieties to aid in consistently producing, at minimal cost, high yields of good quality tobacco.

During recent years, emphasis has been given to research to modify the raw product so as to improve quality and reduce any constituents that can be identified as potentially harmful to the consumer.

I. BREEDING AND VARIETAL DEVELOPMENT

The U.S. Department of Agriculture (USDA) has a long history of accomplishments in tobacco breeding and varietal development. It maintains the only world collection of tobacco germplasm representing most of the cultivated types and all of the wild tobacco species. This major source of germplasm is continually reproduced, improved, and supplied to all tobacco breeders, both public and private. Many of the breakthroughs in research on all tobacco types have come from this collection.

These include resistance to such destructive diseases and pests as Granville (bacteri-

al) wilt, root knot nematode, wildfire, tobacco mosaic, potato virus Y, black-root-rot, blue mold, and tobacco budworm. Most of the tobacco types and varieties currently produced in the United States contain germplasm developed by the USDA. In addition, this germplasm base is presently being used in research designed to change tobacco chemistry for improved tobacco quality and safety. Some significant first examples of improved tobacco varieties and basic germplasm are outlined as follows:

The first black shank-resistant and the first Granville wilt-resistant flue-cured tobacco varieties were developed by USDA scientists. Flue-cured tobacco sales return over $1.5 billion annually to growers. This tobacco could not be grown economically without black shank resistance. Most of the flue-cured varieties presently in production incorporate sources of resistance to black shank and Granville wilt diseases.

Since 1960, USDA scientists have developed 12 flue-cured varieties and 20 lines of basic germplasm with increased disease resistance, yield, and quality. Among these was the first variety which combined resistance to the root knot nematode, black shank, Granville wilt, and other diseases. This variety, once important in two flue-cured tobacco production States, now provides germplasm for all the presently grown root knot-resistant flue-cured varieties in the United States. Over 50 percent of the flue-cured acreage presently is planted to root-knot-resistant varieties. The first tobacco mosaic-resistant flue-cured breeding lines and varieties with acceptable yield and quality were developed by USDA scientists.

Tobacco hornworms are among the oldest and most destructive insect pests of tobacco. It is estimated that this insect causes damage to North Carolina flue-cured growers alone in excess of $2 million annually. A tobacco hornworm-resistant breeding line, representing the first breakthrough in efforts to develop a tobacco variety resistant to this insect, was developed. The discovery of a source of hornworm resistance is a significant development in our overall effort to find biological control agents for major crop pests and represents one more step forward in reducing dependence on insecticides.

Potato virus Y (PVY) is a potentially destructive disease which has occurred sporadically in the tobacco growing areas of the United States. There is no known cure at present. A tobacco breeding line has been developed which will contribute to the development of commercial varieties with resistance to PVY disease. The new line possesses many favorable traits of a commercial variety and has tolerance to the mild strain of PVY and apparent immunity to the severe strain of this disease.

The first variety of burley tobacco resistant to tobacco mosaic, wildfire and black shank was developed by USDA scientists. Before the development of this variety, plant beds were treated with costly bactericides for control of the wildfire disease. This variety also reduced losses to the burley growers caused by black shank and mosaic. All burley varieties now available have the basic germplasm for wildlife resistance from the original USDA source. The USDA has continued to develop burley varieties and breeding lines with improved yield and quality characteristics along with resistance to disease.

Since 1960, USDA scientists have developed and released seven burley varieties and four lines of basic germplasm with improved disease resistance, yield, and quality. A recent article in the Greenville, Tennessee, newspaper indicated that the research at one station in Tennessee, where tobacco research has largely been funded by USDA, "has saved the tobacco growers hundreds of millions of dollars in preventing losses from disease and in producing plants that are most productive and profitable to the farmer."

A major accomplishment in tobacco varietal development was the incorporation of black-root-rot resistance from one of the wild relatives of tobacco into acceptable varieties of burley and dark-fired types. Black-root-rot was a major disease of the air-cured tobaccos. In addition, seven dark-fired varieties have been developed and released which have resistance to black shank and tobacco mosaic.

Other breakthroughs in varietal development include wildfire resistance in cigar binder tobacco. A new race of the disease has recently been discovered, and USDA scientists have already developed germplasm that is resistant to the new race and which is being incorporated into useful varieties.

As a result of research over a 10-year period, 2 disease-resistant varieties of a cigar-filler tobacco were released in 1961 by USDA. One of the varieties is highly resistant to wildfire. The other variety is highly resistant to both wildfire and mosaic, and moderately resistant to black-root-rot. The new varieties yield 200 to 400 pounds per acre more than the standard varieties and have resistance to 2 very destructive diseases of cigar filler tobacco. Since that time, an additional variety of cigar filler tobacco has been developed.

Blue mold is a potent, destructive disease of tobacco, and USDA scientists have been instrumental in developing improved germplasm for resistance to this disease. A cigar wrapper tobacco, resistant to the blue mold disease, was developed by USDA and State scientists and is presently being used to develop other types of tobacco with resistance to this disease.

More recently, rapid breeding procedures such as the haploid technique and cell and tissue culture have been developed and refined. These techniques make possible introduced biochemical modifications of considerable magnitude into new tobacco germplasm strains. Haploid plantlets which develop from cultured anthers of tobacco are placed in a solution of colchicine to induce chromosome doubling of haploids to the normal diploid chromosome level. The diploid plantlets are true-breeding immediately. The method offers the advantage of reducing to 2 years the normal 6 to 8 years required to develop new lines and varieties with desirable chemical characteristics or resistance to insects and diseases. Through this rapid method, the production of more than 1,000 dihaploids from a single hybrid anther source was accomplished in 1979.

II. NUTRITION AND CULTURAL PRACTICES

Much of the early research in nutrition and cultural practices was conducted by USDA scientists, who discovered the first magnesium deficiency in tobacco. This was a landmark discovery which led to elimination of this problem in tobacco and other crop plants through the application of magnesium in commercial fertilizer.

Substitution of potassium nitrate for ammonium and potassium sulfates significantly increased acre yields and values of the cured tobacco leaf (more than 20 percent). A marked reduction in sulfur content, striking improvement in burning properties, increased filling capacity, and lower sugar content in the cured leaf were associated with the substitution of potassium nitrate for ammonium sulfate and potassium sulfate. Based on these and other results, sulfur content with tobacco fertilizers has decreased.

There has been considerable controversy about the use of maleic hydrazide for tobacco sucker control and research has been conducted to find alternative control methods. Technologies for the control of tobacco suckers by fatty acids and fatty alcohols have been developed by USDA scientists and are now used in combination with maleic hydrazide to improve sucker control without increasing chemical residues.

The fatty alcohols developed to control tobacco suckers also controlled unwanted growth in woody plants. These findings were used as the basis for development of chemical pruning of fruit and floral crops, resulting in improved production efficiency by reducing hand labor requirements. The development of the fatty alcohols was termed by some horticulturists as the most important advancement in horticulture in the 1960's.

A spray rig assembly was adapted to a high-clearance sprayer that directed the spray solution of maleic hydrazide (MH) toward the stalk and downward. This technique improved control with fatty alcohols. In combination with MH, its use reduced residues 50 percent without impairing control. In addition, it was found that an application of fatty alcohols following the MH treatment improved control. The complete system will reduce chemical residue, especially of MH, and still offer the grower sucker control.

III. IMPROVED TOBACCO SAFETY

In the mid-1960's, USDA research on tobacco shifted gradually toward improved tobacco safety. The current program of USDA's Science and Education Administration on Improved Tobacco Safety is the only program in the world with research extending from seed to cigarette smoke with the objective of reducing potential hazards due to tobacco consumption. This represents a melding and coordination of diverse tobacco research into a unified program designed to reduce or remove potentially hazardous constituents from the leaf or smoke. Recent accomplishments in this program include the following:

Reduction of nicotine and tar. Genetics and cultural production methods influence the levels of nicotine in leaf and smoke and TPM (tar) in smoke. Germplasm has been developed by USDA scientists with nicotine levels ranging from about 0.2 to 4.0 percent nicotine in both burley and flue-cured types. Low nicotine lines have been developed and released for both flue-cured and burley tobacco types. These lines have been used extensively in smoking and health research studies by the National Cancer Institute. The nicotine-to-tar ratio is important. Progress has been made in changing the ratio to reduce potential risk from smoking.

Reduction of pesticide residues. In order to reduce pesticide residues, new methods for controlling diseases, nematodes, and insects, as well as less persistent growth regulators, have been or are being developed. Successful tobacco production depends upon the control of diseases, nematodes, and insects in the field and in the storage warehouse.

Some outstanding results have been obtained in biological control. Tobacco leaf-spot diseases have been controlled by field application of organisms which are antagonistic to the disease pathogen. Practical methods for biological control of folair diseases could be achieved in the near future. Research is in progress to control the tobacco hornworm and tobacco budworm through biological means with the use of pathogens and predators. An effective pathogen, Bacillus thuringiensis, is now available which leaves no undesirable residues and is not harmful to beneficial insects. Also, the spined stilt bug, a predator, is being produced and released in strategic areas, thereby using a beneficial insect to control one that is harmful. Strains of tobacco have been identified which are resistant to budworms and hornworms. The accomplishment of these objectives will make it possible to further reduce pesticide residues in U.S. tobacco.

Insects such as the cigarette beetle are very destructive to stored tobacco and can inflict such damage as to render the stored leaf virtually worthless. In research studies on stored tobacco for insect control with

minimal chemical residues, methods were developed by USDA scientists for fumigation with phosphine in storage warehouses. These methods gave excellent control in packaging units of tobacco up to hogshead size. Also, methods were developed for applying dichlorvos in an aerosol from automatic dispensing systems. During seasons when insects are active, dichlorvos is automatically dispensed on a regular basis. Residues of phosphine are about 0.5 parts per billion, and dichlorvos is not detectable on tobacco. These methods are presently being used for control of insects on stored tobacco.

Homogenized Leaf Curing (HLC). Curing of the ripe, mature leaf is done on the farm as the final stage of tobacco production. Chemical and physical leaf characteristics are set at harvest and may not be significantly modified under conventional methods of tobacco curing.

However, homogenized leaf curing (HLC), a new approach developed by USDA scientists, offers the possibility of making changes during the cure. Precursors of undesirable smoke constituents can be removed. HLC can be used to make reconstituted sheets of predescribed thickness, porosity, or any other features desirable in the manufacture of cigarettes. Studies with flue-cured and burley tobacco have given promising results for maintaining smoke quality and reducing tar delivery and biological activity. For example, removal of soluble proteins during HLC has the potential to reduce the allegedly harmful compounds hydrogen cyanide, oxides of nitrogen, and quinolin content.

Tobacco treated to reduce health hazards. A method was developed by USDA scientists for the treatment of tobacco with ozone to effect decomposition of leaf components responsible for the formation of much of the tumor-producing hydrocarbons (PAH) in cigarette smoke. Ozonization yields tobacco which, when burned, produce smoke with as much as 83 percent less hydrocarbons and 87 percent less nicotine. This technique constitutes a new approach with high potential toward the development of a less hazardous cigarette.

Association between leaf characteristics and smoke components. A comprehensive study was completed to examine simple correlations and multiple regressions among leaf characteristics and smoke components. Four flue-cured and four burley tobacco varieties, each with leaves from eight stalk positions, were used. More than 270 variables were investigated, among them leaf and agronomic characteristics and cigarette and smoke components. The results clearly indicated that certain leaf characteristics can be used to predict total smoke delivery for individual smoke components. These findings demonstrated that modification of these characteristics through genetic, cultural, or curing manipulations can lead to the development of safe leaf tobacco.

Reduction of health related compounds by breeding. A pale yellow tobacco developed by USDA scientists produced 10 to 30 percent lower levels of polynuclear aromatic hydrocarbons (PAH) than normal green tobacco. This decrease in PAH is considered important since it is believed that the PAH contributes to the biological activity of the tobacco smoke.

Smoke chemistry. Research in smoke chemistry has made much progress in the past 10 years. Smoke consists of an aerosol of gases and suspended particles. More than 2,500 compounds have been identified, and USDA research has contributed significantly to knowledge about the number of known constituents. The identification of these compounds will aid in their selective removal or alteration through breeding, cultural practices, and manufacturing processes. The following examples of this research are by no means inclusive:

Tobacco leaf pigment, lignin, and pectin gave relatively high yields of phenols on heating to high temperatures. The phenols are smoke constituents which may exert undesirable effects in the tobacco smoke. The possible role of leaf pigment in the generation of certain harmful compounds known to be in smoke has been investigated thoroughly.

The hexane-soluble fraction of flue-cured tobacco has been pyrolyzed to evaluate the importance of its contribution to the formation of aromatic compounds, especially polynuclear aromatic hydrocarbons (PAH), present in cigarette smoke. Estimates of benzo(a)pyrene levels in pyrolysates indicate that nearly two-thirds of the amount produced during tobacco pyrolysis may be attributed to the hexane-soluble components of leaf which comprise only 6 percent of dry weight.

Official analytical methods for tar and nicotine in cigarette smoke and nicotine, nornicotine, nitrogen, potassium, chloride, menthol, and moisture in tobacco have been developed through collaborative tests.

A rapid and quantitative method has been developed for the analysis of the tobacco sucker control agent maleic hydrazide. The method is 20 times more rapid and 10 times more sensitive than the currently used colorimetric method.

IV. HIGHLY NUTRITIOUS PROTEIN FROM GREEN TOBACCO AS A BYPRODUCT

Fraction 1 protein (F-1-P), the most abundant protein in nature, has been crystallized from green tobacco leaves. Although all other green plants contain F-1-P, it has been crystallized most readily from tobacco. The nutrient value of F-1-P has been found to be very high, the equivalent of egg or milk. Possible uses of pure crystalling protein include (a) nutrition of medical patients requiring controlled protein and mineral intake, such as kidney disease patients to reduce dialysis frequency, and (b) infant formulas to avoid milk allergies. Fraction 2 protein (F-2-P), a mixture of other soluble proteins about equal to F-1-P in nutritive value, has also been extracted from tobacco. A simplified, high-yield crystallization procedure for extracting Fraction 1 protein from homogenized tobacco has been developed. This procedure should be adaptable to large-scale operations.

CZECHOSLOVAK INDEPENDENCE DAY

● Mr. WEICKER. Mr. President, today is Czechoslovak Independence Day. On October 28, 1918, the independent Republic of Czechoslovakia was proclaimed. The historic struggle that had been waged for centuries by the Czech and Slovak peoples for their national liberation from the Hapsburgs ended. With the goal of self-determination of nations espoused by Woodrow Wilson in mind, Czechoslovaks had rallied to the allied cause and helped defeat the Central Powers in the First World War. Here in America, Czech Americans had volunteered in large numbers. Those who could not fight had bought war bonds making the Czechs the people that bought proportionally more bonds than any other foreign-born group. An espionage service of Czech Americans, led by Emanual Voska, had supplied the allies with key information on German and Austrian activity in the United States.

The defeat of Germany and the Austro-Hungarian Empire assured the birth of the independent nation. In the years following the war, Czechoslovakia enjoyed a thriving democracy under the leadership of their great statesman Tomas Masaryk. Agrarian reform improved the lot of the peasants. Progressive social legislation gave needed security to workers. Craftsmen and small industries flourished. All indications pointed toward a long and favorable future for the new republic situated in the heart of Europe. Unfortunately, such hopes were to be done in by a man named Hitler.

Mr. President, in September 1938, faced with the threat of imminent war and isolation from the rest of Europe, Czechoslovakia was forced to accept the infamous Munich agreement, thus giving up a fifth of their territory to Nazi Germany. Hopes that Hitler would keep his word and make no more territorial claims were soon dashed. Within 6 months German tanks stationed themselves in Prague and Czechoslovakia ceased to exist as an independent nation.

World War II caused great suffering for the Czechoslovakian people, but by 1945, they had regained their independence. Overjoyed with the victory over the German war machine, few people were prepared for the encroachments of their Russian neighbor. In 1948, the postwar coalition government was toppled by the Communists. In the ensuing years, the government took complete control over business, industry, agriculture, religion, and education. Secret police intimidated the populace, imprisoning all who offered opposition.

In 1968, Czechoslovakians fought back against their restrictive government. Under Alexander Dubcek, a program of liberal reforms was introduced emphasizing freedom of expression and contact with the non-Communist world. The flame of hope rose high only to be dashed again by the grim arrival of Soviet tanks and troops from the Communist nations. A year later Dubeck was replaced, reformists were purged.

Mr. President, there will be no cele-

brations in Czechoslovakia today. No parades in the streets or fireworks in the sky. In the dark shadow of the Soviet empire, the people continue to exist in subjugation. But as the world has learned and will learn again: with brutality comes resistance, with suffering comes aspiration and with ordeal comes strength. Buried deep in the souls of Czechoslovakians, the coal of freedom continues to burn, giving warmth to their hopes. Here in the United States, all Americans, Czech, and of other descent, pause on this day to recognize those hopes and the force that keeps them alive. Liberty cannot be shackled forever. One day we shall celebrate the rebirth of a free Czechoslovakian nation in a free Europe in a free world.●

CONRAD SCHWIERING DAY

● Mr. WALLOP. Mr. President, today's events will produce an important decision affecting our Nation and other Western industrialized economies and our Saudi Arabia oil artery. October 28, however, also marks an important day in my home State of Wyoming. Today, Wyoming is honoring one of America's most well-respected, contemporary Western artists, Conrad Schwiering. Since I cannot personally attend the festivities in his honor, I ask that the following statement, which is being delivered to day at the Casper Country Club on my behalf, be printed in the RECORD.

The statement follows:
